(includes the ceremony and speeches in full)
- Videos are viewable Online via Vimeo
(the links can be made public or remain privatised so only the couple can view them)
- Turnaround time of 12 weeks

The TLP Basic Collection covers the core part of your special day from the pre ceremony to the speeches. This includes 30 minutes to an hour of the pre ceremony, capturing shots of the venue, the room, and the guests arriving before the bride arrives and the ceremony begins. It is also during this time that the videographers will get set up for ceremony.

After the ceremony finishes the videographers will get to work capturing shots of the reception, which includes footage of the couple going off for their photos, shots of the wedding breakfast room, and the general atmosphere of the reception. It is also an opportunity for the videographers to capture video messages from guests or any activities that may be occurring during this time such as a magician. The reception finishes with the bride and groom entering the wedding breakfast room before the speeches get underway.

Depending on where the speeches are in relation to the wedding breakfast meal the videographers will either set up to capture the speeches during the wedding breakfast or during the reception. Both the ceremony and the speeches will all be filmed in full on multiple cameras. The videographers will pack up after the speeches.

The day after the wedding the couple can expect to receive an edit form, where they can put down their music choices and any other edit preferences they may have. Once the form has been filled in the edit can begin and the couple can expect to receive their videos Online via Vimeo within 12 Weeks. These videos will consist of a 3-6 minute highlights video, and an extended feature film which will include the ceremony and speeches in full.

Before the wedding the couple will be able to book in a video or phone consultation to discuss the day and any preferences or logistics
