EB Rockham 2176

This standout by SAV Renown has definitely set himself apart from the rest. He is super wide based with perfect bone and foot structure as well as flawless phenotype. He has the look of an old school angus herd bull, adding pounds without gaining frame size in your females. With a modest 80 lb. birth weight and ratioing 106 at WW he will sire low birth calves that gain. His mother

by upward is a no miss cow with a perfect udder and a calving interval of 3 calves at 343 days. She is very consistent and will enter our donor program this spring.

EB Diamond 02176

EB Renown 556

This massive son of Renown take top honors as the heaviest weaning calf of this years calf crop with an actual 205 of 1084 lbs.! He is rugged in his design and is packed with as much red meat as any calf in the breed. If you sell calves right off the cow you will appreciate this early maturing bull.

EB Resource 304

This super complete son of Resource is excellent in his design. He is long sided, perfect footed and is mild in his temperament. He displays true Angus breed characteristics!

EB Resource 412

This calf by Resource is extra thick with a nice clean front end that should make very feminine females. He is in the top 2% of the breed for YW EPD, and is out of a great first calf heifer.

EB Recharge 0230

This son of SAV Recharge is huge through his middle clean fronted and moves excellent. With a 75 lb. birth weight and ratioing 96, he should be a sleep all night kind of bull.

EB Resource 808

This will be the largest framed Resource son in the offering. He is big boned, super long spined and comes from a highly productive cow family.

EB Cash M031 M0134

EB Resource 850

Another great son of Resource, this calf has had many brothers go through the ring in past sales. His mother is a Pathfinder cow and just never seems to miss. If you're looking for a consistent cow family then here you go.

The Pathfinder dam of
850, 5E Strongland Lass
8K50

EB Priority 454

This is a whale of a calf by Priority. When I think of power and mass, this calf comes to mind. He is in the top 1% of the breed for WW. His mother is a great first calf heifer by Harvestor. He was one of the heaviest weaning calves of this calf crop to ratio 127.

EB Capitalist 0142

This big time son of Capitalist is a maternal brother to the 3rd high selling bull in the 2016 sale. This calf is every bit as good as his brother, he is very long bodied and great footed. He is a big framed Capitalist son, but will sire calves that come easy at birth and get up and grow. His mother consistently gives us great calves year after year. She ratios 94 BW, 106 YW and 122 on IMF.

EB Capitalist 214

A nice, moderate framed son of Capitalist. He is very complete in his makeup and has a very good disposition. He is one of the younger bulls in the offering. He ratioed 88 on BW with a 70 lb. actual and ratioed 109 on WW.

EB Tour of Duty 326

This son of Tour of Duty is an outstanding individual. He has lodes of rib, a huge foot and is just made right. With an actual 205 of over 900 lbs. he will make a set of feeder cattle that will be fun to feed.

EB Tour of Duty 514

Another son of Tour of Duty, he is big framed and extremely long bodied. He was one of the heaviest calves to come off grass and earned a WW ratio of 116. His mother is a great old cow by Hoff Head of the Class, she has recorded 9 natural calves in a 361 day calving interval. She doesn't know how to be open!

EB Tour of Duty 402

A really nice son of Tour of Duty off a excellent first calf heifer. He will sire calves that will get up and grow.

EB Montana 705

This is a powerhouse son of MW Montana. He is huge bodied, big footed and very nice fronted. He will sire the kind of females that are feminine and will make excellent mother cows.

EB Cash M031ET 339

A nicely made son by Barstow Cash and our M031 Donor. This mating has produced massive calves that are correct. This calf ratioed 106 on WW.

EB Resource 77

Another powerful son of Resource who stands on all four feet, is wide based and huge middle.

EB Rampage 873

In terms of phenotype this is as good of a Rampage son as you will find anywhere. He has a balanced EPD profile and has a 74 lb. BW to ratio 96. He moves very well, has lodes of volume and length. His mother is a great old cow by a bull who needs no introduction, Nebraska 901. She records an average calving interval of 5 calves at 363 days. She is a big framed cow with a nice udder. This calf will be a highlight on March 6th!

Summertime photo of EB Rampage 873 and his mother MB 44 Nebraska Lass 8k73

EB International 859

Another son of International, this calf has been a standout all summer long. He is a well rounded animal with a great disposition.

EB International 629

When you combine old school cow power and International this calf has a big future. In terms of phenotype, this calf is as nice as any bull in the offering. He is powerful and has a lot of base. He will be a crowd favorite.

EB International 256

An outstanding individual by SAV International. This sire group is one of the best we have ever offered. These bulls have rib shape, rump shape and the look of cattle that work in the real world.

EB International 306

This International son has the look of a herd bull, he is big hipped, big footed, tight sheathed and has a big scrotal. He should sire a set of females that will last you a long time. His mother is a beautiful made 4 year old by Pioneer.
