

EcoFlex800

The 'game-changing' ultra-lightweight flexible display

NEW PRODUCT FOR 2015

For an incredibly lightweight and flexible display solution that is compact, easy to assemble, transport and re-use, this system is the perfect choice.

Its ability to fit into the boot of a small car makes it ideal for flyaway events and exhibitions. Flexible and extremely cost effective, the system will literally change the shape of your exhibition display experience. The panels can either be attached to a frame or used as a link graphic for maximum flexibility, add or remove panels one-by-one.

If simplicity, speed of assembly and portability are what you want from a display system, then the **EcoFlex800** ticks all the boxes. You can re-use and reconfigure the display time and time again, saving you time and money.

EcoFlex800

Assembly Instructions

Case-to-counter...

Convert your tube case into a neat, strong and easy-to-assemble counter with our case-to-counter upgrade. It's as easy as 1-2-3!

EcoFlex800

Easily adapt the shape and overall size of your EcoFlex800 display to fit within the space you have booked at your events. The flexible sections allow your display to curve in any direction and you can easily add or remove panels to alter the overall width of your stand.

Single panel display with media screen attached

Link a 2nd panel to create a 2 panel display

Link another panel to create a 3 panel display (shown without optional media screen)

Link 2 more panels to create a 5 panel display which you can flex to the shape you require

5 panel display flexed into a simple L-shape (shown without optional media screen)

Link 2 more panels to create a 7 panel display shown here flexed into an L-shape to fit within a 3m x 3m corner shell scheme stand space
