

Perimeter Pest Control Program

Our Perimeter Pest Control program is designed with you and your family in mind! Our State Certified Technician puts a barrier around your home to keep unwanted pesky bugs out! The idea behind our program is to attack the insects at the perimeter of your home so we can limit their population and keep them from getting inside. By doing this outside, we are limiting the need for you to apply insecticides inside where you, and your family and pets, eat, sleep and play!

Our program consists of:

- 4 applications- Spring, Early Summer, Late Summer and Fall
- Focused concentration on the cracks and crevices where insects enter the home
- Products that are pet and child safe once dry
- Products that do not harm soil, plants, trees, flowers, turf or bushes
- Odorless and colorless products
- Products applied by a State Certified Professional Technician
- Products that help eliminate ants, fleas, crickets, mites, chinch bugs, ticks, spiders, termites and many, many more!

\$69.00 per application x 4 applications= \$276.00 total for program

Name: _____ Acceptance Signature: _____

Address: _____

Phone: _____ Email: _____

Payment method: _____ Bill me after each application

_____ Prepay total amount \$262.20 (5% discount)
