Mr. Lucky had a rough start to life, but his foster mom worked very hard to help him survive. She got him when he was 2 to 3 days old, so he was bottle raised & has grown into a beautiful, young 2-year-old. Although he survived, Mr. Lucky

He is FeLuk Positive. He shows no signs of the disease and the vet thinks he might be a carrier only.

Mr. Lucky would do great as an only cat or with another FeLuk positive cat, possibly his girlfriend, Cupcake. He is a lovable, affectionate cat who loves to play, sit on your lap, purr, and sleep next to you. Please consider this wonderful cat for your loving home.
