Kamm Consulting™
your guide to a clear vision from the peak

GAP™ Turnkey Solutions Partners

7-Step Process for Site Selection

6-Step Process to GAP™ Implementation

The GAP™ Turnkey Solutions package combines the consulting expertise of **Kamm Consulting Group** with its partner companies: **Hoffmann Group, EMCO Group, Weiler, Kunzmann, FESTO, KUKA, SIEMENS, I.CG, Bluegrass Educational Technologies, NIMS and the Urban Institute** to offer world-class training equipment, software systems, standards, curriculum, train-the-trainer instruction, and 3D training lab workshop layouts and designs.

The GAP™ Turnkey Solutions partnering program aligns key stakeholders from industry, government and education, identifies European world-class benchmark apprenticeship occupational standards that best suit the workforce training needs of the region, and aligns, maps and implements these world-class benchmark standards into the regional and US apprenticeship and educational infrastructures.
