Includes bicycle, helmet, lights,
specialized guides

Please reserve in advance

02 2170350 / 0969983251 / 0939355717

“Riding in the dark on a dirt road alongside the forest, away from our programmed daily lives, as we search for all the night crawlies and listen to their music blend in with the river, is...unexpectedly magical...”

Cycling level: must know how to ride well for 2 hours

We do not recommend children under 10 for this tour, unless they can ride well for 2 hours

Children between 1 & 3 years old may be carried on a seat on one of their parents’ bicycle.

During our ride we make some stops to observe, identify and learn a little about some of the nocturnal species we encounter. Among the most common species we find are arachnids, terrestrial insects (fireflies, walking-sticks, katydids), we also see aquatic insects, amphibians, reptiles, marsupial mammals (possums), nocturnal birds. Includes specialized guides (cyclist & biologist)
