Architectural Tiles

ARCHITECTURAL COLLECTION

VOLUME ONE

Rectified Tiles

Ceramic or porcelain tiles that have been precisely cut, ground and machined to give them near-perfect straight edges and exact dimensions. Providing a very clean, symmetrical look, and allow for extremely fine grout lines of 3mm or less. The machines used to cut them work to very fine tolerances.

Natural Finish

The surface of a Natural finished tile typically replicates the finish of the material on which it is based. For a stone and concrete effect tile, the surface will be very similar to the look and feel of the natural material, with its own unique markings, patterns and textures.

Polished Finish

During the finishing process each porcelain slab passes through a series of graded polishing wheels. These pads first grind and then buff the surface of the tile which gradually acquires a glossy, highly reflective appearance. We also have Semi-Polished sometimes related to as a Lappato Finish.

Anti-slip Finish

For use in wet areas such bathrooms, pool surrounds and shower areas, Anti-slip tiles offer a highly slip-resistant surface. Featuring a superfine 'sandpaper-like' texture they have been designed specifically for wet surface conditions where a slip resistant tile is required. Please note that while it is impossible to completely eliminate the risk of slipping, our Anti-slip tiles are suitable for public use facilities, and far exceed the recommendations from the UK HSE for flooring applications. Please note that all our 20mm tiles are available in Anti-slip.

Anti-Slip Rating Guide

Ramp Testing

DIN51130 - Shod traffic

DIN51097 - Barefoot

Classification	Angle
R9	6° < 10°
R10	10° < 19°
R11	19° < 27°
R12	27° < 35°
R13	> 35°

Classification	Angle
A	12° < 17°
B	18° < 23°
C	> 24°

Pendulum Testing

PTV = Pendulum Test Value

PTV Pendulum Test Result	Slip Potential
0 - 24	Dangerous or high potential for slipping
25 - 35	Marginal or moderate potential for slipping
36 - 65	Safe or low potential for slipping
66 +	Very safe or extremely low potential for slipping

About Waxman Architectural

Based in Elland, West Yorkshire, and with a network of specification specialists across the UK, Waxman Ceramics Architectural Tiles provide solutions for industry professionals looking for a wide range of high-quality tiles for even the most challenging commercial specifications.

As the specification division of Waxman Ceramics, we have long-standing relationships with some of the world's most influential manufacturers - from both a design and technical standpoint. Working alongside designers, architects and building services professionals, we help clients fulfil design briefs in both residential and commercial properties including; hotels, leisure centres and restaurants amongst many other industries.

Bespoke Service

From creating bespoke Victorian floor designs to commissioning unique mosaic blends to meet specific design criteria, our attention to detail, coupled with highest quality customer support, has made Waxman the supplier of choice for clients looking to balance creativity, budget and technical ability.

Waxman Architectural has an enviable client list, developed over many years, as our unrivalled product knowledge and customer service provide a complete solution for anyone in the building industry. Examples of our work can be seen throughout the United Kingdom; high street brands, UK landmarks, hotel chains, heritage sites and sporting venues have all selected Waxman Architectural as a key partner for their respective projects.

Tile Types and Specifying Slip-Resistant Tiles

As one of the UK's leading suppliers of commercial wall and floor tiles, we are keen to share our expert industry knowledge by offering a RIBA accredited CPD seminar in 'Tile Types and Specifying Slip-Resistant Tiles'.

Held in your place of work, this 1 hour seminar covers the technical characteristics of ceramic and porcelain tiles and provides help and advice on specifying tiles to suit specific environments when considering slip resistance.

Traditional System Installation

- Segano's self-levelling technology makes for easier installation on uneven floors. This means that surfaces require less preparation, aiding faster application.
- Manufactured using raw materials with high plasticity to facilitate flexibility.
- Highly durable, yet extremely flexible.
- The weight and flexibility of Segano means that self-levelling is possible to increase application versatility.
- The large 20x170cm size of Segano means that installation is much quicker and easier.

Dry System Installation

- Segano offers a new and adaptable installation system that means adhesives and joints are no longer required; a great solution for quick and easy fitting.
- Due to Segano's dry system installation, the removal of tiles is also quick and easy.
- Without the need for grout and adhesive, Segano can be walked upon as soon as it's laid.
- Segano is increasingly adaptable and can be re-used in various dry system installations. This makes it a cost effective surface solution.

WINCKLEMANS

Everything started for Théophile Winckelmans in 1894 when he opened an unglazed tile factory in Lomme in Northern France.

Five generations have followed since then, sustaining the legacy and know-how of the founder whilst meeting the challenges specific to each era: the World Wars and bombing of the factory along with globalisation and the need to open up to export are some of the challenges successfully overcome which have allowed the factory to remain on its original site for so many years.

After the opening up to the world and rapid development of exports initiated by Jacques Winckelmans in the 1990s, the beginning of the 2000s was a difficult time for the factory which had to make some radical changes. The fifth generation currently at the helm thus decided on a major change of gear, with major investment in production and a move upmarket for the product. Our company has now achieved global recognition for the quality of its tiles and gained the trust of prestigious names in such diverse fields as haute couture and restoration as well as of known personalities.

Today, it is Barbara, Jacques daughter, who is carrying on with the legacy of the product and maintaining the family values that are key to the survival of our tiles.

A Natural and Authentic Product

Our fully vitrified unglazed fine tiles are made of natural materials (mainly clay) from France and Europe which produce a non-porous tile, the ideal, versatile product for all types of residential, commercial and industrial projects.

Easy maintenance and excellent stain resistance thanks to near-zero porosity

The absorption rate of under 0.5% of our fully vitrified tiles makes them stain-resistant and they can therefore be used in the dampest locations with no fear of them changing colour or appearance. This low porosity makes them easy to clean and renders any post-installation treatment or specific cleaning products superfluous. They can be used in such varied projects as professional kitchens, public swimming pools and so on.

Through-body colours and patterns

Our tiles are through-body, which gives them an identical colour throughout their thickness and a service life of several centuries thanks to the lasting shades and patterns.

A lasting, versatile product thanks to its exceptional technical characteristics

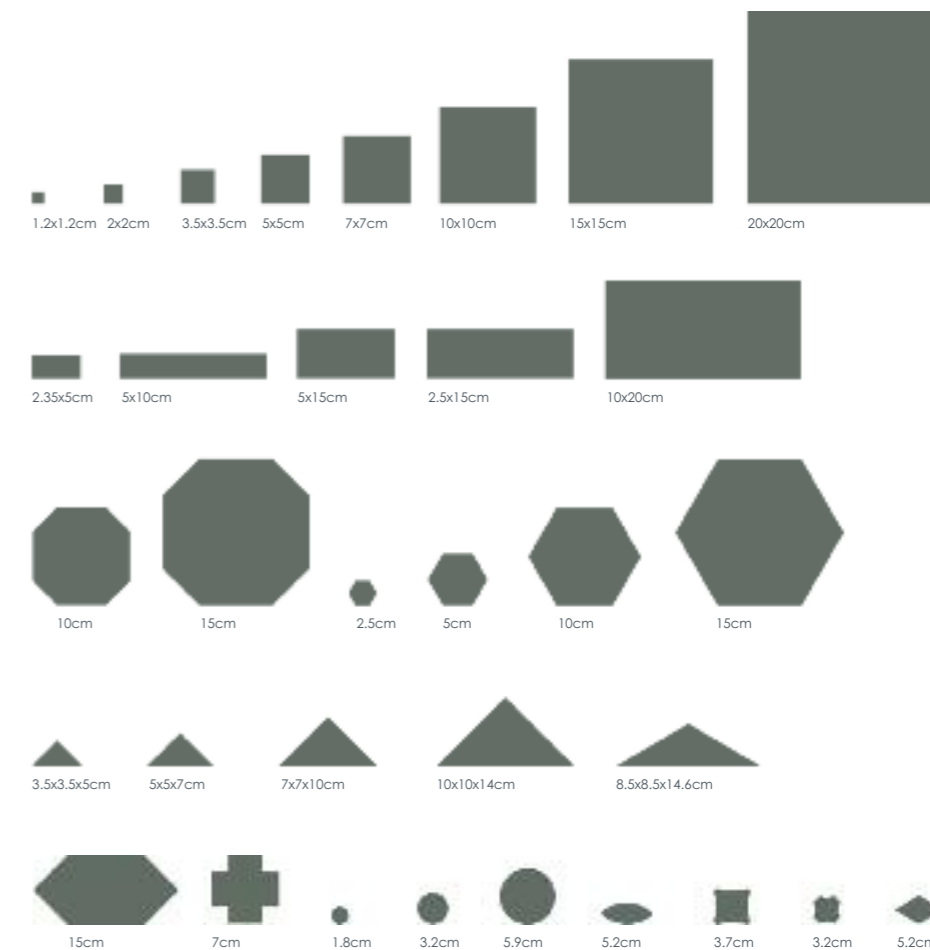

Fired at a temperature close to 1,200 degrees Celsius, our unglazed tiles are compact and have excellent technical characteristics. They are robust enough to be used commonly outside, they are heat- and frost-resistant and suitable for intensive use areas.

DESIGNS & BORDERS

Designer Range

Packaging

All our floor designs and borders are supplied pre-assembled on sheets of about 30x30 cm for easy installation. Caution, floor designs and borders are supplied separately so any border can be used with your choice of floor design.

Joints

Floor designs and borders assembled edge to edge and supplied without joint. Some floor designs have an alternative version with standard joints. Please ask for further information.

Models

Some borders are presented with plain squares around them which are used here for aesthetic purposes only.

Brighton - Design & Border

Colours:
Black, White, Red, Linen

Glasgow - Design & Border
