Launderable Wet Mops

Microfiber Tube Mop

Lightweight and super absorbent, these durable looped mops are made of microfiber tube-like loops. They have a wide mesh headband and single stitched tailbands. Looped fringe improves pickup of large dust and debris.

The LTM3 Series Wet Mop

The latest microfiber technology allows for a direct replacement of your current conventional looped wet mop. The LTM3 has double the absorbency than most synthetic mop blends and triple the yarn strength. Superior strength and launderability. The LTM3 is our highest performance wet mop.

Wide Track Wet Mop

Premium 4-ply cotton/polyester/acrylic blended yarn provides the absorption and durability you expect from a looped end mop. This is the industry's best general purpose, launderable, looped end wet mop. Available in small, medium, medium-large, large and extra large. Colors: white, blue, green, yellow, red and orange. Launderable from 25-50 washings depending upon the consistency of the laundry process in relation to Tuway's laundering specifications.

Syn Track Wet Mop

When it comes to maximum launderability, nothing beats the Syn Track. Tough synthetic blended yarn takes harsh usage and repeated launderings. Lint free yarn with a mesh headband that is ideal for getting dirt and debris up off the floor. Tuway's highest rated conventional (non-microfiber) wet loop. Colors: orange, yellow, blue, white and green.

Micro Track Wet Mop

This high performance launderable wet mop provides all the advantages of a looped end, tail banded construction, in a unique rayon/polyester yarn blend. Launderable from 50-100 washings depending upon the consistency of the laundry process in relation to Tuway's laundering specifications. The material blend allows for faster mop drying time which inhibits mold and mildew growth. Engineered with permanent antimicrobial treatment to inhibit the growth of bacteria, mold, mildew and fungi on the mop head.

Launderable Wet Mops

Guardian Wet Mop

This highly launderable, anti-microbial, looped end wet mop is the ideal choice for hospitals, medical clinics, nursing homes, or any facility where bacteria and odor prevention is needed. Great for commercial laundry facilities. Launderable from 50-100 washings depending upon the consistency of the laundry process in relation to Tuway's laundering specifications. The material blend allows for faster mop drying time which inhibits mold and mildew growth. Engineered with permanent antimicrobial treatment to inhibit the growth of bacteria, mold, mildew and fungi on the mop head.

Econo Loop Wet Mop

Solid performance at an economical price. This mop is a combination of engineered cotton yarn and special construction features that puts looped end performance within reach of just about any cleaning budget. Launderable from 5-7 washings depending upon the consistency of the laundry process in relation to Tuway's laundering specifications. Made from 100% recycled material content. Colors: blue, natural and green.

Blended Wet Mop

This cotton/rayon/polyester/acrylic mop is perfect for when you want both the absorbency of a cotton mop and the quick release of a rayon mop. This blended loop end mop has the best features of both. Launderable from 5-7 washings depending upon the consistency of the laundry process in relation to Tuway's laundering specifications. Colors: orange, blue, natural and green. Made from 90% recycled material content.

Types of Yarn

Yarn

Certain yarns are better suited to a specific cleaning task than others. To get maximum efficiency and value from a wet mop, it's important to select the right yarn for the job.

Yarn	Advantages	Disadvantages	Yarn	Advantages	Disadvantages
 Cotton	Excellent absorption and retention. Low initial cost.	Requires break-in. Lints and dries slowly. Subject to mildew and deterioration.	 Synthetic	Long-staple fiber for superior tensile strength, no lint. No break-in required.	Higher cost than cotton. Poor absorption.
 Rayon	Quick absorption and release. Dries fast, mildew resistant. Cleaner yarn, lints less.	Less liquid retention.	 Blends	Balanced to provide performance and durability. Synthetic fibers add strength.	May shrink unless pre-laundered. Reduced break-in period.
