

Emergency / Disaster Management Plan

Crisis Management Team:

Tommy Martin (727) 423-9101 Cell

Ron Harrison (813) 477-2975 Cell

Tamara Martin (727) 423-1174 Cell

In the event of any crisis, emergency, or natural disaster, Tommy Martin (owner) should be contacted immediately. These events may or may not include: robberies, tornadoes, fires, earthquakes, etc. Should an emergency include a criminal act, facility employees should contact the necessary law enforcement agency immediately.

Should any crisis/disaster involve a power outage, facility employees should immediately seal all coolers to reserve refrigerated temperatures until length of outage can be determined. Should a power outage be predicted to last long enough to cause cooler temperatures to exceed acceptable ranges, other means of refrigeration will be arranged (see below).

As temporary means of storage, Coastal Produce Inc. will use its refrigerated delivery trucks and semi-trailer as portable coolers.

In the event of any natural disaster (tornado, earthquake, hurricane, fire, etc.), evacuations will be conducted as deemed necessary by management.
