

The ABP Update

Exciting Exterior Door Options

Joke of the Month

A man goes to see his Rabbi.
 "Rabbi, something terrible is happening and I have to talk to you about it."
 The Rabbi asked, "What's wrong?"
 The man replied, "My wife is going to poison me."
 The Rabbi, very surprised by this, asks, "How can that be?"
 The man then pleads, "I'm telling you, I'm certain she's going to poison me. What should I do?"
 The Rabbi then offers, "Tell you what. Let me talk to her, I'll see what I can find out and I'll let you know."
 A week later the Rabbi calls the man and says, "I spoke to your wife on the phone for three hours. Do you want my advice?"
 The man said, "Yes" and the Rabbi replied, "Take the poison."

ABP Birthdays

Scott Herndon	6/22
Dave Taylor	6/25

Well, so much for spring, we jumped right into summer! The ground has warmed up and everything is growing like weeds!

Business is good but chaotic. Prices are all over the board, but consistently going up! Jeld-Wen has delayed their price increase. Their increase of approximately 6% has been pushed off until September giving us more time to prepare.

You may already know that ABP is a distributor of Glass Craft fiberglass doors. However, you may not be aware of their new products now being offered. Glass Craft is getting away from the iron line of doors called Buffalo Forge. Instead they are replacing them with a new door called Buffalo Forge Steel Therma Plus! This line is 40% less than the iron line and more energy efficient. The unit is thermally broken and has polyurethane core. The door panels are 18 gauge so denting is not a problem as well as providing more security than the typical 24 gauge steel door. The Therma Plus comes in contemporary, rustic, and some leaded glass patterns. In addition the Therma Plus only comes prefinished and prehung making it ready to install! Glass Craft also has a smooth fiberglass offering in contemporary designs with several flush glazing glass pattern options. Plus, you will be pleasantly sur-

prised how competitively priced these units are!

Changing gears slightly, but staying with fiberglass doors products, ABP is in the process of adding a unique additional line of fiberglass entry systems. ABP will only stock these units prehung and prefinished in two color choices with three or four door design options. They will come standard with 4 9/16" composite frame and brickmold, bronze adjustable sill, bronze ball bearing hinges, and double bore. The quality of these units will meet the standards of the Force 5 prehung system and WAIT UNTIL YOU SEE THE PRICE! Your ABP rep will have more info in the next couple of weeks so stay tuned.

Finally, we want to remind you again that ABP is now a ViWinTech vinyl window distributor. We still distribute Ellison vinyl windows and doors, but we have situations in the market where we can't sell Ellison, so instead we can now offer you ViWinTech. We are fast seeing what a high quality vinyl line ViWinTech is at a competitive price! Check out the back of the newsletter for features and benefits and contact your ABP rep if you are interested in becoming a ViWinTech dealer.

Thank you for your continued support and enjoy the May flowers.
