WHO WE ARE

“DRINK GOOD WINE
DRINK IT RESPONSIBLY
SHARE IT WITH FRIENDS”

Villa Vestea Winery is family owned and operated. The project was started by **Stefania Galasso**, a young, passionate entrepreneur with a long family history in **vine growing and wine making**. Stefania’s project started with the production of **Organic Montepulciano d’Abruzzo doc**. Today, in the family vineyards, she produces **Organic and Sustainable Montepulciano** as well as other well known and appreciated varietals. **Villa Vestea** controls all production phases, from vine to bottle. Key words are: quality, technology, innovation and image.

where WE ARE

Abruzzo, located halfway up the “boot”, facing, to the East, the **Adriatic Sea**, enjoys an amazing range of natural habitats: mountains, marine, river and lake, woods. **This Land** is a true **bio-laboratory that protects nature and ecosystems**. Mountains strongly influence the characteristics of the region that shifts from typically Mediterranean environment, to alpine scenarios. The Appennine Range runs from North to South of Abruzzo and here, of all the areas, is where it has a prevalently mountainous nature. The highest peaks of the range lie here: **Corno Grande (Gran Sasso range, almost 10000 feet elevation)**, **Monte Amaro** (Maiella range, just over 8000 feet asl). Villa Vestea vineyards are located between these high mountains and the coast line, on hilly terrains at an altitude of 1148 feet. This is an area blessed with an abundance of sunshine, generous rainfall and a perfect climate for viticulture.
