

A vibrant illustration of a bouquet of five pink roses. The roses are in various stages of bloom, with some showing deep pink petals and others more open. They are attached to green stems with several green leaves. The background is plain white.

February -- 2019

We enjoyed weekly entertainment and had a lovely Valentines day.

We moved through to a very busy March

Smiles all round

We can look forward to spring around the corner

Getting out and about enjoying the sunshine and seeing our gardens become brighter and warmer.

We are working hard raising funds for our next project, the Ross Garden.

We will be having user friendly paths, seated areas and raised flower beds. We will have bird boxes, lots to look at and keep us busy.

Speak to Margaret Ann, Julie or Fiona to have the updated information in regard to its completion. We are hoping for the tail end of summer.

Please feel free to give your views and opinions, what would you like to see.

Flowers, plants, bird boxes to name but a few.

Well that's all for now :)
