

THE SOLUTION BENEFITS

IMPROVE VISIBILITY

Know where your personnel are at all times and ensure your property is serviced correctly

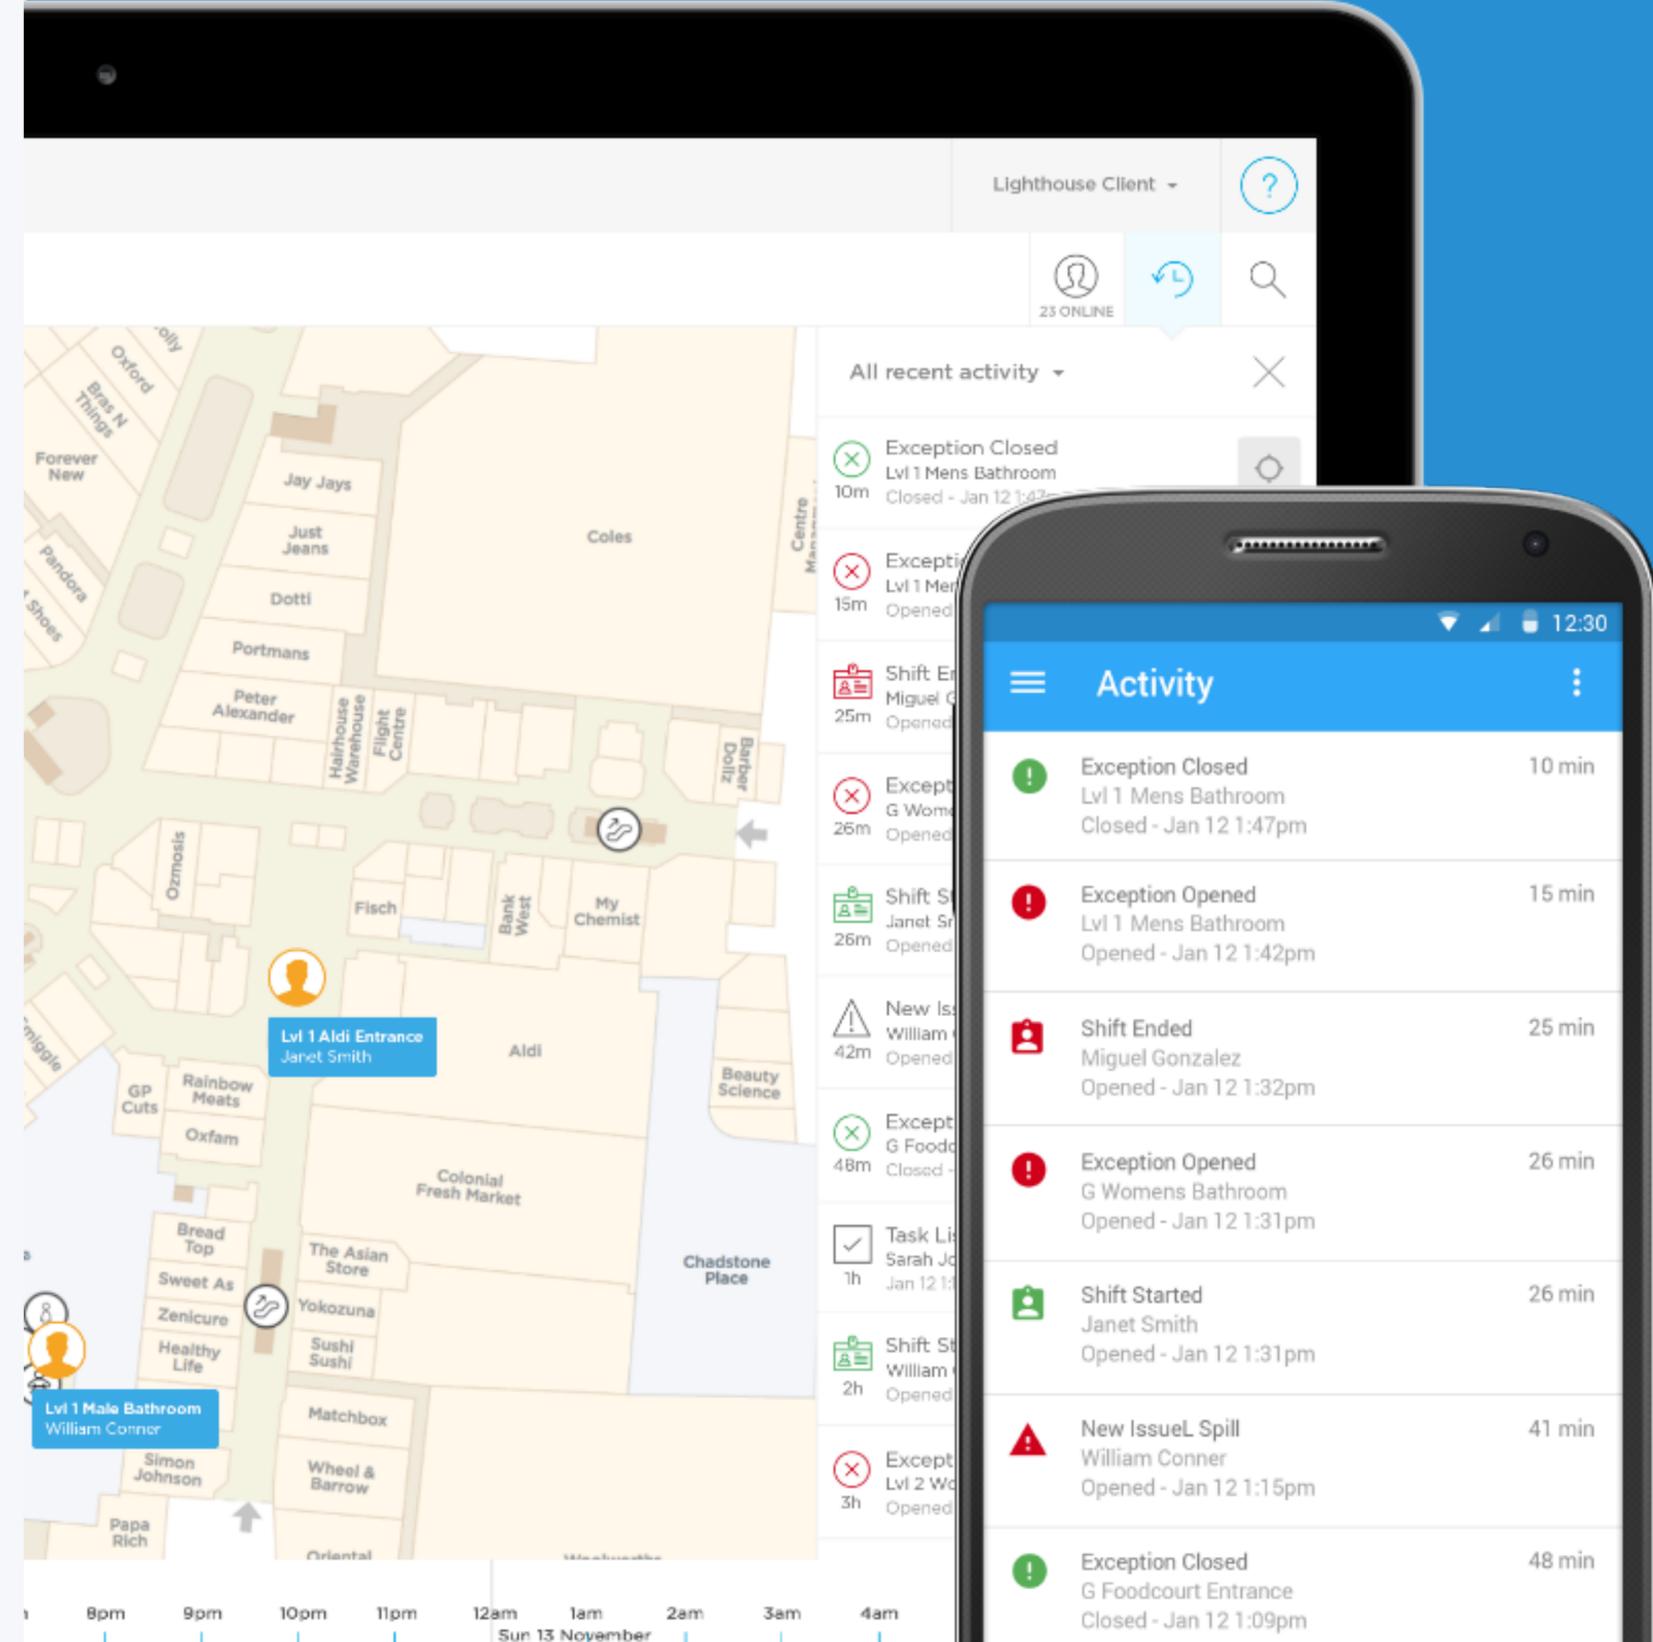

IMPROVE EFFICIENCY

Improve efficiency of property operations and enable interaction between tenants and service staff

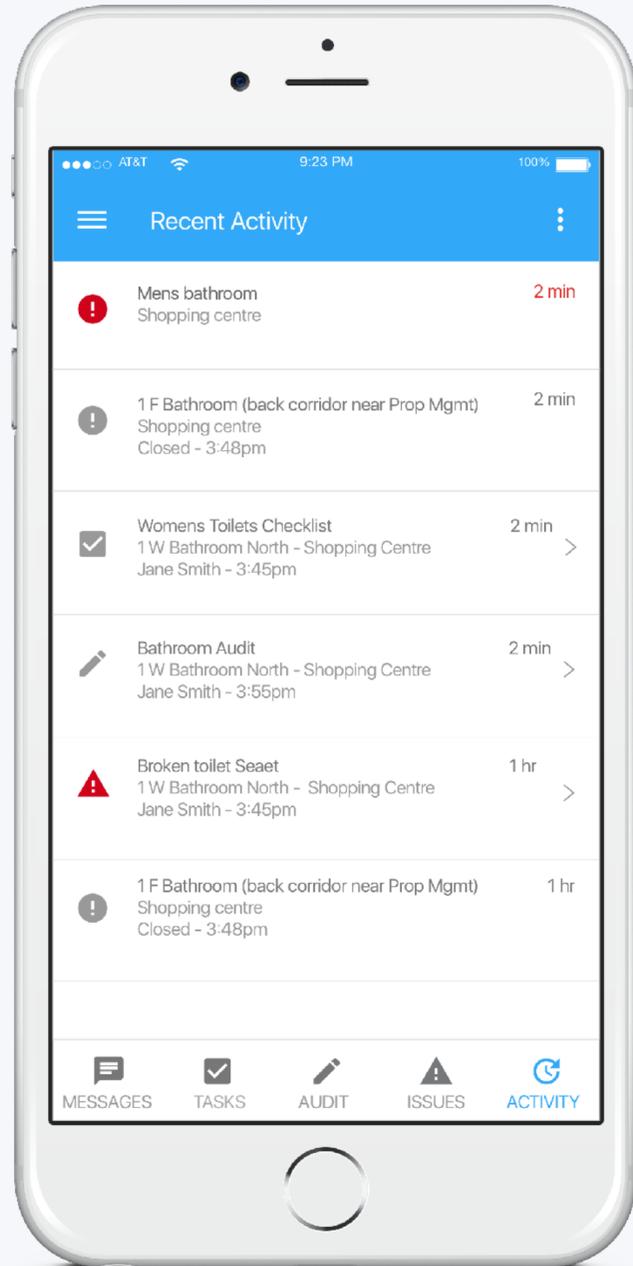

IMPROVE REPORTING

Access centralized web-based activity reports and optimize operations across all properties.

THE SOLUTION MOBILE APP AND SDK

LOCATION TRACKING

Real-time & historical visibility of personnel location.

INSPECTIONS

Monitor quality of your property and identify hazards with mobile inspections.

ISSUE MANAGEMENT

Enable tenants and personnel to report issues and trigger service.

TASK MANAGEMENT

Deliver tasks to workers based on their exact location.

NOTIFICATIONS AND ALERTS

View a realtime feed of site activity and trigger alerts for service failures.

MESSAGES

Improve communication between tenants, building management and service providers

THE SOLUTION MANAGEMENT CONSOLE

REAL-TIME MAPS

See the real-time location of tenants and personnel

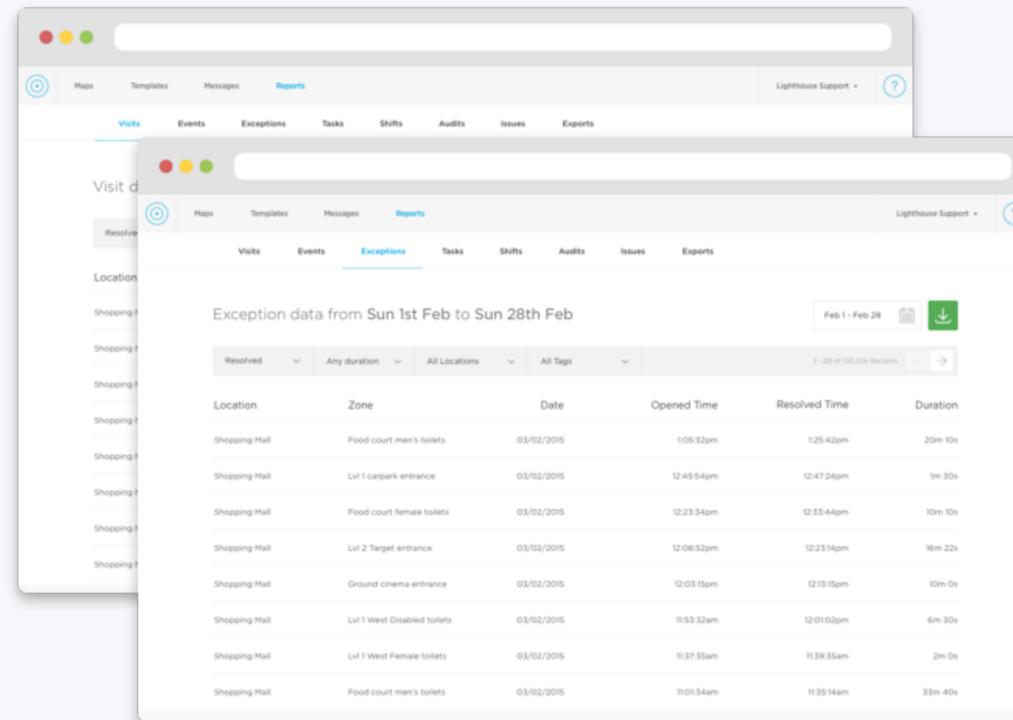

HEAT MAPS

See how each area of your property is serviced and utilized

FORM MANAGEMENT

Create variable tasks, inspections, and notifications available via the mobile app.

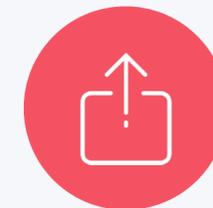

REPORTS

Refine investments, reduce risk and improve quality.

MESSAGES

Improve communication through group or one-to-one messages.

DATA EXPORTS & API

Export data for further analysis or connect with other systems.

THE SOLUTION MANAGEMENT CONSOLE

Search for people or assets

Real-time activity feed

Report issues via mobile app

Assign content to rooms and areas

View all users location in real-time or historically

The screenshot displays the Management Console interface. At the top, there are navigation tabs: Maps, Templates, Messages, and Reports. Below this, the location is set to '301 6th St New York'. A sidebar on the left shows 'Room Lvl 1 Boardroom' selected, with details for 'Game of Thrones' including WiFi Name (301NY), WiFi Password (301Connect!), and Phone (234 545 2325). The main area shows a floor plan with green location pins for users. A tooltip for 'Michael Scott' is visible in the center corridor. On the right, an 'All recent activity' feed lists events such as 'New Issue: Damage', 'Exception Opened', 'Shift Ended', and 'Task List: Floor Inspection'. At the bottom, a timeline shows the current date as 'Sat 12 November' with hourly markers from 9am to 7am.

The mobile app screenshot shows the 'Report Issue' screen. It includes a search bar, an 'ISSUE TYPE' section with checkboxes for 'Spill', 'Damage' (checked), and 'Maintenance', and an 'ISSUE DESCRIPTION' section with an 'Add notes...' field and an 'Attach photo' button. A photo of a spill is attached. At the bottom, there are radio buttons for 'Critical' (selected) and 'Non-Critical' urgency levels. The status bar at the top shows 'AT&T', '9:23 PM', and '100%' battery.
