Introduction

Technical Turf offers a unique one stop service incorporating construction, design, renovation and maintenance as a consequence of this we offer services in the sports turf and sports surfaces construction & renovation industry, amenity supply division, grounds maintenance division and lawn care division. This guide focuses on all of these divisions except amenity which is focused on in the product guide that can be requested by contacting Technical Turf.

At Technical Turf we are continually investing in new specialist machinery and equipment to ensure that all our projects are completed to the highest possible standard. A continued investment in machinery also allows us to offer the most current and advanced services in the turf care industry. We allow clients to hire out some of our specialist professional equipment for one or five day periods. A specialist Air2G2 machine is available to hire nationwide with a Technical Turf operator. All details for machinery hire can be found on individual pages within this guide, on our website (technicalturf.co.uk) or by contacting us on 01664 444 001 or emailing us at enquiries@technicalturf.co.uk.

Do not hesitate to contact us with any queries you have regarding our business or with any bookings you would like to make!

Air2G2

What is the Air2G2?

The Air 2G2 is a self-propelled hydrostatic drive three probe air injection machine, injecting compressed air to either 7" or 12" deep (depending upon probe fitting). This causes a fracturing effect of the compacted rootzone, with no surface disruption. Air is injected vertically and horizontally over an area of 5ft (1.5m) to 12" (30cms) deep.

Where can the Air2G2 machine be used?

The Air2G2 is available to hire nationwide and can be used on all sports surfaces. Technical Turf regularly visit a variety of destinations with the Air2G2 including golf courses, bowling greens, football pitches, tennis courts, cricket pitches, and universities.

Benefits of Air2G2 use:

- Can be used on all sports surfaces.
- Improved growth in the root zone.
- Better drainage and aeration leading to long term benefits to both the soil structure and health of grass.
- Can be used all year round.
- Zero surface disruption.
- Air injected vertically and horizontally over an area of 1.5m to 25cm's deep.

Air2G2 Hire:

Technical Turf offer a nationwide service of Air2G2 hire, due to its highly specialist nature the machine is only available to hire with a Technical Turf operator. To enquire further about the Air2G2, receive a quick quote or book, contact us on 01664 444 001 or email us at enquiries@technicalturf.co.uk. To see testimonials from other clients who have hired the Air2G2 visit our website (www.technicalturf.co.uk) and click on the Air2G2 page.

Please do not hesitate to contact us with regards to any services displayed in this guide. Contact details can be found at the bottom of this page and all other pages in this guide.

We aim to be a one stop shop so please do not hesitate to contact us with projects that cannot be entirely completed with the services on these pages alone as we will try and find a solution that benefits both us and you. Whether it be that we can cover the service or that we use our wide range of contacts to bring another company in to help complete the project we will try to ensure a solution is reached.

Technical Turf also has an online shop which can be found on our website (www.technicalturf.co.uk) and on-site shop at our Scalford, Melton Mowbray site (On-site shop open day 5th March). You can request a product guide by contacting us directly or alternatively you can download an online copy from the amenity supply section of our website.

You can find testimonials on our website from our regular clients that you can easily access to assure yourself that you are getting the best service possible.

Remember to like us on Facebook, follow us on Twitter @technical_turf and connect with us on LinkedIn to keep up to date with the latest Technical Turf news and offers.
