

Microfiber Polar Scrub Floor Pad

REUSABLE

Microfiber Scrub Polar Pad FP(A)

Eliminate different pad types and save storage space by using a pad that combines the best of both.

When we look at the fibers (both synthetic) we see two extremes, the microfiber plastic & the rigid plastic. Yet when combined, the cleaning capabilities are **unmatched by anything on the market today!!!**

- Microfiber (**Capture**)
- Synthetic Turf Strips to Scrub
- High Pile for Heavy Soil Load Capacity (**Remove**)
- A Dustless Floor Pad Which Support IAQ & Patient Safety
- Rinse To Clean (**Dispose**) & Hang Dry
 - Lasts at least 5 Times Longer Than Standard Abrasive Pads
- Available in Round or Rectangular
- Double Sided for Auto Scrubbing
- Single Sided w/Velcro for Burnishing
- For Heavy and Light Soil Conditions - Daily Maintenance
- Reduce Carbon Footprint
 - Reduce amount of pads to dispose
 - Reduce amount of pads material that is poured down drain
- Reduce SKU's and Cleaning Steps
- Critical Component in Helping to Achieve HCAHPS and HAC Scoring Goals

Tuway products are critical in reducing or eliminating cross contamination risk. Our microfiber based product line mechanically "CAPTURES" and "REMOVES" pathogens from surfaces there by "Breaking the Chain of Infection." By hand Rinsing the Polar scrub Pad, we are "DISPOSING" soil and pathogens down the drain following use.

The results will assist your organization in meeting its HAC and HCAHPS goals while also support TJC field survey requirements listed in IC.02.02.01 - Cleaning and performing low level disinfection AND May Support EC.02.05.01 -By Being Part of Control Plan that Helps to Increase Time Between Air Filtration Changes
