

Synergy ROLL WRAPPER

For Large Applications

For the most economical way to package your roll products

Quickly and economically apply stretch film to your roll product to provide protection and total encapsulation. *Cocoon wrap* for maximum product protection, or offset the film and wrap *open-eye* for easy handling.

Highlight is the leading manufacturer of roll wrapping equipment, with more machine placements than any other company. With decades of experience, Highlight equipment is designed to perform efficiently and reliably for years of industrial use.

HIGHLIGHTS

- » Heavy duty all-steel construction and over-engineered design make the Synergy roll wrapper durable and reliable
- » Simple operator interface makes wrapping loads to your exact specifications easy and consistent
- » Stretch wrap your large roll products to save significant packaging time and labor costs

PREMIUM FEATURES

Why Choose Stretch Film

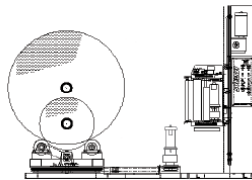

Stretch film reduces packaging time and labor cost, improves product image and aids identification. Using stretch film also improves cleanliness and weather protection, and dramatically decreases packaging costs.

Custom Design

Highlight will design your roll wrapper to meet your application requirements and maximize productivity. A complete selection of options are available for surface and through-eye roll wrappers.

Heavy Duty

All-steel construction and *over-engineered* design make the Synergy Roll Wrapper durable and reliable for decades of use.
