The Polar Pad - A Virtually Dustless Floor Pad

One pad that takes care of all your daily maintenance needs

The Polar Pad has the ability to adjust to the topography of your floor by reaching down into the floor's texture. Brush-type fibers are too large to reach these areas. The Polar Pad also lets you burnish without burning any high spots. Dust is eliminated, keeping your company's indoor air quality cleaner.

Reduce your inventory of conventional pads and brushes. Now you have one pad that takes care of all your daily maintenance needs.

Constructed of durable, highly launderable microfiber, the Polar Pad maximizes cleaning and polishing. For use wet or dry.

Use less cleaning solution and fewer refinishers

- Ideal for burnishing, scrubbing, wet cleaning and high speed buffing.
- Will not remove floor finish when burnishing or polishing.
- Removes dirt and scuffs when auto scrubbing
- Significantly improves Indoor Air Quality (IAQ) by not abrading the floor's finish.
- Will not burn high spots or "donut" the floor.
- Machine or hand wash to clean.

A single-sided, velcro reinforced version is available for use on high-speed floor machines.

FOR USE ON VIRTUALLY ANY FLOOR TYPE!

Rubber, Vinyl, VCT, Luxury Vinyl Tile, Tile Concrete, Porcelain, Terrazzo, Marble, Grouted and Wood Flooring.
