

Dust Mop Frames and Handles

Autoflex Handle - Jaws

Made of elastomer with a vinyl coated metal handle, this attachment can be used anywhere a regular mop handle can be used anywhere a regular handle can be used with several advantages. Flexes automatically back to original position after impact. Also easily detachable to accommodate different types of dust frames, scrubbers and pad holders.

Less handle movement equals easier mopping.

Weighs 1/3 less than metal attachments.

No assembled parts that could house bacterial contamination.

No locking mechanism required, handle simply rebounds back.
