

# Illinois FCCLA State Proficiency Event 2020 Interior Design Scenario

## Client Profile:

Amanda and Patrick Logan have recently downsized from a 3 bedroom home with a partially finished basement and a one car garage to a one bedroom studio apartment in the city of Chicago. They both like a Mid-Century Modern design. Both Amanda and Patrick are in their late 50's and have one son who is grown and on his own. They are going to start remodeling their living area. Their current furniture does not fit so they need to purchase new items.

The Challenge: Remodel the living area of the studio apartment.

Here's what you need to consider:

- In downsizing, they have lost a lot of storage space.
- The studio is open concept.
- The exterior walls are brick.
- The living room should seat 4 – 5 people.
- Patrick is a novice art collector and their previous home had a lot of art displayed.
- Amanda loves to scrapbook and would prefer to have a designated area for working on her books.
- Amanda and Patrick's budget for the project is \$10,000.00

Additional Information not included on the floor plan:

Ceiling Height is 12'

Standard window width: 4'

The floor plan for Amanda and Patrick's studio apartment can be found in the pdf named "2020 Interior Design Floor Plan".
