

SATURN

Strapping Systems

Model SP-9900

Portable Pallet Strapper

The Saturn SP-9900 is engineered for flexibility. It straps pallets quickly, easily, and securely anywhere in your plant.

Simply push the strapping arm into the pallet and loop the strap over. Insert the strap into the seal head and in less than two seconds it automatically tensions and heat seals the strap to secure the load.

**For the simplest way to strap
pallet loads!**

HIGHLIGHTS

- » Portable design allows strapper to be used anywhere
- » Bayonet sends strap through the center of the pallet to avoid abrasion against the ground
- » Easy-to-use controls make operation simple and increases productivity
- » Dependable design provides years of reliable service with low maintainance

PREMIUM FEATURES

Versatile

Eliminates the need to bring your pallet to the strapper, the Saturn SP-9900 can go straight to your load and strap any height pallet.

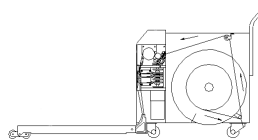

Easy Operation

Simply push the strapping machine up to a pallet until the system is against the edge of the load. Press the start button to feed out a length of strapping through the pallet. Next, take the strap over the top side of the load and insert the end into the entry guide to begin the cycle. The machine will automatically back feed, tension, cut, and heat-seal the strap according to your settings.

Heavy Duty Design

All-steel construction, sturdy design, and powder-coated surfaces make the Saturn SP-9900 durable and reliable for years of industrial use.

SIMPLE CONTROLS

- Start Button
- Reset Button
- Strap Feed In/Out
- Power On/Off
- Power Indicator Light
- Strap Tension Selector
- Strap Length Selector
- Strap Jog

Easy-to-Use Controls

Simple controls make strapping any pallet simple and consistent.
