

Consulting Electrical Engineers

Technical Forum & Tradeshow

Monday, May 1, 2017

Union League Club of Chicago, 65 West Jackson Boulevard, Chicago

Join us at the *premiere* professional networking and educational event of the **Consulting Electrical Engineers (CEE) division of the Electric Association!** This event is open to Electrical Engineers, Designers, Contractors, Architects, Specifiers & others. You do not have to be a member to participate! Utilize this **FREE** opportunity to obtain important Professional Development Hours, network with peers from the industry, and discover the latest in electrical, lighting, and communication products & technology! **NEW THIS YEAR: Every new attendee that you refer to attend this event will gain you an entry into our grand raffle prize drawing!** Please have them mention your name upon registration.

2017 Technical Forum Topic:

The Internet of Things

The Internet of Things (IoT) refers to the growing range of connected devices that send data across the internet. The IoT is now a reality due to the convergence of several technologies, including wireless communications, micro-electrical systems, cloud storage and of course, the internet. A "thing" is any object with embedded electronics that can transfer data over a network without human interaction. Examples are wearable devices, environmental sensors, machinery in factories, devices in homes and buildings, or components in a vehicle. Data from connected devices are the next natural resource to be mined for economic value. This presentation will provide examples of how the IoT is already creating value for businesses. How well do you know your total cost of building operations? Everything that happens in your buildings is producing data. How can you capture and make sense of it to improve operations? The IoT can provide a complete workplace management solution that combines data from sensors and equipment with powerful analytics to optimize everything from core facilities maintenance to lease accounting, capital project management, space management, energy management, and more. Technology is changing how buildings are used, but it can also help you adapt your facilities management strategy to rapid change.

2017 Keynote Speaker: Mr. Rajiv Phougat
Watson Technical Strategy Leader at IBM Corporation, USA

Participation in the technical forum & tradeshow awards
2.0 Professional Development Hours

Tradeshow Features:

This year the New Product Showcase will be in the Heritage Room on the 2nd Floor. This room is adjacent to the check in area of the 2nd floor.

The Table-Top Tradeshow will take place on the 2nd floor of the Union League Club following the Technical Presentation. Over 50 Manufacturers will be Exhibiting.

The tradeshow will include a complimentary wine and beer reception, light dinner buffet, dozens of raffle give-aways.

NEW THIS YEAR: Every exhibitor you visit will gain you an entry into their raffle. Now you have the chance to win multiple prizes. Bring your business cards!

*** 2 PDH's Awarded to all Attendees**
