Kamm Consulting Group, LLC to Partner with European Companies to offer German-style apprenticeship Turn-key Solution for Workforce Skills Training in the US

For Immediate Release

Date: April 25, 2016

Kamm Consulting Group, LLC, based in the US, a company that specializes in implementing German-style apprenticeship programs in communities across America, is presenting GAP (Germanic Apprenticeship Programs) to US communities during Hannover Messe 2016.

This program is aligning key stakeholders from industry, government and education, identifying German IHK occupational apprenticeship standards that best suit the workforce training needs, and aligning, mapping and implementing the German IHK benchmark standards to the US educational infrastructure.

The turn-key solution package combines the consulting expertise of Kamm Consulting, with its partner companies: Hoffmann Group, FESTO, KUKA, WEILER and the EMCO Group that offer world-class equipment products, curriculum and technical trainings.

In the midst of this year's Hannover Messe, while high ranking US and German government officials are jointly promoting The German Skills Initiative and Joint Declaration of Workforce Training, these world-leading companies known in Europe for their unparalleled commitment to vocational training, are offering a forward-thinking, and pro-active world-class one-stop solution for workforce training in America.

As part of the turnkey package, the companies are specialized in the following products and services:

Hoffmann Group is a global market leader and system partner for quality tools. As a company with deep roots in Germany, that now has operations in the United States, we know that establishing a strong foundation of knowledge and skills in tomorrow's workforce is the key to success. Therefore, we will provide turnkey solutions for workstations and storage products, hand and assembly tools, as well as cutting tools to support the German Skills Initiative. For more information, visit the Hoffmann Group website at www.hoffmann-group.com.

Festo Didactic is the largest provider of equipment and solutions for industrial education. We design and implement learning centers and laboratories, educational equipment and programs that train people to perform in highly dynamic and complex industrial environments. Our goal is to maximize learning success in educational institutions and industrial companies around the globe. For more information about Festo Didactic visit www.festo-didactic.com.

Improving America's Workforce Training with

KUKA Robotics Corporation in the United States is the provider of the KUKA KORE robotic training cell for education. KUKA Roboter GmbH, with its headquarters in Augsburg, Germany, is a member of the KUKA Aktiengesellschaft and ranks among the world's leading suppliers of industrial robots. Core competencies are development, production and sale of industrial robots, controllers and software. The company is the market leader in Germany and Europe and number one in various industries worldwide. KUKA Roboter GmbH employs about 4230 people worldwide. In 2015, sales totaled 909,6 million Euro. 26 countries provide a presence in the major markets of Europe, America and Asia. For more information about KUKA visit www.kukarobotics.com

WEILER offers a wide range of conventional, servo- conventional, cycle-controlled and CNC precision lathes which are designed for the special requirements of vocational training. All WEILER products are manufactured at Emskirchen in Germany. WEILER promises the highest accuracy in piece work machining and WEILER products are especially durable. Additionally, WEILER products include outstanding features such as user-friendliness, flexibility, and the highest safety standards of precision lathes that meet the most stringent standards for vocational training centers. For more information, visit the WEILER website www.weilerusa.com .

EMCO Group, an Austrian-German CNC Machine Tool company with worldwide operations, specializes in CNC milling and turning equipment and provides tabletop mills and lathes for the classroom, as well as other larger industrial-sized equipment needed for advanced manufacturing. All world class machines for education and production purpose are made either in Austria, Germany or Italy. For more information, visit the EMCO website at www.emco-world.com .
