Dear Family and Friends;

I don't often call people "slugs", but those pictured certainly fill the bill and deserve the honor. I don't ever recall such a large group of slugs in one place

at one time in my 82 years. All of them, including many more, want to rid the Office of President of the BEST ONE since WW11, These people are phony servants of the people that paid or pay for their livelihood. They are truly **SLUGS**. Continually eating at the table that others provided and leaving a sticky mess behind when they leave.

The Democrat Party used to be for the "worker". Then they were for the Black (African American) people. Now they are for the illegals and the workers and Blacks would like to know what happened to their support. It has taken quite awhile for them to figure it out, probably since 1964, and many still pursue the Democrats as "their" Party. I believe the election in 2016 was an eye opener for many. Now a non-politician took the reins and is fighting to restore America. I believe both Parties leave much to be desired, but more Republicans are in the Conservative category than Democrats. AND one thing we DON'T need is more liberal spending and laws.

These Slugs are setting a very bad example for our children and young people to follow. Every one has lied and continues to lead a bad life and does so out of hatred for the President. They cannot prosper. They must be taken out behind the shed and given a whipping. *Therefore to him that knows to do good, and does it not, to him it is sin. James 4:17*

The Chief SLUGS. There are many more that fit this title, but I don't have space for them all. It needs to be noted that California leads in the SLUG development. We have so many, both in the Federal government and State government. They must have crawled out from under a very big rock.

The following is the brewhouse for all this hate:

May the Good Lord continue to bless our Country and President Trump

Thanks for Listening.

R. G. "Ron" Berger
