MOISES DE LA VARA

Ever since I can remember I have always had a special fascination for race cars and everything related to velocity and racing.

I began racing Karts as an amateur for a short time when I was about 8 years old, but because of my interests in other sports such as football, I abandoned Kart racing.

It was not until the end of 2014 when I spontaneously re kindled my interest for Karts, and by April 2015 I had my first official competition. After this experience I realized that my true passion was racing and that I wanted to become a professional in this field. It was then when I began training long and hard hours, filled with dedication and discipline so that I could compete to my full potential in different championships in the United States and Mexico. These championships have motivated me to keep following this regimen and peruse my passion.

Currently I am participating in the F4 category of the NACAM 2015-2016 championship in Mexico, at the same time I am preparing for the FIA F4 in the United States and Karting season 2016. I believe that with hard work, dedication, and unconditional support from my family I will be able to reach my goals in the different elite categories of such championships and one day stand out in the national or international levels.
