PARTNERS IN EMS

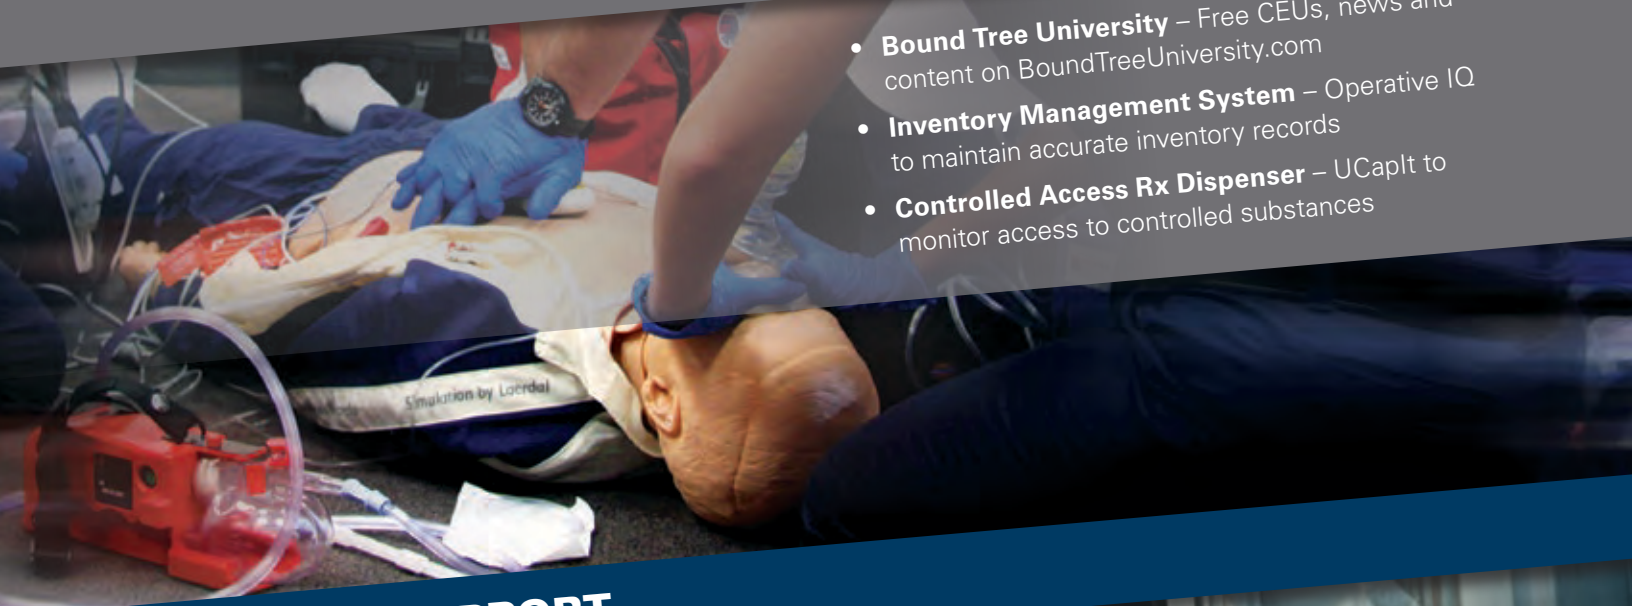

THE RIGHT PRODUCTS

- **Curaplex® by Bound Tree** – Savings off of comparable name-brand medical supplies
- **Kitting Solutions** – Convenient, cost-effective pre-assembled kits
- **Recertified Equipment** – Fully recertified equipment to stretch budget dollars
- **Pharmaceuticals** – Full line of Class II and Class IV drugs

THE RIGHT SERVICES

- **Bound Tree University** – Free CEUs, news and content on BoundTreeUniversity.com
- **Inventory Management System** – Operative IQ to maintain accurate inventory records
- **Controlled Access Rx Dispenser** – UCapt to monitor access to controlled substances

THE RIGHT SUPPORT

- **Nationwide Distribution** – Six distribution centers to quickly deliver across the entire nation
- **Dedicated Account Managers** – EMS knowledge and expertise to guide you
- **Disaster Support** – Immediate deployment of emergency medical supplies in disaster situations

CURAPLEX® BY BOUND TREE

Curaplex® Select Defibrillator Pads

See page 400

The radiotransparent and radiotranslucent “one-pad system” enables Curaplex® defibrillator pads to remain with the patient as they move through various care environments. Their 60-inch lead wire offers you flexibility to move around more freely in your environment, and the color-coded packaging gives way to easy identification.

Curaplex® IV Administration and Extension Sets

See page 325

Curaplex® needle-free administration and extension sets utilize MicroClave® neutral displacement technology, creating a protective barrier in the IV connector. This set serves to lessen the risk of bacterial contamination or infection during procedures.

KITS BY CURAPLEX®

O2-MAX™ Neb Kit

See page 93

Together, the Pulmodyne O2-MAX™ with integrated nebulization and Microstream™ sampling lines allow you to nebulize your patient while delivering positive and consistent pressure as well as providing the earliest indication for patients at risk of respiratory compromise.

Curaplex® IV Start Kits

See page 178

Curaplex IV start kits are conveniently packaged with a wide assortment of component options available. These pre-assembled kits are designed to allow for the quick introduction of an IV to a patient in an emergency setting.

PATIENT HANDLING

Graham MegaMover® Select
See page 213

The MegaMover® Select Transport Unit features multi-positioned handles allowing the user to select the handle that offers the safest and most comfortable position for transporting patients. It excels when maneuvering stairs by allowing the user to select a higher position handle or a lower position handle to enhance leverage.

Graham MegaMover® Transport Chair
See page 213

The MegaMover® Transport Chair is made of strong nonwoven material. Durable single-use transports up to 350 lbs. Ideal for carrying patients in areas of limited space. Eight handles for ergonomic lifting.

PATIENT MONITORING

Microstream® Capnography Lines

See page 379

Microstream® disposable CO₂ sampling lines provide continuous feedback on the breathing and ventilatory status of patients in emergency care. The lines help ensure accurate sampling for short term use, long term use, adult, pediatric and neonate care.

Nellcor PM10N

See page 370

The Nellcor™ Portable SpO₂ Patient Monitoring System, PM10N, is a convenient, handheld monitor that is ideal for spot-checks or continuous monitoring in various healthcare and home use settings. Its ergonomic shape and simple design make it intuitive to use and simple to operate. Wherever you need accurate, reliable SpO₂ measurements, count on the Nellcor portable SpO₂ pulse oximeter to meet the challenge.

AIRWAY

King LTS-D™

See page 56

The King LTS-D, like the King LTD, is designed for positive pressure ventilation over 30 cm H₂O and spontaneously breathing patients. The LTS-D, however, features a curved, double-lumen tube with separate paths for ventilation and access to the stomach. The exclusive anatomically-shaped distal tip and cuff assist in the airway's passage behind the larynx and into the normally collapsed esophagus.

AMBU® AuraGain™

See page 54

The AuraGain laryngeal mask satisfies 3 fundamental airway management needs by integrating gastric access and intubation capability in an anatomically curved single-use device that facilitates rapid establishment of a safe airway.

PATIENT TRANSPORT

FERNO® Pedi-Mate+®

See page 238

Pedi-Mate® Pediatric Restraint System quickly adapts any ambulance cot to safely transport children ranging in size from 10-80 lb (4.5-36.3 kg). Fully-adjusting five-point harness system securely holds patient. Nontoxic, easy-to-clean vinyl rolls compactly for storage.

FERNO® Neo-Mate

See page 238

The Neo-Mate Pediatric Restraint System adapts any ambulance cot to safely transport children ranging in size from 7-14 lb (3-6 kg).

CARDIAC CARE

Heartstart FR3 Defibrillator

See page 384

The HeartStart FR3 Defibrillator from Philips is a lightweight and portable automated external defibrillator (AED). The rugged FR3 is designed for use in EMS environments. With a bright, high-resolution color LCD screen, the FR3 is easy to use in a noisy environment. It is lightweight to carry on the scene of a sudden cardiac arrest emergency at just 3.5 lbs.

Recertified Lifepak 15

See page 392

The Lifepak 15 monitor/defibrillator has the ability to monitor multiple parameters such as NIBP, SpO2, End-tidal CO2 and Invasive Pressures. Bluetooth options available. Includes 1-year warranty.

IV THERAPY

B.Braun Introcan Safety® 3 Closed IV Catheter

See page 341

The Introcan Safety® 3 Closed IV Catheter continues the tradition of passive needlestick protection and now, with the newly added blood control septum, clinicians will benefit from protection against blood borne pathogens. This breakthrough technology reduces bleed out and other catheter complications.

B.Braun CME Bodyguard 121 Twins Dual-Channel Infusion Pump

See page 329

The BodyGuard 121 Twins ambulatory is the only lightweight, dual-channel infusion pump on the market. Priced to compete with larger devices, the BodyGuard 121 Twins pump gives you the flexibility to deliver continuous infusion or use the CCT drug library.

VENTILATION

Newport™ HT70 Plus Ventilator
See page 97

The Newport HT70 Plus ventilator from Medtronic is a lightweight, portable vent that provides both invasive and noninvasive (NIV) ventilation capabilities, with CPAP and BiPAP breath support features. Whether your needs are for short transports or lengthy critical care travel, the Newport ventilator is versatile enough for home care, long-term care or hospital applications.

The AHP300 Transport Ventilator
See page 99

The AHP300 is a new broad-featured transport ventilator designed to meet the specific needs of modern EMS response. It features Pressure or Volume Control, CPAP / Bi-Level Support, A/C or SIMV, and full FiO₂ blending capability. Its single panel control interface is easy to navigate, easy to clean, and rugged. It also features quick start programmable presets, O₂ Conserve, a 7.5 hour battery life, and carries a low cost of ownership.

INFECTION CONTROL

Halyard Health Purple Nitrile® Gloves
See page 14

Unique purple color provides a quick, visual differentiation from latex and other synthetic gloves. Textured fingertips enhance wet and dry grips. 3.5 ml cuffs, 4.7 ml palm and 5.9 mil fingertips. Custom design enhances comfort and fit. Available in 9.5" and 12" long cuffs. 12" cuff is NFPA certified. Powder free. New SmartPULL dispenser box has two openings to allow for better glove dispensing and less waste.

Halyard Health Sterling Nitrile® Gloves
See page 15

Halyard Health has created a latex-free glove with the protection, flexibility and sensitivity of latex. These gloves utilize synthetic nitrile polymer with an innovative proprietary compounding process. This results in a latex-free exam glove with the protection of nitrile and the sensitivity of latex. 12" cuff is NFPA certified. New SmartPULL dispenser box has two openings to allow for better glove dispensing and less waste.

HALYARD HEALTH STERLING NITRILE® GLOVES

Halyard Health has created a latex-free glove with the protection, flexibility and sensitivity of latex. These gloves utilize synthetic nitrile polymer with an innovative proprietary compounding process. This results in a latex-free exam glove with the protection of nitrile and the sensitivity of latex. 12" cuff is NFPA certified. New SmartPULL dispenser box has two openings to allow for better glove dispensing and less waste.

HALYARD HEALTH STERLING SG NITRILE GLOVES

STERLING SG Sensi-Guard Nitrile Exam Gloves provide excellent fit and feel compared to latex. The new nitrile formulation provides excellent tactile sensitivity, without Sacrificing any of STERLING Nitrile's barrier properties or durability. They also have an Acceptable Quality Level (AQL) of 1.0. That means STERLING SG* Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet ASTM 2.5 AQL requirement. [250/bx - 10 bx/cs]

- Powder-free
- Non-sterile
- Textured fingertips
- Ambidextrous
- Beaded Cuff
- Higher Count
- Saves space and waste
- Length: 9.5 in. (242MM)

PROTECT YOURSELF WITH BEST IN CLASS SENSITIVITY, STRENGTH & VALUE

DIGITCARE APEXPro™ NITRILE GLOVES

APEXPro gloves feature 2-PlyTechnology™ for maximum strength and exceed puncture resistance of NFPA 1999-2013ed. They have a human skin pH balanced coating for reduced risk of irritation and reduced perspiration. A black interior color and a high contrast perm-white exterior offers improved visibility with infectious fluids. They are specially formulated with an advanced non-latex nitrile polymer and their EaseOff™ non-stick exterior surface prevents tapes and even Veni-Gard™ from sticking to the glove. AQL of 0.65 exceeds industry standard. [100/bx - 10 bx/cs]

DIGITCARE FLEXSENSE™ NITRILE GLOVES

FlexSense is a powder-free, fully-textured nitrile glove. It does not contain the accelerators commonly used in the production of nitrile gloves, helping prevent Type I and Type IV allergies. The gloves offer both comfort and tactile sensitivity in the field. With an interior coating to quickly slip gloves on and an exterior surface that most tapes and adhesives will not stick to, FlexSense is ideal for emergency situations. 4 mil thickness. 9.5" cuff. [150/bx - 10 bx/cs]

INFECTION CONTROL

N95 Respirators - Face Masks

BIOMASK™ ANTIVIRAL FACE MASKS

BioMask inactivates 99.99% of tested influenza viruses on 5 minutes contact with the surface of the facemask. The first and second layers of the mask are treated with different compounds that inactivate influenza viruses. Rapid absorption ensures the influenza A & B viruses are wicked away from the outer surface. In the outer active layer, viruses are inactivated by exposure to a low pH environment. Meets ASTM F2100-07 standard: High Barrier surgical facemask. [10/bx - 20/cs]

FLUIDSHIELD® PROCEDURE MASK WITH WRAPAROUND SPLASHGUARD® VISOR

The FluidShield face mask, combined with the SplashGuard visor, offers a one-piece system for full facial protection. It provides cool wearing comfort while protecting the eyes from possible splashing. The mask material filters 0.1 micron size particulate matter at 99% efficiency. The wraparound visor offers extra peripheral protection with a 2" extension on both sides. The visor has a special anti-fog treatment. The patented fog filter reduces the possibility of fogging through the mask. An anti-glare charcoal band has also been added to eliminate distracting reflections. Ear loop design. [25/bx - 4 bx/cs]

INFECTION CONTROL

Collection Bags - Biohazard Bags - Convenience Bags

HARTWELL MEDICAL BIOHOOP® COLLECTION BAG

The BioHoop Collection Bag is a multipurpose, wide-mouth container to dispose of emesis, urine, IV starts and blood spills, contaminated dressings and scene garbage. Also serves as a security bag for evidence and patient belongings like watches, wallets, cell phones and eyeglasses. A plastic strap keeps the bag open, and you simply pull the strap tight to seal the bag. One side clear with volume indicators, other side white opaque. 8" x 13". Folds flat, accordion style, for convenient storage. [12/pk - 40 pk/cs]

Key features and benefits:

- Long, protective cuff at the rim protects your hands from body fluids
- Leak-proof seal prevents spillage and contains larger biohazard waste, disposable laryngoscope blades, trash or scene evidence. Holds more than 2,000cc
- The patient's personal items can be secured in the bag and attached to their clothes with the hook clip to ensure nothing is lost
- Helps comply with OSHA 29 CFR Part 1910.1030

KING LTS-D™

The King LTS-D Laryngeal Tube is designed for positive pressure ventilation over 30 cm H₂O and spontaneously breathing patients. The King LTS-D features a curved, double lumen tube with separate paths for ventilation and access to the stomach. The exclusive anatomically-shaped distal tip and cuff assist in the airway's passage behind the larynx and into the normally collapsed esophagus.

See page 56 for more information.

CATH-GUIDE® AIRWAYS

These airways are designed with three separate channels. The internal configuration establishes, at point of entry, the prescribed path of a suction catheter. This eliminates possible blocking of the airway, assuring that two channels will remain open for gas exchange. Each airway is contoured for maximum comfort and is made of soft, pliable, clear vinyl. AMBU® AURAGAIN™

The AuraGain laryngeal mask satisfies 3 fundamental airway management needs by integrating gastric access and intubation capability in an anatomically curved single-use device that facilitates rapid establishment of a safe airway. [10/cs]

- Integrated gastric access channel for managing gastric content
- The original anatomical curve, ensuring rapid placement
- Intubating capability using standard ET tubes
- Integrated bite absorption area prevents airway occlusion
- Pilot balloon identifies mask size and provides tactile indication of degree of inflation
- Navigation marks for guiding flexible scope
- MR safe
- Phthalate-free material

Alternate Airways

KING LTS-D™

LATEX FREE

The King LTS-D, like the King LT-D, is designed for positive pressure ventilation over 30 cm H₂O and spontaneously breathing patients. The LTS-D, however, features a curved, double-lumen tube with separate paths for ventilation and access to the stomach. The exclusive anatomically-shaped distal tip and cuff assist in the airway's passage behind the larynx and into the normally collapsed esophagus. [10/cs]

The 2nd lumen of the King LTS-D, which is open at the distal tip of the tube, provides 3 key benefits:

- Passage of gastric tube up to 18 FR
- Channel for regurgitation - significantly reduces potential for regurgitation to pass the cuff, thereby reducing the chance for aspiration
- A "vent" for gastric pressure and stomach decompression

Some additional design features unique to the King LTS-D are:

- Smaller, softer tip for easier placement
- New tapered ramp design provides additional ventilation outlets
- Ramp for passage of tube exchanger or fiber optics located at the proximal eye reduces the need to withdraw the tube when using a tube exchanger or fiber optics
- Shorter tube length and patented "s-shape"
- Depth marks
- Single valve pilot balloon
- Anatomically shaped proximal cuff
- Ventilation openings and eyelets
- Distal cuff
- 100% latex-free and sterile for single patient use

KING LT-D™

The King LT-D is a disposable supraglottic airway designed for superior positive pressure ventilation as well as spontaneous breathing. It consists of a curved tube with ventilation apertures located between two inflatable cuffs. Both cuffs are inflated using a single valve/pilot balloon. The distal cuff is designed to seal the esophagus, while the proximal cuff is intended to seal the oropharynx. Attached to the proximal end of the tube is a 15 mm connector for attachment to a standard breathing circuit or resuscitation bag. [10/cs]

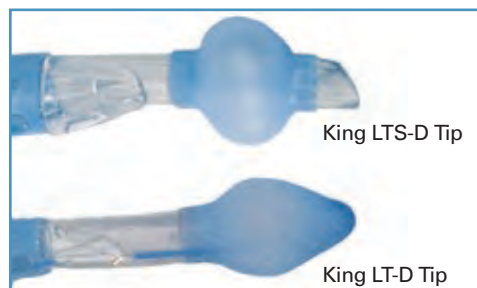

- Alternative to tracheal intubation or mask ventilation
- Consistently achieves a ventilatory seal of 30 cm H₂O or higher
- Easy to insert and results in minimal airway trauma
- Shorter tube length and patented "s-shape"
- Depth marks
- Single valve pilot balloon
- Anatomically shaped proximal cuff
- Ventilation openings and eyelets
- Distal cuff
- 100% latex-free and sterile for single patient use
- Available in pediatric and adult sizes

KING AIRWAY KITS*

The King Airway is a disposable, supraglottic device created as an alternative to conventional, tracheal intubation. This airway is designed for positive pressure ventilation as well as for spontaneously breathing patients. The ability to provide positive pressure ventilation over 30 cm H₂O and spontaneous breathing maximizes the King Airway's versatility as a superior airway management tool. [5/bx]

- 3-year shelf life
- Latex-free
- Single port for quick, simple inflation
- Color-coded design provides quick identification of adult and pediatric sizes
- Ease of insertion with minimal movement of the head
- LTS-D model adds a second channel to the airway in order to pass a gastric tube into the esophagus and stomach
- Durable, vacuum-sealed packaging for convenient storage
- Each kit includes airway device, syringe, lubricating jelly and quick reference guide

i-GEL O2 RESUS PACKS*

The i-gel O2 Resus Pack contains an i-gel O2, a sachet of lubricant and an airway support strap in an easily removable inner tray all packaged in a specially designed clear, sterile, rigid pack. This unique design ensures protection of the contents, both in transit and in storage. The i-gel O2 has a color coded hook ring to allow quick and easy identification of size. Includes i-gel O2 with hook ring, lubricant and airway support strap. Available in three adult sizes. [6/cs]

2114-87301	Small Adult with Size 3 i-Gel (30-60 kg)	\$32.79 ea	\$196.74 cs
2114-87302	Medium Adult with Size 4 i-Gel (50-90 kg).	\$32.79 ea	\$196.74 cs
2114-87303	Large Adult with Size 5 i-Gel (90+ kg)	\$32.79 ea	\$196.74 cs

i-GEL® SUPRAGLOTTIC AIRWAY

Made from a medical grade thermoplastic elastomer, i-gel has been designed to create a non-inflatable, anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures while avoiding compression trauma. The shape, softness and contours of the i-gel accurately mirror the perilaryngeal anatomy. This innovative concept means that no cuff inflation is required. The i-gel works in harmony with the patient's anatomy so that compression and displacement trauma are significantly reduced or eliminated. i-gel is designed for use in securing and maintaining a patent airway in routine and emergency anaesthetics for operations of fasted patients during spontaneous or intermittent positive pressure ventilation (IPPV). It is available in three sizes and is supplied in an innovative, color-coded polypropylene protective cradle. [25/cs]

Features:

- 15 mm connector – reliable connection to any standard catheter mount or connection
- Clearly displayed product information – for quick, easy reference and confirmation of size and weight guidance
- Position guide – easy confirmation of optimum insertion depth
- Gastric channel – improves and enhances patient safety, and allows for suctioning and passing of a nasogastric tube and facilitates venting
- Integral bite block – reduces the possibility of airway channel occlusion
- Buccal cavity stabilizer – aids insertion and eliminates the potential for rotation
- Epiglottis blocker – reduces the possibility of epiglottis ‘down folding’ and airway obstruction
- The non-inflatable cuff – made from a unique soft gel-like material allowing ease of insertion and reduced trauma

2114-08201	Size 1, 5-11 lbs (2-5 kg)	\$25.29 ea	\$252.90 cs

AMBU® TUBECHK-B™

Ambu Tubecek is a device that rapidly and reliably confirms if endotracheal tube placement is correct. This simple tool uses the anatomical difference between the esophagus and trachea as its working principle. If there is negative pressure, you are in the esophagus; if you can aspirate air, you are in the trachea. If the tube is in the soft, unsupported esophagus, the walls will collapse around the end of the endotracheal tube, creating negative pressure if you attempt to aspirate air. If the tube is in the rigid trachea, air can easily be aspirated. Instant feedback – no need for initial ventilation through the tube to obtain CO2 detection. Since no initial ventilation is needed, potential stomach inflation is eliminated. No expiration date makes them easy to handle and store. Shelf life considerations are no longer an issue. Syringe and bulb models available. The bulb can illuminate in the dark, making it the ideal choice for EMS services. [20/cs]

065-000172002EA	TubeChek-B, Bulb Style	\$4.51 ea	\$90.20 cs
------------------------	----------------------------------	-----------	------------

INTUBATION DETECTION BULB/SYRINGE

The intubation detection bulb / syringe is a disposable device used to verify endotracheal tube placement. After endotracheal tube placement and before any ventilation attempts, first compress the bulb or syringe, and while holding it in a compressed state, attach the unit to the endotracheal tube. A vacuum is created once the compressed bulb is released. Should the endotracheal tube be in the esophagus, air will not fill the bulb or syringe. However, if the endotracheal tube is properly placed, the bulb or syringe will fill with air. [20/cs]

- Reduces errors in clinical judgment
- Reduces aspiration risk

020173	EID Syringe Style	\$10.59 ea	\$211.80 cs

AMBU CO₂ DETECTOR

The Ambu CO₂ Detector is a carbon dioxide detector designed to detect CO₂ in the exhaled breath of a patient. It provides colorimetric indication of end-tidal CO₂ by changing from violet at ambient levels of CO₂ to yellow at normal respiratory levels. The Ambu CO₂ Detector is used during mechanical ventilation to assist in the placement of an endotracheal or nasotracheal tube, or to verify the condition of a patient airway. The detector may be used for up to two hours of continuous use. [12/cs]

2723-71316	CO ₂ Detector, Pediatric	\$191.99	cs

CURAPLEX® FENEM CO₂ INDICATOR

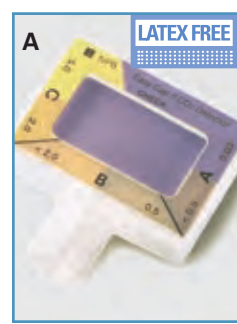

This CO₂ indicator provides a simple, convenient way to monitor a patient's tube placement and profusion levels. It attaches to the exhalation port of a resuscitator bag, so it does not add dead space or resistance to flow. Features include a three-color range: purple: .03% CO₂, tan: 0.5 - 2.0% CO₂, yellow: 5.0% CO₂. [10 ea/cs]

301-5534EA	CO ₂ Indicator, 19/22 mm	\$24.49	ea	\$2938.80	cs
301-5585EA	CO ₂ Indicator, 30 mm.	\$24.49	ea	\$2938.80	cs

EASY CAP® & PEDI CAP®

Easy Cap provides an extra measure of safety for endotracheal intubation. Just attach the Easy Cap detector to the endotracheal tube and begin monitoring ETCO₂ levels with breath-to-breath response. A color change between inspiration and expiration helps you verify proper tube placement in seconds. It also allows you to monitor ETCO₂ during CPR. [24/cs]

SLICK® STYLETTE

The Slick Stylette is constructed of malleable, coated wire. Holds shape and form to facilitate safe intubations. Nylon coating prevents cracking, peeling or flaking to facilitate tube insertion. SURELOC® stop helps maintain desired stylette length for patient safety. Handle forming capability for a better grip. Individually packaged, sterile and disposable. Adult size fits 7.0 mm to 10.0 mm ET tube. Child size fits 4.0 mm to 6.5 mm ET tube. Pediatric/Neonatal size fits 2.0 mm to 3.5 mm ET tube. [25/bx]

LAERDAL® THOMAS ENDOTRACHEAL TUBE HOLDER

The Thomas ET Tube Holder provides a quick-set screw for a secure hold after tube placement. Not only does the Thomas Tube Holder accommodate Combitubes and LMA's, its special bite block feature protects the patient and the tube. Hook-and-loop padded strap provides security and comfort, and will not stretch or shrink when wet. Color coded for ease of identification between adult and pediatric versions. Slide stick facilitates fast, efficient application of the head strap around the patient's neck without movement of the head. Quick-set screw system securely holds tubes in place and facilitates fast, easy adjustment or removal of the Thomas Tube Holder.

LATEX FREE

- Enlarged tube opening to allow for the use of larger outer diameter single and double-lumen airway tubes (ETT's, LMA's, Combitubes, etc)
- Enlarged mouth access opening for easier suction access and visualization of the mouth
- Adjusted bite block to prevent biting of the larger outer diameter tubes, and to protect patient's teeth and gums
- New color branding (Pediatric includes a pink head strap for quick identification in an emergency)

AIRWAY & OXYGEN DELIVERY

Video Laryngoscopes

KING VISION™ VIDEO LARYNGOSCOPE*

The King Vision is a portable video laryngoscope featuring a durable, reusable display paired with a disposable blade. The full-color, non-glare and anti-scratch display enables high performance visualization capabilities for both difficult and routine intubations. It is ergonomically designed with an integrated blade/handle for maximum control and minimal lifting of soft tissue and impact on teeth. The lightweight and battery-operated device can use a channeled or standard disposable blade for guided or standard intubations.

- Display comes with 1 year warranty
- Water-resistant display packaged in a protective foam case for portability
- Each individually-packaged blade features new optics, light and anti-fog lens
- Guiding channel allows for easy ETT placement and removal

THE CURAPLEX ADVANTAGE

As the healthcare landscape evolves, Curaplex® by Bound Tree responds with cost-effective clinical products that enable providers to deliver quality treatment and improve patient outcomes. With a robust portfolio of everyday products and specialty solutions across multiple clinical categories, Curaplex continues to anticipate the needs of tomorrow's healthcare while responding to the needs of today.

10+ Product categories of every run supplies to maximize savings on the products you use the most

75+ Account Managers with EMS knowledge and expertise to provide you with unique insight and industry experience

20% Savings off of comparable name-brand medical supplies

Continuous quality improvement and rigorous product evaluation

6 National distribution centers with high fill rates, consistent availability and expedited delivery

Innovative new products that can improve processes and costs

Medstorm® to Curaplex®

All of your favorite, trusted Medstorm® products will soon be transitioning to Curaplex®. Certain Curaplex® products may still be shipped in Medstorm® packaging during the transition. For any questions regarding this change, please call Bound Tree Medical Customer Service.

Always follow your local protocols regarding product use and procedures.

The Curaplex Select product portfolio is comprised of higher-quality, everyday products and specialty solutions. Curaplex Select options are available in most clinical categories.

HARTWELL MEDICAL BRITEVIEW® LARYNGOSCOPE BLADES

The BriteView Color Coded Disposable Laryngoscope Blades were designed by EMS professionals with real-life street experience. These blades provide a bright light source and have color-coded heels for instant size recognition. Disposable stainless steel construction means you do not have to compromise strength and reliability. Available in both Macintosh and Miller styles that fit all standard handles. [10/bx]

- No cleaning or maintenance required, single patient use
- Formed stainless steel construction from blade tip to handle connection eliminates flex and potential for breakage
- Color-colored heels have ball-bearing connections instead of bent metal ridges. No damage to your handle.
- Large, easy-to-read blade type and size printed at the top of each easy-open tear pack

Laryngoscopes

EQUIPLITE™ DISPOSABLE LED LARYNGOSCOPE BLADES

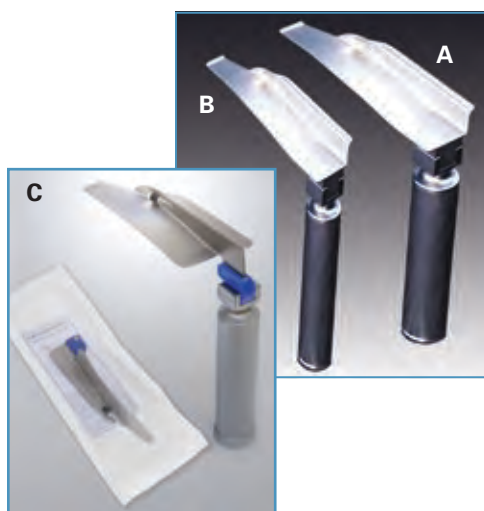

The Truphatek EquipLite LED Laryngoscope Blades are premium quality, single-use laryngoscope blades. They feature stainless steel construction and brilliant white-blue LED illumination. LED's dramatically reduce power consumption and help to extend battery life. They also generate less heat and eliminate the central shadowing typical with an incandescent bulb. Unlike disposable fiber-optic blades, the EquipLite blades work with ISO standard 7376(i) conventional handles. You can obtain the benefits of a disposable system while still using your standard conventional handles. By utilizing a formed steel heel with a plastic insert, the EquipLite blades also offer a lower-weight alternative to the competition without compromising strength. They have a modern low-profile design and are color-coded for rapid identification. [20/bx]

- Premium quality and performance
- Bright white-blue LED illumination
- LED illumination allows for longer battery life, less heat and no central shadowing
- Formed steel heel with plastic insert allows for less weight without compromising strength
- Atraumatic tip for patient safety and comfort
- Color-coded for easy size identification
- Compatible with ISO standard 7376(i) conventional handles

HARTWELL MEDICAL GRANDVIEW® LARYNGOSCOPE BLADE

Known as the "Tongue Tamer", the GrandView Blade was designed by an ER physician to fit the majority of all adult patients. It provides a more anatomically appropriate curve which improves direct visualization. Wider blade surface keeps the tongue out of the way and reduces the need to reposition the blade. A super bright light source provides excellent illumination and the socket accepts all standard adult laryngoscope bulbs. Fits all standard handles and is made of stainless steel. Durable version is available in Adult and Child sizes.

VIVIDTRAC VIDEO INTUBATION DEVICE

No Cleaning, Maintenance or Battery Required

VividTrac provides an unmatched image quality to support proper and speedy placement of the ET tube, leading to high intubation success rate in the first attempt. VividTrac has an integrated ET tube channel providing easy means for the preloaded ET tube advancement into the oral cavity and trachea, under continuous visualization, and without the need of a separate Stylet.

VividTrac has been shown to perform flawlessly under concurrent chest compression, in moving vehicles, as well as with successful suctioning of the airway by the same person performing the intubation. All these attributes and the unique “no force” technique used with the VividTrac (which is well tolerated even in awake patients) make the VividTrac one of the safest devices on the market today.

VividTrac’s USB based “open system” architecture allows it to be compatible with a wide variety of display options (low cost tablets), eliminating the need to purchase or maintain high-cost proprietary equipment.

VividTrac video is readily recordable and can be easily transferred to patient medical records, or used in education and training.

Features:

- Stainless Steel Blade (will not break)
- Integrated ET Tube Channel for Guiding
- ETT Sizes 6.0mm to 8.5mm (Adult)
- ETT Sizes 4.0mm to 6.0mm (Pediatric)
- Integrated standard USB cord (3ft)

Benefits:

- Superior Imaging
- Portable and Low Cost
- No Cleaning or Maintenance
- No Stylet Required
- No Neck Hyperextension
- No Battery
- Built in Anti-Fogging

PATIL EMERGENCY CRICOTHYROTOMY CATHETER SET*

This set is used for emergency airway access when conventional endotracheal intubation cannot be performed. The catheter is 9.0 FR OD and 6 cm in length; the needle is 19 gauge. It is supplied in sterile peel-open packages and intended for one-time use.

Set Includes:

- Needle Introducer Assembly
- Disposable Scalpel
- Luer Lock Syringe
- Luer Lock Connector
- Cricothyrotomy Catheter

Cricothyrotomy Kits

CURAPLEX® PERTRACH® CRICOTHYROTOMY / TRACHEOSTOMY DEVICE*

The Pertrach is a cricothyrotomy and tracheostomy device that uses a patented splitting needle and dilator to perform a rapid and simple procedure in the most critical situations. It has no expiration date and is ideal for use in the following situations:

- Failed orotracheal or nasotracheal intubation and/or fiber optic bronchoscopy
- Immediate airway control in patients with maxillofacial, cervical spine, head, neck and multiple trauma
- Endotracheal intubation is impossible and/or contraindicated

Contents:

- Pediatric device contains 2 17 ga splitting needles, uncuffed trachea tube dialator with flexible leader, blade with twill tape and 3 cc syringe
- Adult device contains 2 14 ga splitting needles, cuffed trachea tube dialator with flexible leader, blade with twill tape, and 5 cc syringe

CURAPLEX® SELECT CPR MASK

The CPR Mask is designed to be used by the professional rescuer and first responder. It includes a low resistance, one-way valve with a disposable 3M Filtrete™ hydrophobic filter to help prevent the passage of liquids and secretions. The mask offers superior protection for both rescuer and victim. Features include: O2 inlet, disposable one-way valve and filter; 99%+ viral and bacterial filter efficacy; pre-inflated cuff for solid seal. Use for adults, children or infants. Latex-free.

- Pre-inflated cuff allows for ease of application and creates effective seal
- Oxygen inlet version facilitates delivery of supplemental oxygen to breathing and non-breathing patients
- Distance from patient allows rescuer to see chest rise and fall

AMBU® SPUR® II

The Ambu SPUR II features a unique shape that is small and easy to hold, yet provides optimum stroke volumes with just one hand. The bag itself is thin and responsive, and the SafeGrip™ surface ensures that the SPUR II can be firmly squeezed. All SPUR II resuscitators come in individual, resealable plastic carrying bags, with one or more masks and any special accessories. The bags themselves are color-coded for fast identification of infant, pediatric and adult sizes.

- Unique single-shutter valve system for reliable functionality
- Integrated handle for user comfort and uniform compression
- Thin-walled compression bag allows for lung compliance and “feel”
- SafeGrip™ surface for secure handling in stressful environments
- Made from SEBS (styrene-ethylene/butylene-styrene) instead of PVC
- Medication port allows quick medication delivery without disconnecting from the ET tube
- Expiratory filter protects the first responder from the unknown by removing 99% of the exhaled airborne particulates
- Disposable manometer allows for accurate measurement of delivered oxygen (0-60 cm of pressure)
- Sensitive patient valve (less than .5 cm to actuate the valve) for spontaneous breathing

CURAPLEX® CMR (COMPACT MANUAL RESUSCITATORS)

The Curaplex Compact Manual Resuscitator (CMR) is latex free and made of high-grade medical PVC. It is available in three different sizes: adults (over 66 lbs), children (15 - 66 lbs) and infants (under 15 lbs). The CMR can be configured for delivery of three different oxygen concentrations: squeeze bag only (21% FiO₂), bag with supplemental oxygen line (65% FiO₂), or bag with supplemental line and a fully inflated O₂ reservoir bag (up to 99% FiO₂). Shipped compact for easy storage. [16/cs]

AIRWAY & OXYGEN DELIVERY

Oxygen Masks

PARTIAL NON-REBREATHER, ELONGATED

Elongated soft vinyl mask designed for high oxygen concentration while low resistance exhalation valve allows exhaled gas to escape. It comes with 84" (7') oxygen tubing. Pediatric mask is designed for children ages 2-12. [50/cs]

A010146 Adult Mask . . . \$2.76 ea \$138.00 cs
411058 Pediatric Mask \$3.08 ea \$154.00 cs

REBREATHER, ELONGATED

This rebreather mask is designed to slip under the chin, with 84" (7') of oxygen supply tubing. [50/cs]

411007 Adult Mask . . . \$2.48 ea \$124.00 cs
411011 Pediatric Mask . \$2.94 ea \$147.00 cs

REBREATHER, SHORT STYLE

These adult and pediatric short style oxygen masks come with 84" (7') of oxygen supply tubing. The pediatric mask fits under the chin, and is best for children ages 2-12. [50/cs]

411009 Adult Mask . . . \$3.15 ea \$157.50 cs
410000 Pediatric Mask . \$4.06 ea \$203.00 cs

REBREATHER, INFANT

Designed for children ages 0 to 2 years old, this fine rebreather mask is disposable and made of an odorless vinyl. Includes Reservoir. Does not include oxygen tubing. [50/cs]

415406 Infant Mask . . . \$5.99 ea \$299.50 cs
D6146 Oxygen Tubing 7' \$0.76 ea \$38.00 cs

REBREATHER HIGH CONCENTRATION, INFANT

Infant High Concentration rebreather is designed for children ages 0 to 2 years old. This mask is disposable and made of an odorless vinyl. Includes oxygen tubing. [50/cs]

415497 Infant Mask w/Tubing
 \$8.29 ea \$414.50 cs

MEDIUM CONCENTRATION, SHORT

Standard adult short style disposable medium concentration mask with 84" (7') tubing. Helps get a tighter seal on larger children while affording a soft disposable mask. [50/cs]

411040 Adult Mask . . . \$3.18 ea \$159.00 cs
411035 Pediatric Mask . \$2.21 ea \$110.50 cs

MEDIUM CONCENTRATION, ELONGATED

This soft disposable mask of odorless vinyl affords excellent fit and negligible CO2 build-up. Comes with 7' tubing. For children ages 2-7. [50/cs]

411201 Adult Mask . . . \$1.59 ea \$79.50 cs
020608 Pediatric Mask \$2.18 ea \$109.00 cs

MEDIUM CONCENTRATION, INFANT

For children ages 0-2 years old. Soft disposable mask of odorless vinyl. With 7' tubing. [50/cs]

416218 Infant Mask . . . \$2.90 ea \$145.00 cs

Disposable supply tubing used in oxygen administration. Made of soft, flexible vinyl with end pieces that fit most oxygen adapters. Each tubing length packaged individually in a plastic bag. [50/cs]

D6146	7' Tubing.	\$0.76 ea	\$38.00 cs
020611	Tubing Connectors	\$0.73 ea	\$36.50 cs

REBREATHER MASKS

Rebreather masks are also called "partial rebreathers" or "high concentration masks." These are used to deliver up to 60% oxygen. 100% oxygen enters through the nipple grommet and inflates the reservoir bag. When the patient inspires, he draws from the reservoir bag, from the oxygen coming through the nipple and from room air entering through the small holes on the sides of the mask. Exhaled air exits the mask through these same holes. Some of the exhaled air also goes back down into the reservoir bag, where it is rebreathed.

NON-REBREATHER MASKS

Non-rebreathing masks are used to deliver up to 90% oxygen. Oxygen enters through the nipple grommet and inflates the reservoir bag with 100% oxygen. When the patient inspires, he draws from the oxygen in the reservoir bag, plus entrains a small amount of room air through the holes on ONE SIDE of the mask. The holes on the other side of the mask are covered by a one-way valve that will not allow room air to enter the mask. Exhaled air exits through the holes on BOTH SIDES of the mask. (The one-way valve allows

air to exit, but not enter.) There is also a second one-way valve in the nipple grommet. It prevents exhaled air from reentering the reservoir bag. The reservoir bag will always contain fresh, 100% oxygen.

Total non-rebreathing masks, or "100% masks", are used to deliver 100% oxygen. They are essentially the same as the nonbreathing mask mentioned earlier, except there are one-way valves on BOTH SIDES of the mask. When the patient inspires, no room air can enter the mask through the holes on the sides. The only source for a breath is the

100% oxygen in the reservoir bag. Exhaled air exits through the one-way valves on both sides of the mask.

MEDIUM CONCENTRATION MASKS

Medium concentration masks are those in which the concentration delivered to the patient is about 50%. Generally 100% oxygen at about 8 liters flow is fed to the mask. When inspiration takes place, enough air is drawn in to dilute the oxygen to about 50% average. Both the instantaneous percentages and flow will vary considerably.

Nebulizers

BAG ASSIST NEBULIZER*

This kit has all the parts necessary to supply nebulized medications either via mouthpiece to a breathing patient, or through the supplied in-line adapter components and external positive pressure ventilation to non-breathing patients. Kit includes the Medic-Aid® high-speed, side stream nebulizer. This nebulizer offers advantages over conventional small volume nebulizers (SVN) that include shorter medication delivery time and smaller, more respirable particles.

AIRLIFE™ MISTY MAX 10® DISPOSABLE SMALL VOLUME NEBULIZER (SVN)

The Misty Max 10 has superior respirable fraction and inhaled respirable mass performance compared to the most commonly used conventional jet nebulizers. Performance is independent of neb orientation during treatment. The Misty Max 10 delivers top inhaled respirable mass results at both vertical and angled delivery positions. The new and unique jet / baffle design results in a more consistent delivery of medication. Full 10cc medication cup capacity with visible gradations to provide medication dosing flexibility. Tinted, snap-in jet to allow for removal during cleaning. Single-twist closure of top and bottom for ease of use. Secure top and bottom seal to prevent leakage. [50/cs]

O2-MAX™*

The O2-MAX is a disposable CPAP system for use in a wide range of respiratory distress conditions. It is available as a variable or fixed system. The variable system includes a variable flow generator that delivers oxygen from 30% to 100% FiO₂ with flow rates up to 140 l/m and a 120" (3 m) O₂ hose and DISS connector. The fixed system includes a fixed flow generator that delivers 30% FiO₂ with flow rates up to 140 l/m and a 4" (100 mm) O₂ hose and DISS connector.

The O2-MAX is compatible with the 3-SET™ (Simple Effective Titration) O2-CPAP™ Valve with adjustable pressure settings from 5.0, 7.5 and 10.0 cm H₂O. The valve allows the clinician to titrate the level of CPAP without carrying additional equipment. [10/CS]

Convenience When It Matters Most

Together, the Pulmodyne O₂-MAX™ with integrated nebulization and Microstream™ sampling lines allow you to nebulize your patient while delivering positive and consistent pressure as well as providing the earliest indication for patients at risk of respiratory compromise.

New Disposable CPAP with Integrated Nebulization and Microstream™ CO₂ Sampling Lines

Both systems are completely disposable and help enable a seamless transfer of care into the emergency department. They are packaged together for quick and easy implementation of treatment.

PORTO2VENT® CPAPOS OXYGEN DELIVERY SYSTEM*

The PortO2Vent CPAP oxygen delivery system is an advanced respiratory device that assists spontaneously breathing patients in an EMS environment. The PortO2Vent provides CPAP (Continuous Positive Airway Pressure) and only delivers oxygen on-demand, reducing the amount of oxygen that is consumed. The PortO2Vent has a built-in pressure gauge which shows airway pressure and acts as a safety feature to ensure that patients receive the correct amount of CPAP set by medical protocol.

- Conserves oxygen by delivering oxygen on the inspiratory cycle only
- Handles flow requirements with ease, regardless of the CPAP level selected, and will match any peak inspiratory demand while supplying a high FiO2
- Built-in manometer displays real time pressure readings
- Divert and/or filter exhaled patient airway from caregiver
- Small volume nebulizer (SVN) can be used in line
- Operator adjustable CPAP provides the ability to titrate to effect
- Masks provide superior seals and comfort

VAR® AUTOMATIC RESUSCITATORS

Emergency medical personnel need devices that can help them save lives in the field. VORTRAN Medical has developed devices that will help EMTs and paramedics to ventilate patients in difficult situations and to save them time and effort. The VAR (VORTRAN® Automatic Resuscitator) allows for hands-free resuscitation, which gives the clinician an opportunity to provide superior patient care. The VAR will effectively ventilate patients during transport, while maintaining a consistent breathing rate and ET/CO₂. The VAR is portable, compact, disposable, and optimizes EMS personnel performance in many difficult situations

- Maintains victims' breathing while they are being extricated from vehicle accidents
- The VAR weighs less than half a pound and is ideal for use during helicopter transport
- A force multiplier for mass casualty incidents
- Can be operated without batteries or electricity
- Can be stockpiled for up to five years for emergency disaster preparedness
- Provides patients with consistent reliable hands-free resuscitation

2421-40600	E-Vent Case Manifold System	\$1059.99 ea

LSP AUTOVENT™ 2000/3000 AUTOMATIC TRANSPORT VENTILATORS

The LSP AutoVent series integrates field experience and engineering excellence, producing a lightweight, transportable automatic ventilator. Both the AutoVent 2000 and 3000 meet the American Heart Association standards for automatic ventilators. Designed for patients over 44 pounds, both units utilize state-of-the-art pneumatics to assure reliable, time-cycled, constant flow capabilities driven by a minimum of source gas. The additional capability of adjustable inspiratory time makes the AutoVent 3000 ideal for institutional applications. Independent controls for rate and tidal volume on the AV2000, and the additional inspiratory time settings on the AV3000, can be adjusted quickly and monitored at a glance. The AutoVents may be used with resuscitation masks or endotracheal and tracheostomy tubes.

Extend the life of your equipment with a BoundTree Medical service plan

WORRY FREE ZONE

NEWPORT™ HT70 PLUS VENTILATOR

The Newport HT70 Plus ventilator is a lightweight, portable vent that provides both invasive and noninvasive (NIV) ventilation capabilities, with CPAP and BPAP breath support features. Whether your needs are for short transports or lengthy critical care travel, the Newport ventilator is versatile enough for home care, long-term care or hospital applications.

- Flexible – use in any mode or breath type, oxygen monitor alarms, on-screen help guides.
- Portable – weighing 15 lbs and featuring rugged construction, the Newport’s battery can last up to 10 hours, and is swappable with no interruptions.
- Versatile – critical care to quick transports, home and long term care as well as hospital use with features that include waveform graphics, on-airway flow sensor and O2 cylinder time calculator.
- User friendly – larger format, full color touch screen, battery time estimator, on-screen help guides and customizable presets.

OXYGEN EQUIPMENT

Oxygen Ventilators

PNEUPAC® PARAPAC PLUS™

The paraPAC plus™ includes CPAP, internal PEEP and manual ventilation mode to comply with AHA guidelines. The new CPAP accessory allows clinicians to quickly titrate to the appropriate cm H₂O pressure settings and easily make adjustments to meet patient's needs on the go. At 5.3 lbs., this new Smiths Medical transport ventilator is 30% lighter, has louder electronic audible alarms, a luminescent manometer dial which is bright in low-light conditions, has an improved aesthetic & streamlined look and an increased MRI spatial gradient of 7.5 Tesla or 750 Gauss/cm.

2421-31001	ParaPAC Plus w/CPAP, Alarms, Internal PEEP, MRI, Manual Ventilation Mode	\$7189.99 ea
2421-30001	ParaPAC Plus w/Alarms, MRI, Manual Ventilation Mode.	\$6029.99 ea
2421-34010	Circuit for Model 310, Single Use	\$194.90 10/cs

2430-36006	CPAP Circuit Medium Mask, Single Use	\$305.94 6/cs
2430-36106	CPAP Circuit Large Mask, Single Use	\$305.94 6/cs

PNEUPAC® PARAPAC VENTILATOR

The paraPAC is a powerful and compact gas powered ventilator which meets JAMA guidelines for adult, child, and infant ventilation during CPR. The frequency control varies the breathing rate from 8 to 40 per minute and is color coded with the tidal volume control which gives volumes from 1300 ml to 70 ml. The paraPAC is equipped with a two-point blender of 100% O₂ or an air mix of 50% O₂. It also has adjustable relief pressure of 20 to 80 cm H₂O with optional audible alarm. If the patient makes any spontaneous breathing effort, oxygen is automatically taken from the integral demand valve. If this breathing is inadequate for the patient, then the ventilator still delivers minimum ventilation but delays each breath appropriately to synchronize with the patient's breathing effort. If the patient breaths adequately, then the ventilator becomes inhibited and oxygen is supplied by the demand valve only. [10/pk]

- Optional PEEP facility
- MRI compatible up to 3 Tesla
- Pneumatically powered

531001	paraPAC Ventilator	\$6729.99 ea

532003	Disp. Circuit (Latex-free)	\$18.99 ea \$189.90 pk
530102	Ventilator Transport Bag.	\$239.99 ea

PNEUPAC® VR1

The Pneupac VR1 emergency ventilator is a simple, portable ventilator packaged into a lightweight, palm-sized unit. Rapid setup, ease of use and key clinical features make the VR1 ideal for managing airway emergencies wherever they occur: in transport situations, industrial or commercial settings, hospitals or remote locations. MRI compatible. Optional PEEP capability. Includes regulator and circuit. Meets AHA Guidelines. [10/pk]

- Linked Manual Controls: Manual button on top of unit and lever on bottom of unit that moves in any direction allowing flexibility in all situations
- Tidal Volume/Frequency Control: Inter-dependent single control enables quick set-up for patient requirements
- Relief Valve: Set at 40 cmH₂O with loud and distinctive alarm to alert operator of excess pressure
- Gas Supply Input: 40-150 PSI

2421-29901	Pneupac VR1 Ventilator	\$2829.99 ea

532003	Disp. Circuit (Latex-Free)	\$18.99 ea \$189.90 pk

THE AHP300 TRANSPORT VENTILATOR

The AHP300 is a new broad-featured transport ventilator designed to meet the specific needs of modern EMS response. It features Pressure or Volume Control, CPAP / Bi-Level Support, A/C or SIMV, and full FiO2 blending capability. Its single panel control interface is easy to navigate, easy to clean, and rugged. It also features quick start programmable presets, O2 Conserve, a 7.5 hour battery life, and carries a low cost of ownership.

Broad Featured Capability:

Invasive and non-invasive support for infant (5 kg and up) to adult patients, with a flexible array of ventilation options including Pressure Control/Volume Control ventilation, SIMV/ Assist Control spontaneous breath support, and stand-alone CPAP/BiLevel support.

Enhanced Ease of Use:

- The AHP300 offers value-added features for intra-hospital and inter-hospital transport.
- *Quick Start Ventilation* – Featuring programmable presets, the AHP300 allows trained caregivers to rapidly recall up to 5 saved ventilation protocols.
- *Long Battery Life* – Up to 7.5 hours on internal battery, with auxiliary battery capability for up to 21 hours of battery life.
- *Oxygen Conserve Mode* – Allows the use of low pressure sources (oxygen concentrator, liquid oxygen, etc.) to extend available oxygen.

Multi-Environment Capability:

For everyday transport or evacuation from extreme environments, the AHP300 has you covered. It features rugged shock and vibration resistance, and IPX22 water resistance.

Low Cost of Ownership:

Simple preventive maintenance schedule along with low-cost battery and repair parts result in significant savings and lower cost of ownership than comparative broad- featured ventilators.

LSP SINGLE PATIENT USE VENTILATION CIRCUIT FOR AUTOVENT 2000/3000

More economical than a disposable BVM, the LSP single patient use ventilation circuit may be used with all AutoVents and bag mask resuscitators. Includes built-in bacteria and viral filtering system with a viral efficiency rating in excess of 99.9%. Clear valve assembly allows for easy visualization of the valve function and the presence of foreign material due to patient coughing or vomiting. Equipped with an external 19 mm outside diameter PEEP port for compatible use with standard PEEP valves. 15 mm inside diameter patient connection. 22 mm outside diameter resuscitator connection. LIFE SUPPORT PRODUCTS EMT RESUSCITATOR

The LSP EMT Resuscitator provides clinicians with greater versatility, improved safety and enhanced performance over similar devices. Delivers 40 liters per minute during the manually triggered breath. During the spontaneous breath, the EMT Resuscitator provides a low initial opening pressure, and a built-in pneumatic circuit provides gas flow as high as 120 LPM. The EMT Resuscitator opens to ambient air in the event of gas power failure. Also includes a secondary safety pressure relief to relieve pressure at 70 cm H2O. Can be cold sterilized, gas sterilized or autoclaved.

530575	Resuscitator only	\$468.99 ea
535751	Resuscitator w/6' Oxygen Hose	\$519.99 ea

LSP ELDER CPR/DEMAND VALVE

Features include easy cleaning and sterilization, anodized aluminum alloy/polycarbonate construction, 100% oxygen delivery on every breath and a lightweight, compact, easy-to-use design.

(A) 534102	Elder CPR/Demand Valve with 6' Hose	\$353.99 ea
(B) 534103	Elder CPR/Demand Valve with 6' Hose, Trigger	\$404.99 ea

LSP CPR/DEMAND VALVE

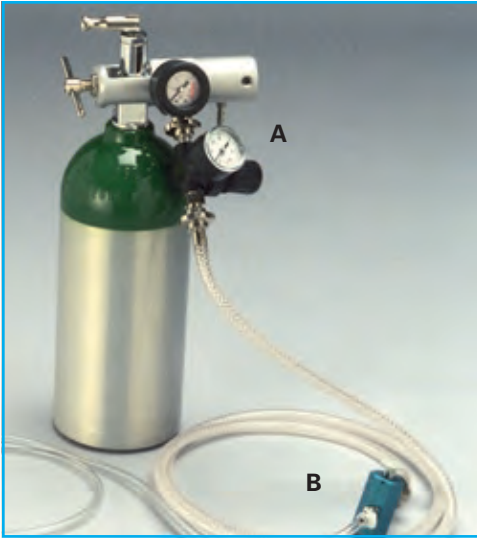

LSP continues to increase effectiveness of CPR with its resuscitator and inhalator in one unit. Two decades of development have refined the LSP demand valve into the most dependable, rugged, and easy-to-use oxygen powered resuscitator available. Designed to provide 100% oxygen to breathing or nonbreathing patients in an emergency situation. The valve can be utilized with a mask, endotracheal tube or tracheostomy tube. Available with a fixed 40 LPM flow rate.

OXYGEN EQUIPMENT

Ventilation Kits - Oxygen Regulators

(A) JET VENTILATOR INLINE PRESSURE REGULATOR

The regulator is recommended for use with the Jet Ventilator to reduce ventilating pressures and, as a result, control flow rates. It is particularly useful with barotrauma, pediatric and small adult patients. 1/4" DISS threads. Oxygen regulator and cylinder not included.

53183R	Inline Pressure Regulator	\$262.99 ea
---------------	-------------------------------------	-------------

(B) MANUAL JET VENTILATION KIT

The cricothyrotomy alternative. Just hook this unit up to a 50 PSI source, insert a 10 ga or 12 ga angiocath into the trachea, back out the needle, attach the patient tubing to the catheter cannula, and ventilate. Kit comes with one patient tubing, catheter connector and clamp set. Tubing, connector, and clamp set is needed for each patient.

531830	Jet Ventilation Kit*	\$327.99 ea
531832	Replacement Tubing	\$29.99 ea

CURAPLEX® ALL BRASS O2 REGULATOR

High quality at a great price, the Curaplex all-brass regulator is our best selling regulator. This regulator features 0-25 adjustable liter flow with two 50 PSI DISS connectors, and a barbed oxygen fitting. CE rated to 3000 PSI.

14288	All Brass 3000 PSI O2 Regulator	\$65.99 ea
--------------	---	------------

CURAPLEX® 286MB CLICK STYLE REGULATOR

This Curaplex piston-design regulator is made of chrome-plated brass and features a CGA 540 connection, 1.5" diameter UL listed gauge with protector, a locking ring to prevent removal, sintered bronze inlet filter for longer service life, and two DISS male outlets. The barbed fitting provides eleven flow positions: 0, 0.5, 1, 2, 3, 4, 5, 6, 8, 10, 15, and 25 LPM. Maximum inlet pressure is 3,000 PSIG, and outlet pressure is 50 PSIG.

30001	CGA 540 Click Style Regulator	\$85.99 ea
--------------	---	------------

To be used with H-M size tanks

** Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.*

CURAPLEX® BRASS OXYGEN REGULATORS

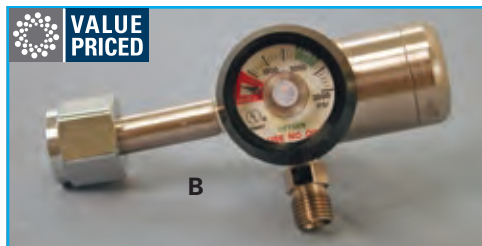

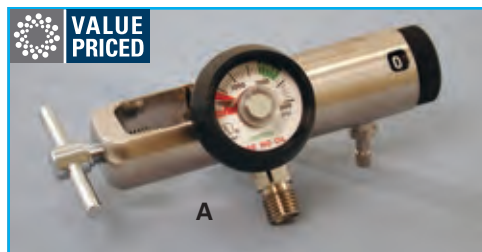

Features:

- Simultaneous operation of all outlets
- Internal safety relief valve set at 100-110 PSIG, opens if outlet pressure exceeds lockup pressures
- For use with portable oxygen cylinders

Specifications:

Supply Pressure	200-2200 PSIG
Outlet Pressure	40-60 PSIG
Outlet Fittings	Standard DISS with Check Valves
Liter Flow Fittings	Standard Barb
DISS-Exterior Finish	Chrome Plated Brass Fittings
Operating Temp.	-30°F to +125°F

(A) D2401	Oxygen Regulator, 2 DISS/1 Barb	\$180.99 ea
(B) D2404	Oxygen Regulator, CGA 540	\$149.99 ea
D2400	Oxygen Regulator, 1 DISS/1 Barb	\$174.99 ea
D2402	Oxygen Regulator, 1 Barb	\$160.99 ea

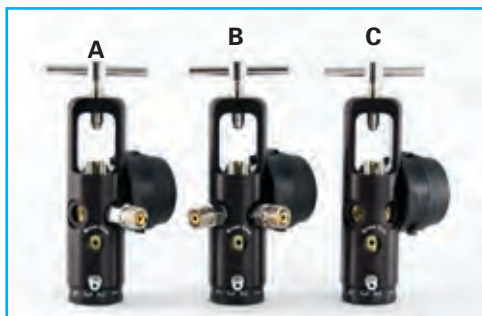

CURAPLEX® BRASS CORE OXYGEN REGULATORS

Durable oxygen regulators with special exterior gauge protector to help increase the life of the regulator and reduce damage to the gauge. Brass core reduces weight.

Specifications:

Supply Pressure	200-2200 PSIG
Outlet Pressure	40-60 PSIG
Outlet Fittings	Standard DISS with Check Valves
Liter Flow Fittings	Standard Barb
DISS-Exterior Finish	Chrome Plated Brass Fittings
Operating Temp.	-30°F to +125°F
Material	Anodized Black Aluminum Body

(A) D2300	Regulator, 1 DISS Outlet and 1 Barb	\$133.99 ea
(B) D2301	Regulator, 2 DISS Outlets and 1 Barb	\$146.99 ea
(C) D2302	Regulator, 1 Barb	\$122.99 ea

LSP RHINO™ ALL BRASS OXYGEN PRESSURE REGULATOR

The Rhino regulator features a unique protective aluminum shroud that is integral to the regulator body, and is designed to prevent gauge damage and contamination. The low profile Rhino gauge is the only shock resistant, virtually unbreakable gauge with a 10-year warranty against breakage. The Rhino regulator comes with a replaceable shroud lens cover which prevents dirt and liquids from contaminating it.

380051B	Regulator, 1 - 25 LPM	\$276.99 ea
380021B	Regulator, 1 - 25 LPM, Two 50 PSI Ports.	\$257.99 ea
D2013	Tee Handle	\$8.09 ea

OXYGEN EQUIPMENT

Oxygen Regulators

LSP BRASS OXYGEN PRESSURE REGULATOR 270-250B

This unibody regulator features 0-25 LPM constant flow controller only. Each LSP brass regulator has an internal safety relief valve that opens if the outlet pressure exceeds the lockup (zero flow) pressure by 25 PSIG.

380030B	Regulator 0 - 15 LPM	\$308.99 ea
380050B	Regulator 0 - 25 LPM	\$294.99 ea
380020B	Regulator 0 - 25 LPM, 2 DISS 50 PSI	\$268.99 ea
32-90-5014	Brass Regulator Gauge & Cover	\$66.99 3/pk
380415	Replacement Lens	\$7.09 ea

LSP BRASS OXYGEN PRESSURE REGULATOR

This regulator is designed for use with a large (H & M size) oxygen cylinder. It is supplied with a C.G.A. No. 540 connector for mounting.

380060B	Brass Regulator 2 DISS 50 PSI	\$220.99 ea
----------------	---	-------------

WESTERN REGULATOR

Western's heavy-duty, single-stage regulator is designed to provide 50 PSI pressure in an ambulance. The left-handed entry allows usage in the close confined space of a cabinet or under the cot bench.

020624	Regulator Top Mount	\$141.99 ea
380002	Contents Gauge 2"	\$29.49 ea

GAUGE SHROUD

The one-piece Gauge Shroud snaps securely to most oxygen regulators and is the perfect device to prevent gauge damage. In addition to protecting the gauge face, the Gauge Shroud is formed to support under the gauge as well. [250/cs]

D2210	Gauge Shroud	\$8.29 ea	\$2072.50 cs

MERET OXYGEN REGULATORS

(A) CRAAREG8715ME	Mini Oxygen Regulator, Blue – (0-15 LPM) Brass core / aluminum casing	\$48.99 ea
(B) CRAAREG8725B2D	Oxygen Regulator – (0-25 LPM WITH 2 DISS) Brass core / aluminum casing	\$51.99 ea
(C) 661294	Magnum Regulator– (0-25 LPM WITH 2 DISS) Brass core/Nickle plated brass casing	\$215.99 ea

! Meret offers a variety of oxygen cylinders from M2 cylinders to aluminum D, E and jumbo D cylinders. Contact your Bound Tree Account Manager for more information.

ALLIED HEALTHCARE REGULATORS

These brass, uni-body, CGA 870 regulators come equipped with an Ohmeda Style quick connect oxygen coupler. When combined with the Ohmeda Style quick connect hose assemblies, rapid deployment of transport ventilation is nearly seamless. The 90°-swivel fitting enables full rotation of the hose reducing looping and coiling.

Specifications:

Supply Pressure:	500 to 2200 psi
Outlet Pressure:	40 to 60 psi @ 500 to 2200 psi inlet pressure
Constant Flow Outlet Selections:	0-25 lpm
Safety Relief Pressure:	75 – 125 psi (up to 140psi on the B&F regulator)

2345-15390	90° Swivel Fitting w/ DISS O ₂ x DISS O ₂	\$67.99 ea

PRECISION FLOWMETER 0-25 LPM

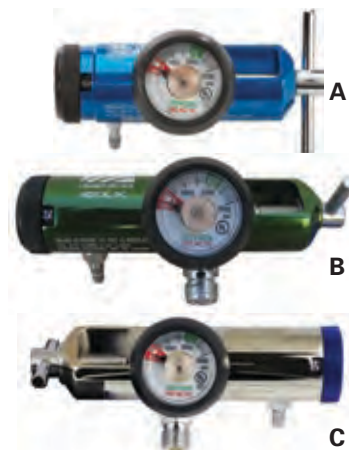

The lack of a flow tube and the durable metal body prevent the breakage problems long associated with standard flowmeters. The compact size allows the unit to fit into tight headwall areas and makes it virtually damage proof when other equipment is installed. Accuracy is assured at every flow setting without the need for a visible float as in Thorpe tube flowmeters. The knurled flow adjustment knob and the large easy-to-read numbers make flow adjustments easy.

387110	Flowmeter 0 - 25 LPM.	\$72.99 ea
---------------	-------------------------------	------------

CURAPLEX® O2 FLOWMETER

This click flowmeter by Curaplex is easy to use: Simply click it to the desired metered flow. Easy to use in demanding environments, this flowmeter is a good choice for emergency medical professionals. Includes a standard 1/8 NPT connection and is calibrated to 50 PSI inlet. Five year warranty. **Connectors not included.**

10856	CFM 0-25 LPM	\$49.99 ea
10857	CFM 0-15 LPM	\$49.99 ea

OXYGEN EQUIPMENT

Oxygen Regulators - Portable Oxygen Kit - Flow Selectors

MULTI-MANAGER O2 ADMINISTRATOR™

The Multi-Manager O2 Administrator is equipped with eight flow control valves manifolded together and mounted on a collapsible aluminum alloy tripod. The Multi-Manager can be connected in series with a second unit, increasing the number of patients treated to sixteen.

Features:

- Offers consistent and reliably controlled oxygen delivery to multiple patients
- Requires less space to store than conventional oxygen delivery systems

38908	Multi-Manager O2 Administrator	\$1470.00 ea
--------------	--	--------------

LSP PORTABLE RESUSCITATOR*

Includes a demand valve, brass regulator, suction aspirator, cuffed mask, 6' hose, cylinder handwheel, adult and child airways and a rugged plastic case. System is also available with the MTV 100 in place of the demand valve. Fits D and Jumbo D size cylinders. (D and Jumbo D size cylinders not included.)

537501	System	\$1229.99 ea
531751	System w/EMT Resuscitator	\$1339.99 ea

D4151	Aluminum Jumbo "D" Cylinder	\$120.99 ea

LSP CONSTANT FLOW SELECTOR VALVES

The LSP Constant Flow Selector Valve is designed for use on oxygen systems where metered supply of oxygen is required. Unlike standard flowmeters and flow gauges, the LSP selector valve has five distinct flow rate settings. These high accuracy valves offer repeatable flow rates regardless of orientation or visibility.

380233	1/8" Female NPT w/DISS Outlet, 0 - 15 LPM (shown)	\$167.99 ea
022330	1/8" Female NPT w/Barb Outlet, 0 - 15 LPM	\$183.99 ea
L233-050	Flow Selector Valve, 0 - 25 LPM	\$199.99 ea

OXYGEN FLOWMETER

Provides metered oxygen from any 50 PSI source. Dual taper scale provides flow settings from .05 to 15 LPM with flow rate of 65 LPM. Includes 50 PSI adapter and Ohio quick connect.

D4114 \$82.99 ea

ALUMINUM OXYGEN FLOWMETER

Features a 0-15 LPM flow rate, Lexan® flowtube and positive shut-off control valve that will not drift from a set flow rate over extended durations.

020629 \$41.79 ea

ALUMINUM OXYGEN FLOWMETER W/CHEMTRON QUICK CONNECT

Features a 0-15 LPM flow rate, Lexan® flowtube and positive shut-off control valve that will not drift from a set flow rate over extended durations.

CHROME BRASS OXYGEN FLOWMETER W/OHMEDA QUICK CONNECT

Features a 0-15 LPM flow rate, Lexan® flowtube and positive shut-off control valve that will not drift from a set flow rate over extended durations.

020637 \$86.99 ea

OCTI-FLO2™ PORTABLE EMERGENCY OXYGEN MANIFOLD*

The Octi-FLO2 is ideal for mass casualty, EMS and triage situations. The lightweight, portable system provides care for up to eight patients at once. The click-style flowmeters are individually controlled and let you lock into your exact flow from 0 – 25 LPM. The pressure gauge on the manifold helps ensure that every patient is receiving the correct flow. Standard DISS inlet and 100 PSI relief valve safety features. 8 oxygen masks, 4 nasal cannulas, 8 green disposable tapered barbs and a black, soft-sided carrying case included. Dimensions: 16" x 16" x 12". Weight: 13 lbs.

Oxygen Accessories

SURGEX® SURGE SUPPRESSING POST VALVE

When SurgeX is used with an all-brass regulator, it provides one of the safest oxygen delivery systems available today. The SurgeX helps eliminate the effects of adiabatic compression to a level well below the ignition point of materials in a regulator. It minimizes the risk of fire when hydrocarbons are present and helps eliminate particle impact due to its unique bayonet tube and bronze filter.

SSCOR QUICKDRAW®

The SSCOR Quickdraw is a compact and efficient suction unit. At just 2.6 lbs (1.18 kg), it is small and light enough to fit in an airway bag, enabling easy transportation to the patient's side. The Quickdraw can be powered by alkaline batteries (model #2403). The #2403 can use a disposable battery pack that will run the Quickdraw for three hours, or ten AAA alkaline batteries that will run the Quickdraw for over one hour. Both alkaline options offer a shelf life in excess of two years. The Quickdraw can also be powered by a rechargeable sealed lead acid battery (590520 and 590500).

SSCOR ONBOARD CANISTER CLIP

Use the SSCOR Onboard Canister Clip with the VX-2 and the Model 23002 Canister Holder to comply with SAE J3043. The Onboard Canister Clip will hold the Bemis 1200cc canister in place on the VX-2 and 23002 plastic canister holder to a force of 25G.

2223-00323	Onboard Canister Clip	\$69.99 ea
-------------------	---------------------------------	------------

SSCOR VX-2®

The SSCOR VX-2 is a portable aspirator that can be mounted in the action area of an ambulance to be used as onboard suction and removed with one hand to be used outside the vehicle. The optional charging retention bracket connects the VX-2 to vehicle power at all times, keeping it charged and using vehicle power for onboard use. The bracket meets SAE J3043 and EN 1789 standards for retention and holds the VX-2 secure to a force of 25G. The VX-2 features a battery condition indicator which will tell you the charge status of the battery when the battery is being used and when it is on charge. One year warranty. Three year battery replacement policy: If the battery does not perform to specifications during the first three years that you own the VX-2 with charging/retention bracket (#2310BV), the battery will be replaced for free.

NOTE: The charging/retention bracket is attached by the manufacturer and can only be added at the time of purchase. If the bracket is desired, please specify when ordering.

SSCOR DCELL SUCTION UNIT

The SSCOR DCell Suction device is the world's first and only full size portable suction device powered by off-the-shelf alkaline batteries. This makes the SSCOR DCell Suction ideal for emergencies when external power sources are not available. With D Cell alkaline batteries that can run the device for 6-9 hours* without the need to recharge, the SSCOR DCell Suction device ensures that medical vacuum is available when power sources fail. 3 year warranty.

Weight:	9.5 lbs/4.3 Kg (when batteries installed; batteries not included)	

SAE J3043 compliant when used with a 1200cc Bemis canister and the SSCOR Onboard Canister Clip.

* Run time is defined as the period of time that the device generates more than 300mmHg negative pressure. Total run time typically varies between 6-9 hours. These run time specifications are based upon tests using new Duracell® CopperTop batteries. Run time will vary depending on battery manufacturer, state of the charge, ambient temperature, and age of the batteries

LAERDAL® SUCTION UNIT (LSU)

The LSU provides device diagnostics with tests including an occlusion check, vacuum efficiency, maximum vacuum, system leakage and battery status. It also features a "no tools" replaceable battery, built-in charger and integrated vacuum regulation/power control in a rugged "bump-proof/splash-proof" design that is very quiet. The suction unit comes with: AC and DC cords, disposable canister with patient tubing, battery and directions. [48/cs]

- Device diagnostics check critical system functions
- Single knob controls vacuum and unit power
- Variable vacuum with five commonly used settings
- Capable of 30 LPM at 500+ mmHg setting
- Full "Rib Cage" design protects canister
- Quiet - less than 57db (A) at 500 mmHg free flow
- Night/day visibility LEDs indicate critical functions

LAERDAL SUCTION UNIT® (LCSU®4)

Laerdal's newest suction unit, the LCSU 4, combines rugged design with lightweight portability, an essential tool for every first responder. The LCSU 4 comes in two alternative canister versions; one configured with 800 ml canister, and one with 300 ml canister. Each version can easily be converted to the other by ordering additional parts. **Two Year Warranty.**

- "Clean" cabinet design
- "Click-in-place" 300 ml canister
- Disposable canister systems
- 800 ml canister - when extra volume is needed
- Easy to convert between 300 and 800 ml canister version
- Internal integrated filter systems for all canisters
- High efficiency filter kit
- Big vacuum regulator dial, with "clicking sound"
- LED display for use day or night
- Children vacuum range area on the control panel
- Arrows pointing the vacuum directions
- Wire Stand for stability
- High density bags

SUCTION-EASY™ DISPOSABLE SUCTION UNIT

This compact, powerful suction unit is designed to effectively evacuate the oral pharynx in emergency situations. It is small enough to fit inside a first responder bag or carried in a pocket. It has a bulb designed to provide a vacuum force of approximately 100 mmHg. Generated by the “rebound” of the bulb after each squeeze, contents are expelled into a collection bag attached to the outlet port. The bag and bulb hold well over 1000 cc’s. For convenience in disposal, the unit is also packaged in a bag with a two-part label so the user can peel off the top layer to expose a biohazard warning. [10/bx]

59610	Disposable Suction Unit	\$38.79 ea	\$387.90 bx

TECNU® POISON OAK AND IVY SKIN CLEANSER

Tecnu Poison Oak and Ivy Skin Cleanser cleans and decontaminates clothing and skin after exposure to poison oak, ivy and sumac. Its waterless cleansing formula has been proven to remove urushiol, the poison plants' oil, which causes an irritating itch and spreading rash. Used within 2 to 8 hours, Tecnu can remove urushiol before the rash begins. Once the rash has started, washing with Tecnu helps remove any oils on the skin, allowing the skin's natural healing process to begin without possible recontamination. [12/cs]

SPLASH CAP™ WOUND IRRIGATION SHIELD

SplashCap is a twist-on wound irrigation shield that allows a clinician to deliver hundreds of milliliters of irrigation fluid directly to a wound in seconds.

- **Faster Wound Irrigation:** Improved productivity and faster turnaround times.
- **Safer Built-in Shield:** Reduces risk of needle sticks and splattering when using bottle caps without shields.
- **Proven Pressure (PSI):** 4 - 15 P SI.
- **Universal Fitting:** Fits all major standard saline bottles.
- **Better Wound Care:** Standardize wound irrigation procedures in your department.
- **High Volume:** Deliver over 250 ml of irrigation fluid in seconds.
- **Kid Friendly:** No scary syringes.

B. BRAUN IRRIGATION SOLUTIONS

These high-quality irrigation solutions come in semi-rigid Plastic Irrigation Containers (PIC™) and are ready for immediate use off the shelf. Ideal for sterile overhead irrigation and easy non-drip pouring, PIC are lightweight, durable and shatterproof. They are made from biologically inert, non-toxic plastic – no PVC or DEHP. In addition, these PIC feature a sterile closure with recessed set port, a molded hand grip and a threaded screw cap. [16/cs]

DERMACEA GAUZE SPONGES

The Dermacea wound care product offering helps bridge the gap between controlling costs without compromising patient outcomes. Our Dermacea line is supported with over 100 years of experience in American made premium Kendall gauze. All cotton entering production for the Dermacea line is steam decontaminated. This provides an additional level of confidence, as the product is sterilized again as a finished good.

GAUZE SPONGES (STERILE 2'S)

The Sterile 2's are packaged in coated paper to reduced fiber debris. The specially designed easy open envelope is carefully sealed to the edges to prevent the contamination of the contents. The Sterile 2's are packaged two per envelope.

087770	2" x 2", 8 ply	\$1.83 50 pk/bx	\$54.90 30 bx/cs

CONTERRA TRAUMA PRO™ HOLSTER

The Trauma Pro Holster features a combination of scuba web, ballistics nylon and Velcro® for a strong, workable holster. A specially designed friction plate behind the glove pouch holds trauma shears without snaps or threaded loops. The expanding glove pouch is large enough to hold different combinations of gloves, towelettes, etc. The main pocket adjusts to hold a radio or cell phone and will close flat to your body when a radio is not carried. Small, open pockets on each side of the holster hold a mini light, pen or window punch.

Contents not included.

KITS BY CURAPLEX®

Curaplex® kits, brought to you by Bound Tree Medical, offer a diverse line of pre-assembled kits to meet your unique procedural needs. These kits provide a cost-effective, convenient way to prepare for a wide variety of emergency scenarios. Kitting the components in one convenient package allows you to respond quickly, providing immediate, targeted care to patients in need.

670060-KIT

See our Kits by Curaplex® section on **page 162** for select items from our kit offering!

TIME / RESPONSE

In an emergency scenario, timing is critical. Procedure-based kits are a targeted, efficient way to cut down on the time it takes to collect components for a given procedure.

SAVINGS \$

Curaplex® kits offer comprehensive savings when it comes to your operating costs and time. Our trained and experienced kitting specialists carefully analyze the best products and work hard to deliver convenient solutions at competitive prices.

CONVENIENCE / CONSISTENCY

With local protocols being different for every area, kits are an effective way to ensure compliance, because you can rest assured your kit will contain the same products every time for every run.

CUSTOMIZATION

Curaplex® kits are customizable, allowing you to choose your own preferred components and packaging. This versatile offering provides you control of your inventory and lessens wasted product.

Curaplex® kits help you prepare for emergency situations such as: the delivery of a baby outside of hospital care, administering an IV, responding to an overdose, preventing infections, tending to mass injuries and more.

800-533-0523 | www.boundtree.com

Always follow your local protocols regarding product use and procedures.

CURAPLEX® RING CUTTERS

61511	Ring Cutter	\$11.59 ea
61512	Replacement Blade	\$5.09 ea

FINGER RING CUTTER

An essential emergency tool that quickly removes rings from fingers. Chrome handle with safety lever slides protective plate between finger and ring. Large thumb screw operates a razor-sharp serrated saw. [4/pk]

400010	Ring Cutter	\$16.49 ea
400011	Blade Only	\$8.19 ea \$32.76 pk

CURAPLEX® BURN SHEETS

Sterile non-woven burn sheet is made of spun-bound polypropylene. Can be used as a wet or dry dressing. Measures 60" x 90".

30061MS	Disposable Burn Sheet	\$6.29 ea
----------------	---------------------------------	-----------

BURN SHEETS

These non-woven Burn Sheets are made of laminated tissue fibers that provide a sterile environment to protect the patient from infection. The construction resists tearing and is comfortable to patient contours. Large 60" x 96" sheet provides total body coverage.

150300	Roehampton Sheet, 60" x 96"	\$9.29 ea	\$222.96 24/cs
713001	Gam Sheet, 60" x 96", (not shown)	\$7.39 ea	\$88.68 12/cs

BURN SHEET

The Burn Sheet is made of a laminated spun bounded material and may be used to provide a sterile environment to protect a patient from infection. The burn sheet's durable construction resists tearing and can be used in many environments. Dimensions: 60" inch x 90". [12/cs]

276-7305EA	Burn Sheet, Blue	\$5.49 ea	\$65.88 cs

WATER-JEL® STERILE BURN DRESSINGS

Proven Safe & Effective Pain Relief ...for over 25 years!

Water-Jel pre-saturated Burn Dressings instantly cool and soothe burns on contact, without the need to moisten with saline or water and are a must for any EMS team.

Water Jel...

- Conforms to most EMS Protocols for burns under 25%TBSA, can be used on any burn.
- Consists of 96% water.
- Includes pre-saturated, non-adherent non-woven pad
- Does not increase the risk of hypothermia.
- Non-greasy, won't interfere with debridement.
- Does not contain Lidocaine
- Specially-designed Hand and Face dressings

710206	2" x 6" Dressing	\$4.43 ea	\$265.80 60/cs
710404	4" x 4" Dressing	\$5.29 ea	\$317.40 60/cs
710416	4" x 16" Dressing	\$11.19 ea	\$313.32 28/cs
710818	8" x 18" Dressing	\$15.79 ea	\$315.80 20/cs
711216	12" x 16" Face Mask	\$21.29 ea	\$425.80 20/cs
11749	8" x 22" Hand Dressing	\$20.49 ea	\$409.80 20/cs

WATER-JEL® CRITICAL BURN KIT*

Specially designed dressings for hand burns and facial burns help to more effectively manage these serious and complex burns and allow first responders to manage moderate to severe burns. The dressings can also be used on other areas of the body.
Kit size: 13" x 8" x 1.75"

Critical Burn Kit Contains:

- 2 8"x22" Hand Burn Dressings
- 1 12"x16" Face Burn Dressing
- 2 4"x4" Burn Dressings
- 2 Roller Gauze
- 1 Scissor
- 1 Instruction Card

1510-4132	Critical Burn Kit	\$114.99 ea	\$689.94 6/cs
------------------	-------------------	-------------	---------------

WATER-JEL® SOFT-SIDED BURN KITS*

The Water-Jel Large Soft-Sided Burn Kit includes the following: one 36" x 30" fire blanket / burn wrap; one 12" x 16" burn dressing with pre-cut facial holes; one 8" x 18" burn dressing; one 4" x 16" burn dressing; three 4" x 4" burn dressings; four 3" x 4 yds sterile gauze rolls; one pair of scissors; and an instruction card. [3/cs]

(A) EBK2-3 Soft-Sided Burn Kit, Large . \$182.99 ea \$548.97 cs

The Water-Jel Small Soft-Sided Burn Kit includes the following: one 12" x 16" burn dressing with pre-cut holes for facial burns, two 4" x 16" burn dressings, two 4" x 4" burn dressings, two 3" x 4 yds sterile gauze rolls; one pair of scissors, and an instruction card. [6/cs]

(B) EBK1-6 Soft-Sided Burn Kit, Small . . \$95.99 ea \$575.94 cs

WATER-JEL® BURN KITS*

Kit 710101 comes with one 12" x 16" dressing for facial burns with eye, nose and mouth slits, two 4" x 4" and two 2" x 6" burn dressings, one box of 25 single-dose Burn Jel® packets and one elastic bandage.

Kit 713601 comes with one 12" x 16" burn dressing for facial burns with eye, nose, mouth slits, one 8" x 18" and one 4" x 16" burn dressing, two 4" x 4" and two 2" x 6" burn dressings, one box of 25 single-dose Burn Jel packets and one elastic bandage. [5/cs]

(A) 710101 Water-Jel Burn Kit 101 . . . \$70.99 ea \$354.95 cs
(B) 713601 Water-Jel Burn Kit 3601 . . . \$94.99 ea \$474.95 cs

TRAUMA & WOUND CARE

Burn Kits - Burn Gel

CURAPLEX® BURN KIT W/ STERILE WATER*

The Burn Care Kit is exclusively distributed by BoundTree Medical. It contains supplies to treat a burn emergency in the field. It is packaged in a tear- and puncture-resistant case with two handles. Made of sturdy nylon.

Contains:

- | | |
|--------------------------------|-----------------------------------|
| 1 Padded, Reinforced Case | 4 Sterile Gauze Bandages |
| 2 60" x 90" Burn Sterile Sheet | 2 1" Tape Rolls |
| 1 20" x 30" Burn Towel | 2 1000 cc Sterile Water Bottles |
| 1 15" x 20" Burn Towel | 2 Sterile, Latex-free Glove, Pair |
| 1 12" x 12" Burn Towel | 1 Fluidshield Mask with Visor |
| 1 Face Mask Dressing | |

1510-77719 Burn Management Care Kit \$117.99 ea

WATER-JEL® BURN BLANKETS

Blankets consist of a 100% worsted wool carrier soaked in water-based, water-soluble gel. Relieves pain, cools the burn and protects against airborne contamination. Water-soluble, gel-soaked blankets won't stick to the wound and can be placed directly over clothing. [4/cs]

713630	Burn Wrap in Canister, 3' x 2.5'	\$90.99 ea	\$363.96 cs
713036	Burn Wrap in Foil Pouch, 3' x 2.5'	\$90.99 ea	\$363.96 cs
717260	Blanket in Canister, 6' x 5'	\$196.99 ea	\$787.96 cs
716072	Blanket in Foil Pouch, 6' x 5'	\$196.99 ea	\$787.96 cs

WATER-JEL® BURN JEL®

Unlike petroleum-based products which can actually trap the heat in the skin, Burn Jel draws heat out and begins dissipating it on contact. It relieves the pain of minor burns fast while it cools and soothes the wound.

(A) 710600	Single-Dose, 3.5 gm Packets	\$22.29 25/bx	\$534.96 24 bx/cs
(B) 710144	Bottle, 4 oz.	\$7.79 ea	\$186.96 24/cs

* BoundTree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.

MEDSTOPPER GAUZE

Medstopper Gauze can be used to stop severe bleeding and protect many types of wounds. Unfolded it can be used as a cover dressing for abrasions and burns. With expanded wound pad, 9" x 5.5". [60/cs]

533-MS-RG002EA	MedStopper Gauze, 9" x 5.5"	\$2.69 ea	\$161.40 cs
-----------------------	---------------------------------------	-----------	-------------

BLOODSTOPPER™ TRAUMA DRESSING

The BloodstopperTrauma Dressing can be used to stop severe bleeding and protect almost all types of wounds. The unique pressure roll and elastic wrap allows the dressing to stop severe bleeding of the head, trunk and/or limbs. Unfolded, the dressing can be used as a cover dressing for burns and abrasions, as a sling, to stabilize dislocated shoulders, to splint broken limbs or as a postpartum dressing for field deliveries. [60/cs]

080033	Bloodstopper	\$6.59 ea	\$395.40 cs
---------------	------------------------	-----------	-------------

THE EMERGENCY BANDAGE

An internationally patented first-aid device for the staunching of blood flow from traumatic hemorrhagic wounds in pre-hospital emergency situations. The product is so easy to use that even an injured person can apply the bandage with only one hand. [100/cs]

- Immediate direct pressure to the wound site
- Quick, easy, personal and professional application
- Significant per treatment time and cost savings

J2702	4" Emergency Bandage, White.	\$6.89 ea	\$689.00 cs
J2704	4" Emergency Bandage, Olive Drab.	\$7.69 ea	\$769.00 cs

CELOX™ HEMOSTATIC CLOTTING AGENTS

Celox Hemostatic Clotting Agent quickly helps to control severe arterial bleeding. Just pour it in, pack it and apply pressure. Celox is not exothermic and will not burn the victim or caregiver. Celox works in hypothermic conditions and clots heparinized blood. It is safe to use for the entire body including head, neck and chest wounds. Celox does not create heat and is easy to irrigate from the wound. Sold in a sterile, waterproof packaging. [100/cs]

1214-91515	Celox Hemostatic Clotting Agent, 15 g	\$18.49 ea	\$3698.00 cs
1214-83410	Celox Hemostatic Gauze, 10 ft, Z-Fold.	\$41.99 ea	
1214-83905	Celox Rapid Hemostatic Gauze, 5 ft, Z-Fold.	\$47.49 ea	
1214-83805	Celox Hemostatic Gauze, 5 ft, Z-Fold.	\$39.79 ea	

QUIKCLOT

QUIKCLOT COMBAT GAUZE® LE

QuikClot Combat Gauze® LE is a 3-inch x 4-yard strip of z-folded soft, white, nonwoven, hydrophilic gauze impregnated with kaolin, an inorganic mineral that is both safe and effective in accelerating the body's natural clotting cascade without any exothermic reactions or use of animal or human proteins.

QuikClot Combat Gauze® LE is packaged in an easy-tear pouch, contains an X-ray detectable strip for easy identification and has five year expiration. [50/cs]

1214-35034	QuikClot Combat Gauze, LE Z-Fold	\$44.99 ea	\$2249.50 cs
-------------------	--	------------	--------------

QUIKCLOT COMBAT GAUZE®

QuikClot Combat Gauze® is a 3-inch x 4-yard strip of z-folded, soft, white, nonwoven, hydrophilic gauze impregnated with kaolin, an inorganic mineral that is both safe and effective in accelerating the body's natural clotting cascade without any exothermic reactions or use of animal or human proteins.

QuikClot Combat Gauze® contains an X-ray detectable strip for easy identification.

Each QuikClot Combat Gauze® is packaged in an easy-tear pouch, vacuum sealed and has five year expiration. [50/cs]

G1284	QuikClot Combat Gauze, Z-Fold.	\$44.99 ea	\$2249.50 cs
--------------	--	------------	--------------

QUIKCLOT® EMS

QuikClot® EMS 4x4 Dressing is a 4-ply, 4-inch x 4-inch, soft, white, nonwoven, hydrophilic gauze impregnated with kaolin, an inorganic mineral that is both safe and effective in accelerating the body's natural clotting cascade without any exothermic reactions or use of animal or human proteins. Each QuikClot® EMS 4x4 Dressing is packaged in an easy-tear pouch and packed 3 per clear poly bag.

QuikClot® EMS Rolled Gauze is 3 inches x 4 feet of soft, white, nonwoven, hydrophilic gauze impregnated with kaolin, an inorganic mineral that is both safe and effective in accelerating the body's natural clotting cascade without any exothermic reactions or use of animal or human proteins. Each QuikClot® EMS Rolled Gauze is packaged in an easy-tear pouch.

1214-47344	QuikClot EMS, 4" x 4".	\$30.79 3/pk	
1214-47548	QuikClot EMS Rolled Gauze, 3" x 48".	\$20.49 5 pk/bx	

QUIKCLOT ACS+® AND QUIKCLOT 1ST RESPONSE

QuikClot ACS+ (Advanced Clotting Sponge) and QuikClot 1st Response are easy-to-use devices made from zeolite beads in a sterile, non-adherent mesh bag. Simply apply the product over bleeding areas to speed clotting and treat injuries while waiting for advanced medical help. Each package of QuikClot ACS+ contains one 3.5 oz hemostatic sponge.

1214-10016	QuikClot ACS+, 100 gram	\$30.79 ea	\$769.75 25/cs
1214-10225	QuikClot 1st Response, 25gm Sponge	\$42.45 5 pk/bx	\$849.00 20 bx/cs

CHITO-SAM 100 CHITOSAN HEMOSTATIC DRESSINGS

The Bolin Chest Seal (BCS) is a sterile occlusive chest wound dressing for treating open pneumothorax and preventing tension pneumothorax that result from gunshots, stab wounds or other penetrating chest trauma. The patented triple-valve design of the BCS allows air and blood to escape while preventing their re-entry, thereby eliminating any unwanted gas or liquid exchange at the trauma site.

1214-00420	Chito-SAM 100, Single Ply, 4in x 4in	\$12.09 ea	\$483.60 40/cs
1214-00620	Chito-SAM 100, Z-Fold, 3in x 6ft	\$36.79 ea	\$551.85 15/cs

SAM[®] Chest Seal

6 YEAR
SHELF LIFE

The SAM Chest Seals are designed to treat open chest wounds, a life-threatening condition that can lead to tension pneumothorax.

TECHNOLOGY

DURAVALV

The Valved SAM Chest Seal features patented DURAVALV technology which provides low-resistance flow of air out of the chest cavity while preventing ingress. The design and rugged construction of the dome protects against occlusion and obstruction of the air channels from direct external pressure such as blankets, dressings or body armor.

The SAM Chest Seal is constructed of transparent flexible polyurethane. The hydrogel adhesive aggressively adheres in the presence of hair, sweat, blood and sand. NIGHT VISION OPTIMIZED - The SAM Chest Seal is designed for use in global combat zones.

- Meets Co TCCC Preferred Features for Chest Seals
- Meets Military Standard 810G

- NOT made with natural rubber latex.
- Sterile
- The SAM Chest Seal is biocompatible (cytotoxicity, irritation, and sensitization tested per ISO 10993)

THE SAM CHEST SEAL - available - with or without VALVE

1216-01103	NON-VALVED	Includes 2 Non-Valved Chest Seals	\$28.49 - 2 pk

CURAPLEX® SELECT HALO SEAL & HALO VENT

LATEX FREE

VALUE PRICED

(A) HALO SEAL

The HALO Seal was specifically developed for casualties with excessive bleeding, heavy perspiration, or very wet and extreme environments. The HALO seal features a highly aggressive adhesive, enabling it to conform and adhere to all contours of a patient's body; durable packaging and material which maintains the product's integrity when folded or crumpled; and a large pull tab that facilitates easy, quick application. Used by many military and law enforcement services domestically and internationally, the HALO seal is manufactured in the US, and exclusive to BoundTree Medical.

Features and Benefits:

- Each package contains two (2) seals to treat both entrance and exit wounds
- Total occlusion with excessive blood, dirt or heavy perspiration present
- Oval shape
- No vent to occlude
- Large pull tabs to facilitate removal or venting of wound
- Adhesive reseals after venting
- No residue once removed
- Durable protective packaging
- Integrity maintained when folded
- Performing temperature range up to 140°F
- 3-year shelf life
- Dimensions: 6.5" x 5.5"
- Manufactured in the USA
- No latex used in the manufacturing of this product

(B) HALO VENT

The HALO Vent is a non-resorbable and non-sterile occlusive wound dressing intended to cover a wound, to provide or support a moist wound environment and to allow the release of gases and fluids. Includes one vented seal and one non-vented seal.

G1163 HALO Seal, 2/Pack \$16.99 ea

G1164 HALO Vent \$19.99 pk

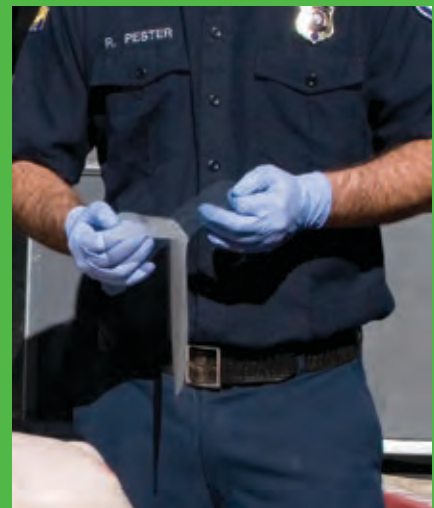

CURAPLEX® SELECT HALO XL TRAUMA DRESSING

The HALO XL Trauma Dressing was specifically developed for casualties with excessive bleeding, heavy perspiration, or very wet and extreme environments. The HALO XL features a highly aggressive adhesive, enabling it to conform and adhere to all contours of a patient's body; durable packaging with four notched corners for easy opening and material which maintains the product's integrity when folded or crumpled; and a large pull tab that facilitates easy, quick application. The Halo XL also performs without loss of adhesion in extreme temperatures. Used by many military and law enforcement services domestically and internationally, the HALO XL is manufactured in the US, and exclusive to BoundTree Medical.

Features and Benefits:

- Superior Hydrophilic gel adhesion
- Occlusive seal in the presence of excessive blood or heavy perspiration
- No vent to occlude
- 100% Translucent
- Large pull tab for easy removal
- Can be utilized to hold other dressings in place
- No residue once removed
- Durable protective packaging
- Notched on all four corners for easy opening
- Performs under extreme temperatures (-40°C) -40° F to (65°C) 150°F
- 3-year shelf life
- Dimensions: 8.5" x 12"
- Manufactured in the USA
- No latex used in the manufacturing of this product

G1185 HALO XL Trauma Dressing \$18.99 ea

SAM[®] Junctional Tourniquet

 MADE IN THE USA

FOR HEMORRHAGE CONTROL & PELVIC IMMOBILIZATION

The SAM Junctional Tourniquet (SJT) is designed to control bleeding where standard extremity tourniquets would not be effective, for example in blast injuries resulting in high level amputations and pelvic fractures. It can be used in the inguinal and axillary areas.

TECHNOLOGY

The pelvic binder's patented TRUFORCE buckle provides a proven safe and effective force to stabilize and secure pelvic fractures. This is vital in high stress environments where over or under tightening could be harmful.

TRUFORCE™

TCD™

The target compression device inflates quickly. It compresses major blood vessels reducing high-pressure, high-volume bleeding. It contains a pressure relief valve to prevent over-inflation. Two can be used to occlude blood flow bilaterally.

The SAM[®] Junctional Tourniquet is compact, easy to use and quick to apply. The rugged design ensures that the device stays securely attached to the patient during transport. Exceeds MIL-STD-810g requirements.

1880-93102	SAM Junctional Tourniquet, 2 Target Compression Devices	\$403.99
1880-93111	Target Compression Device, Hand Pump	\$139.99
1880-93112	Target Compression Device, Hand Pump and Extender	\$166.99
1880-93113	Hand Pump Only	\$ 25.99
1880-93114	Extender Only	\$ 12.99
1880-93100	Pelvic Sling Belt Only	\$132.99

1880-19231

SOF™ TACTICAL TOURNIQUET

Many of the world's most elite and experienced warriors have chosen the SOF Tactical Tourniquet for its outstanding ability to control severe bleeding, high level of reliability and ease of application. For law enforcement officers, application of the tourniquet is similar to the use of a hobble. This existing level of familiarity reduces training time and aids in the effectiveness of the device.

TCCC Recommended!

1880-19231	SOF Tactical Tourniquet Wide, 1.5"	\$36.99 ea
1880-15620	SOF Tactical Tourniquet, 1"	\$33.99 ea

MILITARY EMERGENCY TOURNIQUET (MET) GENERATION II

The Military Emergency Tourniquet (M.E.T.) can be applied within seconds by an appropriately trained soldier, with only one hand. A simple, one-time use device, the M.E.T. does not rely on small mechanical components to lock. The M.E.T. is not inhibited by mud, blood, saltwater corrosion or fine granular sand. Its unique non-slip backing prevents the M.E.T.'s pull strap from backing out after being pulled through the windlass and buckle.

1880-13703	Military Emergency Tourniquet Gen II Multicam	\$61.99 ea
------------	---	------------

COMBAT APPLICATION TOURNIQUET (CAT)

The C-A-T® utilizes a durable windlass system with a free-moving internal band providing true circumferential pressure to the extremity. Once adequately tightened, bleeding will cease and the windlass is locked into place. A hook and loop strap is then applied, securing the windlass to maintain pressure during casualty evacuation.

Product Enhancements and Features:

- Reinforced windlass clip and highly visible security tab includes a writeable area to record the time of application
- Featuring NAR's Red Tip Technology™ with a red elliptical tip to assist user in locating and threading during application
- True, one-handed application tourniquet
- Designed to perform in all weather conditions

FIXED FLANGE NASOPHARYNGEAL AIRWAYS

This kit prepares you to assist a variety of patient sizes who may need airways in an emergent situation. It contains a set of various sizes of Robertazzi style nasopharyngeal airways. These soft and flexible airways resist collapse or kinking while safely entering the nasal passage. Kit comes with packets of lubricating jelly. Latex free.

028055	Set of 6 in Case (Sizes: 20, 24, 26, 28, 32, 36FR)	\$33.29 set
028056	Set of 5 in Bag (Sizes: 20, 22, 24, 26, 30FR)	\$33.29 set

CURAPLEX® NASOPHARYNGEAL AIRWAYS

For nasal airway management. The nine-pack kit contains one airway of each size, from 20F-36F. Does not contain packets of lubricating jelly. Made from soft PVC. Latex free.

36619	Set of 9 in Bag (Sizes: 20, 22, 24, 26, 28, 30, 32, 34, 36FR)	\$21.99 9/pk
--------------	---	--------------

ADJUSTABLE FLANGE NASOPHARYNGEAL AIRWAYS

This compliant silicone and latex airway conforms to the nasopharyngeal anatomy while the beveled tip eases insertion and reduces injury to nasal polyps. Individually packaged.

020036	Set of 4 in Bag (Sizes: 22, 26, 30, 34FR)	\$39.99 set
020055	Set of 5 in Case (Sizes: 28, 30, 32, 34, 36FR)	\$52.99 set
020037	Set of 6 in Bag (Sizes: 20, 22, 24, 26, 28, 30FR)	\$57.99 set

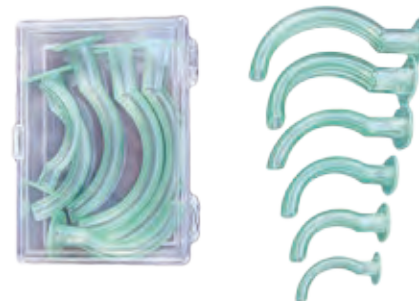

CURAPLEX® COLORED BERMAN ORAL AIRWAYS

Curaplex colored Berman Airways are available in multiple colors for easy identification. These devices are designed to maintain patient airways and improve ventilation efficiency.

13027	Set of 8 in Bag (40 mm, 50mm, 60mm, 70mm, 80mm, 90mm, 100mm, 110mm)	\$2.81 8/pk
--------------	--	-------------

CATH-GUIDE ORAL AIRWAY KIT

This airway kit contains a set of Cath-Guide airways (sizes 6, 7, 8, 9, 10, 11 and 12) in a compact storage case for ease of access and portability. Airways are contoured for patient comfort, made of a soft, pliable vinyl.

020008 Set of 6 in Case (Sizes: 6, 7, 8, 10, 11, 12) \$14.69 ea

LMA SUPREME® PLUS PACK

The LMA Supreme® is a single-use, supraglottic device created as an alternative to conventional, tracheal intubation. It features a built-in drain tube designed to channel fluids and gas away from the airway. The elliptical shape and integrated bite block facilitate proper placement and prevent kinking. Each LMA Supreme comes packaged sterile for one-time use. The LMA Supreme Plus Pack includes the LMA Supreme, syringe and lubricant in a conveniently packed plastic bag [10/bx]

- Fixation tab helps maintain proper cuff depth
- Integral bite block
- Elliptical airway tube is stable in situ and allows for easy placement and no kinking
- Drain tube
- Larger pre-curved cuff for improved fit and effective seal
- Molded fins protect airway from epiglottic obstruction
- Reinforced tip and molded distal cuff resist folding

AURAGAIN™ LARYNGEAL MASK KITS

The AuraGain™ laryngeal mask satisfies 3 fundamental airway management needs by integrating gastric access and intubation capability in an anatomically curved single-use device that facilitates rapid establishment of a safe airway.

- Integrated gastric access channel for managing gastric content
- The original anatomical curve, ensuring rapid placement
- Intubating capability using standard ET tubes
- Integrated bite absorption area prevents airway occlusion
- Pilot balloon identifies mask size and provides tactile indication of degree of inflation
- Navigation marks for guiding flexible scope
- MR safe
- Sizes 1, 1.5, 2, 2.5, 3, 4, 5
- Phthalate-free material

Thermal Angel® EMERGENCY PACKS*

The Thermal Angel is an in-line, battery-powered disposable, lightweight and completely portable blood and IV fluid infusion warming device, capable of intravenous application and irrigation warming.

- Disposable; Single Patient Use
- Maintains a constant 38°C ±3°C (100.4°F) at a flow rate of KVO to 150 ml/min given a fluid input temperature of 20°C (68°F) with a fully charged battery (TA-BCE or TA-UB1)
- Smart Disposable - Measures / adjusts output temperature 5000X per second
- A fully charged Standard Battery (TA-BCE) will last approximately 3 to 5 liters of IV fluid at various flow rates with an input temperature of 20°C (68°F) or 1 to 3 units of blood with an input temperature of 10°C (50°F).
- A fully charged Ultra Battery 1 (TA-UB1) will last approximately 1 to 2.5 liters of IV fluid at various flow rates with an input temperature of 20°C (68°F) or 1 to 3 units of blood with an input temperature of 10°C (50°F).
- Cost Effective - Single disposable remains with patient (up to 72 hrs)

GREAT SELECTION

TRAUMATIC RESPONSE KIT

Traumatic Response Kits (also known as Active Shooter Kits) are designed to provide products for the emergency treatment of more than one patient involved in a critical event. These kits are created for the administration of care when injury occurs outside of ambulance reach, aimed at helping control bleeding associated with traumatic injury, including gunshots and stab wounds. These kits are ideal for those in a wide range of professions, including police officers, first responders, security, and more. Comes in a large trauma bag.

FERNO® POWERFLEXX+® POWERED COT

The POWERFlexx+® Powered Ambulance Cot delivers 700 lbs. unassisted lift capacity. The cot lifts the weight, not the operator, reducing situations where operators may injure their back. The POWERFlexx+® Powered Ambulance Cot also features advanced power management features and in-the-fastener charging to keep you powered on every call, without having to carry around extra batteries or take them out to charge.

Specifications

Length Max	83" (211 cm)
Length Min	61" (155 cm)
Max Load Height	33" (84 cm)
Weight	133 lbs (60 kg)
Load Limit (Load Position)	700 lbs (318 kg)
Load Limit (Lowest Position)	1000 lbs (450 kg)
Width	24" (61 cm)

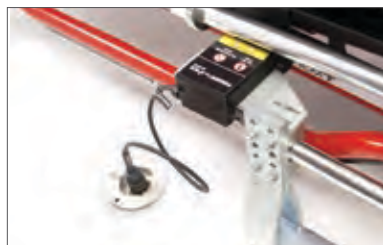

Features Include:

- A Wide Thumb Control**
Provide effective gripping and control from a variety of positions with or without gloves
- B 24 Volt DC Power Pack**
With Hydraulic actuator and dual lifting cylinders provides smooth and reliable lifting
- C Five-Position Drop Frame**
And multi-position foot-end lift bar reduce the cot length by 15" for movement in confined spaces, and provide true 360 degree turning radius in the lowest position
- D Reflective Labeling**
Provides nighttime visibility for added safety (optional personalized graphics available)
- E 700 lbs Lifting Capacity**
Raises the patient weight without lift assistance
- F All-Metal Frame Construction**
Provides strength, long service life, and exceptional performance with heavy patients

Cots

FERNO® 35X PROFLEX® COT

The Ferno 35X PROFlexx® X-Frame Ambulance Cot provides industry leading stability and safety and reduces the chance of injury to you or your patients. A rigid c-channel and carefully designed frame geometry reduce your chance of tipping or flipping the cot. And the exclusive EZ-Pull™ release handle reduces wrist strain and helps you position yourself before you assume the weight of the cot.

Specifications

Length Max	79" (201 cm)
Length Min	64" (163 cm)
Loading Height	35" (89 cm)
Weight	.92 lbs (42 kg)

10832	SofNet with Zipper Pocket

Features Include:

- A Wider Bed Surface and Head Frame**
Provide comfort and support for various size patients and extra elbow room during intubation and CPR
- B EZ-Pull™ Release System**
Reduces wrist strain and helps you position yourself before assuming the weight of the cot, allowing optimum lifting posture and reducing strain on your lower back
- C Five-Position Drop Frame**
Provides better leverage for lifting and loading, reduces the cot length by 15" for movement in confined spaces, and provides true 360° turning radius in the lowest position
- D Superior Stability and Center of Gravity**
Come from a longer, fixed front leg in the X-frame, a rigid C-channel running the length of the cot, and carefully-engineered frame geometry
- E All-Metal Frame Construction**
Provides strength, long service life, and exceptional performance with heavy patients

FERNO STAT TRAC HAS YOU COVERED FOR NEW AMBULANCE REQUIREMENTS

FERNO STAT TRAC COT FASTENING SYSTEM

The Ferno Stat Trac Cot Fastening System has been tested to and is fully compliant with the new requirements from the Society of Automotive Engineers (SAE). Stat Trac is a straight-in-track design that eliminates cot drift and the need to steer the cot in, minimizing operator strain on angled surfaces. A single-hand release and wide-angle entrance guide provide quick and easy cot loading.

3265-67086	Ferno 185 StatTrac Fastener Channel (Short Trac 86" Length)	\$1642.00 ea
661850	Ferno 185 StatTrac Cot Fastening System w/ Mounting Blocks Kit (Short Trac 86" Length)	\$1763.00 ea
3265-67096	Ferno 185-MT StatTrac Fastener Channel (Medium Trac 96" Length)	\$1903.00 ea
661850MT	Ferno 185-MT StatTrac Cot Fastening System w/ Mounting Blocks Kit (Medium Trac 96" Length)	\$2086.00 ea
3265-67103	Ferno 185-LT StatTrac Fastener Channel (Long Trac 103" Length)	\$1903.00 ea
FERCF1856	Ferno 185-LT StatTrac Cot Fastening System w/ Mounting Blocks Kit (Long Trac 103" Length)	\$2086.00 ea

After more than four years of testing and research, the Society of Automotive Engineers (SAE) has published their "Recommended Practice" concerning the forces that an ambulance cot, fastening system and patient restraints should be able to withstand in a 30 mile-per-hour crash. These requirements will be adopted into new standards, including GSA KKK-A-1822F and NFPA-1917. Traditional "Antler and Rail" fastening systems will NOT meet these new requirements. The requirements from SAE will apply to new ambulance builds contracted after July 1, 2014.

Get ready for the change and update your fleet from your "Antler and Rail" System to the Stat Trac Cot Fastening System to protect your crews and your patients from injury.

Cots

FERNO® 28Z PROFLEX® CHAIR COT

The 28Z PROFlexx® Chair Cot provides maximum versatility in confining environments. The 28Z transforms from a cot to a chair so you can easily maneuver through tight hallways, narrow staircases, and small elevators, without transferring the patient. Available with or without a lower hard tray.

Specifications

Weight	69 lbs (31.2 kg)
Load Limit.	700 lbs (318 kg)
Width	25" (63 cm)
Depth	48" (122 cm)
Load Height	27" (68 cm)

3211-81018	28Z PROFlexx Chair Cot with Hard Tray, Red
3211-81002	28Z PROFlexx Chair Cot with Hard Tray, Blue

6605132	28Z IV Pole
3262-17808	28Z SofNet with O2 Bottle Holder and Pouch

Features Include:

- A Versatile Patient Transport**
Provides easy transition from cot to chair position providing maneuverability and flexibility in challenging structural environments without the need to transfer patients
- B Unparalleled Maneuverability**
48" length in chair position provides the shortest length of any cot on the market for working in confined spaces such as tight hallways, small elevators and narrow staircases
- C Light Weight**
At 69 lbs., it's easy to operate
- D Ergonomic One-Hand Release**
Mechanism changes cot into one of three locked positions (chair/ intermediate/cot)
- E All-Metal Frame Construction**
Provides strength, long service life, and exceptional performance with heavy patients

FERNO® MODEL 40 STAIR CHAIR

Easy to maneuver by two EMTs, the Model 40 gets you in and out of cramped quarters. Two 5" stationary rear wheels enable the EMT to move the patient over most surfaces with minimal effort. Telescoping, two-position front handles allow the foot-end EMT to maneuver the patient without interfering with the patient's feet. Vinyl-coated nylon cover is simple to clean, resists stains, blood and bodily fluids. Two 7' quick-release patient restraints hold the patient securely. The Model 40 mounts to interior or exterior walls and is ideal for high-rise buildings or industrial settings.

Features Include:

- Stationary 5" rear wheels enable swift, easy transport over most surfaces
- Telescoping handles enable front-end EMTs to move without interfering with the patient's feet
- Easy to maneuver in cramped quarters
- Ideal for high-rise office buildings or industrial settings
- Available with a durable, easy-to-clean, molded plastic back and seat, with built-in clipboard holder, or with the original vinyl cover

Specifications

Weight:	19 lbs (9 kg)
Load Limit.	350 lbs (159 kg)
Width	20" (51 cm)
Depth Open	27" (69 cm)
Depth Folded	7" (18 cm)
Height.	36" (91 cm)

CALL 800-533-0523 FOR PRICING AND INFORMATION.

FERNO® MODEL 42 STAIR CHAIR

Designed to be stored in small places, the Model 42 Stair Chair functions well in confined areas such as narrow hallways and multiple-landing stairways. Four lifting handles with nonslip handgrips enable EMTs to move the patient safely and easily. Soft vinyl-coated cover is simple and easy to clean, resists blood, stains and bodily fluids. Locking safety latch maintains Model 42 in the chair position during use. Safety latch is manually released when the chair is folded for storage. Two 7' quick release patient restraints securely hold the patient.

Features Include:

- Specially designed for confined areas such as hallways or multiple-landing stairways anywhere access is severely limited
- Two 4" rear stationary wheels and 2" low-profile front guide wheels facilitate transport on most floor types
- Locking safety latch maintains chair position during use

FERNO® MODEL 107 STRETCHER/CHAIR

Ferno Combination Stretcher Chairs are designed to serve as a wheeled chair, a stair chair, and a flat stretcher. Sturdy, lightweight aluminum frames provides long-term durability, while the vinylcoated nylon cover wears well and is easy to clean and maintain. Each stretcher includes two 5' quick-release patient restraints and is available in burgundy or orange.

Features Include:

- Folding head-end posts double as lift handles and support legs and fold underneath the stretcher for storage.
- Foot-end wheels fold flat for storage and snap back into place.
- Fits squad bench post and wheel cups, for use as a second stretcher

FERNO® EZ-GLIDE EVACUATION STAIR CHAIRS

The Ferno EZ-Glide chair can be used as a stair chair, evacuation chair, and transport chair. Two rear tracks contact the lip of stairs, allowing them to glide over the edge of each step and eliminate the need to lift the chair and patient. This chair features an all-metal frame construction, which allows bariatric patient transport. The chair also features two 4 inch front swivel wheels and two 6 inch rear wheels with locks, a 5-position rear lift bar (from 37.5 inch to 63.5 inch), and 5-position front telescoping handles (from 5.4 inch to 19 inch). Includes a vinyl cover.

CURAPLEX® STAIR CHAIR

A stair chair designed with the transporter in mind, the Curaplex stair chair features four 5" stationary wheels for better ergonomic mobility with back-wheel locks to enhance ease of use and safety. Made of high grade aluminum, the chair chassis extrudes squarely to strengthen the core and support irregular weight disbursement by offering more PSI on each connection joint. This stair chair also features two-position telescoping front handles for maneuvering tight spaces. Finally, lifting handles were built with strong brackets and thick connection bolts to withstand tough jobs. The Curaplex stair chair is covered with vinyl-coated nylon that is stain and fluid resistant for convenient cleaning. Includes two quick-release patient restraints.

FERNO® EXL SCOOP STRETCHERS

Ferno's Scoop EXL Stretcher provides superior comfort and safety to patients who need spinal immobilization. The Scoop EXL eliminates the need for log-roll maneuvers, which significantly decreases movement to the cervical spine. Two hinged, interlocking pieces allow operators to bring the two halves together beneath the patient and gently scoop them up. Made from X-ray translucent, composite material.

Features

- Head section recessed to maintain proper cervical alignment.
- Supports a patient in the position found reducing risk of further injury.
- Easy-to clean surface is impervious to fluids.
- Thermally-treated polymer construction does not get too hot or cold, allowing for greater patient comfort.
- Four adjustable length options accommodate patients of different heights.

- Narrow foot end and split-apart design provide easier use in confined space immobilization.
- Oval profile and angled handles provide ergonomic ease of use

470012	Model 12 Emergency Stretcher, Orange	\$567.00 ea
---------------	--------------------------------------	-------	-------------

TAYLOR TITAN™ SOFT STRETCHER

The Titan™ Soft Stretcher is designed to keep patients and rescuers safe as they navigate the challenges associated with caring for bariatric patients.

- Cost effective, reusable, easy to store and durable
- Vital to have on the scene when space limitations prohibit use of standard EMS stretchers
- 16 SureGrip™ rubber handles ensure rescuers the comfort and stability of a firm grip, which provides easy lifting while transporting a patient
- Made of ultra-strong PVC and nylon webbing
- Designed for use with or without a backboard. Accommodates 16"-18" backboards (backboard not included)
- Easily disinfected and air dried
- Folds for space-saving storage in the accompanying custom Titan carrying case
- Lifting capacity of 1500 lbs.

3244-40802 Taylor Titan™ Soft Stretcher \$59.99 ea

FERNO® MODEL 108 POLE STRETCHERS

All Ferno Pole Stretchers feature heavy duty aluminum poles for easy handling and heavy duty, vinyl-coated nylon covers that resist stains, blood and bodily fluids. Nonslip handgrips help EMTs keep a firm grasp on the stretchers. Each stretcher is available in burgundy or orange. The Model 108-AF folds lengthwise and crosswise for compact storage.

5516-108-AF Model 108-AF Folding Pole Stretcher with Feet, 81", Orange \$349.00 ea

HARTWELL MEDICAL COMBICARRIER II®

The CombiCarrierII is two products in one, saving valuable budget dollars, payload weight and storage space. Auto lock latch system is designed to minimize training and increase reliability. It locks instantly during application and releases manually during removal of the patient. Concave patient surface provides excellent lateral support and improves patient's sense of security. Minimizes movement of the patient's spine during lifting and transport, no need to logroll.

3245-20016 CombiCarrierII w/Four 4-ft. Speed Clip Straps. \$949.99 ea
3142-32008 CombiCarrierII Head Immobilizer (not shown). \$134.99 ea

SKED® BASIC RESCUE SYSTEM*

Equipped for land, high angle and confined space rescues. Includes the SKED stretcher, Cordura® backpack for stretcher, horizontal lift slings, vertical lift sling, steel locking D carabiner, tow strap and eight carrying handles (four permanent, four removable). International Orange.

262200	SKED Basic Rescue System	\$759.99 ea
---------------	------------------------------------	-------------

CONFINED SPACE STRETCHER

The model SAF-300CS stretcher is 19" wide and designed for rescues where space is confined. Basket is 18 gauge, 1" hexagon mesh netting. Nylon web straps for securing at chest, abdomen, thigh and calf. Supplemental accessories to facilitate special handling needs are available. 81-1/2"L x 18-3/8"W x 7-3/4"H. 1500 lb load capacity. Weighs 23 lbs. Accommodates up to a 14" wide backboard.

470301	Confined Space Stretcher	\$368.99 ea
---------------	------------------------------------	-------------

LIGHTWEIGHT BASKET STRETCHER

Nylon web straps at chest, abdomen, thigh and calf. Adjustable foot rests for vertical lifting. Frame is 5/8" steel tubing; cross braces and runners are 3/16" x 5/8" flat steel. Basket is 18 gauge, 1" hexagon mesh netting. 80"L x 8"H. Widths: chest 22-1/2", abdomen 22", thigh 21-1/2", calf 20-1/2". Individual carton. Shipping weight 31 lbs. Carton size 83"L x 8"W x 24"H. **With leg dividers.**

260300A	Lightweight Stretcher	\$345.99 ea
----------------	---------------------------------	-------------

The SAF-300-W (without leg divider) is designed to accommodate most standard 16"W x 72"L full-length backboards. Also available with plastisol coating (SAF-300-PCW).

260300	SAF-300-W.	\$321.99 ea
260300WP	SAF-300-PCW w/Coating.	\$360.99 ea

STOKES-TYPE 2-PIECE SPLIT STRETCHER

Designed to rescue injured persons from locations where lengthy foot travel is mandatory. The stretcher breaks into two halves which can be backpacked to the point of rescue and assembled in seconds. Includes restraint straps.

Dimensions: 84-1/2"L, 24"W, 7-1/2"D

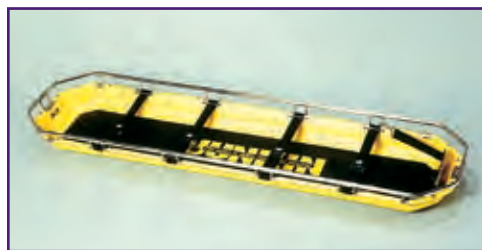

Load Capacity: 1200 lbs.

B0170 Stokes Type 2 Piece Split Stretcher. \$1019.99 ea

PLASTIC STRETCHER

The model SAF-200 stretcher is made of a yellow high-density polyethylene shell supported by a stainless steel outer rail and permanently attached with stainless steel semi-tubular rivets. Features molded runners, fully exposed outer rail, nonabsorbent foam pad secured to stretcher and four restraint straps. 84-1/2"L x 24"W x 7-1/2"D. 1200 lb load capacity. Weighs 31 lbs.

472000 Plastic Stretcher. \$789.99 ea

CURAPLEX® HEAVY-DUTY STRETCHER

A Bound Tree Medical exclusive heavy-duty version of the popular Reeves® Stretcher. Constructed of 20 oz. vinyl with double slats, padded handles and metal seat belt buckles with nylon seat belt webbing. The stretcher measures 29" wide and 79" long. The maximum weight capacity is 1,000 pounds. Five-year warranty.

47200 Bound Tree Heavy Duty Stretcher. \$476.99 ea

(A) REEVES® SLEEVE

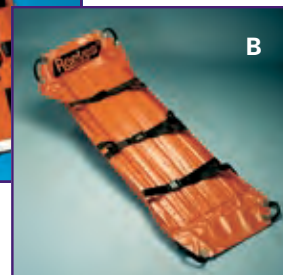

The Reeves Sleeve is easy to use, fast and secure. For use with standard backboards or orthopedic stretchers. Constructed of 18 oz vinyl-coated, stain-resistant nylon with 4,000 lb tested, seatbelt-type strapping and Fastex® side release buckles for quick and secure fastening. Steel oxide-coated rings are sewn to the underside straps for absolute weight suspension of any patient in the device. A carrying case is included for storage and handling of the Sleeve.

471220 "Sleeve" w/Case. \$759.99 ea

(B) REEVES® 101 STRETCHER

Constructed of two layers of 18 oz vinyl-coated nylon with five select grainwood slats for stiffening. Three web straps secure the stretcher around the body. Handles make it easy to carry. When closed, its compact size makes storage convenient.

476153 101 Stretcher. \$359.99 ea

FERNO® MODEL 71 BASKET STRETCHER

The Ferno Model 71 Basket Stretcher is made with a high-density polyethylene shell supported by a permanently attached, heavy-duty, aluminum frame. Molded-in runners and handholds make it easy to handle, and brass grommets are strategically located for quick use with Model 418-1 Adjustable Lifting Bridle (tag lines should always be used when lifting the basket stretcher). The shell is chemical, UV, rust, and corrosion resistant and a replaceable closed-cell foam pad is attached inside the stretcher for patient comfort. Four two-piece 5' quick-release patient restraints are simple to use and permit the rescuers to easily change the position of the straps to fit each patient.

Specifications

Weight 23 lbs (10 Kg)
 Load Limit. 600 lbs (272 Kg)
 Width 24" (61 cm)
 Height. 8" (19 cm)
 Length 86" (218 cm)

660571 Model 71 Basket Stretcher \$865.00 ea

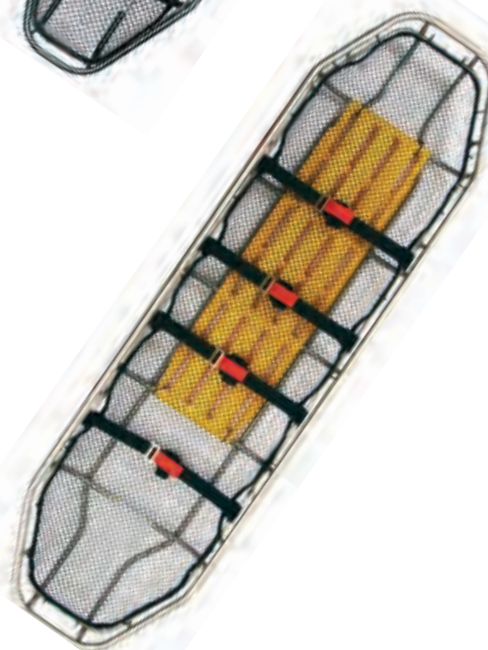

FERNO® GAZELLE BASKET STRETCHER

The Gazelle Series Stretchers are a basic rescue stretcher designed to be used in raise/lower operations. Features all-carbon-steel with MIG welded, 19mm tubular frame construction, and carefully designed frame geometry for the ultimate strength. Replaceable Durathene netting will not corrode and provides safety and comfort to the patient and rescuer.

Specifications

Weight 28.5 lbs (13 Kg)
 Load Limit. 900 lbs (408 Kg)
 Length 82.5" (211 cm)
 Width 24.25" (62 cm)

3242-10507 Gazelle Basket Stretcher \$406.00 ea

FERNO® TITAN BASKET STRETCHER

The Titan Rescue Basket Stretcher is a complete rethinking of the classic Stokes military style stretchers. The top rail is a full one-inch diameter making the stretcher easier to handle when carried for extended periods, and it has been reinforced with double tubing at the head and foot ends for extra strength during vertical raises and lowers.

Specifications

Weight 31 lbs (15 kg)
 Width 23" (59 cm)
 Height. 7.25" (16 cm)
 Length 83" (212 cm)
 Load Rating. 2500 lbs (1,134 kg)

3242-19920 Titan Basket Stretcher \$810.00 ea

FERNO® TRAVERSE RESCUE STRETCHER

Designed and constructed for both horizontal and vertical casualty evacuations. The lightweight and compact roll-up design makes this stretcher ideal for high angle and confined space rescue, as well as backcountry wilderness and helicopter operations. The wrap-around concept gives the patient a feeling of security and protects arms and sides from further injury during evacuation procedures.

- Constructed using an inner layer made from a tough high-density polyethylene sheet, which give the stretcher its rigidity when curved around the patient.
- Outer fabric shell is made using two different materials. The base fabric is a 1350 Denier Cordura nylon with a heavy PU coating, which has been specially woven to be as tough as possible to resist abrasion and cuts. The top layer is 1000 Denier Cordura.
- Carry handles and vertical lift attachment points are constructed from 2" webbing and are designed as structural attachment points for a lifting bridle.
- Plastic tubing on the carry handle makes for a much more comfortable carry for rescuers.
- Built-in color-coded full body adjustable harness restrains the patient securely in the stretcher so there is no need to fold over the head and foot end of the stretcher, which can cause discomfort to the patient.
- Padded straps in the shoulder and groin areas make for a comfortable fit, while the foot strap stops the patient from sliding down during vertical lifts.
- Six outer 2" web restraint straps further secure the patient into the stretcher by wrapping the stretcher around the patient's body using a two-bar steel buckle system, which is easy and quick to work with, even with gloves on.
- Includes a Cordura storage bag with backpack shoulder straps.

3242-97720 Traverse Rescue Stretcher.\$1034.00 ea

XTRACT®2

Weighing less than 3lbs, the Xtract®2 can easily be carried into the incident site and be available at point of injury. Innovative textile development allows the Xtract®2 to be dragged or lifted and survive the most severe conditions.

72013 Xtract2 \$299.99 ea

PATIENT HANDLING

Transfer Sheets & Boards - Rescue Equipment

SCHURE SLIDE™ PATIENT TRANSFER SYSTEM

The Schure Slide is used to transfer patients safely and easily from bed to stretcher and/or from stretcher to bed. The sliding action eliminates the need to lift the patient, removing the risk of possible back injury to emergency personnel. There are no steel rollers or hard surfaces to cause pain or discomfort to the patient, and the unique patented design allows patient transfer in any position. The Schure Slide is radiolucent and is nonstaining. Measures 18"W x 33"L.

5511-4755 Schure Slide \$85.99 ea

PRO-SLIDE™

The PRO-SLIDE is a patient transport device that has the extra strength and durability needed for EMS use. The PRO-SLIDE has the most hand holes available on the market (12). The PRO-SLIDE also has a lifetime guarantee (Under Normal Usage). HDPE Anti-Static Plastic. 3/16" x 18" x 72". 100% X-Ray translucent. Weight: 6 lbs. 12 hand holes.

B0196 PRO-SLIDE \$183.99 ea

Z-SLIDER® PATIENT TRANSFER SHEET

The Z-Slider is a friction-reducing patient transfer and repositioning sheet designed to prevent disabling back injuries to healthcare workers. It complies with OSHA recommendations and "No-Lift" State Laws.

3246-10220 Z-Slider \$106.99 ea

(A) CURAPLEX® TRANSFER SHEET

Curaplex's heavy-duty, vinyl-coated nylon transfer sheet. Eight sewn-in carrying handles, can also be used as a pole stretcher with poles inserted through 2" wide nylon webbing handles or side pockets. Red. 73"L x 44"W.

471341 Curaplex Transfer Sheet \$102.99 ea

(A) CMC RESCUE WATER RESCUE THROWLINE BAG SET

CMC Rescue combines Wellington's™ 7/16" x 75' Water Rescue Throwline in a special UV resistant, high-strength yellow mesh bag. It has an Ethafoam® floatation disc to keep the bag afloat for easier access by the victim, and the bag also includes a handle strap with quick release buckle.

72291275 Water Rescue Keep Bag \$181.99 ea

(B) WATER RESCUE ROPE BAG

The Water Rescue Throw Bag comes with 70' of polyester kernmantle rope. The bag has a drawstring on one end, a grommet on the other end, and a web carrying and throwing handle. The rope on the drawstring end is held while the bag and its contents are thrown to the victim. The bag measures 13" x 6", is made of heavy red Cordura® nylon and contains a styrofoam float.

72230 Water Rescue Throwline Bag Set \$84.99 ea

Bound Tree Medical offers an extensive line of products from leading rescue equipment manufacturers. Contact your Bound Tree Account Manager for specialty catalogs or quotes on equipment like ropes, webbing or rescue hardware.

CINCH RESCUE COLLAR

The Cinch Rescue Collar is a harness designed for safe recovery of victims in swift water or blue water, as well as cliff extrications, high rise and confined area rescues. This first line rescue device allows the victim to simply enter the harness with head and arms extended before tension is applied by the rescuer. The patient's weight will then release the connector, automatically cinching the collar snugly around the patient's chest and preventing the patient from slipping out in the event of becoming unconscious. The Cinch is durable and lightweight with a non-absorbent, closed-cell foam interior. The outer covering is tough, stain-resistant, washable Cordura®.

470593 Cinch Rescue Collar with Case \$347.99 ea

CMC PROSERIES PADDED RESCUE HARNESS

The waist and leg loops are made from three-inch web, backed by a full, four-inch wide closed cell foam padding. The padding is covered with 1000-denier Cordura® nylon. Quick-fit buckles allow fast adjustment for the best fit. The 1-3/4" web used for the waist-and-leg adjustment wraps continuously around the harness for maximum strength. Adjustable leg straps allow the leg loop height to fit tight to the body. The steel D-Rings in the front and back have a Mil-Spec proof load of 5,000 pounds and are large enough to take multiple carabiners. Web color is black.

72202174 Large, Blue. \$411.99 ea

72202175 X-Large, Blue \$411.99 ea

CMC RESCUE 8 WITH EARS

CMC designed their Rescue 8 with Ears for fire service, rescue and police tactical operations. The aluminum model has proven the excellence of the design in the field, working well on rope diameters from 7/16" to 3/4". The steel model performs exceptionally well in high-wear situations such as helicopter operations. Both are big enough to allow a safe lock off with larger diameter ropes, and the carabiner hold has enough room for extra carabiners. The steel model is drop forged and nickel plated. Large hole diameter: 3 inches.

72300850 Steel Rescue 8. \$168.99 ea

72300835 Aluminum Rescue 8 \$102.99 ea

VALUE PRICED

CURAPLEX® EMERGENCY MYLAR BLANKET

The cost-effective Curaplex aluminum Mylar blanket reflects up to 90% of body heat to keep patients warm. Waterproof and windproof. Dimensions: 52" x 84".

12945 Mylar Blanket \$1.46 ea

READY-HEAT II™ DISPOSABLE BLANKET

The Ready-Heat II is designed to warm patients quickly and effectively. It is comprised of three major components: the nonwoven blanket, the heating (chemical) element and the outer translucent polybag. Activation of the heating element occurs when the polybag is opened, and the blanket is removed and unfolded. Within only 10-15 minutes the Ready-Heat II will reach full operating temperature (approximately 104°F / 40°C), and will retain this temperature in excess of six hours. Two-year shelf life. [8/cs]

IMMOBILIZATION & SPLINTING

Extrication

FERNO® K.E.D.® AND K.E.D.® PRO

The FERNO K.E.D. and K.E.D. PRO are ideal for extricating and immobilizing patients from auto accidents and other confined spaces. The wrap-around design provides horizontal flexibility for easy application and vertical rigidity for maximum support of the spine, neck, and head during extrication. They immobilize the torso, head and neck, enabling prompt extrication while minimizing risks of further injury. X-rays or advanced life support procedures can be performed with the K.E.D. in place.

The K.E.D. PRO can be used for vertical rescue and features enhanced metal buckles for extra security, one-piece leg straps, redesigned head & chin straps and a new backpack style carrying case with storage pockets.

- Built-in handles enable rescuers to get a firm grip on the patient and K.E.D. PRO as one unit
- Adapts to a hip and pelvic splint by simple inversion
- Adjustable, fold-back sides permit easy access to patient's chest
- Can be used for multiple patient sizes, including children and pregnant women
- Color-coded, sewn-in securing straps and snaplock buckles for quick, easy application
- Does not interfere with the application of anti-shock trousers
- Includes carrying case

CURAPLEX® EXTRICATION DEVICE™

The Curaplex extrication device includes color-coded straps to aid in application. It is constructed with a built-in rigid spine and plywood slats covered with a heavy-duty vinyl shell. Easy to clean, this extrication device is compatible with cervical collars. Includes carry case.

15327	Extraction Device with Case, Red	\$94.99 ea
15329	Extraction Device with Case, Green	\$94.99 ea

PRO-LITE SPEEDBOARD®

The SpeedBoard works perfectly in bucket seats and is quick to apply. Three color-coded straps apply quickly in a cross strapping method. While in place they also help to keep the C-Collar secure. The SpeedBoard does not constrict the inter-costal muscles as with other vest-style short extrication devices. The HDPE plastic is easily decontaminated, and the straps are disposable. The carrying case is large enough to fit a set of collars, CID and LSB straps.

HARTWELL MEDICAL EVAC-U-SPLINT® VACUUM MATTRESS

The EVAC-U-SPLINT mattress offers fast, full-body immobilization without placing undue pressure on prominent parts of the body. Vacuum technology eliminates any axial, lateral or rotational movement during normal patient transport. This lightweight (12 lbs.) splinting device is easy to manipulate into various configurations and prevents patient discomfort and development of decubitus ulcers. Ideal for transporting geriatric patients by providing excellent stabilization and comfort. X-ray and MRI compatible. Polystyrene beads help reduce body heat loss and provide maximum comfort. Easily cleaned and disinfected with available cleaning agents. Mattress has patented integrated slat system, plus six sturdy handles. Operating range of -30° F to +180° F. Can be used with standard vacuum pump, compact pump or a portable suction device. Lifetime guarantee on the MaxiValve™.

IMMOBILIZATION & SPLINTING

Vacuum Mattresses, Adult - Pediatric Immobilization

MED TECH SWEDEN VACUUM SPINE IMMOBILIZER

The Med Tech Sweden Vacuum Spine Immobilizer (VSI) is a lightweight and easy-to-apply extrication device. The VSI conforms to a patient in most positions, offering comfortable support without the risk of neck/head hyperextension. Multi-Chamber System prevents the beads from shifting during use. Features color-coded straps/buckles and cushioned lifting handles. Leg straps prevent the Vacuum Vest from sliding up during extrication. MRI compatible and X-Ray translucent. Lifetime guarantee on all workmanship, manufacturing and valves. Ten-year warranty on all heat-sealing and non-replacement parts. PVC free.

MED TECH SWEDEN ADULT & PEDIATRIC VACUUM SPINE BOARDS

The Adult and Pediatric Vacuum Spine Board with an internationally patented multi-chamber system of 12 to 23 different sized chambers allows the specially-formulated beads to stay in place, even in vertical applications, such as hip fractures or mountain slopes. The specially designed, easily adjustable pelvic strap system is automatically in place to help support unrecognized open book fractures. All straps and lifting handles are color-coded, comfortable, and easy to replace. ½" US/Europe standard fitting two-piece valve system with valve adapter for portable suction units. Product is comfortable for the patient and color-coded for quick and easy application. The securely closing valve design makes it easy to use even while wearing gloves. Simple to machine wash. Made in the USA using durable U.S. component materials.

The Pediatric Vacuum Spine Board is for patients up to 85 lbs/38kg. A full length measuring scale is printed onto the product to facilitate the calculation of medication dosages.

The Adult and Pediatric Vacuum Spine Boards are covered by a lifetime guarantee. Replaceable straps are covered by a one-year warranty. MRI compatible, x-ray translucent, latex free and PVC free.

IRON DUCK® PEDI-AIR-ALIGN BOARD

The Pedi-Air-Align's patented dual-plane, head-drop system allows for a patient to be immobilized while managing their airway and establishing neutral spinal alignment simultaneously. The board accommodates the larger occipital area of a child's head, allowing for neutral spinal alignment and an open, maintainable airway. The Pedi-Air-Align is rotomolded from high density polyethylene (HDPE). This creates a one-piece seamless product that allows for decontamination. Carrying case features hook-and-loop closures and an external pocket for strap storage. Board is 48" long x 12" wide x 1.75" high. Lifetime guarantee.

- System includes 1 teal board, 1 shoulder strap, 4 body straps, 2 wrist restraints, 3 pairs of head blocks with straps, and 1 carrying case.

SAFEGUARD TRANSPORT AMBULANCE COT RESTRAINT

The SafeGuard Transport is a cot-mounted restraint that safely transports children of a wide range of sizes, from 22 to 100 pounds. Extensive, rigorous crash testing assures the product is dependable and effective for transporting children safely in ambulances.

- One operation tightens harness and adjusts height, securing the child within seconds in a five-point restraint
- Integrates easily into ambulance operations, stowing efficiently in space-limited storage areas
- Snap hooks with color-coded webbing make attachment to cots quick and easy
- Moves with the cot backrest to accommodate multiple positions from horizontal to fully upright, allowing easy access to the patient during transport
- Seamless foam pad is impervious to body fluids and is designed to facilitate easy cleaning

3250-85705	SafeGuard Transport.	\$589.99 ea

IMMOBILIZATION & SPLINTING

Backboards

FERNO® NAJO® LITE BACKBOARD

The NAJO® Lite is Ferno's lightest backboard at just 14.5 lbs and features a central slot in the lower half of the board to immobilize each leg separately. The Lite also features two handholds at the tapered end to allow more stable transport and angled edges for easy log-rolling. Strong, one-piece HDPE construction is impervious to all bodily fluids, is easy to decontaminate, and provides 100% x-ray translucency. The board is also buoyant and can assist with flotation in the water. Available with no pins, 10 pins or 18 pins in green, blue, red, yellow and orange.

- Two handholds at the tapered end allow more stable transport
- Central slot in the lower half of board to immobilize each leg separately
- Impervious to all bodily fluids
- 100% X-ray translucent
- All boards meet OSHA recommendations and are easy to decontaminate

FERNO® NAJO® REDIHOLD® BACKBOARD

The NAJO® RediHold® features two handles at a tapered end to allow for more stable transport. The head area is smooth to insure all head immobilization devices adhere to the board, and the edges are angled for log-rolling. Strong, lightweight, one-piece HDPE construction is impervious to all bodily fluids, is easy to decontaminate, and provides 100% x-ray translucency. The board is also buoyant and can assist with flotation in the water. Available with no pins, 10 pins or 18 pins in red, green, blue, yellow and orange.

- Two handles at tapered end to allow for more stable transport
- Floats 136 lbs. in water
- Impervious to all bodily fluids
- 100% X-ray translucent
- All boards meet OSHA recommendations and are easy to decontaminate

FERNO® MILLENNIA™ LITE BACKBOARD

The Millennia™ Plastic Backboard provides a contoured shape with easy-slide features for efficient and smooth patient movement in any space, including confined areas. Easy to clean plastic shell with foam-filled construction is light weight yet strong and provides X-ray translucency. Comes with 10 pins and is available in blue, yellow, burgundy, and orange in both 16" and 18" widths. White only available in 18" width.

- Slick surface for easy transfer
- Minimal deflection for improved patient stabilization
- Wider, longer handholds for increased EMT control
- Compact, tapered design for easy maneuverability and storage
- X-ray-translucent

Backboards

LIFE SUPPORT PRODUCTS XTRA™ BACKBOARD

The XTRA backboard has been designed to provide the ultimate in X-Ray translucence with the rigidity that is needed to protect the patient from further injury. At 71" L x 15.75" W x 1.85" D and weighing just 15 pounds, XTRA fits into standard storage areas and is easily carried to the patient. The smooth surface allows for easy cleaning and disinfecting, while the construction of the XTRA prevents the intrusion of liquids into the board. XTRA will float an adult and has been tested to loads in excess of 1,000 lbs. without breaking. Custom graphics available.

CURAPLEX® ELITE BACKBOARD

The Curaplex Elite Backboard was designed with a new state of the art I-beam stiffening system built into the hand grips. The foot end is one of the thinnest on the market, which aids in sliding the board under a seated patient during extrication operations. A slot in the lower end of the board allows for extra strapping or splinting of the lower extremities. Our board is rated at 1000lb. and weighs just 11.5lbs. Our spine board is backed 100% by superior customer service and manufactured in the USA. Dimensions: 72"L x 16"W Taper top to bottom 14". Thickness: 1.95".

IRON DUCK® ULTRA-VUE BACKBOARD

The Ultra-Vue was designed and engineered by Emergency Medical Technicians and Emergency Physicians from across the United States. Their goal was to design a backboard that would increase crew safety, improve patient care and meet the needs of physicians and radiology. The design team used their field experiences and clinical "wishes" with our manufacturing excellence to design a safe, strong and 100% X-ray translucent backboard. Oversized hand holds measure 2" x 6" for gloved hands. Capacity: 600 lbs. Available with or without pins. 72"L x 16"W x 1.75"D. Standard pin configuration is 12 pins. Lifetime guarantee.

IRON DUCK® ULTRA-VUE 18 BACKBOARD

All the great features of the popular Ultra-Vue board, now available in an 18" width. The Ultra-Vue 18 Backboard is free of plugs, seams and voids, making it easy to clean. It is 100% X-ray translucent, MRI and CT scan compatible and has a reflective edge for added safety. Its tapered design, Sure Grip octagon-shaped hand holds and higher hand clearance all add to the Ultra-Vue 18 Backboard's ease of use. 1000 lb weight capacity; floats up to 250 lbs. The Ultra-Vue 18 Backboard also features a recessed edge for securing head immobilizers. Custom colors and graphics are also available. 72"L x 18"W x 1.75"D. Standard pin configuration is 12, expanded pin configuration is 22. Allow six to eight weeks for special order delivery. Lifetime guarantee.

IMMOBILIZATION & SPLINTING

Backboards

PRO-LITE SPINEBOARD

The PRO-LITE Spineboard is the only backboard to provide for natural curvature of a patient's lower extremities, offering better patient centering and requiring less padding. Its seamless design prevents fluids from entering and eliminates cross-contamination. Two boards can be nested together in less than 4" of space with the head immobilizer attached. Spinal injuries can be diagnosed before the patient is removed from the spineboard. Foot section is angled slightly downward to assist rescuer in auto extrication. Compatible with all head immobilization devices. Unlimited single-patient weight capacity. 72"L X 16"W X 2-1/4"D. 16 - 2" x 5-1/4" hand holds. Tapers from 16" at head end to 14" at foot end. Weight: 12.5 lbs.

IRON DUCK® ULTRA-SHORT BOARD

This rugged alternative to standard wooden short boards is manufactured from high-density polyethylene plastic (HDPE). The Ultra-Short Board is free of seams, voids and plugs, making it incredibly easy to clean. Oversized hand holds allow for gloved hands to easily fit into the provided space. Offset composite pins are located in the lower third of the hand hold, keeping the composite pin out of the way while lifting patients. Custom imprinting is available. 31.25"L x 15.75"W x 1"D. Lifetime guarantee.

IMMOBILIZATION & SPLINTING

Backboards

FERNO® EXL SCOOP STRETCHERS

Ferno's Scoop EXL Stretcher provides superior comfort and safety to patients who need spinal immobilization. The Scoop EXL eliminates the need for log-roll maneuvers, which significantly decreases movement to the cervical spine. Two hinged, interlocking pieces allow operators to bring the two halves together beneath the patient and gently scoop them up. Made from X-ray translucent, composite material.

Features

- Head section recessed to maintain proper cervical alignment.
- Supports a patient in the position found reducing risk of further injury.
- Easy-to clean surface is impervious to fluids.
- Thermally-treated polymer construction does not get too hot or cold, allowing for greater patient comfort.
- Four adjustable length options accommodate patients of different heights.

- Narrow foot end and split-apart design provide easier use in confined space immobilization.
- Oval profile and angled handles provide ergonomic ease of use

EZ LIFT RESCUE SYSTEM™

With a breakthrough, patented design, EZ LIFT Rescue Systems reinvents the traditional backboard to make lifting safer and reduce on-the-job back injuries. This unique design uses extendable handles that allow EMS Rescuers to lift from a safe position just below the knees—instead of the dangerous lift position required to pick up a traditional backboard from the ground. The system includes EZ LIFT board with retractable handles, 2 sets of white straps, 5 disposable head immobilizers with head tape and full access to training materials.

- Weight rated at up to 1,000 lbs.
- Weighs less than 22lbs. and is optimized for low profile storage in Fire and EMS vehicles
- 100% X-Ray translucent; compatible with all imaging equipment.
- Ergonomically designed for improved patient comfort, stability, and un-weighting typical pressure points

LSP MILLER FULL BODY SPLINT/LITTER

The Miller Full Body Splint/Litter is a versatile spine immobilization board and litter that comes with a full head and body harness. This unique system will allow a victim to be rotated onto his or her side for proper airway management or to effect a difficult extrication without jeopardizing a spinal position. Harness adjusts to accommodate small children to large adults. A foam core makes the board strong to prevent bowing and buoyant so that it will float, during hazardous water rescues.

260701	Carry Case	\$258.99 ea

HARTWELL MEDICAL COMBICARRIER II®

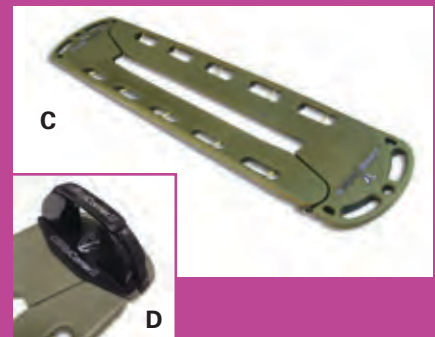

The CombiCarrierII is two products in one, saving valuable budget dollars, payload weight and storage space. The innovative design makes it easy to apply with minimum personnel and it can also be removed once the patient is on the cot, if so desired, to meet the latest EMS protocols. No logrolling is required. Ideal companion product to the FASPLINT FULLBODY or FASPLINT HALFBACK. Auto-lock latch system is designed to minimize training and increase reliability. Off-set, sturdy latch makes it much easier to apply and remove under patient load. Separates at both ends for use in confined areas. Concave patient surface provides excellent lateral support and improves patient's sense of security. Minimizes movement of the patient's spine during lifting and transfer. No panel gaps or corners to worry about, so patient can be easily rotated and slid out onto the CombiCarrierII during auto extrication. Seamless plastic construction makes it easy to clean and disinfect. Virtually eliminates repairs and reduces required maintenance costs to almost zero. Floats for water rescue. Load capacity: 450 lbs. Dimensions: 73.5" L x 16.5" W x 2.2" D, 15.5 lbs.

IMMOBILIZATION & SPLINTING

Backboard Accessories

THE BACK RAFT

The Back Raft offers a positive alternative to traditional techniques of immobilizing patients on a longboard. Designed by EMT's, paramedics and emergency physicians, the Back Raft helps to alleviate pressure points which in turn help to avoid the development of ulcers. The Back Raft is a low-cost, disposable air mattress that provides patient comfort and reduces secondary injury. Prolonged immobilization on a spine board has been associated with the development of pressure sores in spinal cord injury victims. The Back Raft allows for full function of the spine board. [25/cs]

HAND-E™ HAND HOLD DEVICE

It is often difficult to maintain control of a non-responsive patient's hands and arms once placed on a spine board. This can make it difficult for first responders to navigate a patient through tight areas and doorways. To solve this problem, an EMT in Minnesota developed the Hand-E. The Hand-E short-term hand holder incorporates a one-piece polyethylene main body and a rubber retainer. The main body is designed for easy cleaning and lightweight durability, and offers smooth edges for patient comfort. A slot on the back can be used to attach the Hand-E to a restraint strap near the patient's waist, keeping the patient's arms in place. Accommodates wrists of all sizes.

- More effective and easier to use than tape
- Easy to clean and will not absorb fluids
- Can be placed/removed quickly by one person
- Lightweight and compact size

3176-07705	Hand-E Hand Hold Device	\$38.99 ea

TRIPLE "X"™ STRAP

Deployment of the Triple "X" is a snap. Simply align the three sets of "X" formation straps over the corresponding weight centers of the body (upper chest, pelvis, legs). Thread the straps through the backboard holes and pull tight. The chest "X" is adjustable in angle, and can be threaded over the patient's shoulders to further help isolate the head and neck from the mass of the body.

505398	Triple "X" Strap	\$104.99 ea
--------	----------------------------	-------------

THE V-8 HARNESS STRAP™ SYSTEM

The V-8's design allows easy accessibility, quick, on-site adjustment from pediatric to large sizes and fits any backboard. Each cross strap on the V-8 has a full covering of an advanced hook and loop fastening system, allowing virtually unlimited strap securement and adjustment. All eight nylon straps are permanently interlocked to fabricate the one-piece self-contained V-8 Harness Strap.

HEADBED II™ CID

The HeadBed II CID provides safe and effective immobilization of the head and neck for patients suspected of a spinal injury, limiting flexion, rotation and lateral bending without limiting patient access to the patient. The wax-impregnated, water-resistant HID delivers secure immobilization under adverse clinical and environmental conditions. The dual adhesive strap provides maximum motion restriction while releasing easily during removal. The HeadBed II is designed and priced for single use so there are no clean up or lost equipment problems. Compact and lightweight, HeadBed II is a universal product suitable for adult, child and infants.

PadPack™ Alignment Pads are available to maintain neutral alignment of the cervical spine by padding behind the heads of adult patients or under the torsos of very young children. 10 pads per package. [100/cs]

260209	HeadBed II	\$5.79 ea	\$579.00 cs
260211	PadPack (Latex-free)	\$7.50 pk	

HOOVER HEADBLOCK

The unique wrap-around design of the Hoover Headblock provides support and padding around the patient's head, while offering ample visual and tactile access to the C-spine and ears. The high, wide, triangular supports on each side allow the insertion of hands for stabilization during application, and do not require raising the patient's head. Two wide foam strips allow you to safely secure your patient to the board without causing skin irritation when you remove the tape. For pediatric application, cut off the foam strips and add as necessary to retain support while still framing the ears. Treated with a water-repellent finish. Assembly/application instructions are printed on each headblock, and they are shipped folded in a compact shrink-wrapped package. Tape not included. [20/cs]

CURAPLEX® CERVIGUARD SYSTEM

The Cerviguard system is a foam-filled, lightweight cervical immobilization device (CID) that complies with the National Basic Trauma Life Support recommendation. The Cerviguard system is inexpensive, designed to be disposable and frees you from the worry of losing expensive CIDs at the hospital. Cerviguards are 6 ml polyethylene and durable enough to reuse. They are both puncture and water resistant, and have sealed seams and a large area to mark your agency name.

260401	Cerviguard without Occipital Pad.	\$6.29 2/pk	
3141-50402	Cerviguard with Strap and Occipital Pad.	\$12.79 st	
3141-50403	Cerviguard Straps Only	\$7.79 ea	

HEAD VISE™ I HEAD IMMOBILIZER

The Head Vise I Head Immobilizer is constructed of heavy-duty corrugated plastic with comfortable foam padding. It quickly attaches to a spineboard with its double sided tape, is impervious to water and body fluids, and is large enough to use with motorcycle helmets. Important information or identification can be written on the surface. The Head Vise I is X-ray translucent, easy to disinfect and stores flat. [18/cs]

261451	Head Vise.	\$25.29 ea	\$455.22 cs
---------------	--------------------	------------	-------------

SPEEDBLOCKS™ HEAD IMMOBILIZER

Designed for durability and performance but priced for disposability, the SpeedBlocks Head Immobilizer gives you the best of both worlds. The low-cost blocks with disposable foam pads and head straps are so effective that you don't need to bother with the mess and inconvenience of taping the patient. Universal base and blocks with replacement foam pads allow for easy, worry-free cleaning. The snap-in blocks allow for multi-axis adjustment, reducing the risk of moving the patient's head.

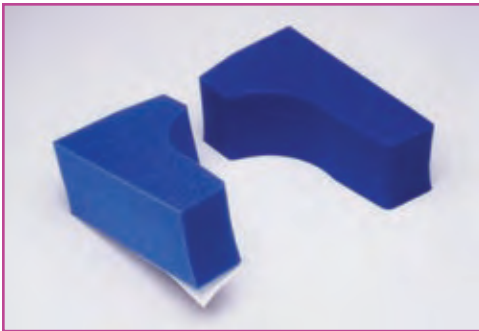

Straps and Pad Refill includes 10 foam block pads, 10 head straps and 5 base pads.

SAM SOFT SHELL® SPLINT

Whether used for a fracture or a sprain, the Soft Shell Splint can be easily shaped and applied within seconds and is comfortable for the patient. It can also be easily removed and re-shaped at any time. The splint is lightweight, inexpensive, and an ideal alternative or temporary solution to rigid splints. The splint can be easily molded to fit the patient's hand, wrist, or forearm. It shapes in seconds into a volar splint, thumb spica splint, ulnar gutter splint or clamshell splint. [20/cs]

FAST SET-3

The FS-3 provides it's patient with the ideal orthopedic splinting experience. It combines the easy application of utility splints with the advantages of a fiberglass cast. The patient can be immobilized moments after the first responder arrives. During the 2 to 3 minutes it takes for the splint to set up, the FS-2 can be gently formed. This allows the responder to get the ideal combination of stability and patient comfort. Conveniently packaged in a sealed, easy to open bag.

- Water activated polyester.
- X-Ray translucent.
- Sets in just under 3 minutes.
- Soft moisture wicking lining, for comfortable skin contact.
- Available in complete kit that includes: 1 FS-3, 1 Responder Gauze, 1 30 ml SalJet.
- Packaging uses easy open finger holes.
- No Gloves necessary.
- Safe for direct contact with skin.
- Secure, Support, Immobilize.

DISPOSABLE SPLINT

The Disposable Splint is designed to conform to contours of limbs. This product allows fractures to be splinted with one-step ease. No need for additional fillers. Constructed of heavy-duty cardboard with half-density cushioning foam. The disposable splint is available in 12", 18" and 24" lengths. Its utility and economy make it an indispensable and cost-effective addition to your stock of medical supplies.

PROSPLINT® KIT

Prosplints are quick and easy to use, taking only a few moments to apply and remove. Since splints are constructed of 100% non-absorbent material, blood, gas and other fluids are easily removed and cleaned with warm water and soap. The splints have no metal stays, are shock absorbing and conform quickly to your desired needs. Hook-and-loop closures make application easy day or night, wet or dry. Prosplints are universal in design and may be used on either the right or left side limbs. In case of multiple injury, arm and leg splints can be interchanged. These splints are unaffected by temperature extremes, remaining pliable from -100°F to 200°F. Prosplint kits come in a ballistic nylon bag.

Full Prosplint Kit Includes: Combo Splint, EMT Straps, Small Leg Splint, Large Leg Splint, Small Arm Splint, Large Arm Splint, Wrist/Forearm Splint, Rib Splint/Restraint, Extrication Collar and Carrying Case. Prosplint Extremity Kit Includes: Small Leg Splint, Large Leg Splint, Small Arm Splint, Large Arm Splint, Wrist/Forearm Splint, Combo Splint and Case.

MED TECH SWEDEN DELUXE EXTREMITY VACUUM SPLINTS

The Deluxe Extremity Vacuum Splints conform to a patient's extremities quickly and without pressure. The multi-chamber system keeps the inner materials in place for fast and easy application and secure, reliable coverage. ½" US/Europe standard fitting two-piece valve system—the same high-quality standard size valve used in the Med Tech Sweden vacuum spine board. Set comes with a small hand-operated vacuum pump, suction adapter for portable suction units and a carrying case for easy storage. Guaranteed to hold vacuum for 24 hours. MRI compatible, x-ray translucent, latex free, PVC free. One-year guarantee. Simple to machine wash. Made in the USA using durable U.S. component materials.

IMMOBILIZATION & SPLINTING

Vacuum Splints

HARTWELL MEDICAL FASPLINT FULLBODY® AND FASPLINT HALFBACK® SPLINTS

The FASPLINT FULLBODY® and FASPLINT HALFBACK® are the newest additions to the FASPLINT product line of cost-effective conforming splints that provide secure immobilization without circumferential pressure, eliminating the potential for tissue, vessel and nerve damage. Both products promote the new paradigm of “Spinal Splinting” where the patient’s head, neck and torso are stabilized as one unit.

Product features of the FASPLINT FULLBODY:

- Vacuum splint technology stabilizes the patient in their position of comfort making it ideal for geriatric patients, even those with kyphosis.
- Provides full spinal splinting from the head to the hips and allows for patient’s knees to be fully supported in a flexed position adding to patient comfort during transport.
- Alleviates pressure point pain and vastly increases patient comfort during transport on a CombiCarrierII, a flat backboard or scoop stretcher.
- Polystyrene beads insulate the patient to help prevent hypothermia.
- Simple, uncluttered tapered design reduces storage space requirements.
- Designed to be used with existing patient transfer devices and existing strap systems. It is not intended to be lifted by itself.
- Supple vinyl top surface with durable heavyweight vinyl on the underside provides excellent patient comfort and increases product durability, making it a street smart product.
- Uses the same pump system as any EVAC-U-SPLINT product. The quick connect MaxiValve™ is guaranteed for the life of the product. Comes with standard aluminum pump with foot stirrup. Also available with compact aluminum pump. Ask for details.

Product features of the FASPLINT HALFBACK:

- Quick and effective application in the field.
- Provides lower back support and evenly distributes patient’s weight helping to alleviate pain associated with lying on a flat backboard for an extended period of time.
- Same material as the FASPLINT FULLBODY. Comes with compact aluminum pump.
- Smaller, more compact design is budget friendly and reduces storage space requirements.

HARTWELL MEDICAL FASPLINT® SEMI-DISPOSABLE VACUUM SPLINT

The FASPLINT® is a low cost conforming splint that provides secure immobilization without circumferential pressure, eliminating the potential for tissue, vessel and nerve damage. [10/cs]

- The FASPLINT can be applied quickly and effectively in the field.
- Apply the FASPLINT, evacuate it and secure it in place in half the time needed to properly apply a board or air splint, thus significantly reducing your on-scene time.
- The tapering shape of the FASPLINT is anatomically appropriate for immobilizing extremity injuries. It is ideally suited for all types of sprains, suspected fractures and dislocations.
- Quality vinyl provides excellent patient comfort and makes the splint easy to form, even in cold temperatures and also to severely angulated extremity injuries.
- Polystyrene beads act as thermal insulation helping to maintain body temperature, which is especially important for pediatric and geriatric patients.
- The FASPLINT kit is available with an all aluminum pump similar to the EVAC-U-SPLINT pump or an economy pump. An adapter is also available to convert an existing EVAC-U-SPLINT pump for use with the FASPLINT. Can also be evacuated using the standard suction tubing supplied with most portable suction units with no adapter necessary. Three popular sizes make the FASPLINT an easy choice for a variety of patients.

HARTWELL MEDICAL EVAC-U-SPLINT® KIT

These quality, lightweight Hartwell Medical vacuum splints effectively immobilize the patient without placing undue pressure on the injured area. Eliminates axial, lateral and rotational movement during normal patient transport. Easy to manipulate into a variety of configurations depending on the type of injury. Polystyrene beads help reduce body heat loss and provide maximum comfort. Great for infant and pediatric immobilization. Radiolucent and MRI compatible. Easy to clean and disinfect. Quick and easy to use and molds precisely to body contours. Compact aluminum vacuum pump included. Operating range of -30° F to +180° F. The EVAC-U-SPLINT Kit measures 25" L x 12" W x 12" D in carrying case. Weighs 6.4 lbs. Lifetime guarantee on the MaxiValve™.

Deluxe EVAC-U-SPLINT extremity splint kit includes three vacuum splints (1 Large, 1 Medium, 1 Small), repair kit, compact aluminum vacuum pump and carrying case.

IMMOBILIZATION & SPLINTING

Pelvic Sling - Traction Devices

SAM[®] Pelvic Sling II

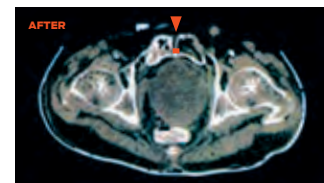

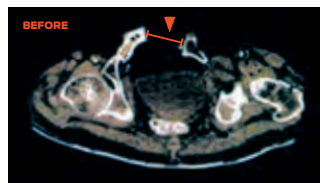

SCIENTIFICALLY AND CLINICALLY PROVEN
TO PROVIDE SAFE AND EFFECTIVE FORCE TO STABILIZE PELVIC FRACTURES

The FIRST and ONLY force-controlled circumferential pelvic belt.

TECHNOLOGY

TRUFORCE[™]

The patented TRUFORCE buckle provides the safe and effective force every time, taking the guesswork out of tightening. The buckle is programmed to stop your pull once the correct compression force has been obtained. Two prongs are released from the buckle, which stops the belt from further tightening. (It does not require a fine touch to operate and gives clear feedback by sound and feel to confirm correct application.)

Trauma surgeons around the world recognize the importance of stabilizing pelvic fractures during the critical first "golden hour" following severe trauma. Because of the potentially devastating hemorrhage associated with such fractures, standard first aid protocol includes applying some type of circumferential binder around the patient's hips. The SAM[®] Pelvic Sling II is simple, compact and quick to apply (usually in less than one minute). The standard size fits 98% of the adult population without cutting or trimming.

• **Radiolucent & MRI Conditional**

Allowing for X-rays and CT-scans without removal. The buckle contains two stainless steel springs. Researchers have stated that "Artifacts proved negligible and did not affect posterior fracture visualization". (Krieg clinical trial)

- Front of SAM Sling is narrow and tapered to facilitate urinary catheterization, interventional radiology, external fixation and abdominal surgery.
- Low friction posterior slider facilitates transfers.
- Reusable, not a onetime use device. Can be cleaned for re-use with common detergents or anti-microbial solutions.

665565	SAM Pelvic Sling II, Extra Small (27" - 40")\$86.99 ea \$2087.76 cs

SLISHMAN TRACTION SPLINT

The Slushman Traction Splint (STS) boasts a red toggle at the end of the shorter traction cord for better grip. The STS's improved labeling and superior red color coding enable quicker patient femur fracture stabilization and application. The STS embodies significant improvements to traction splinting:

Product features:

- No extension past the foot
- Quickly adjusts to patient
- Easily applied during manual traction
- Not contraindicated for lower leg injury or amputation
- Light and compact
- One size fits all

OPTIMUM TRACTION DEVICE (OTD)

When using this OTD, you never need to roll your patient or raise their leg when applying. The OTD allows the ability to work around any hip or groin trauma. The traction pole adjusts for adult or pediatric use. The OTD comes in a convenient 9.5" x 3.5" storage pouch with instructions. It weighs less than 20 ounces. Designed to be carried in a trauma box, jump bag or first aid kit, this device is especially practical for wilderness rescue, ski patrols, SWAT medics and military field medics.

SUPER SAGER® FORM III BILATERAL SPLINT

Has the ability to treat an adult or child with one or two fractured femurs. Has four times the function of ischial pad splints. Always have the correct splint to treat the wide variety of femoral fractures.

660202	Bilateral Splint	\$519.99 ea
---------------	------------------	-------------

FARETEC CT-EMS LEG TRACTION SPLINT

The CT-EMS is a Leg Traction Splint designed for Pre Hospital Care and Patient transport. It is primarily used on patients with mid-line femur fractures. The CT-EMS helps relieve patient pain and prevents further damage to surrounding muscle and tissue while reducing the risk of death caused from severed arteries. The CT-EMS is made of carbon tubing which snaps together via an internal bungee. Traction is achieved with a 4 to 1 purchase system using a small line to apply tension. This method results in a very precise and delicate form or traction that is also powerful enough to be effective on extra large adults. The CT-EMS is extremely compact, light and strong.

322-1126626 CT-EMS w/Blue Carrying Bag \$162.99 ea

- Carbon Fiber Tubing: Corrosion resistant, temperature stabile, extremely high strength to weight ratio, x- ray translucent.
- 4:1 Purchase Traction System: makes it easy to apply ample traction for even the largest patient. The V- Jam cleat makes it easy to readjust traction, key in long transport situations. Includes safety clip to prevent accidental releases.
- Application: The CT-6 comes out of the bag ready to go; all of the necessary parts are attached to the splint. There is no way to lose pieces, resulting in very fast application times.
- Instruction Manual: Each splint comes with its own "quick reference" two sided instruction manual that is water proof and tear resistant.

Made in USA

QD-3 & QD-4 TRACTION SPLINTS

This retractable, space-saving splint features a hex lock mechanism to adjust for length quickly and easily. Simply twist in either direction to lock and turn back to the middle to open. The aluminum ratchet also has a micro adjustment so that the proper amount of tension can always be generated. Adult model (QD-4): ext length 54", cl length 32", width 9", weight 7 lbs. Pediatric model (QD-3): ext length 45", cl length 29", width 6.5", weight 6 lbs. Each unit comes with necessary components and carrying case.

LIFE SUPPORT PRODUCTS TRAUMA AIR PANTS

Trauma air pants are designed to promote emergency care for the victim experiencing hypovolemic shock. The trauma air pants will cause counter pressure around the legs and abdomen causing displacement to the upper torso and head. Trauma air pants are constructed of essentially nonabsorbent material to prevent odor and stains from entering the material. They can be applied easily and quickly. Each chamber can be inflated individually via simplified pump and valve systems. Available with three-gauge system, a one-gauge system and a relief valve system. Each of the systems feature spine indication line, soft-sided carrying case, strategically located lifting handles, enlarged catheter opening, easy femoral artery access and a lifetime warranty on the internal bladders. All adult sizes are downsizeable.

OXYGEN/VENTILATOR JUMBO D CYLINDER CARRY BAG

This oxygen/ventilator carry bag is designed to fit a jumbo D cylinder. Bag features two zippers that allow quick access to the oxygen cylinder regulator. Storage space can accommodate other oxygen supplies. Heavy-duty adjustable shoulder strap. 22" long x 5 1/4" wide x 12" tall. **Contents not included.**

2522-09186 Oxygen Carry Bag, Red \$223.94 ea

MEGA DUFFEL III

The large center compartment (24"L x 7"W x 10"D) can easily accommodate a "D" cylinder. A sturdy Velcro® strap holds your O2 bottle in place. Surrounding the inside compartment on all sides is 1/2" of firm padding to protect the tank and the bag's contents. Elastic pockets also line the inside of the bag. The underside of the top contains a large mesh pocket for your O2 accessories. Along the exterior of the Mega Duffel III are five color-coded pockets that will help you organize your trauma supplies. End pockets are 8.5"L x 2"W x 7.5"D. The long side pocket is 23"L x 2"W x 8"D. Finally, there are two pockets on the back side measuring 11"L x 2"W x 8"D. Colors of pockets are red, black, green, yellow and blue. A reflective stripe surrounds the bag. Shoulder strap included. **Contents not included.**

680072 Mega Duffel III \$223.99 ea

PROPAC SA06 OXYGEN CARRY BAG

The SA06 is a "D" cylinder carry bag with two zippers entering the main compartment. The end zipper accesses the O2 cylinder. The second zipper accesses an adjunct pocket on the top of the bag. This creates ample room for a BVM, a compact airway module or several brands of ventilators. On the inside lid of the bag is a retractable pouch to hold a "SIMS PneuPAC" Responder vent. The bag comes equipped with an adjustable shoulder strap and suspending hooks for hanging the unit on a stretcher. 22"L x 4.5"W x 11"H. **Contents not included.**

680060 Oxygen Carry Bag \$217.40 ea

OXY "SLEEVE"

This uniquely designed "Sleeve" will hold your "D" size oxygen cylinders and act as a simple handle to carry your cylinder. The "Sleeve" has two wide hook-and-loop straps which can secure a demand valve hose or O2 tubing, keeping your system simple and easy to handle. CONTERRA RESPONDER I BAG

Made entirely out of SI-TEX fluid-proof fabric and Scotchlite® tape. Features a non-absorbent sure grip handle. Opens via a huge #10 main zipper, making it the perfect choice for a vehicle response kit. Sports 10 internal pockets, 17 elastic loops and two removable dividers for your gear. The bag also has a full-length zippered inside pocket and converts to a fanny pack for hands-free use when climbing ladders or going over embankments. **Contents not included.**

6895RB Responder I Bag \$99.99 ea

CONTERRA RESPONDER II BAG

This bag is made entirely out of SI-TEX fluid-proof fabric and features a #10 coil zipper, Scotchlite reflective tape and a hideaway fanny pack suspension. Inside are 11 organizer pockets, 14 elastic loops, three removable dividers and an internal zippered pocket. The unique fold-out front pocket is perfect for organizing ET tubes or storing assessment tools. Also has a non-absorbent easy grip handle that can be carried even without turnout gloves on. **Contents not included.**

RB2 Responder II Bag \$120.99 ea

CONTERRA RESPONDER III BAG

This bag features #10 coil zippers, SI-TEX fluid-proof fabric, reflective striping and large rubber grab handles. Sports a large end pocket that is designed to carry assessment tools and body fluid protection. The main pocket opens to reveal six divided compartments that are compatible with the Conterra Intubation Kit, Drug Kit and Insulated IV Kits. Inside the lid are two zippered window pockets that are color-coordinated and removable for ease of use. Handle system extends and adjusts to allow the bag to be carried like a backpack, even over turnout gear. **Contents not included.**

RB3 Responder III Bag \$223.99 ea

CONTERRA RESPONDER IV BAG

This large, technically organized ambulance response bag is very similar to the Responder III Bag in the way that it opens and carries. The main compartment is sized to work with any of the Conterra modular kits, but is long enough to fit an oxygen cylinder and will accept the 0-2 Caddy insert. Sports twin side pockets (long enough to fit stifneck-type collars) and two end pockets. All pockets and top lid are built with Velcro®-compatible fabric, and can be organized using any M.O.S. units. Features fluid-proof handles on each end of the bag, padded bottom, giant #10 coil tape reinforced zippers and SI-TEX fluid-proof fabric. **Contents not included.**

681690 Responder IV \$310.99 ea

EQUIPMENT BAGS

Trauma Bags

IRON DUCK® TRAUMA PACK PLUS

Iron Duck's Trauma Pack Plus has tapered exterior pockets and a U.P. covered bottom for ease of cleaning. In the front pocket you will find multiple interior pouches and elastic holders for supplies while the rear pocket has elastic holders and extra storage space. The main compartment is divided into three areas for dressings and trauma supplies. Fold open the top lid to see a large zippered pocket for supplies along with strategically placed elastic tool holders. The large pockets on each end can hold a sharps container or any other items you may need during the day. The heavy duty handles wrap around the entire bag for improved weight distribution. It is constructed of 1000D ballistic fabric with an exclusive water-tight, non-toxic coating. 19"L x 14"W x 12"H. Lifetime guarantee.

Contents not included.

Tapered pockets reduce wear and tear.

IRON DUCK® ULTRA SOFBOX PLUS

Iron Duck's Ultra Sofbox Plus has sleek tapered exterior pockets and impact resistant runners on the UP covered bottom that are not only esthetically pleasing but practical in the field. On one side of the front pocket there is a flat zipper pouch with two smaller pouches on the front and on the other side of the front pocket there is a row of four pouches with elastic holders on the front for supplies. The back full length pocket has full length flat zipper pocket on one side then on the opposite side there is a row of elastic holders for tools. Open the main compartment to find moveable dividers that can be configured to individual needs. The top lid has a full length clear mesh reinforced pocket with different sizes of elastic tool holders. The large pockets on each end of this bag can hold sharps containers. Nylon handles wrap around the entire bag for proper weight distribution. The deluxe ergonomic padded shoulder strap can be attached to different points of the case for added comfort and convenience. Made with 1000D ballistic nylon with an exclusive waterproof, nontoxic coating. Universal Precautions (UP) Material listing. 23"L x 17"W x 12"H. Lifetime guarantee.

THOMAS TRANSPORT ADVANCED LIFE SUPPORT PACK

The Thomas Transport Advanced Life Support Pack features many new features to help you tackle the day-to-day rigors of EMS. The exterior pocket size has been increased to hold an additional Thomas Drug Box or the new Thomas Intubation Pack. For night-time safety, the ALS Pack now features increased reflectivity on the side of the pack. New heavy-duty, dual-adjust militarized style backpack straps offer sturdy support. Inside compartments feature clear vinyl windows for quick and easy labeling, reorganization and identification of contents. A dry erase board and pen have been added on the outside of the Thomas Drug Kit (included) for recording vital signs, taking notes or for medication restocking reminders. Dimensions: 22"H x 14"W x 7"D.

Contents not included.

021000	ALS Pack, Orange	\$539.99 ea
---------------	------------------------	-------------

THOMAS TRANSPORT ALS ULTRA PACK

The Thomas Transport ALS Ultra Pack features a color-coded ABC (Airway, Bleeding and Cardiac Medicine) organizational system. With eight color-coded removable sections and 19 multi-use soft pouches, the ALS Roller is simple to restock and provides quick access to supplies. All removable cases and pouches are securely fastened in the pack to avoid loss of equipment. Other features include one small and one large exterior pocket, four exterior removable vinyl front pouches, top and side handles, a three-piece shoulder harness and enough space inside to carry a "D" or Jumbo "D" oxygen tank and accessory items.

Contents not included.

THOMAS TRANSPORT ALS ROLLER PACKS

The ALS Roller is a versatile ALS pack for the EMS industry today. For maximum mobility it features a lightweight internal frame, inset high-impact wheels and a telescoping tuck-away handle. Inside, the ALS Roller features a color-coded ABC (Airway, Bleeding, and Cardiac Medicine) organizational system. With eight color-coded removable sections and 19 multi-use soft pouches, the ALS Roller is simple to restock and provides quick access to supplies. All removable cases and pouches are securely fastened in the pack to avoid loss of equipment, and are easily removed when needed. Other features include one small and one large exterior pocket, four exterior removable vinyl front pouches, top and side handles and a three-piece shoulder harness.

The ALS Ultra Roller includes all of the features of the ALS Roller, plus a number of new innovations, including: space to carry a "D" or Jumbo "D" tank; increased reflectivity on the sides of the pack; increased exterior pocket size and depth to hold additional equipment; heavy-duty, militarized backpack straps; and larger, removable, clear vinyl interior pockets.

THOMAS EMS ZENITH BAGS

The Zenith ALS/BLS or Airway bag is the perfect blend of size and space. It is ideal for the first in bag, featuring both backpack straps and over the shoulder option.

Superior Construction:

- Made with reversed zippers to avoid bending zipper teeth
- Zippers are located not on the edges of the bag, so that they don't rub when corners and edges are beat up from storage, and dragging on the floors of ambulances and Fire trucks
- Only #10 YKK zippers the best in the industry
- Made with 2 handle top carry system to avoid zipper stress when hefting or carrying the bag with the hand handles.
- All 1000 D Cordura
- High Visibility Zipper pulls for all exterior compartments and pockets
- Tuck-Away back pack straps for hands free carrying

Features:

- Made to accommodate a "D" sized tank and multiple sizes of BVM's, Intubation, IO, Pulse oximetry, and other initial assessment and wound treatment supplies.
- 3 exterior pockets, and 2 glove stuff pockets
- Large interior compartment
- Removable sectional dividers for keeping equipment organized
- 2 large removable clear vinyl fronted pockets for storage and organization
- Padded base for protected storage of O2 tank with nylon straps and side release buckles to ensure secure storage

Flexibility:

- The Zenith has removable pockets in the inside of the lid
- Pocket configurations of 2 or 4 pockets
- Inside lid drug case available
- Inside the lid intubation kit available
- The base configuration features expandable dividers
- All dividers can be removed completely

Fluid Free Features:

- New Thomas EMS "Bio-Armor" Fluid free material wears like Cordura, and still keeps fluids from penetrating material.

2521-28018	Zenith ALS/BLS or Airway Bag, Red	\$407.99 ea
2521-28022	Bag, Zenith ALS/BLS or Airway, Black, Fluid Free	\$529.99 ea

THOMAS EMS O2 BAGS

Loaded with all the features you have come to expect from Thomas (hide-away heavy duty backpack straps, clear vinyl pockets, YKK reverse zippers, multiple carrying options), the Thomas O2 pack is designed to accommodate a "C", "D" or "Jumbo D" size oxygen cylinder, with plenty of room to spare for all accessories and related airway and trauma equipment. A standard in EMS bags.

- Multiple zip opening for easy access to the regulator
- Movable, padded internal dividers designed to accommodate multiple BVM's and other trauma and airway supplies
- Large exterior pockets can accommodate large dressings, C-Collars, or burn and emergency blankets
- Multiple carrying options (shoulder strap or back-pack straps)
- Made of 1000D water repellent nylon, Evazote® protective foam, and YKK reverse zippers
- Available in Bio-Armor Fluid free material wears like Cordur but still wipes down easily

11357RD Case, O2, Water-Repellent Nylon, Evazote Protective Foam, YKK Reverse Zippers, 25 x 15 x 14inch, Red. \$271.99 ea

The Thomas O2 Lite is a compact airway bag designed to accommodate all O2 and airway supplies when storage space is tight and multiple carrying methods are required. The lid section has been engineered to open and remain upright during use to minimize supply loss and speed treatment time on scene. The modular, removable and adjustable clear vinyl inside pockets are designed for maximum visibility and quick access of all airway supplies.

- The O2 Lite features our new Bio-Armor material a fluid resistant, quick wipe down exterior material that is durable like Cordura.
- Hide away backpack straps and a shoulder strap
- Multiple padded handles, and Hi-Vis reflective striping.
- The O2 Lite can be stored either vertically or horizontally in your response vehicle with no shifting of equipment.

2522-25022 Thomas O2 Lite \$278.99 ea

The Thomas O2 Supreme EMS Oxygen Bag. Our largest and most comprehensive O2 pack ideal for ALS response from both ambulance and fire apparatus. Designed to accommodate up to a "D" sized tank, multiple sizes of BVM's, intubation, IO, pulse oximetry, and all other initial assessment and wound treatment supplies.

Interior Features

- Padded base for protected storage of O2 tank with nylon straps and side release buckles to ensure secure storage
- Nine clear vinyl interior zippered pouches with high visibility pull tabs
- Clear vinyl adjustable pockets in the base of the pack with clear vinyl tabs for easy marking and identification of all equipment

Exterior Features

- Two exterior handles that allows for easy removal from the cabinet and multiple carrying options
- High visibility zipper pulls for all exterior compartments and pockets.
- Tuck-Away back pack straps for hands free carrying.

2522-27522 Thomas O2 Supreme. \$499.99 ea

THOMAS EMS PEDIATRIC BAG

External Dimensions: 14" x 20" x 9"

The Thomas EMS Pediatric Pack is the most organized and complete pre-hospital pediatric pack in the industry. Made from rugged 1000 Denier Cordura, with a heavy weight fluid resistant nylon base for easy decontamination. Includes both a shoulder strap and carrying handles. The Thomas EMS Pediatric Pack can also be used in conjunction with all existing pediatric systems.

Main Compartment

Eight separate high visibility removable pouches designed to treat all pediatric patients up to 36kg. Each pouch is designed to accommodate all of the medical equipment necessary to treat a patient in each specified weight range.

All non-weight specific pediatric equipment (BVM, intubation handles, Magill forceps, syringes, etc...) can be stored inside the main inside chamber, or on the interior fold out flap. The fold out flap includes a neo-natal kit, and also features an area to display all quick reference material such as APGAR, Rule of 9, or other important local pediatric treatment information (burn center, poison control, etc...)

Interior Pouches

The interior of each removable pouch is constructed from a dry erase board material, which allows the medic to clearly label all equipment. Each pouch also includes an attached reference medication chart specific to each weight range, and a small vinyl note card size exterior sleeve to quickly and easily monitor expiration dates of all equipment contained within the pouch.

2521-10520 Thomas Pediatric Pack, 14" x 20" x 9 1/2", Green \$639.99 ea

PEDIATRIC FILL KIT

Everything assembled, packaged and labeled – ready to be placed in your Thomas EMS Pediatric Pack. Each fill kit contains 8 size specific packages that are clearly marked to correspond with the pouches of your Thomas EMS Pediatric Pack.

1472-10516 Kit Only for Thomas Pediatric Pack (bag not included) \$769.99 ea

THOMAS EMS IFAK BAG*

Equip your EMT's and medics with the equipment necessary to quickly triage and save lives in an "Active Shooter" or other mass casualty scenario with the Thomas EMS IFAK - Active Shooter Kit. This compact, compartmentalized pack includes an adjustable shoulder strap that can be worn across your body over turn-outs or swat gear if necessary.

** Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.*

THOMAS EMS DRUG CASES

All Thomas EMS Drug cases are made of 500D nylon with both hard plastic and a padded inner lining to keep the drugs from crushing even when the case is smashed inside a bag. All cases have a padded inner flap in between sides holding the vials.

The padded center page adds extra protection for fragile vials and has 2-vinyl windows for printed material. Each side of the drug case has over 25 separate elastics to hold vials securely in place. The other side of the case holds our brand new Boxed drug pocket. If you don't want the boxed drug side, you can remove it and add other removable strips. The other side of the kit includes the Thomas dry erase board and pen, which can be used for patient note taking (vital signs, drugs administered, etc..) or equipment replacement reminders. This case fits inside all of the larger Thomas EMS ALS bags.

Dimensions: 9.25" x 13" x 4.5"

683000 Thomas Padded Drug Case, Yellow. \$101.99 ea

The padded center page adds extra protection for fragile vials and has a vinyl window for printed material. Comes with 6 removable strips to hold vials of all sizes. Fits inside the Aeromed Advanced Pack from Thomas EMS

Dimensions: 5" x 11.25" x 3.75"

2524-30102 \$64.99 ea

The padded center page adds extra protection for fragile vials and has a vinyl window for printed material. Will work for all drugs but is specifically configured for use with the NarcBox Narcotics security safe. Comes with 5 removable strips, with sizes for both the preloaded drugs as well as the smaller vials.

Dimensions: 5" x 8" x 2.5"

2524-30702 Drug Case Narc Box, Blue \$64.99 ea

This RSI drug case is insulated and made to store key refrigerated medications, and the insulation will keep them cool longer after removing them from the cooler. Comes with 3 removable strips for holding various vials.

Dimensions: 3.25" x 8.5" x 2"

2521-30518 Thomas RSI Drug Case, Insulated, Red. \$56.99 ea

- **FLAT**
smooth, swabbable surface.
- **SPLIT-SEPTUM**
a preferred design feature for connectors.
- **STRAIGHT FLUID PATH**
for clearing blood and blood residual with low flush volumes.
- **MINIMAL DEADSPACE**
(also referred to as residual volume) of 0.04 mL allow for lower flush volumes.

MICROCLAVE® TECHNOLOGY

Healthcare associated catheter-related bloodstream infections (HA-BSIs) remain a major cause of morbidity and mortality in the U.S. The design of Intravenous needlefree connectors (NCs) plays a substantial role in HA-BSI risks.

Based on recommendations found in Infection Control Today, there are several features of a needlefree connector (NC) that can reduce the risk of infection. Based on a 2013 study comparing 8 different connectors, the MicroClave needlefree connector ranked the best overall.

MINIMAL DEADSPACE

Minimal deadspace (also referred to as residual volume) of 0.04ml allows for lower flush volumes

STRAIGHT FLUID PATH

Allows for clearing of blood and blood residual with low flush volumes

NO CLAMPING SEQUENCE

Reduces educational burden and risk of error

NEUTRAL DISPLACEMENT

So called "positive" and "negative" pressure luer access mechanical valve NCs have been associated in a number of studies with increases HA-BSIs risk

PRODUCT ATTRIBUTES

Base Technology	Internal cannula and silicone compression seal split-septum. Internal cannula windows are exposed by the insertion of a male luer, and cannula enters the male luer's internal space to achieve flow.
Residual Volume	0.04 mL
Fluid Path	Straight through polycarbonate cannula. Enhances flushing efficiency.
Moving Parts in Fluid Path	No
Number of Assembly Parts	3, of which 1 moves on luer access
Fluid Residual External on Disconnect	Minimal
Clamping Sequence	None required
Flow Rate	165 mL/min
Clear Available	Yes
Antimicrobial Available	Yes
Patient Comfort	Smooth housing. Small profile.
Bacterial Transfer Performance	The least amount of bacterial transfer of any connector tested.
Displacement	Neutral: 0 to -0.01 mL -0.0049 mL and -2.2cm published
Flushing Performance	Highly efficient. Connector cleared of blood elements with minimal flush volumes (2 to 7.5 mL). Not recommended to change connector after blood draw.
Performance Data and Trademarks	ICU Medical and MicroClave are trademarks of ICU Medical Inc. Performance data on file at ICU Medical Inc. San Clemente, CA 92673. Reference ENG-433.

CURAPLEX® SELECT IV ADMINISTRATION SETS

Curaplex® Select needle-free administration and extension sets utilize MicroClave® neutral displacement technology, creating a safe, protective barrier in the IV connector. This set serves to lessen the risk of bacterial contamination or infection during procedures. Adoption of this innovative technology may lead not only to safer patient outcomes, but improved cost of care. [50/cs]

- Tubing is standard / macrobore
- All tubing is DEHP-free and latex free
- Each unit is packaged in a poly pouch

B.BRAUN CME BODYGAURD 121 TWINS DUAL-CHANNEL INFUSION PUMP

The BodyGuard 121 Twins ambulatory is the only lightweight, dual-channel infusion pump on the market. Priced to compete with larger devices, the BodyGuard 121 Twins pump gives you the flexibility to deliver continuous infusion or use the CCT drug library. A lightweight, easy-to-use design makes it a good fit whether pole-mounted or carried with the patient. The Twins pump can infuse via large volume IV sets or syringe. The Twins pump is very easy to titrate, has a long battery life of 7 hours and only weighs 1lb. Includes pump, pole clamp and power cord. Optional carrying case available.

Product Capabilities

- 2 Infusion Channels
- Deliver 2 independent treatment regimens
- 4 Infusion Programs: Continuous, Intermittent, Total parenteral nutrition (TPN), Patient-controlled analgesia (PCA)
- Piston Mechanism- Delivers $\pm 5\%$ accuracy and $1.8 \mu\text{l}$ linear infusion even at the lowest flow rates your protocols require
- 0.1 to 1200 ml/hr Flow Rates- Extra-wide range to meet your needs

Thermal Angel® EMERGENCY PACKS*

The Thermal Angel is an in-line, battery-powered disposable, lightweight and completely portable blood and IV fluid infusion warming device, capable of intravenous application and irrigation warming.

- Disposable; Single Patient Use
- Maintains a constant 38°C ±3°C (100.4°F) at a flow rate of KVO to 150 ml/min given a fluid input temperature of 20°C (68°F) with a fully charged battery (TA-BCE or TA-UB1)
- Smart Disposable - Measures / adjusts output temperature 5000X per second
- A fully charged Standard Battery (TA-BCE) will last approximately 3 to 5 liters of IV fluid at various flow rates with an input temperature of 20°C (68°F) or 1 to 3 units of blood with an input temperature of 10°C (50°F).
- A fully charged Ultra Battery 1 (TA-UB1) will last approximately 1 to 2.5 liters of IV fluid at various flow rates with an input temperature of 20°C (68°F) or 1 to 3 units of blood with an input temperature of 10°C (50°F).
- Cost Effective - Single disposable remains with patient (up to 72 hrs)

IV Warmers

THOMAS EMS 4-LITER IV WARMER

This IV warmer can bring up to 4 liters of fluid up to body temperature and keep them ready for use as long as power is supplied. Just plug in the 12 V power supply and IV's will be body temperature the moment you need them. Entire case is surrounded with 2 layers of insulation. First a ½ inch closed cell foam providing structure as well as insulation, with an inner lining of Mylar™ heat reflective material. The heating element is completely removable and the IV's can be accessed while staying in the bag. If the fabric materials are over soiled or damaged, snap out the electronics and clean or replace the bag.

Key Features Include:

- Fuse protected power supply
- Anodized aluminum heater housing
- Fuse protected circuit board controller
- 12 Volt operation
- Insulated Cordura™ bag
- Mylar™ heat reflective inner lining
- Point Tie Down Ring For Aviation

Dimensions:

Exterior: 13.5 in x 11 in x 3.75 in

Interior: 12 in x 9.5 in x 2 in.

1870-66118 Thomas EMS 4-Liter IV Warmer, Red, 1000D Cordura, 12V \$462.99 ea

SOFT SACK IV FLUID WARMER

Built of rugged Cordura™, lined with a layer of Thinsulate™ insulation, with an inner lining of Mylar™ heat reflective material, this is the finest EMS fabric based IV fluid warmer on the market. Built with snap in electronics component, the Soft Sack IV fluid warmer can easily be remanufactured to its original specification after years of service.

Key Features Include:

- Fuse Protected Power Supply
- Anodized Aluminum Heater Housing
- Fuse Protected Circuit Board Controller
- Over Therm Fuse in Heater
- 12 Volt Operation
- Optional 120 vac Adapter
- 3 Liter Capacity
- Pouch For IV Catheters, Tubing And Other IV Accessories
- Dimensions: 12" x 11" x 6"
- Point Tie Down Ring For Aviation

12VSS3L02 Soft Sack IV Fluid Warmer. \$789.99 ea

MAD NASAL™ INTRANASAL MUCOSAL ATOMIZATION DEVICE

The MAD® (Mucosal Atomization Device) is used for delivery of atomized medication to the nasal, oral, laryngeal, tracheal and pulmonary mucosal surfaces. Reliable atomization of topical solution across the nasal and oropharyngeal mucous membranes.

Safe and Painless

- No needle, no shot, no pain, and no risk of needle stick

Rapidly Effective

- Atomized nasal medications absorb directly into blood stream, avoiding first pass metabolism
- Atomized nasal medications absorb directly into the brain and cerebrospinal fluid via olfactory mucosa to nose-brain pathway
- Achieves medication levels comparable to injections

Controlled Administration

- Exact dosing, exact volume
- Titratable to effect
- Atomizes in any position
- Atomized particles are optimal size for deposition across broad area of mucosa

Minimal Resource Utilization

- Nasal drug administration is quick and easy, eliminating IV set-up time
- No sterile technique required

THE COLLIE CLIP

The Collie Clip is the base component of a multi-functional gripping and supporting system. It is small, light and easy to use with or without gloves. Manufactured from surgical grade stainless steel, it is low maintenance and not prone to rust or corrosion. With the available attachments, the Collie Clip can be used as an IV/blood bag holder, airway management tool, urinary catheter holder, chest drainage bag holder, line or cable separator, swab bowl holder or a waste bag holder.

TEGADERM® TRANSPARENT DRESSING

This sterile “breathable” barrier lets oxygen in and keeps moisture vapor out. Tegaderm Transparent Dressing is conformable, hypoallergenic and allows for continual site observation without removing the dressing. Dressing measure 2 3/8" x 2 3/4". [100/bx - 4 bx/cs]

081624	Transparent Dressing	\$57.99 bx	\$231.96 cs
---------------	--------------------------------	------------	-------------

CURAPLEX® TRANSPARENT DRESSING

This Transparent Dressing was designed to serve the dynamic needs of care in a critical environment. The thin, clear sterile dressing effectively keeps out water, dirt, and germs, all while allowing the patient’s skin to breathe. This dressing allows for efficient monitoring of the IV site, as it does not have to be removed for examination. [100/bx - 4 bx/cs]

18303	Curaplex Select Dressing, 2.38" x 2.75"	\$24.99 bx	\$99.96 cs
661469MS	Curaplex Dressing, 2.38" x 2.75"	\$42.29 bx	\$169.16 cs

CLEARSITE® TM INTRAVENOUS DRESSING

A transparent dressing with a semi-permeable polyurethane adhesive film that is designed to cover and protect wounds and minor skin irritations as well as secure objects to skin such as I.V. catheters. For use only on non-infected wounds. 2" x 3". [400/cs]

351023	ClearSite TM Intravenous Dressing	\$0.80 ea	\$320.00 cs
---------------	---	-----------	-------------

CURAPLEX® IV GUARD

This sterile, waterproof foam dressing provides catheter stability. Features a transparent window that offers visibility of the IV site. [100/bx - 5 bx/cs]

36002MS	IV Guard	\$51.99 bx	\$259.95 cs
----------------	--------------------	------------	-------------

VENI-GARD®

Veni-Gard, with a transparent membrane, is a low-profile, breathable dressing with high moisture vapor and oxygen permeability. Because it is totally occlusive to microorganisms and fluids, yet permeable to air and moisture vapor, the dressing may generally be left in place for the entire length of the IV. [100/bx - 5 bx/cs]

WINGED INFUSION SETS

Terumo's soft, flexible interlocking wings readily conform to the body's contour. The wing is angled for ease of positioning of the needle during venipuncture, and for less risk of vessel damage or occlusion of the lumen. The ultra-thin wall design assures ease of penetration and continued access with a single insertion. [50/bx]

INTROCAN SAFETY® 3 CLOSED IV CATHETER

The Introcan Safety 3 Closed IV Catheter offers the same safety benefits as Introcan Safety with the added feature of a multi-access blood control septum that limits blood exposure after withdrawing the needle and every time the hub is accessed. [200/cs]

- Passive safety needle shield aids in prevention of needlestick injuries
- Multiple-use blood control septum helps prevent blood exposure
- Integrated stabilization platform is designed to improve catheter stability and minimize movement within the vessel
- Smooth hub surface and polyurethane catheter material help improve patient comfort and in-dwelling performance

INTROCAN SAFETY® IV CATHETERS

The Introcan Safety IV Catheter incorporates a passive protection system to promote clinician and patient safety. From needle insertion to catheter deployment to needle removal, the protection system is automatically activated while maintaining the application characteristics of a traditional IV Catheter. [200/cs]

- Passive safety clip protects against accidental needlestick injuries and prevents accidental needle reinsertion.
- Super sharp universal needle bevel and double flashback vein access confirmation is designed for greater first-stick success and clinician confidence.
- Passive safety mechanism promotes best practices and compliance with recommended safety guidelines.
- Clear flashback chamber allows visibility of blood, and its ribbed design affords secure handling
- Removable flash plug permits attachment of a syringe for aspiration or other special procedures
- Color-coded labels for quick gauge size identification
- Available in FEP and Polyurethane

IV, DRUG DELIVERY & BLOOD COLLECTION

IV Catheters

VIAVALVE SAFETY IV CATHETER

ViaValve Safety IV Catheters provide blood control to help reduce the risk of blood exposure and contamination. A unique valve inside the catheter hub impedes blood flow from the patient's vein upon initial venipuncture. Maintaining a clean access site, helps prevent the transfer of bloodborne pathogens from patient to caregiver on soiled gloves, clothing, bedding and dressings. The catheter, once in the patient's vein, is activated by attaching the Luer fitting of an infusion line which opens the valve to allow unrestricted flow. ViaValve Safety IV Catheter also helps prevent unintended needlesticks. Its safety guard surrounds the retracted introducer needle and produces a "click" to indicate that the needle is contained for handling and disposal.

CURAPLEX® CLEARSAFE™ SAFETY I.V. CATHETER

The cost-effective MedSource ClearSafe™ I.V. catheter is designed to allow caregivers easy and safe I.V. access. The specially designed beveled needle provides smooth, painless insertion. The clicking lock mechanism ensures safety from cross-contamination.

- Fully encapsulating needle shield with clicking lock safety mechanism
- Ergonomically designed thumb grip
- Gently tapered catheter tip
- Large-volume chamber
- Designed to help healthcare workers protect themselves from exposure to blood borne pathogens via needlestick injuries
- Provides smooth transition from needle to catheter
- Allows for a variety of user techniques to aid insertion
- Provides clear visual conformation through flashback

IV, DRUG DELIVERY & BLOOD COLLECTION

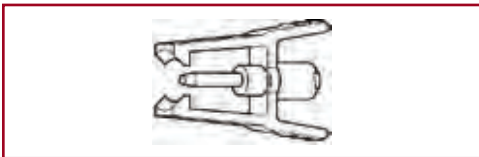

Vial and Ampule Access Devices

BD TWINPAK™

The BD Twinpak is a universal IV access device, which offers twice the performance of traditional methods. It features two cannulas in one shield: one red hub cannula for syringe filling and one clear blunt plastic cannula for safe split septum access. The Twinpak helps to streamline IV work flow and reduces the number of individual pieces, thereby saving time and reducing costs. [1000/cs]

NEEDLE-FREE SYRINGES

Needle-Free Syringes feature dual-side ports, which create greater fluid dispersion in flushing and drug delivery. This helps to minimize the potential risk of infection by reducing the reliance on turbulent flushing techniques. Center-point design provides simplified access to the injection site with smoother insertion and reduced penetration force.

SAFETYGLIDE®

The SafetyGlide features the Activation-Assist™ needle protection system. Used with single hand activation, a stainless steel latch shields the needle tip after activation. The SafetyGlide requires minimal training and a minimal change in technique. [50/bx]

BD SAFETY-LOK® SYRINGES

The Safety-Lok Syringe features an extra sharp needle for greater patient comfort. With bold scale markings, a crystal clear barrel and sleeve, large flanges and a tapered plunger rod, the Safety-Lok offers increased control and ease of use. In addition, the Safety-Lok provides a clear visual and audible confirmation of the lock position.

357290 Multisample Luer Adapter \$27.79 100/bx \$277.90 10 bx/cs

FAST1® INTRAOSSEOUS INFUSION SYSTEM

The FAST1® sternal IO delivers drugs to the heart faster and in higher therapeutic concentrations than tibial IO in cardiac arrest patients. Specifically designed for use in demanding emergency environments, it is a quick, safe and efficient IV alternative for the delivery of drugs and fluids to the heart. FAST1® is used extensively by defense departments, emergency medical services and hospitals around the globe. Training System includes: 1 SimIO System, 1 Demo Introducer, 1 Training Video, 1 Training Manual, Supplies for 10 Demonstrations.

- FAST:** Fluids to the heart in seconds
SIMPLE: Success rate of over 95%
EFFECTIVE: For concurrent use with other procedures
SAFE: Minimizes cross contamination

JAMSHIDI® INTRAOSSEOUS NEEDLES

Designed to allow safe and simple aspiration of marrow from the sternum or iliac crest. For pre-hospital care, it can also be used to administer fluids to pediatric patients (15 gauge for 9 months and older; 18 gauge for younger than 9 months). The adjustable depth spacer controls depth of insertion. [10/cs]

621518	Jamshidi Intraosseous Needle, 18 ga x 1.5"	\$23.49 ea	\$234.90 cs
621515	Jamshidi Intraosseous Needle, 15 ga x 1.875"	\$23.49 ea	\$234.90 cs

CURAPLEX® INTRAOSSEOUS KITS*

Curaplex IO kits are available with either a 15 or 18 gauge Jamshidi needle. Both include a 20 cc LL syringe, a PVP prep pad, an alcohol prep pad, a roll of clear tape and high flow 35" extension tubing with 4-way stopcock.

36613	IO Kit with 15 ga Jamshidi Needle	\$22.79 ea	
36614	IO Kit with 18 ga Jamshidi Needle	\$22.49 ea	

VALUE PRICED

BONE INJECTION GUN (B.I.G.)

The Bone Injection Gun (B.I.G.) presents a simple "position and press" mechanism. The world's first automatic, user-friendly IO device brings you rapid IO access for the delivery of fluids and medications at flow rates similar to peripheral IV infusion. [12/cs]

- Disposable, automatic spring-loaded trocar 15G needle
- Ready-to-use, no maintenance required
- Pocket size: 6.5 x 3 in. (16.5 x 7.6 cm)
- Lightweight: Less than 3 oz

934-WMBIG-A1	Bone Injection Gun, B.I.G., Adult, 15 ga. Needle	\$90.99 ea	\$1091.88 cs
934-WMBIG-C2	Bone Injection Gun, B.I.G., Pediatric, 18 ga. Needle	\$90.99 ea	\$1091.88 cs

* Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.

NITROMIST®

NitroMist is a nitroglycerin lingual aerosol that delivers 0.4 mg per metered spray. This propellant-driven, ultrafine mist delivery system helps preserve the potency and stability of the medication. The pocket-sized bottle is convenient and easy to prime, ensuring quick administration.

See page 363 for more information.

Bound Tree Medical, LLC

Controlled Substance Ordering Guidelines

Bound Tree Medical is pleased to now offer two ordering options for Schedule II controlled substances. In addition to the traditional paper DEA Form 222, Bound Tree now offers CSOS (Controlled Substance Ordering System), a convenient, easy to use DEA approved online system. Each time a Schedule II controlled substance is ordered, a 222 form must be submitted or an online order is required through the CSOS system. Schedule III, IV and V controlled substances (Ativan, Valium, Versed, etc.) may be ordered via phone, fax or mail.

Before Bound Tree Medical can process your order, we must receive a License Authorization form and current license/certificate.

For those interested in ordering via our CSOS program, please see the next page for instruction on how to get started. For those utilizing paper DEA Forms 222, please refer to the following instructions for completing those forms.

Complete instructions for completing a Form 222 are found on the back of the back copy of each Form 222. (The DEA Form 222 is a triplicate form.) A Bound Tree Medical order form is not necessary when ordering Schedule II substances. Please include a copy of your purchase order number with your Form 222 if you should require it for receiving/billing purposes.

In accordance with Federal regulations, controlled substances can only ship to the address shown on the DEA certificate. This address is pre-printed on your DEA Form 222.

* DEA Form 222s are issued by the DEA. To order these forms please contact your local DEA office or visit www.deadiversion.usdoj.gov.

Instructions for completing DEA Form 222

Please follow these instructions closely. Per Federal regulations, any form that has been altered or contains errors will be voided and returned to you.

1. To (Name of Supplier) Bound Tree Medical. Please see map below. Select the Bound Tree address that corresponds with your shipping location. Use this Bound Tree address to complete sections 2 & 3.
2. Street Name
3. City, State
4. Date - enter date that the Form 222 is completed and mailed.

Since controlled substances are not returnable, please be very specific with the product information.

5. No. of packages - indicate the number of boxes you would like to order.
6. Size of package - indicate the number of units per box.
7. Name of item - drug name, concentration and delivery format (amp, carpupject, vial, etc.).

Please see our Controlled Substance listing to obtain size of package and full descriptions.

8. Last line completed - indicate the number of lines you used to complete your order (example - if one item ordered, write in the number "1")
9. Signature of Purchaser or Attorney or Agent: This is the person who signs the DEA application and renewals or any individual who has been authorized by a power of attorney. Your Medical Director may or may not be the authorized agent.

Bound Tree will complete sections 10- 13. Do not write in these sections.

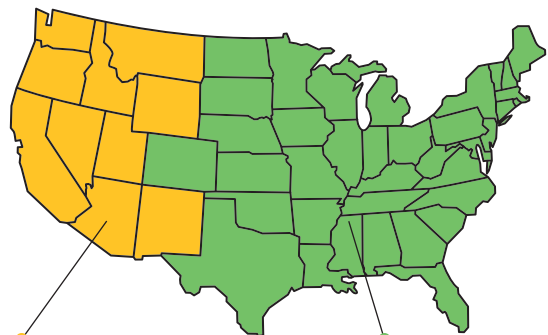

After completing the form, remove the last copy (blue) and retain it for your records. Do not separate the first two copies (brown and green), and do not remove the carbon paper between these two copies. By regulation, we can only accept forms where the brown and green copies are NOT separated and carbons are intact.

Please mail your completed Form 222 to the Bound Tree Medical address you used as the supplier information [see map to determine servicing Bound Tree Medical Distribution Center]. We recommend sending your 222 form in a way that can be tracked. The Bound Tree Medical Distribution Center shipping these items must have the original Form 222 (brown and green copies) in its possession prior to shipping your order.

BOUND TREE MEDICAL NOW OFFERING

ELECTRONIC CLASS II CONTROLLED SUBSTANCE ORDERING

Class II controlled substances can now be ordered through our secure electronic Controlled Substances Ordering System (CSOS) without the supporting paper DEA Form 222!

ABOUT THE CSOS PROGRAM

CSOS was developed by the DEA for the electronic transmission of Class II controlled substances orders. It is the only allowance for electronic ordering of Class II controlled substances.

Using the DEA's CSOS program to order Class II controlled substances provides you with the following benefits:

- Significant reduction in the number of ordering errors
- Ability to include more line items on a single order
- Faster transaction times
- Lower costs due to order accuracy and decreased paperwork

GETTING STARTED

The DEA's CSOS program requires that each individual purchaser enroll with the DEA to acquire a CSOS digital certificate before placing an electronic order for Class II Controlled Substances. Each digital certificate contains identification information specific to each individual subscriber and his/her associated DEA registration.

PLACING YOUR FIRST e222 ORDER

Once you have successfully installed the CSOS digital certificate on your computer, please contact Customer Service to enroll in the Bound Tree e222 program. After receiving your login information from Customer Service, you may start ordering Class II Controlled Substances from Bound Tree Medical's secure electronic Controlled Substances Ordering System (e222.boundtree.com).

For more information contact your Bound Tree Account Manager or get started today at www.boundtree.com/csos.aspx.

NARC BOX™

Narcotic and controlled substance security is one of the key challenges facing the EMS and Fire Industries. The Narc Box™ balances maximum controlled substance security, with quick access to these medications in critical patient response scenarios is a necessity.

The Narc Box is made from 1/8th in anodized airplane grade aluminum, and can withstand most forced entry. The Servo style lock can only be activated by the electronics by using the full color resistive touch screen or encrypted RFID entry system. The Narc Box can also be easily vehicle mounted, either vertically or horizontally, to save space and accommodate virtually any cabinet configuration.

- Temperature tracking warns users when the Narc Box is too hot or cold
- Detailed time and date stamped information for each access
- Updates to the Narc Box software are automatic and wireless
- Dimensions: 10" x 8" x 4"
- Weight: 3.5 lbs

1890-20651	Narc Box, incl 110V power adaptor, 10"x 8"x 4"	\$1139.99 ea

Authorization For Medical Directors and Pharmacists-in-Charge

A CUSTOMER AND SHIPPING INFORMATION

Please Print or Type:

Facility Name: _____ Account # _____

Contact Name: _____ E-mail address: _____

Company Shipping Address: _____

City: _____ State: _____ Zip: _____ Telephone: _____

Does customer have multiple shipping addresses? Yes* No **If there is more than one shipping address, please include an attachment with additional addresses.*

B ITEM CERTIFICATION

We certify that the items purchased will be used only by the organization named above. The material will not be sold to a third party, distributed or used for any other purpose. Prescription Drugs are subject to the U.S. Federal Export Control Regulations and may not be exported or otherwise removed from the U.S. without prior written authorization from the U.S. Department of State. [Please check box]

C PRODUCT CATEGORY AND LICENSE INFORMATION

I, the undersigned, am the Medical Director or Pharmacist-in-Charge for the above-named facility at the above-specified shipping address. In this capacity, I hereby authorize the facility to authorize the below-indicated category(ies) of products and submit the following referenced license(s) with respect to such orders, with a copy of such license(s) attached to this form. [Please check appropriate box(es) and complete corresponding license information.]

I wish to order Prescription Drugs and/or Medical Devices. License authorizing these items is as follows:
Physician's License or State Board of Pharmacy License # _____ Expiration Date: _____

I wish to order Controlled Substances: License(s) authorizing these items is as follows:
DEA License # _____ Expiration Date: _____
DEA license must be specific to shipping address. Please provide either medical director, pharmacists-in-charge or entity DEA license that corresponds to desired shipping location. Regardless of shipping address specified in Part A, controlled substances will ship to address corresponding to DEA license provided.

State Controlled Substance License # _____ Expiration Date: _____
State controlled substance license is required for certain states. For those states, both the DEA and state license must be provided.

D STATEMENT OF AUTHORITY AND SIGNATURE

I hereby swear under penalty of perjury that (i) I am the (check one): Medical Director Pharmacist-in-Charge with responsibility for the facility identified above in Part A with respect to the specified address; (ii) that the license information provided is current and accurate and I am, therefore, licensed to authorize shipment of the substances indicated on this form to the facility designated; and (iii) I understand that failure to provide complete and truthful information may constitute grounds for the vendor to recommend that appropriate authorities bring disciplinary actions against me.

Signature: _____ Date: _____

Print Name: _____ Print Title: _____

Instructions:

This Authorization is only valid if accompanied by a copy of the license specified in Part C. This Authorization will expire at the time of the expiration of the above-specified license (as applicable to the product ordered). Upon expiration, a new Authorization must be submitted for orders to be processed. If there is a change in Medical Director or Pharmacist-in-Charge, this Authorization will immediately become invalid and a new Authorization, including applicable license(s), must be submitted for orders to be processed.

Please complete this form and submit a copy of the appropriate license(s) to Customer Licensing by facsimile to 866-470-1355, by email to custlicense@sarnova.com, or by mail to P.O. Box 8023, Dublin, OH 43016-2023.

MONITORING & DIAGNOSTICS

Pulse Oximetry

MEDTRONIC PORTABLE SPO² PATIENT MONITORING SYSTEM

The Nellcor™ Portable SpO² Patient Monitoring System, PM10N, is a convenient, handheld monitor that is ideal for spot-checks or continuous monitoring in various healthcare and home use settings. Its ergonomic shape and simple design make it intuitive to use and simple to operate. Wherever you need accurate, reliable SpO² measurements, count on the Nellcor portable SpO² pulse oximeter to meet the challenge.

2711-16401 Medtronic Portable SPO² Patient Monitoring System \$749.99 ea

NONIN® 8500 PULSE OXIMETER

The Nonin 8500 Handheld Pulse Oximeter features a bright LED display and simple, maintenance-free operation. Ideal for spot checks or transport monitoring, the 8500 can conveniently monitor infants, children and adults. Weighs 10 oz with 6 AA batteries. 100 hours of battery life. Dimensions 3"W x 6"H x 1"D. 3 year warranty, UL listed, USAF approved and tested for helicopter vibration. Memory option of 18 hours available.

MONITORING & DIAGNOSTICS

Pulse Oximetry

CURAPLEX® FINGER PULSE OXIMETER

The Curaplex fingertip SPO2 monitor is ideal for use in situations where fast readings of blood oxygen saturation and pulse rates are needed.

- Small & lightweight design
- No additional sensors needed
- Dual color OLED display
- SPO2, PR, Pulse Bar, Plethysmogram
- Six display modes
- Low power consumption
- Accommodates a wide range of finger thicknesses
- 30 hours of continuous use; 2500 spot checks

69100MS Fingertip SPO2 Monitor \$97.99 ea

CURAPLEX® SELECT ONYX® VANTAGE 9590 FINGER PULSE OXIMETER

When you need to make decisions quickly, you don't have time to question the accuracy of your finger pulse oximeter. You can trust Onyx Vantage 9590 finger pulse oximeter with PureSAT® technology to quickly and accurately capture SpO₂ and pulse rate measurements – even on patients where low perfusion is a challenge. Accuracy matters and Onyx Vantage provides accurate data for actionable decision making. The Onyx comes with lanyard, instructions on CD and two AAA batteries. Optional carrying case available.

- Oxygen saturation range – 0% to 100%
- Pulse rate range – 18 to 300 pulses/minute
- Lead-free and latex-free construction
- Built to last in the USA
- Easy battery access
- Comfortable to carry anywhere—it is lightweight and only weighs two ounces

NONIN® ONYX II FINGER PULSE OXIMETER

The Nonin® Onyx® II is ideal for use in any situation where a fast accurate reading of blood oxygen saturation and pulse rate is needed. It is small and lightweight, and can be carried on a lanyard, in a carrying case or in your pocket. The large LED display offers a wide viewing angle for optimum visibility of patient readings, day or night. Nonin® has also improved the design of the battery door for more convenient battery access. The pulse quality indicator is bright and easy-to-see, allowing for quick and accurate assessments of patient readings. A new turn-off mechanism allows two AAA batteries to provide approximately 2500 spot checks or 21 hours of continuous operation. The Onyx® II accommodates a wide range of finger thicknesses, 0.3-1.0 inch (8 mm to 26 mm). With the rugged and reliable design of the Onyx® II, it can be used in even the most demanding environments. Two-year warranty. Dimensions: 1.31" x 2.22" x 1.27" (3.32 x 5.63 x 3.22 cm) Weight: 1.89 oz (53.5 g) w/batteries. [12/bx]

173802 Curaplex Justice Mark II, Hard Case for the Onyx \$34.79 ea

NONIN® WRISTOX2, PULSE OXIMETER

The WristOx Model 3150 uses proven PureSAT® pulse oximetry technology. It's extremely rugged construction fits conveniently on the wrist like a wristwatch. The use of two AAA batteries provides a minimum of 48 hours of continuous use (minimum 24 hours with Bluetooth® wireless continuously on). The WristOx2 features 1,080 hours of non-volatile memory at a four-second sampling rate with additional high resolution sampling options of one or two seconds. Connection to other devices or computers can be done using either USB download cable or Bluetooth wireless technology.

2711-63150	Pulse Oximeter, WristOx2, Cardio-Ambulatory Monitor, Compact, Remote Wireless, Bluetooth	\$889.99 ea
-------------------	--	-------------

BCI® DIGIT® FINGER OXIMETER

The BCI Digit Finger Oximeter combines a monitor and a sensor in one unit, delivering fast and reliable oximetry in a handy, pocket size. Although small in size, the Digit provides SpO₂, pulse rate and pulse strength measurements for patients from pediatric to adult. This non-invasive device combines convenience and affordability for care providers.

173420Y	BCI Digit Finger Oximeter	\$265.99 ea
----------------	-------------------------------------	-------------

OXIMAX MAXFAST FOREHEAD SPO2 SENSOR

Part of the OxiMax pulse oximetry system, the MaxFast forehead sensor works more effectively than traditional finger sensors at detecting changes in SPO₂, especially during poor perfusion conditions. This sensor features the LoSat expanded accuracy range for extremely precise results, and is the only sensor indicated for mechanically ventilated patients. Includes MaxFast forehead sensor with long-lasting, 4-layer adhesive and a soft, adjustable headband. Single-use.

9365	OxiMax MaxFast Forehead SpO ₂ Sensor and Headband	\$43.29 ea
-------------	--	------------

OXIMAX ADHESIVE SENSOR

OxiMax™ adhesive sensors are highly accurate and feature tear-resistant bandages that provide a comfortable, secure "second-skin" fit. The sensor bandage is also designed to prevent ambient light from interfering with SpO₂ readings.

175412	Oximax Adhesive Sensor, Disposable, Memory Chip, 18" cable, Greater than 30 kg, Adult.	\$24.29 ea

MEDICABLEUSA® UNIVERSAL PREMIUM SOFT BOOT™ PATIENT SENSORS & CONVERSION CABLES

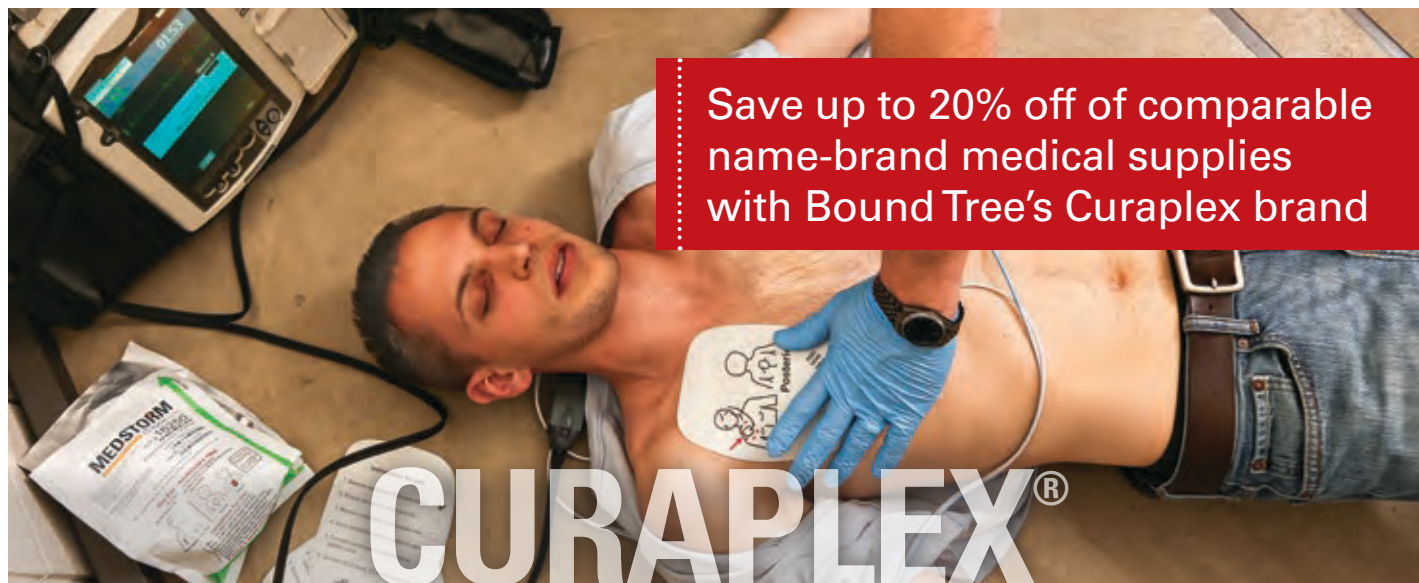

Universal Premium Soft Boot sensors are the standardized approach to SpO2 patient monitoring. The soft, one-piece design stays where it is placed, has no springs or hard parts that can break or crack and the hood design protects from light that can cause an inaccurate result. Conversion cables allow the sensors to be used with most Masimo, Nellcor, Nonin and BCI (monitors), allowing standardization across multiple pieces of equipment.

- Reusable sensors are soft, flexible and latex-free
- One size works for adult, pediatric and infant patients
- Durable and easy to clean, one year warranty included
- Budget friendly from lower cost and less frequent replacement orders
- Conversion cables allow for use with most pulse oximetry equipment

ASSURANCE® NASAL ALAR SPO2 SENSOR

Product Features:

- Earlier detection
- More reliable monitoring of low perfusion
- Dependable monitoring
- Easy access to the alar site
- Immune to ambient light
- Less susceptible to high noise and vibration environments
- For use with compatible pulse oximeters including Nellcor OxiMax and Oxisensor II and Philips FAST compatible monitors.

In the world of EMS, speed is everything. Making quick, informed decisions can be the difference in patient outcomes. The Assurance® Nasal Alar SpO2™ Sensor is your “one and done” solution for fast, accurate and dependable SpO2 readings.

This single-patient-use sensor maintains its placement on the nasal ala comfortably, without adhesives. The sensor is easily removed and reapplied, eliminating the waste associated with trying multiple sensors to get a good signal. The sensor’s receiver is inside the nose naturally protecting it from the interferences of ambient light and making it less susceptible to dropout caused by noise and vibrations during EMS transportation.

2712-11214 Assurance Nasal Alar SpO2 Sensor, Disposable . . . \$23.29 ea \$558.96 24/cs

BCI® CAPNOCHECK® II HAND-HELD CAPNOGRAPH / OXIMETER

The BCI Capnocheck II Hand-Held Capnograph / Oximeter is a full-featured, highly portable unit that can deliver capnography or capnography combined with oximetry. The large, back-lit display assures easy viewing of waveforms, numeric values and on-screen trending data. The battery-operated design with optional battery bypass offers the flexibility to accommodate both stationary and transport applications. The Capnocheck II also offers an infrared link to an external printer (not included) that provides quick, trouble-free downloading.

MICROCAP™ AND NELLCOR™ N-85 HANDHELD CAPNOGRAPHS

Microstream™ capnography technology delivers effective, proven airway management by providing the earliest indication of airway compromise. The technology of the Microcap (EtCO₂) and N85 (EtCO₂ and SpO₂) hand-held capnographs is designed to provide an accurate, reliable and easy to use assessment of your patient's breathing quality, whether intubated or non-intubated, in any clinical setting. Both systems feature the following features and benefits:

Ease of Use:

- Molecular Correlation Spectroscopy (MCS™) eliminates the need for time-consuming manual calibration and zeroing
- No additional water traps
- Wide selection of CO₂ sampling accessories available

Ease of Use:

- No external sensor required
- No cross sensitivity when using O₂, N₂O, He and other gases
- Accurate in a wide range of temperature environments
- Smart sampling technology provides superior oral/nasal sampling; reduces nuisance alarms

Safety:

- FilterLine® provides a bacteria barrier preventing exhaled moisture and air-borne contamination from entering the monitor

Features:

- Use for any patient population from neonate to adult
- Portable system can be used in Rapid Response Teams, Critical Care, Emergency Rooms, Emergency Transport, General Floor
- Switch quickly between intubated and non-intubated patients; simply attach the airway sampling line; no sensors to find or change
- Fast warm-up time

MONITORING & DIAGNOSTICS

Capnography

NONIN® LIFESENSE® CAPNOGRAPH/PULSE OXIMETER

The LifeSense Capnograph/Pulse Oximeter monitor is ideal for continuous monitoring in acute care environments. Equipped with Nonin PureSAT® SpO₂ and MedAir™ EtCO₂ technologies, LifeSense is a proven performer for ET-tube placement verifications, detecting breathing irregularities, gauging the efficacy of CPR and procedural sedation monitoring. Its sidestream design allows use with intubated and non-intubated patients. [10/bx]

Features:

- Fast, first breath detection of respiratory rate and end-tidal CO₂ (EtCO₂)
- Proven Nonin SpO₂ technology
- Highly visible, easy to use touchscreen display
- Numerical SpO₂, pulse rate, EtCO₂ and respiratory rate
- Capnograph and pulse plethysmograph
- Data output via RS232 port
- Meets rigorous ISO requirements for air and ground EMS transport

HEARTSTART® MRx ALS MONITOR/DEFIBRILLATOR WITH AED FUNCTION

The Philips HeartStart MRx is a transport monitor/defibrillator specifically designed with EMS in mind. With a wide viewing angle and full-color display, users appreciate the ease and speed at which critical information is conveyed. The HeartStart MRx features an optional CompactFlash® data card that automatically captures critical patient data, allowing EMS crews to seamlessly transfer information to hospital-based caregivers and enabling users to analyze, track and exchange patient data. The HeartStart MRx conducts automated self-tests that check for readiness, and is packaged in an exceptionally rugged design. Philips backs the HeartStart MRx with one year of on-site service.

Multiple configurations available Call for complete pricing and details!

Superior Measurements:

- Arrhythmia Monitoring
- SpO2 w/Fourier Artifact Suppression Technology
- Noninvasive Blood Pressure
- Microstream® Capnography
- Philips 12-Lead ECG
- Q-CPR™ Capabilities

Proven Therapies:

- SMART Biphasic Technology
- AED Mode
- Manual Defibrillation
- Synchronized Cardioversion
- Noninvasive Pacing

HEARTSTART FR3 DEFIBRILLATOR

The best professional-grade AED yet, the HeartStart FR3 is designed to make lifesaving faster, easier, and better.

- **Faster** – helping you do your job faster as it significantly reduces deployment. It eliminates steps to help you start the right therapy – CPR or defibrillation
- **Easier** – helping make your job easier with the smallest and lightest professional grade AED among leading global manufacturers.* It is designed to be rugged, reliable, and ready to use
- **Better** – helping you improve your response by supporting a culture of continuous improvement, including optimizing training and fine-tuning SCA response
- Automatically powers on by opening the FR3 carry case so you can focus on pad placement from the start
- Peel & place SMART Pads III. There's no foil pouch to open when the pads are pre-connected
- Receive patient-specific guidance with Philips SMART CPR for the most appropriate initial therapy – CPR or defibrillation – even for shockable rhythms
- Minimize CPR interruptions and speed shock delivery with Philips Quick Shock

HEARTSTART® FRX DEFIBRILLATOR

The HeartStart FRx Defibrillator is designed to be used in environments too demanding for many other defibrillators. The HeartStart FRx Defibrillator's biphasic waveform delivers a highly effective defibrillation shock that is also gentle to the heart. SMART Analysis automatically assesses the victim's heart rhythm and is designed not to deliver a shock unless the rhythm is determined to be shockable, even if the shock button is pressed. Although small and lightweight (3.5 lbs) the HeartStart FRx Defibrillator is exceptionally rugged. Designed to surpass rigorous testing requirements, the FRx withstands jetting water, loads up to 500 pounds and a one-meter drop onto concrete.

INTELLIVUE MP2

The Philips IntelliVue MP2 is a remarkably light, flexible and durable transport monitor that's also easy to use. Just a single step allows you to unplug and go. It is designed to withstand harsh environments including rain, shock, vibration, high humidity and temperature. The IntelliVue MP2 is FDA-cleared for use in road ambulance, aircraft and helicopter transport.

- Compact and easily carried (basic monitor weighs just 3.3 lbs)
- Configurable display of up to three waveforms
- User replaceable three-hour battery
- Electronic recording of ECG, SpO2 and NBP
- Crisp, colorful touch screen with 3.5" display

2612-20021 MP2 w/ECG, Resp., NIBP, SpO2 \$6743.00 ea

FRx/MP2 COMBO KIT*

The FRx/MP2 Combo Kit includes the Philips HeartStart FRx defibrillator and the Philips IntelliVue MP2 Monitor, packaged together in a durable Cordura carrying bag (not pictured). This combination enables EMS personnel to monitor and defibrillate patients in cardiac arrest.

IntelliVue MP2

The IntelliVue MP2 is a remarkably light, flexible, and durable transport monitor that's also easy to use. It weighs just 3.3 lbs and features a configurable display of up to 3 waveforms, and a crisp, colorful 3.5" touch-screen display. Just unplug and go in a single step, helping to evaluate, diagnose, and treat patients in need.

2525-61323 FRx/MP2 Combo Kit* \$13719.99 ea

PHILIPS HEARTSTART® ONSITE DEFIBRILLATOR

Weighing just 3.3 lbs., this small and lightweight defibrillator can be easily carried to the patient's side. Using clear, natural voice instructions, the OnSite Defibrillator guides the user through each step of defibrillation and CPR. Integrated SMART pads placed on the patient's bare skin transmit information to the defibrillator, which senses and adapts to the user's actions every step of the way. HeartStart OnSite includes proven Philips technologies for heart rhythm assessment (SMART Analysis) and defibrillation energy delivery (SMART Biphasic). And like all HeartStart defibrillators, it can be used to treat adults, as well as infants and children. Between uses, the HeartStart OnSite performs daily, weekly and monthly self-tests of its electrical components, subsystems and battery to help ensure continued reliability and readiness. A pads integrity test, which checks that the cartridge is properly installed and that the defibrillator pads are in working order, provides an additional level of assurance. Includes one pair of adult defib pads, one long-life (four-year) battery, directions for use and five-year warranty.

HeartStart One Ready Pack

- 1 pad cartridge
- 1 battery pre packed
- Standard case with spare pads, adult

2746-066C01 HeartStart OnSite Defibrillator, 1 Pad Cartridge, 1 Battery Pre-packed, and Case. \$1455.00 ea

BOUND TREE MEDICAL NOW OFFERS RECERTIFIED AEDS AND MONITOR/DEFIBRILLATORS

When seconds count, you need reliable equipment. When budgets count, you need cost-effective solutions that fit with today's economy. Now, you can have the best of both worlds with the recertified AED and Monitor/Defibrillator program from Bound Tree Medical.

Don't be fooled. Not all recertified programs are alike. Bound Tree Medical's 11-point checklist for AEDs, and 22-point checklist for monitor/defibrillators, are made by trained technicians in order to adhere to stringent manufacturer guidelines and specifications. Each recertified unit carries a 1-year warranty and AEDs still being manufactured carry a 3-year warranty. Contact Bound Tree Medical to learn more.

BOUND TREE MEDICAL 2ND LIFE SERVICE PLAN

Bound Tree Medical offers you security and peace of mind with our premium comprehensive service plan for your new or recertified medical devices, including monitor/defibrillators, AEDs, ventilators, infusion pumps and other general medical devices.

Here's how it works:

- Sign up for a service plan specifically designed for your device.
- We will send you a loaner device* and you can send us your equipment for recertification.
- Bound Tree will certify your monitor/defibrillator using our extensive 22-point checklist. For the initial recertification process, additional fees may be required to bring your device up to manufacturer-recommended compliance.
- Now that your device is recertified, enjoy the benefits of comprehensive repair coverage, preventative maintenance/calibration, free loaners*, annual device reports and timely notifications to name a few.

To learn more about our recertified product offering or to get started with your premium service plan, call us toll free at 800-764-0636.

Service Provided	Premium
Comprehensive repair coverage on device while under contract	✓
Preventative Maintenance / Calibration	✓
Free Loaners (freight not included)*	✓

MONITORING & DIAGNOSTICS

Recertified AEDs & Monitor/Defibrillators

RECERTIFIED LIFEPAK 15

The LifePak 15 defibrillator monitor provides an option to escalate energy to 360J. An new platform to the LifePak 12, the LifePak 15 is powered by Lithium-ion battery technology. Units can be configured to include 3-lead or 12-lead ECG, pacing, pulse oximetry for accurate and stable oxygen saturation monitoring, SpCO, SpMET, noninvasive blood pressure (NIBP) monitoring, invasive blood pressure, end-tidal CO2 (EtCO2) monitor for both intubated and non-intubated patients, and Bluetooth. Each device will come with new batteries (2), new carrying case, printer, all necessary cables and sensors, 1 set of adult electrodes, and 1 year warranty.

4610-LP1512PSBCABT

Recertified LifePak 15, 12 Lead, Biphasic, Pacing, SpO2, NiBP, EtCO2, AED with Bluetooth

RECERTIFIED LIFEPAK CR+

The LifePak CR Plus AED was created for lay users in commercial and public settings and can come in both automatic and semi-automatic versions. For use by the first person at the scene of a cardiac arrest, they are designed for minimally-trained rescuers. The AED tells the rescuer exactly what to do, one step at a time, in a simple, clear voice. They are easy to understand and use in a cardiac emergency. The LifePak CR Plus is easy to own and maintain. Synchronized replacement of the electrodes and battery Charge-Pak will keep your maintenance burden at a minimum. Weekly and monthly self-tests. Each AED comes with one charge-pak (2 pairs of adult pads and one battery), one carry case, and a 3 year warranty.

Recertified LifePak CR Plus Semi-Automatic Biphasic AED
Recertified LifePak CR Plus Biphasic Fully-Automatic AED

RECERTIFIED LIFEPAK 1000

The LifePak 1000 defibrillator is an automatic external defibrillator (AED) powerful and adaptable enough for professional responders, featuring advanced capabilities like 3-lead ECG monitoring capability that can help improve lifesaving outcomes and speed the transition of cardiac patients to the next critical level of care. With two display options, the 1000 is easy to configure to your patient care protocols, or make changes when necessary. Escalating energy up to 360J provides the options you need for maximum defibrillation success. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

Bound Tree doesn't just sell Defibrillators and AEDs. We also have infusion pumps, ventilators, pulse oximeters, capnographs and more. Contact your BTM representative today for more information.

RECERTIFIED PHILIPS MRX

The Philips HeartStart MRx is a transport monitor/defibrillator specifically designed with EMS in mind. With a wide viewing angle and full-color display, users appreciate the ease and speed at which critical information is conveyed. The MRx features a large color display shows 4 waveforms and numerics, or view all 12 leads at once with the 12-lead acquisition option, and comprehensive automated hourly, daily, weekly self-test results are available on the display. Units can be configured to include 3-lead or 12-lead ECG, pacing, pulse oximetry for accurate and stable oxygen saturation monitoring, noninvasive blood pressure (NIBP) monitoring, invasive blood pressure, end-tidal CO₂ (EtCO₂) monitor for both intubated and non-intubated patients, temperature, QCPR, and Bluetooth. Each device will come with New Batteries (2), New Carrying case, printer, all necessary cables and sensors, 1 set of adult electrodes and 1 year warranty.

4610-MRX12PSCBT

Recertified Philips MRx 12-Lead, Biphasic, Pacing, Spo₂, EtCO₂, NiBP, AED with Bluetooth

RECERTIFIED PHILIPS FRX

The HeartStart FRx offers on-demand CPR Coaching to help the stressed user recall their training. Calm, clear voice instructions are precisely timed to the responder's actions, guiding the responder every step of the way. At just 3.5 pounds, it is among the smallest and lightest defibrillators. Unique in the industry, the Infant/child key turns the HeartStart FRx into a pediatric defibrillator, tailoring the voice instructions and therapy to the needs of a child. That means just one pad set works for adults, children, and infants, simplifying a stressful rescue. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-FRX-R

Recertified Philips HeartStart FRx AED

RECERTIFIED PHILIPS ONSITE

The Philips HeartStart OnSite AED is a portable, lightweight automated external defibrillator that's very easy to use. Pulling the green handle activates the defibrillator and its voice instructions and visual icons. These instructions are paced to your actions, to help guide you through the entire process – from placing each pad on the patient to delivering a defibrillation shock and performing CPR. The Philips HeartStart OnSite has optional pediatric electrode pads available. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-ONSITE-R

Recertified Philips Onsite AED HS1

RECERTIFIED PHILIPS FR3

The HeartStart FR3 Defibrillator with ECG and Text Display is a lightweight and portable automated external defibrillator (AED). The rugged FR3 is designed for use in EMS environments. With a bright, high-resolution color LCD screen, the FR3 is easy to use in a noisy environment. It is lightweight to carry on the scene of a sudden cardiac arrest emergency at just 3.5 lbs and features faster deployment time and SMART CPR. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-FR3

Recertified Philips FR3 AED

CALL 800-533-0523 FOR PRICING AND INFORMATION.

RECERTIFIED ZOLL X SERIES

The Zoll X Series defibrillator monitor is designed primarily for EMS operations. The X Series is about half the size and half the weight of competitive full-featured monitor/defibrillators, yet much more powerful and built to the most extensive standards for ruggedness. The X Series is built on the Propaq® MD Monitor/Defibrillator platform and features a large bright screen that allows for simultaneous viewing of up to four different waveform traces, as well as split-screen 12-lead views. Units can be configured to include 3-lead or 12-lead ECG, pacing, pulse oximetry for accurate and stable oxygen saturation monitoring, SpCO, SpMET, noninvasive blood pressure (NIBP) monitoring, invasive blood pressure, end-tidal CO₂ (EtCO₂) monitor for both intubated and non-intubated patients, temperature, and Bluetooth. Each device will come with New Batteries (2), New Carrying case, printer, all necessary cables and sensors, 1 set of adult electrodes and 1 year warranty.

4610-ZX12BIPSBCABT

Recertified Zoll X Series, 12 Lead w/Pacing, NiBP, EtCO₂, AED with Bluetooth

RECERTIFIED DEFIBTECH LIFELINE

The Defibtech Lifeline AED is an easy to use AED that is lightweight and durable, which makes it perfect for all environments. The AED's simplistic design and clear voice prompts will help the rescuer through the cardiac event. The Lifeline AED features indicator light displaying the AED is ready to be used. This AED also features a data card allowing the AED to be upgraded to the latest protocols and allowing any event data to be downloaded off the device. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-DCF-100AN-R

Recertified Defibtech Lifeline AED

RECERTIFIED ZOLL AED PLUS

The Zoll AED Plus' unique graphical interface – pictures combined with text displays and voice prompts – helps rescuers every step of the way. Lights on the pictures draw the rescuer's attention to actions in the proper sequence. Text and voice prompts correspond to the pictures and help the rescuer perform every important life-saving action. ZOLL's Real CPR Help converts compression data instantaneously from the CPR-D padz, and provides an adaptive metronome to help the rescuer with the proper rate and depth, saying "Push harder" or "Good compressions," as needed. It also shows CPR compression depth on the display. ZOLL's AED Plus can see your chest compressions and guide you to the correct rate and depth during CPR. The Zoll AED Plus is only AED that uses inexpensive Duracell consumer batteries. Each AED comes with one pair of adult pads, one battery pack, one carry case, and a 3 year warranty.

4620-ZAEDPLUS-R

Recertified Zoll AED+

RECERTIFIED ZOLL AED PRO

The Zoll AED Pro supports Basic Life Support as well as Advanced Life Support professionals. The Zoll AED Pro's ability to function in manual mode with an override function makes it ideal for professional rescuers. It features a high-resolution LCD display that allows responders to visualize a patient's ECG while utilizing a 3-lead monitoring cable. With one of the highest IP ratings in the whole industry, the AED Pro works through the demands of a harsh and unforgiving environment. The AED Pro is compatible with both the standard two piece Stat-Padz II's as well as the Zoll CPR-d Pads which offer CPR feedback. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-ZAEDPROR

Recertified Zoll AED Pro

RECERTIFIED CARDIAC SCIENCE G3 PLUS

The G3 Plus is a Cardiac Science automated external defibrillator (AED) that features daily, weekly, and monthly self-checks, RescueCoach and STAR biphasic technology to make your rescue as simple as possible. The Powerheart G3 AED determines the electrical impedance (resistance level) of each patient and customizes the energy level delivered. If more than one shock is necessary, the proprietary STAR® biphasic software escalates the energy to deliver therapy at an appropriate, higher level. Text runs in tandem with the voice prompts. Especially useful for audio-challenged rescuers and in noisy environments, the screen also provides valuable rescue information to professional rescuers when they arrive on the scene. Available in automatic and semi-automatic models, this AED is ideal for lay rescuers to use in public access defibrillation areas such as schools, athletic fields, and workplace environments. Each AED comes with one pair of adult pads, one battery, one carry case, and a 3 year warranty.

4620-CSPHG3RS

Recertified Cardiac Science Powerheart G3 Biphasic AED (Semi-Automatic)

4620-CSPHG3RA

Recertified Cardiac Science Powerheart G3 Biphasic AED (Automatic)

RECERTIFIED CARDIAC SCIENCE G3 PRO

The G3 Pro is a fully equipped automated external defibrillator (AED) that features daily, weekly, and monthly self-checks and STAR biphasic technology and is designed for medical professionals. The semi-automatic operation, manual override option, and 3-lead ECG monitoring capability give you the tools you need to be in complete control. The color ECG display shows critical patient information. The built-in metronome (which can be switched off) can set the pace for CPR compressions. In AED mode, the device knows when to (and when not to) deliver a shock. Each AED comes with one pair of adult pads, one non-rechargeable battery, one carry case, and a 3 year warranty.

MONITORING & DIAGNOSTICS

Defibrillation Accessories

PHYSIO LP12 & LP15 EDGE SYSTEM ELECTRODES WITH REDI-PAK PRECONNECT SYSTEM

The Edge System Electrodes are disposable, combination therapy electrodes that perform ECG monitoring and simplify therapy delivery for pacing, defibrillation and synchronized cardioversion. REDI-PAK preconnect system allows electrode connection prior to use without breaking the package seal. Saves valuable time at patient arrival. Eliminates time-consuming electrode changes and promotes continuity of patient care.

238497 Edge System Electrodes \$47.29 pr

Only those electrodes, adapter devices or batteries labeled as Physio-Control products are recommended for use with LIFEPAK defibrillator/monitors.

R-CAT BY CURAPLEX®

R-CAT was designed to assist medical personnel in the task of identifying the 12 lead EKG concepts associated with ischemia, injury, and infarction. Not only does the R-CAT line save time by serving as a catalyst in initiating treatment, but it also serves to reduce the risk of critical errors. These tools are an indispensable investment for any student, instructor, or emergency medical personnel interested in sharpening their skills in relation to arrhythmias and STEMI identification.

PADPRO® MULTIFUNCTION DEFIBRILLATION PADS

The PadPro line from CONMED offers adapters or retrofit cables, allowing multiple brands of defibrillators to use the same electrodes. The Direct Connect electrodes are comparable to Zoll®, Physio QUIK-COMBO™ and Philips electrodes with the barrel-style connector. Radiotranslucent, pediatric and mini-pediatric electrodes are available. Electrodes with Pre-Connect packaging are available. PadPro electrodes are constructed to adhere and conform to the patient's body, providing superior current distribution and resulting in better clinical outcomes. They offer 24 hours of use on a patient, eight hours of continuous pacing or a maximum of 50 shocks. The PadPro line can be used for defibrillation, cardioversion, external pacing and ECG monitoring. They are non-sterile and latex-free. [10 pr/cs]

B

- Our radiotransparent and radiotranslucent “one-pad system” enables pads to remain with the patient as they move through various care environments.
- Our 60-inch lead wire is by far the longest on the market, offering you more room to work with.
- Curaplex pads are designed to take up less room on a patient’s body while leaving the conductor plate the standard size. Now, it’s easier to ensure the optimal one-inch separation from the grounding pad, mapping pad, EKG electrodes and corresponding defibrillation pad.
- Our polymer adhesive gels provide superior contact, while offering uniform current distribution and more effective defibrillation and pacing.
- Curaplex electrodes are latex-free.
- Easy to read instructions, cautions and warnings located on packaging exterior.
- Packaging is color-keyed. For example, if your hospital utilizes ZOLL packaging, it will always come with a yellow expiration label.
- Our peel pouch and tear notch packaging means you have more ways to get to the pads if you’re wearing gloves.
- An easy to follow instruction checklist is directly on release liners.
- Unlike transparent release liners, Curaplex electrodes show up on the floor, so you won’t slip.
- All Curaplex pads have 510K for Physio Control, Zoll, Philips and HP.
- Manufactured in the USA.

R2* MULTI-FUNCTION ELECTRODES

The R2 Multi-Function Electrodes are radio translucent and can be used for defibrillation, synchronized cardioversion, external pacing and ECG monitoring. They are suitable for use with manufacturers' defibrillators which meet AAMI DF-2 and AAMI DF-39 performance requirements. Direct connect, cable conversion and adapter options available. The R2* electrodes are non-sterile and latex-free. [10 pr/cs]

ZOLL® CPR-D•PADZ™

One electrode pad is easier than two!
The CPR-D•padz from ZOLL is a one-piece, pre-connected electrode with Real CPR Help™ feedback. By using CPR hand placement as the landmark, it is easy to place the CPR-D•padz on the victim quickly. Five-year shelf life.

The CPR-D•padz come with: *

- 1 CPR barrier mask
- 1 Pair of scissors
- 1 Pair of disposable gloves
- 1 Prep razor
- 1 Towel
- 1 Moist towelette

AMBU® WHITESENSOR ELECTRODES

Ambu WhiteSensor Electrodes feature a non-sensitizing, acrylic copolymer coated foam. The foam coating has been increased and this extra coating per square mm of adhesive maximizes adhesion under diaphoretic and stress conditions. It provides a comfortable, soft conformable electrode. Ambu WhiteSensor Electrodes are designed for difficult adhesion conditions that occur in extended patient monitoring or when excessive moisture may be a problem.

- Disposable, hypoallergenic white foam
- Center snap, solid gel
- Dimensions: 1.5"H x 1.7"W
- Teardrop shaped, centered snap with conductive solid gel column
- Strong medical grade adhesive
- Maximum adhesion under diaphoretic and stress conditions
- Packs of 3, 4, 5, 10, 30 and 50 available

2741-05019		\$9.79	50/pk
2741-30019		\$5.09	30/pk

AC Impedance @ 10 Hz sec	60 (OHMS)	AC Impedance after defib.	46 (OHMS)
DC Offset @ 5 sec after capacitor discharge	6.5 (mV)		

MONITORING & DIAGNOSTICS

Electrodes

AMBU WHITESENSOR CENTER SNAP WET GEL

- Highly conductive wet gel – ensures reliable traces
- Good and secure adhesion – prevents false alarms
- Comfortable foam backing – is easy to use
- Convenient presentation of 3 pieces/strip – for fast application

2741-45038 2" Dia . . . \$18.49 60/pk

AMBU WHITESENSOR DIAGNOSTIC WET GEL

- Highly conductive wet gel – ensures reliable recordings
- Strong and secure adhesion throughout the procedure
- Comfortable foam backing – is easy to place and remove
- Ergonomic shape – is comfortable for patients & users
- Convenient presentation of 3 pieces/strip – for fast application

2741-45613 \$19.29 60/pk

AMBU WHITESENSOR BIOTAC GEL

- Solid gel – ensures reliable recordings
- Comfortable foam backing – is easy to use
- Ergonomic leaf shape – is comfortable for patients
- Small size – can be used on adults and children
- Convenient presentation of 3 pieces/strip – for fast application

2741-48317 Foam, 37.5 x 37.5, 3 Per Strip. \$14.99 60/pk

AMBU WHITESENSOR WET GEL LEAF SHAPE

- Solid gel – ensures reliable recordings
- Ergonomic leaf shape – is comfortable for patients
- Convenient presentation of 3 pieces/strip – for fast application
- Radiolucent and MR Conditional – can remain on the patient during X-ray and MRI procedures

2741-78416 Leaf Shape, Clear Tape Backing, MRI . . . \$17.49 60/pk

CLEARTRACE® ELECTRODES

The Cleartrace ECG Electrode is a monitoring electrode with clear tape and conductive adhesive gel. It is latex-free and features:

- Clear Neoderm® tape allows visual monitoring of the patient's skin condition at all times
- Perforated tape permits skin ventilation and moisture evaporation for increased patient comfort
- Surface is completely adhesive
- Conforms to patient's body without pulling on the skin
- Clear tape does not absorb fluids

541703 Adult \$12.69 30/bx
 \$253.80 20 bx/cs
541700 Adult \$20.79 50/bx

231700030 Adult \$11.79 30/pk
 \$235.80 20 pk/cs

SURETRACE® ELECTRODES

SureTrace multipurpose electrodes combine a proven conductive adhesive gel with a soft foam backing. The closed cell foam is impervious to fluids and conforms to body contours to maintain contact. Made of Silver/Silver Chloride, these electrodes provide strong signals and a stable baseline. The conductive adhesive gel ensures skin contact is maintained during patient movement and has excellent electrical characteristics without irritating the skin. Low impedance allows minimal skin prep and no messy cleanup.

231800 Adult \$11.09 30/bx
 \$221.80 20 bx/cs

3M® RED DOT™ MONITORING ELECTRODES

The 3M Red Dot Monitoring Electrodes feature foam backing and sticky gel. They can be used for all cardiac monitoring applications and the high performance adhesive provides for long, secure wear. Contains sticky gel conductor and strip delivery. [1000/cs]

- Remains fresh for 30 days out of the bag
- High performance adhesive offers instant adhesion and up to five-day wear
- Sticky gel delivers excellent trace quality resulting in better patient information
- Smaller electrode is easier to place and minimizes skin irritation

C925308 Electrodes, 5/bg \$317.99 cs

MEDI-TRACE® 530 FOAM SERIES ELECTRODES

Graphic Controls offers the Medi-Trace 530 Series electrode with conductive adhesive hydrogel for effective stress and holter monitoring. Conductive adhesive hydrogel maximizes electrode adhesion and electrical contact while minimizing gel residue and clean up. The electrode has a smaller size for easy lead placement. It also has a specially designed shape for easy identification of the release tab. In addition, it conforms to skin for high quality traces. Out of pouch shelf life of 30 days, minimizing susceptibility to dry out.

- Designed for superior performance in stress and holter applications
- Highly aggressive adhesive
- Teardrop shape 1 3/4" in diameter

LUCAS CHEST COMPRESSION SYSTEM ACCESSORIES

The LUCAS Chest Compression System is designed to deliver uninterrupted compressions at a consistent rate and depth to facilitate ROSC (return of spontaneous circulation). It delivers automated compressions from first response in the field to ambulance transport and throughout the hospital. LUCAS facilitates consistent blood flow from the moment it is turned on, helping to improve a patient's chance for a successful outcome. With LUCAS, defibrillation can occur during ongoing compressions that can prime the heart for a successful shock. Also continuous compressions help maintain coronary perfusion pressure needed to facilitate ROSC.

Defibrillator Mounts

FERNO® M-201 DEFIBRILLATOR MOUNT

The Ferno M-201 Defibrillator Mount Kit is designed to secure the Physio Control LIFEPAK 12 with AC adapter.

Features

- Each Ferno Defibrillator Mount is easily installed onto a countertop or bench
- A quick release mechanism allows easy locking and unlocking of a defibrillator for grab-and-go convenience on scene
- Each Ferno Defibrillator Mount features a swivel base for easy positioning and viewing of the monitor screen during patient care
- Ferno Defibrillator Mounts accommodate the defibrillator and soft storage accessories

Specifications

- Depth: 12 in (30 cm)
- Height: 17.75 in (45 cm)
- Width: 15.75 in (39 cm)

2746-23913 M-201 Defibrillator Mount \$597.00 ea

FERNO® M-200 DEFIBRILLATOR MOUNT

The Ferno M-200 Defibrillator Mount Kit is designed to secure the Physio Control LIFEPAK 12 and 15, with or without a bag.

Features

- Each Ferno Defibrillator Mount is easily installed onto a countertop or bench
- A quick release mechanism allows easy locking and unlocking of a defibrillator for grab-and-go convenience on scene
- Each Ferno Defibrillator Mount features a swivel base for easy positioning and viewing of the monitor screen during patient care
- Ferno Defibrillator Mounts accommodate the defibrillator and soft storage accessories

Specifications

- Depth: 12 in (30 cm)
- Height: 15.25 in (38 cm)
- Width: 12.5 in (32 cm)

FER0822238 M-200 Defibrillator Mount \$597.00 ea

FERNO® P-300 DEFIBRILLATOR MOUNT

The Ferno P-300 Defibrillator Mount Kit is design to secure the Philips HeartStart MRx defibrillator.

Features

- Each Ferno Defibrillator Mount is easily installed onto a countertop or bench
- A quick release mechanism allows easy locking and unlocking of a defibrillator for grab-and-go convenience on scene
- Each Ferno Defibrillator Mount features a swivel base for easy positioning and viewing of the monitor screen during patient care

Sphygmomanometers

LATEX FREE

E-SPHYG™

The E-Sphyg is the world's first digital aneroid sphygmomanometer. It replaces your mechanical gauge with a virtually indestructible, digital instrument that can stand up to the toughest use. The E-Sphyg can withstand repeated drops of 5 feet or more. Extra large backlit LCD is easy to read in virtually any light. Splash-resistant housing for use in harsh environments. Swivel cuff clip allows the manometer to be re-positioned for easy viewing. Auto off function conserves battery strength. The E-Sphyg is latex-free. Lifetime calibration warranty.

SYSTEM 5™

The most compact, ergonomically designed, and affordably priced 5-cuff blood pressure system on the market today. Includes child, small adult, adult, large adult and thigh cuffs.

The System 5 Features:

- A multi-pocketed, heavy-duty 600D nylon attaché style case that keeps each component securely in place, yet instantly accessible
- Dual-zipper closure for rapid access. Protects against the elements
- Measures a compact 10" x 9" x 4" when closed, weighs just 2 1/2 lbs (680.3 g)
- Compact enough to fit in most emergency bags or trauma boxes
- Reinforced carry handle allows for wall mounting in the open position
- Includes Child, Small Adult, Adult, Large Adult, and Thigh Adcuff™ nylon cuffs, featuring ADC's Size Guide™ marking system
- Quick-release luer slip connector to permit rapid selection of the appropriate cuff
- Revolutionary Diagnostix™ 804 palm style manometer with precision Japanese-engineered movement rated to 50,000 cycles
- Ambidextrous trigger-release air valve
- Assembled, inspected, and packaged in the U.S.A. from foreign components

MONITORING & DIAGNOSTICS

BP Cuffs

ADC BARIATRIC ADCUFF™

The Bariatric Adcuff™ from ADC is designed for use on severely obese or bariatric patients. The Bariatric Adcuff™ provides the larger circumference of the thigh cuff with the narrower width of a large adult cuff. Its curved shape gives the proper fit on conically shaped upper arms. For use with most manual sphygmomanometers.

COMFORTCHECK™ DISPOSABLE BLOOD PRESSURE CUFFS

For over ten years Zefon International has been designing and manufacturing superior blood pressure cuffs for leading blood pressure measurement instrument manufacturers. With a complete range of sizes, materials and connectors, Zefon brand cuffs bring consistent performance, patient comfort and economy to your medical setting. [10/bx]

- Soft white fabric material for enhanced comfort
- Disposable – reduces costly disinfection procedures and contamination concerns
- Increase infection control with single patient use cuffs
- Meets AAMI and AHA Cuff Sizing Recommendations
- Color coded printing on each cuff for easy identification
- Latex-free
- Designed as a direct replacement for OEM cuffs provided by monitor manufacturers
- Full range of connectors and adapters allow standardization of cuffs
- Easy connection to electronic NiBP monitors or manual blood pressure measurement systems

DIAGNOSTIX 750 SERIES

The 750 series features a large easy-to-read 6" dial with white numerals on a contrasting face for high visibility, a 300 mmHg no-pin stop mechanism with lifetime calibration warranty and a contemporary, Euro-style ivory casing to complement any decor. A rear bracket acts as an inflation system storage compartment and permits full 110° swivel on wall-mount model. Comes with necessary hardware and eight-foot length (when extended) of coiled latex tubing. Available in standard wall mount or mobile configuration on stand and rollers.

- ADC assembled and inspected in America
- Lifetime Calibration Warranty on the gauge
- 3 year warranty on everything else
- Latex-free
- Integral cuff storage with optional cuff basket
- New beveled face reduces parallax view for easier more accurate reading
- Luminescent dial for high visibility in any light condition
- Internal air restrictor to reduce "needle bounce" that cause lesser built clock models to lose calibration prematurely

(A) H1645	Wall Mount, Adult	\$133.99 ea
(B) 540021	Mobile Mount, Adult	\$302.99 ea

WELCH ALLYN® 767-SERIES WALL ANEROID

Clinical-grade accuracy and mercury-free design make the 767-Series one of the best Tyco's aneroids for manual blood pressure. This device is certified accurate to ±3 mmHg, mercury free and latex-free for safety, and comes with a large, laser-engraved dial face that is accurate and easy to read. With lifetime calibration warranty and convenient built-in cuff storage too. Includes a durable, one-piece adult cuff.

7670-01	Wall Aneroid.	\$297.99 ea

Dopplers

DOPPLEX® MINI NON-DIRECTIONAL DOPPLER

The Dopplex Mini is an audio only, non-directional Doppler. It features an integrated probe connector and offers clear audio sounds of blood flow or a fetal heart. It is compatible with a wide range of vascular probes for maximum utility. The Dopplex Mini comes with headphones and a large carrying bag.

170900	Mini Dopplex Doppler w/5 MHz Probe	\$969.99 ea
OP2-HS	2 MHz Probe	\$444.99 ea

CARDIOBEAT® BLOOD FLOW POCKET DOPPLER

This is a superior alternative to using conventional stethoscopes or other pocket Dopplers. CardioBeat offers an exclusive, patented noise reduction feature that allows even the weakest pulse to resonate clearly. In addition, the Enhanced Detection Mode (EDM) increases sensitivity to screen more difficult patients. With the new no-hold on/off button, CardioBeat is easier to use while locating vessels, taking weak pulses, assessing vessel patencies and taking systolic pressures of infants, shock and obese patients. It fits comfortably in the palm of your hand; it's non-invasive and patient friendly. Includes 5.12 MHz Doppler, stethoscope headset, gel, two AA 1.5V batteries and soft carrying case. [12/bx]

171041	CardioBeat Blood Flow Pocket Doppler.	\$929.99 ea
1701021	Doppler Gel, 60 gm (not shown)	\$3.32 ea \$39.84 bx

MEDASONICS® BLOOD FLOW DOPPLER

The MedaSonics Blood Flow Doppler determines general blood flow with a frequency of 5.3MHz. It can be used to locate vessels and asses vessel patency, to calculate ankle-brachial index or to measure systolic blood pressure. Runs on one standard 9V alkaline battery. Includes Doppler, Stethoscope headset, gel, battery and soft carrying case. Dimensions: 4.95" x 2.5" x 1.0" (12.6 x 6.4 x 2.5 cm). Weight: 4.7 oz. (133 gm).

2770-010	MedaSonics Doppler	\$1399.99 ea
-----------------	------------------------------	--------------

ADC POCKET OTOSCOPE/OPHTHALMOSCOPE SET

The Pocket Otoscope/Ophthalmoscope Set comes in a convenient storage case for easy transport. Both compact instruments feature 2.5v halogen illumination for true tissue color and consistent, long-lasting lamp performance. Instrument heads are made from durable ABS, an impact resistant, space-age thermoplastic. Pocket clip with integral on/off slide switch enables ambidextrous use. Uses AA batteries.

Pocket Otoscope:

- Fiberoptics for cool, obstruction free light transmission
- Wide angle, swivel 2.5x viewing lens permits instrumentation
- Uses Welch Allyn disposable polypropylene ear specula
- Complete instrument includes tube of 5 each 2.75mm and 4.25mm specula

Pocket Ophthalmoscope:

- 5 aperture selections (small spot, large spot, fixation aperture, semicircle aperture and red-free filter)
- 17 lenses from -20 to +20 diopters for better resolution
- Illuminated dial
- Rubber brow rest prevents scratching of eyeglasses

2840-51014 Pocket Otoscope/Ophthalmoscope Set with Hard Case \$319.99 set

CURAPLEX® DISPOSABLE PENLIGHT

Sealed concentric beam, disposable diagnostic penlight and pupil gauge. Activated by depressing pocket clip. [6/pk - 60 pk/cs]

400015P Penlight. \$8.99 pk \$539.40 cs

CURAPLEX® EMERGENCY PENLIGHTS

These disposable diagnostic penlights work by depressing the pocket clip. Available with or without pupil gauge, these penlights measure 5" long and .5" diameter. Rainbow package includes: two white, one black, one red, one blue, and one orange penlight. [6/pk]

61447 Rainbow Penlights \$8.79 pk

METALITE

Reusable penlight with brushed aluminum housing. Activated by depressing pocket clip. Two "AAA" batteries included.

400352 Reusable Penlight \$4.02 ea

I-STAT DISTRIBUTION KIT*

This kit includes the i-STAT handheld, Printer, Simulator, Downloader and Manual. Fully automated, the system provides time-sensitive tests at the patient's side in just minutes. Lightweight and portable, the i-STAT System features single-use disposable cartridges that perform a broad menu of the most commonly performed diagnostic tests.

Benefits of the i-STAT System:

- Real-time, lab quality results within minutes provide accurate results for a wide range of tests right in patient care settings
- Supports a patient-centric approach that accelerates patient care decision-making by reducing the time needed to get vital information
- Broad range of tests with one platform
- Test cartridges and solutions available

2761-48501 i-STAT Distribution Kit. \$13659.99 ea

BRAUN THERMOSCAN® PRO 6000 EAR THERMOMETER

The Welch Allyn Braun ThermoScan PRO 6000 ear thermometer featuring advanced measurement technology, has the speed and simplicity you need to capture accurate and reliable temperature readings in a comfortable way for patients. The Braun PRO 6000 advantage lies in our innovative PerfectTemp technology, which overcomes the potential for low readings compared to core, by adjusting for factors that impact measurement accuracy. The sleek design is easy to disinfect and upgraded security features help protect and maximize your investment. Memory recall button and 60-second pulse timer are added features to support staff efficiency and help improve workflow.

- Innovative PerfectTemp™ technology adjusts for variability in probe placement
- ExacTemp™ technology detects stability of the probe during measurement
- 60 second pulse timer assists with manual measurement of pulse rate, respiration
- Small or large cradles for probe cover storage that pop-up for easy attachment
- 6- or 9-foot security tether options keep device attached to cradle

2731-14602 ThermoScan Pro 6000 with Small Cradle \$300.99 ea
2731-14603 ThermoScan Pro 6000 with Large Cradle \$305.99 ea

** Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.*

NON-CONTACT INFRARED THERMOMETER

The MedSource Infrared Non-Contact thermometer is specially designed to take a human body temperature while never touching the patient. It uses an infrared detection system and displays temperature in Celsius and Fahrenheit on a backlit screen. Specifications:

- 6 in 1 model
- Can be used on adult or pediatric patients
- Measures body temp, ambient temp and surface temp
- Audible alarm if temp is too high
- 32 reading memory
- Celcius or Fahrenheit reading
- Instantaneous reading
- Uses 2 AA batteries (included)

2731-13119 Non-Contact Infrared Thermometer \$74.99 ea

CURAPLEX® INFRA-RED EAR THERMOMETER

Features:

- Automatic shut off in one minute, non-operated.
- Takes quick measurements.
- Long life performance with common AAA-size batteries.
- Soft operation keys not to disturb a sleeping a baby.
- Includes 20 disposable probe covers.

12992 Infra-Red Ear Thermometer \$20.49 ea
12995 Disposable Probe Covers \$20.49 20/bx

CURAPLEX® BABY TEMP PACIFIER THERMOMETER

The Baby Temp Pacifier Thermometer provides an easy way to take the temperature of infant patients. Disguised as a pacifier, this thermometer delivers readings in a quick response time on an easy-to-read digital display. Features an auto shut-off function.

Measuring range: 35.5 - 42 degrees Celsius.

12993 Baby Temp Pacifier Thermometer \$4.07 ea

THERMA-DOT THERMOMETER

These convenient, single-use thermometers eliminate the need for disinfection, recharging and recalibration. Soft, flexible thermometers are comfortable for the patient and do not need to be held during temperature taking, allowing nurses to take pulse and blood pressure concurrently. You can obtain a clinically accurate oral body temperature in 60 seconds and an axillary or rectal temperature in 3 minutes. Sterile thermometers are individually wrapped. [100/bx - 2000/cs]

536-MMM5122Z Thermometer \$25.79 bx 515.80 cs

ARKRAY ASSURE LANCE LANCETS

For healthcare professionals to obtain capillary blood samples. Designed to help meet OSHA requirements for needlestick safety. Automatic lockout after use to prevent accidental needle stick injuries and cross-contamination for residents and professionals. Ergonomic design for a secure, comfortable grip. Tri-bevel needle for less pain.

Features:

- Needle hidden before use
- Needle retracts automatically and locks out for extra safety
- Designed to help meet OSHA requirements for needlestick safety
- Helps prevent accidental needlestick injuries and cross-contamination
- Ergonomic design makes handling easy
- Lancet is ready to activate - no loading is required
- Affordable high gauge safety lancets

OWEN MUMFORD UNISTIK® 3 SAFETY LANCETS

The only lancet featuring Comfort Zone Technology® for a virtually pain-free blood sampling experience.

The twist-off protective cap keeps the lancet sterile.

Comfort Zone Technology's 8 raised dots distract the brain to enable a more comfortable sample.

CZT also assists the healthcare professional in the placement of the lancet to the patient's finger, providing greater stability.

Unistik® 3's pre-loaded, stainless steel and highly polished lancet penetrates the skin to precisely the right depth, then permanently retracts to help eliminate needle stick injury and cross-contamination.

The side activation button is designed to increase patient comfort by reducing the amount of pressure placed on the test site.

PRECISION XTRA®

The Precision Xtra offers fast results and requires a small sample size. It no longer needs calibrated and uses individually foil-wrapped glucose test strips.

Features:

- Simple two-step testing - insert strip, add blood and test begins
- Fast five-second test time for capillary blood
- Unique chemistry minimizes the effects of interfering substances
- Test only starts with sufficient sample, minimizing error messages and repeat test
- Permits second drop of blood if first sample is not adequate
- Individually foil-wrapped glucose test strips maintain freshness and insure accuracy

OPTIUMEZ

The OptiumEZ Blood Glucose Monitoring System is an easy-to-use, two-step blood glucose testing system that does not require calibration. It provides fast, glucose-specific results just five seconds after a small blood sample (0.6 microliters) is applied. Individual foil-wrapped test strips maintain freshness and help ensure accuracy. The touchable test strip has a reaction site that is covered by a protective cover and separated from the sample application area.

TRIAGE 2.0

The Global leaders in Triage and Mass Casualty Incident (MCI) Management introduce the TRI-PACK. This invaluable tool allows responders to effectively and rapidly triage patients and also perform rapid lifesaving interventions out of the same shoulder sling bag. All of the triage equipment that SMART users across the globe are accustomed to are back, but in a kit that also allows the responder to carry tourniquets, hemostats, airways and any other devices they deem necessary to provide immediate lifesaving care as the first unit on the scene.

See page 438 for more information.

TRIAGE

Triage Systems	438
Safety Vests	444
Triage Equipment	445
Decontamination	447
Oxygen Manifold	449
Immobilization	450
Patient Transport	451

SMART TRIAGE PAC™*

The Smart Triage Pac contains all the tools required for effective on-scene triage. The hands-free design provides rescuers easy access to all contents.

Kit includes:

20 Smart Tags	1 Smart Pediatric Tape	2 Pencils
20 WMD Tags	5 Light Sticks	1 Start/Count Card
10 Dead Tags		

73212	Smart Triage Pac, Standard Specification	\$169.99 ea

SMART T.R.I. PACK™

The SMART T.R.I. Pack is another alternative to our traditional SMART Triage Pack. It allows you to perform rapid lifesaving interventions while conducting effective triage. The SMART T.R.I. Pack™ has been designed around the equipment most frequently selected to address immediately life threatening conditions typical at a multiple casualty incident.

Guided by customer feedback and data from recent incidents, we have designed the SMART T.R.I. Pack™ to be a valuable resource to the responder, providing them with space for medical equipment such as trauma dressings, airways and chest seals, without the need to take a complete trauma bag into the scene. This allows the delivery of rapid lifesaving interventions at point of wounding.

Kit includes:

20 SMART Triage Tags	1 SMART Pediatric Triage Tape	2 Pencils
20 SMART CBRNE Tags	1 Triage Algorithm and Casualty Count Card	
10 Dead Tags	5 Priority 1 Lightsticks	

73257	SMART T.R.I. Pack (contains the START Triage Algorithm card)	\$224.99 ea
73255	SMART T.R.I. Pack (contains the MUCC/SALT Triage Algorithm card)	\$224.99 ea
73213	SMART T.R.I. Pack Refill (START)	\$67.99 ea
73262	SMART T.R.I. Pack Refill (MUCC/SALT)	\$67.95 ea

SMART MCI BAG™ *

The Smart MCI Bag contains all the equipment necessary to respond rapidly, and to provide effective management during a mass casualty event. With this system, a first responder can establish an on-scene medical command post in any location. It is ideal for deployment at sporting events, malls, conference centers, concerts and other public venues. Includes four Smart Triage Pac's, one Smart Commander, three clear plastic pouches, carrying bag and external label.

- Ideal solution for MCI response and management
- Contains Four SMART Triage Pacs & One SMART Commander
- Space for additional MCI supplies and equipment
- One Smart MCI Bag provides triage capabilities for up to 80 casualties

73210	Smart MCI Bag, Standard Specification	\$924.99 ea
73237	Smart MCI Bag without SMART Pediatric Tape	\$924.99 ea

** Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.*

THE SMART COMMANDER™*

The Smart Commander enhances command and control at a triage scene. Its compact design allows for easy storage in any vehicle or office. The command board is detachable, and there is additional room for personal or department equipment.

Kit includes:

- 1 EMS Control Board 2 Sharpie Pens
- 1 EMS Incident Board 2 Plan Holders

73211	Smart Commander with Command Board.	\$209.99 ea
73225	WMD Commander with WMD Boards	\$209.99 ea
73227	Hospital Commander with Hospital Boards	\$219.99 ea
73222	Replacement EMS Boards, Set	\$20.99 set
73232	Replacement Plan Holder, Clear Vinyl	\$21.99 3/pk
73233	Replacement Dispatcher Holder, Clear Vinyl	\$17.99 2/pk

SMART TAG®

The SMART Tag® is now the most widely used triage tag in the world. The folded design means that effective triage is quick and simple as it allows for both deterioration and improvement of casualties without the need to duplicate information and re-tag the patient. [10/pk - 100 pk/bx]

- Highly visible tag that only shows a single priority
- Resistant to water, bodily fluids, petrol and many other chemicals
- Barcoded for patient tracking
- Will survive a decontamination process, allowing a response to a chemical / biological incident
- Patient history & clinical condition are clearly available

73215	Smart Tags	\$18.99 pk	\$1899.00 bx
--------------	----------------------	------------	--------------

THE SMART WMD TAG™

Save lives in a WMD situation. The Smart WMD Tag clearly identifies contaminated casualties with space available to detail agents involved and decontamination procedures followed. It is a resource for improving the management of MCI scenes suspected to involve nuclear, biological or chemical agents. The Smart WMD Tag is included as standard in the Smart Triage Pac™ and available separately for re-supply. [20/pk - 50 pk/bx]

73221	The Smart WMD Tag (tag only)	\$19.40 pk	\$970.00 bx
--------------	--	------------	-------------

SMART TAPE™

The SMART Tape™ provides rapid triage of injured children. At a mass casualty event, the ability to maximize pediatric resources could mean the difference between life and death. By identifying the most seriously injured children you can do just that. Usable in low light, this pocket sized tape provides the only evidence based method for pediatric triage.

- Provides rapid triage of injured children
- Gives rescuers a protocol in their hand
- Durable material allows the tape to be used in all conditions

73214	Smart Tape	\$46.99 ea
--------------	----------------------	------------

* Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.

SMART RE-SUPPLY PACK*

SMART Re-supply Pack - Includes 20 Smart Tags, 20 WMB Tags, 10 Dead Tags, 5 light sticks, 2 pencils, 1 START Count Card

73213 Smart Re-Supply Pack \$67.99 pk

SMART Re-supply Pack - Includes 20 Triage Tags, 20 WMD Tags, 5 bar-coded Dead Tags, 1 START Count Card, 5 light sticks, and 2 pencils.

73248 Triage System Re-Supply Tag Kit \$64.95 pk

DEAD TAGS RE-SUPPLY, BAR-CODED*

Dead Tags, bar-coded. [10/pk - 100 pk/bx]

73247 Dead Tags Re-Supply, Bar-Coded. \$9.00 pk \$900.00 bx

DEAD TAGS RE-SUPPLY, NON BAR-CODED*

Dead Tags, non bar-coded. [10/pk - 100 pk/bx]

73223 Dead Tags Re-Supply, Standard. \$9.00 pk \$900.00 bx

SMART SAFE™

SMART Safe™ is designed to secure, track and return personal belongings in an efficient and timely manner to the patient. Jewelry, clothing and other possessions secured inside this tamper-proof bag can now be tracked throughout the treatment process. Once the patient's belongings are placed inside the bag, remove the protective pull tab and secure the items inside by way of the tamper-free security seal. Then, tear off the property tag at the perforated line and attach it to the patient's wrist. The peel-off bar codes can be attached to a patient's record / run sheet, ensuring the return of his or her possessions following treatment.

- Protects Valuables
- Saves Time
- Helps Prevent Theft
- Easy Barcode Tracking
- Tamper-Resistant Material
- Contents Visible For Easy ID

73250 Small, 13" x 10.5" x 2.5" \$30.95 25/bx
73251 Large, 26" x 27.5" x 5" \$23.99 10/bx

Available in red only.

SMART RAPID AID AND TREATMENT (RAT) PACK*

The Smart Rapid Aid and Treatment (RAT) Pack has been specifically developed to reduce the morbidity and mortality from injuries associated with Multiple Casualty Incidents. Medical intervention at the scene of an MCI requires a rapid response in a less-than-ideal care setting, often without suitable equipment. The Smart RAT Pack allows the responder to provide rapid, life saving, procedures to the injured personnel during the triage process. The Smart RAT Pack is also the ultimate resource for improving casualty care at scenes suspected to involve nuclear, chemical or biological agents, and is a practical way to transport equipment while wearing Hazmat suits. Contains 10 'self help' packs.

73239 RAT Pack, Red \$189.95 ea

** Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.*

SMART D-NET TRAINING PROGRAM

The SMART D-Net Training Program is an interactive, online training course for EMTs and first responders who want to increase their knowledge, training and preparedness in Multiple Casualty Incident (MCI) response. The program equips users of any level, even those with no previous experience in multiple casualty care, with effective skills to control, organize and manage an MCI.

Contact your account manager for more information.

THE SMART EDUCATION PACK™

The Smart Education Pack provides the ideal way to simulate an MCI training session or in-service. The pack includes an instructor's CD and a set of exercises to work through with students and gives you everything you need to run training on the Smart Incident Command System™, as well as multiple casualty incident response.

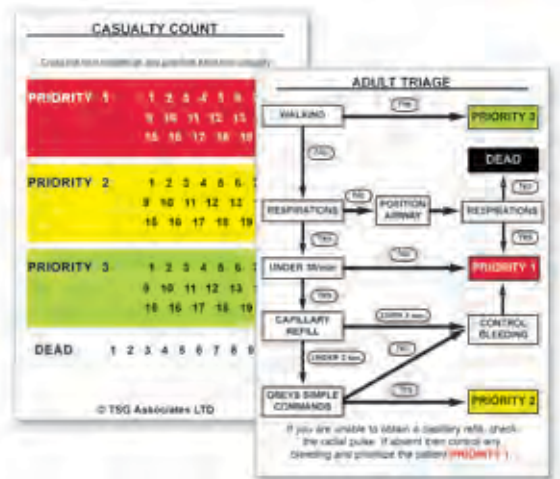

73220	Smart Education Pack	\$219.99 ea
73238	Smart Education Pack without Pediatric Tape	\$219.99 ea

TSG SMART CASUALTY COUNT CARD

One of the keys to effective resource management is knowing the number and severity of the casualties involved in an incident. The Smart Casualty Count Card enables rescue personnel to record this information during triage. The adult triage flow chart is printed on the back for easy reference. [5/pk]

73244	Smart Casualty Count Card	\$8.95 pk
72021	MUCC Triage Algorithm Pack.	\$9.20 pk

TSG PATIENT TRACKING PAD

The Patient Tracking Pad is a simple-to-use product designed to assist in logging and tracking patients at a multiple casualty incident, both at the scene and in the hospital.

73231	Patient Tracking Pad.	\$21.99 ea
--------------	-------------------------------	------------

WMD BOARDS

The WMD dry erase Boards are an additional set of information boards to be used with the Smart Commander™. The WMD Boards are designed to enhance the on-scene management of a chemical, nuclear or biological event, and to keep scene command simple. The WMD Boards can be used to record information on specific incident objectives, contaminated and decontaminated casualties and rescue personnel and responsibilities. The WMD Boards also include a clearly marked chart of the WMD zone. Set includes WMD Scene Command Board and WMD Control Board.

73224 WMD Boards (Boards Only) \$20.99 set

FIRE GROUND BOARDS™

The Fire Ground dry erase Boards help to enhance incident command and organization at the scene of a fire. They help prompt key strategic and tactical goals and aid in improving personnel safety. They are practically sized for on scene work, with the ability for you to adapt it to your local operational procedures.

- Detachable incident control boards help organize command and ease transfer of command
- Visually display the incident scene, apparatus placement and key incident assignments
- Organizes resources – helps insure accountability
- Plan holders for safe storage of preplans, building diagrams and maps
- Netted pocket to store the supplies you need to manage the incident

73243 Fire Ground Boards (Boards Only) \$20.99 set

HOSPITAL BOARDS

The Hospital dry erase boards are an additional set of information boards to be used with the Smart Commander™. The Hospital Boards have been developed to reflect the structure of the Hospital Incident Command Course (HEICS). The Hospital Boards can be used to record information on the incident action plan, patient tracking and hospital command tasks. Set includes Action Plan Board, Patient Tracking Board and Hospital Control Board.

73226 Hospital Boards (Boards Only) \$44.99 set

AZ TRIAGE SYSTEM*

The AZ Triage System includes many necessary triage items in a compact, easy-to-use fanny pack. The kit is based on the highly regarded START™ (Simple Triage and Rapid Treatment) system. The kit has many innovative features including a custom designed fanny pack that has special compartments for all components. It fits a wide range of waist sizes and stores easily.

System Contains (components are also available separately):

35	Triage tags and cable ties	6	Oral airways
15	Reflective decals for quick identification of "immediate patients"	1	Pair of trauma shears
		3	Pens

681207	AZ Triage System Kit	\$136.99 ea

MEDICTECH INFLATABLE MCI MANIKINS

MedicTech Inflatable MCI Manikins are a smart and efficient way to train and assess emergency response systems. The durable manikins save time and money, and decrease the liability of conducting mass casualty training. Adult: 5' 7" Tall, 3 lbs 8 oz. Pediatric: 30" Tall, 3 lbs. [10/cs]

- Clear chest pocket contains prescribed START disaster scenarios
- Compliant with JCAHO standards
- Made of durable PVC to resist punctures
- Made to withstand hot, cold and inclement weather
- Quick inflation / deflation valves
- Sandbags in feet keep manikins in place
- Grommets on shoulders allow tie-down
- Deflates and stores easily after use
- Available in adult and pediatric sizes

651972	MCI Manikin, Pediatric	\$52.99 ea	\$529.90 cs

TRIAGE TARP

Constructed from heavy-coated nylon oxford cloth for years of use. These triage tarps are heavily reinforced at the corners with 1000d Cordura nylon, and feature powder-coated brass grommets to use as tie downs or suspension points. Constructed from the same material used on the flooring of expedition tents which compresses into a smaller space than traditional tarps. Color coded to match the S.T.A.R.T. triage requirements.

EMS DISPOSABLE DECON SYSTEM

The EMS Disposable Decon System is designed for Emergency Response Personnel to decontaminate patients at an accident scene and/or to transport contaminated/injured patients. It fits onto an EMS stretcher between the handrails, utilizes any backboard and allows medical treatment of the patient. The system is both portable and disposable, and is easily set up in 60 seconds. Stored size is 24" x 15" x 4"; it measures 84" x 24" x 8" when set up for use. The lightweight unit weighs only 7 pounds, and is pre-assembled with a PVC drain and hose and a five gallon collapsible polyethylene container. The liner is made of PVC laminated nylon which is tough, chemically resistant and impervious. Applications include: Hazardous Materials; Chemicals; Biological; Radiological; Burn Victims; Hyperthermia; Hypothermia; Delousing. The System includes a 32-gallon bag for proper disposal. [3/cs]

735000	EMS Disposable Decon System	\$310.99 ea	\$932.97 cs
733000	Hospital Disposable Decon System.	\$341.99 ea	\$1025.97 cs

HOSPITAL DECONTAMINATION TABLE TOP II*

The Decontamination Table Top II is designed as an emergency treatment and decontamination table for a contaminated/injured patient. It is radiotranslucent and allows for the use of a defibrillator. The table is portable, as it straps onto any standard hospital gurney or stretcher. It is easily stored by hanging vertically from the wall storage bracket that is included. Constructed of 100% lightweight fiberglass, impermeable and resistant to most chemicals and solutions. The backboard is equipped with molded slots to allow the wash fluid to escape from the patient rather than "pool" underneath, and rests on elongated pedestals 2" above the base of the table.

Decontamination Kit Contains:

- | | |
|--------------------------------|--|
| 1 Decon Table Top | 1 Flexible Drain Hose |
| 1 Decon Backboard | 2 15-Gallon Waste Water Containers with Handles and Sealed Lid |
| 2 Adjustable Locking Straps | 1 Wall Storage Bracket |
| 1 Splash Reducing Spray Nozzle | DOT 34 Rated for Hazardous Materials |

732000	Hospital Decontamination Kit.	\$5629.99 ea

(A) HAZMAT DECON SHOWER

The Hazmat Decon Shower is a portable, collapsible, field-expedient shower designed for decontaminating emergency response personnel. The unit is constructed of 1-1/2" PVC tubing and is color coded for ease of assembly (it sets up in only five minutes). A criss-cross water flow pattern is provided from the upper support bars. The shower is reusable and comes in a heavy-duty canvas duffel bag measuring 46-3/4" x 21-1/2" x 11".

- | | | |

|---------------|--------------------------|-------------|
| 736014 | Shower Curtain | \$231.99 ea |
|---------------|--------------------------|-------------|

(C) HAZMAT DECON POOL

The disposable Hazmat Decon Pool provides a means of collecting and containing the wash fluid utilized during decontamination. Designed for single incident use, the pool itself requires no decontamination; the cardboard frame allows the unit simply to be folded up and discarded in a salvage drum. The polyethylene liner (12 mil) is chemically resistant and impermeable. This lightweight unit (12 lbs.) is compact for storage, measuring 60" x 21" x 3", yet opens to a spacious working configuration of 60" x 60" x 12" that can hold up to 175 gallons. It is easily set up in less than 60 seconds and can be used as a decon pool or as a containment pool for leaking barrels. [2/cs]

- | | | | |
|---------------|---------------------|-------------|-------------|
| 736000 | Decon Pool. | \$208.99 ea | \$417.98 cs |

MULTI-MANAGER O2 ADMINISTRATOR™

The Multi-Manager O2 Administrator is equipped with eight flow control valves manifolded together and mounted on a collapsible aluminum alloy tripod. The Multi-Manager can be connected in series with a second unit, increasing the number of patients treated to sixteen.

Features:

- Offers consistent and reliably controlled oxygen delivery to multiple patients
- Requires less space to store than conventional oxygen delivery systems

38908 Multi-Manager O2 Administrator \$1470.00 ea

OCTI-FLO2™ PORTABLE EMERGENCY OXYGEN MANIFOLD*

The Octi-FLO2 is ideal for mass casualty, EMS and triage situations. The lightweight, portable system provides care for up to eight patients at once. The click-style flowmeters are individually controlled and let you lock into your exact flow from 0 – 25 lpm. The pressure gauge on the manifold helps ensure that every patient is receiving the correct flow. Standard DISS inlet and 100 psi relief valve safety features. 8 oxygen masks, 4 nasal cannulas, 8 green disposable tapered barbs and a black, soft-sided carrying case included.

Dimensions: 16" x 16" x 12". Weight: 13 lbs.

IRON DUCK® ULTRA-VUE BACKBOARD

The Ultra-Vue was designed and engineered by Emergency Medical Technicians and Emergency Physicians from across the United States. Their goal was to design a backboard that would increase crew safety, improve patient care and meet the needs of physicians and radiology. The design team used their field experiences and clinical "wishes" with Iron Duck's manufacturing excellence to design a safe, strong and 100% X-Ray translucent backboard. Oversized handholds measure 2" x 6" for gloved hands. 600 Pound Weight Capacity. Available with or without pins. 72"L x 16"W x 1.75"H. Standard pin configuration is 12 pins. Lifetime guarantee.

CURAPLEX® TITAN COMPACT RESPONDER

Curaplex Titan Responder kits were created to provide items for emergency care in an easily portable and navigable pouch. The Titan Compact Responder comes in the smallest pouch in the Titan series, making it easily attachable to MOLLE compatible clothing or gear.

BASIC

- 1 MOLLE pouch, small
- 1 Combat Application Tourniquet® (C-A-T®)
- 1 Israeli dressing, 4"
- 1 Face shield
- 1 Pair of gloves, latex-free, large
- 1 Roll of compressed gauze

INTERMEDIATE

(Adds the following to Basic)

- 1 QuikClot combat gauze, LE version, 3" x 4 yds

SAM® Junctional Tourniquet

MADE IN THE USA

FOR HEMORRHAGE CONTROL & PELVIC IMMOBILIZATION

The SAM Junctional Tourniquet (SJT) is designed to control bleeding where standard extremity tourniquets would not be effective, for example in blast injuries resulting in high level amputations and pelvic fractures. It can be used in the inguinal and axillary areas.

TECHNOLOGY

The pelvic binder's patented TRUFORCE buckle provides a proven safe and effective force to stabilize and secure pelvic fractures. This is vital in high stress environments where over or under tightening could be harmful.

TCD™

The target compression device inflates quickly. It compresses major blood vessels reducing high-pressure, high-volume bleeding. It contains a pressure relief valve to prevent over-inflation. Two can be used to occlude blood flow bilaterally.

The SAM® Junctional Tourniquet is compact, easy to use and quick to apply. The rugged design ensures that the device stays securely attached to the patient during transport. Exceeds MIL-STD-810g requirements.

1880-93102	SAM Junctional Tourniquet, 2 Target Compression Devices	\$403.99
1880-93111	Target Compression Device, Hand Pump	\$139.99
1880-93112	Target Compression Device, Hand Pump and Extender	\$166.99

1880-93100	Pelvic Sling Belt Only	\$132.99

1880-19231

SOF™ TACTICAL TOURNIQUET

Many of the world's most elite and experienced warriors have chosen the SOF Tactical Tourniquet for its outstanding ability to control severe bleeding, high level of reliability and ease of application. For law enforcement officers, application of the tourniquet is similar to the use of a hobble. This existing level of familiarity reduces training time and aids in the effectiveness of the device.

TCCC Recommended!

1880-19231	SOF Tactical Tourniquet Wide, 1.5"\$36.99 ea
1880-15620	SOF Tactical Tourniquet, 1"\$33.99 ea

COMBAT APPLICATION TOURNIQUET (CAT)

The C-A-T® utilizes a durable windlass system with a free-moving internal band providing true circumferential pressure to the extremity. Once adequately tightened, bleeding will cease and the windlass is locked into place. A hook and loop strap is then applied, securing the windlass to maintain pressure during casualty evacuation.

- 1880-13022** Combat Application Tourniquet (CAT), Tactical Black \$38.79 ea
- 1880-23315** Combat Application Tourniquet (CAT), Orange. \$38.79 ea

MILITARY EMERGENCY TOURNIQUET (MET) GENERATION II

The Military Emergency Tourniquet (M.E.T.) can be applied within seconds by an appropriately trained soldier, with only one hand. A simple, one-time use device, the M.E.T. does not rely on small mechanical components to lock. The M.E.T. is not inhibited by mud, blood, saltwater corrosion or fine granular sand. Its unique non-slip backing prevents the M.E.T.'s pull strap from backing out after being pulled through the windlass and buckle.

- 1880-13703** Military Emergency Tourniquet Gen II Multicam \$61.99 ea

SAM® Chest Seal

6 YEAR SHELF LIFE

The SAM Chest Seals are designed to treat open chest wounds, a life-threatening condition that can lead to tension pneumothorax.

TECHNOLOGY

DURAVALV

The Valved SAM Chest Seal features patented DURAVALV technology which provides low-resistance flow of air out of the chest cavity while preventing ingress. The design and rugged construction of the dome protects against occlusion and obstruction of the air channels from direct external pressure such as blankets, dressings or body armor.

The SAM Chest Seal is constructed of transparent flexible polyurethane. The hydrogel adhesive aggressively adheres in the presence of hair, sweat, blood and sand. NIGHT VISION OPTIMIZED - The SAM Chest Seal is designed for use in global combat zones.

- Meets Co TCCC Preferred Features for Chest Seals
- Meets Military Standard 810G
- NOT made with natural rubber latex.
- Sterile
- The SAM Chest Seal is biocompatible (cytotoxicity, irritation, and sensitization tested per ISO 10993)

THE SAM CHEST SEAL - available - with or without VALVE

VALUE PRICED

A

(A) CURAPLEX® SELECT HALO SEAL

The HALO Seal was specifically developed for casualties with excessive bleeding, heavy perspiration, or very wet and extreme environments. The HALO seal features a highly aggressive adhesive, enabling it to conform and adhere to all contours of a patient's body; durable packaging and material which maintains the product's integrity when folded or crumpled; and a large pull tab that facilitates easy, quick application. Used by many military and law enforcement services domestically and internationally, the HALO seal is manufactured in the US, and exclusive to Bound Tree Medical.

Features and Benefits:

- Each package contains two (2) seals to treat both entrance and exit wounds
- Total occlusion with excessive blood, dirt or heavy perspiration present
- Oval shape
- No vent to occlude
- Large pull tabs to facilitate removal or venting of wound
- Adhesive reseals after venting
- No residue once removed
- Durable protective packaging
- Integrity maintained when folded
- Performing temperature range up to 140°F
- 3-year shelf life
- Dimensions: 6.5" x 5.5"
- Manufactured in the USA
- No latex used in the manufacturing of this product

G1164 HALO Vent \$19.99 pk

CURAPLEX® SELECT HALO XL TRAUMA DRESSING

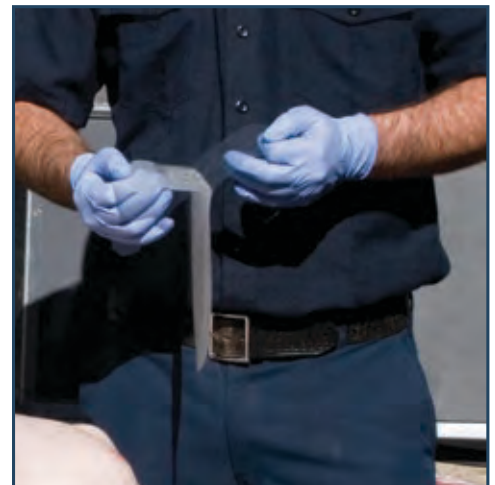

The HALO XL Trauma Dressing was specifically developed for casualties with excessive bleeding, heavy perspiration, or very wet and extreme environments. The HALO XL features a highly aggressive adhesive, enabling it to conform and adhere to all contours of a patient's body; durable packaging with four notched corners for easy opening and material which maintains the product's integrity when folded or crumpled; and a large pull tab that facilitates easy, quick application. The Halo XL also performs without loss of adhesion in extreme temperatures. Used by many military and law enforcement services domestically and internationally, the HALO XL is manufactured in the US, and exclusive to Bound Tree Medical.

Features and Benefits:

- Superior Hydrophilic gel adhesion
- Occlusive seal in the presence of excessive blood or heavy perspiration
- No vent to occlude
- 100% Translucent
- Large pull tab for easy removal
- Can be utilized to hold other dressings in place
- No residue once removed
- Durable protective packaging
- Notched on all four corners for easy opening
- Performs under extreme temperatures (-40°C) -40° F to (65°C) 150°F
- 3-year shelf life
- Dimensions: 8.5" x 12"
- Manufactured in the USA
- No latex used in the manufacturing of this product

BOLIN CHEST SEAL™

Sucking chest wounds require an emergency first aid solution that is fast, direct and effective. The Bolin Chest Seal (BCS) is a sterile occlusive chest wound dressing for treating open pneumothorax and preventing tension pneumothorax that result from gunshots, stab wounds or other penetrating chest trauma. The patented triple-valve design of the BCS allows air and blood to escape while preventing their re-entry, thereby eliminating any unwanted gas or liquid exchange at the trauma site. The large (6" diameter), rugged polyurethane disc structure of the BCS can cover the chest trauma site, and prevents wrinkling during application. In addition, the wound side of the disc is covered with a thick layer of gel-based adhesive, strong enough to seal over hair and blood, and flexible enough to be removed and reapplied to the trauma site if required. [10/bx]

1215-01319 Bolin Chest Seal \$28.99 ea \$724.75 bx

H-BANDAGE TRAUMA DRESSING

The H-Bandage serves as an emergency dressing and as a hemostat for arterial bleeding and hemorrhaging in limbs. Its unique design allows it to be deployed one-handed, so it can be used under many conditions. When applied, the H-Bandage places heavy pressure over and into the wounded area. Initial clinical test results have shown that the H-Bandage may act as a hemostat for arterial bleeding in limbs, a critical component in the dressing's functionality. The H-Bandage is an all-in-one emergency and combat bandage for most traumas.

The H-Bandage is also available with an antimicrobial silver mesh Silverlon® covering to prevent infections, including combat wounds.

1121-484 H-Bandage \$11.59 ea

Kit Contents:

- (1) CombiTube Airway in Roll-up Pouch
- (1) Nasal Intubation Kit with 7.0mm Endotracheal Tube
- (1) Flexi-ET Cuffed Endotracheal Tube with 8.0 Stylette
- (1) Shiley Disposable Cuffed Tracheotomy Tube, Size 8
- (1) Metal Eye Shield
- (1) Pedi Cap Carbon Dioxide (CO2) Detector
- (1) Std. Laryngoscope Handle, Adult
- (1) Std. Stainless Macintosh Laryng. Blade, Size 4
- (1) 10 cc Luer Lock Syringe
- (1) Disposable Sterile Scalpel, #20
- (1) Tube Restraint ET Tube Holder
- (1) Black 22" Sprague Stethoscope
- (1) Stahl Rolling Tourniquet, Large
- (1) Penrose Drain Tourniquet Tubing, 1" x 18"
- (1) 25" Long Triage Ribbons, Set of 4 Colors
- (1) Trauma Shears
- (10) Medium Alcohol Prep Pads
- (1) ProtectIV IV Catheter, 14 ga x 1.25"
- (1) ProtectIV IV Catheter, 16 ga x 1.25"
- (1) ProtectIV IV Catheter, 18 ga x 1.25"
- (2) Heparin Lock Flush, 100 units/ml, 10 ml Vial
- (1) 1 cc Luer Slip Syringe
- (1) Hypodermic Needle, 18 ga x 1.5"
- (2) Heparin Lock Flush, 10 units/ml, 1ml Vial
- (2) Veni-Gard Transparent IV Dressing, Adult
- (1) Color-Coded Airway (Light Blue), #0 Infant, 50 mm
- (1) Color-Coded Airway (Black), #1 Small Child, 60 mm
- (1) Color-Coded Airway (White), #2 Child, 70 mm
- (1) Color-Coded Airway (Green), #3 Small Adult, 80 mm
- (1) Color-Coded Airway (Yellow), #4 Adult, 90 mm
- (1) Color-Coded Airway (Red), #5 Large Adult, 100 mm
- (1) Ammonia Inhalants, Box of 10
- (1) SAM Splint, Gray
- (1) SPUR BVM with Reservoir Bag and Mask, Adult
- (3) Asherman Chest Seal
- (2) Chest Decompression Catheter, 14 ga x 3.25"
- (1) Pocket Mask in Olive Green Case
- (2) Triangular Bandage, 40" x 56"
- (10) Flexible Adhesive Bandage, 1" x 3"
- (5) Flexible Adhesive Bandage, Knuckle
- (5) Flexible Adhesive Bandage, Large Patch
- (2) Vaseline Occlusive Gauze, 3" x 9"
- (2) 3M Steri-Strips Sterile Skin Closure Strips, 1/8" x 3"
- (4) Triple Antibiotic Ointment in Single-Use Tube
- (6) Gauze Pads, 4" x 4"
- (4) Gauze Pads, 2" x 2"
- (1) Zonas Adhesive Tape, 1/2" Roll
- (1) Zonas Adhesive Tape, 1" Roll
- (1) Zonas Adhesive Tape, 2" Roll
- (1) Elastic Bandage, 4" x 4.5 yds
- (1) Coban Self-Adhering Bandage Wrap, 3" x 5 yds
- (2) Gauze Bandage, 4.5" x 3.1 yds
- (5) Defender T Nitrile Exam Gloves, Pair
- (5) Vionex Antimicrobial Skin Wipe Towelettes
- (1) Infu-Stat Pressure Infuser, 1000 ml Bag
- (1) Lactated Ringers, 1000 ml Bag
- (1) IV Start Kit with Latex Tourniquet
- (10) Mettag Triage Tag
- (4) Xtra Strength Tylenol Pain Reliever, 500 mg, 2/pk
- (1) Emergency Bandage, 4", Olive Drab
- (1) Big Cinch ABD Pad, 12" x 16"
- (1) Bound Tree Tactical First Responder Kit, 4" x 17" x 11"

CURAPLEX® MEDICINAL KIT*

Equipped with a wide variety of "over-the-counter" medications, the Bound Tree Medicinal Kit provides a means to treat most minor ailments quickly and easily.

(A) THE BLIZZARD RESCUE VEST

The Blizzard Rescue Vest is a unique garment with a tiny packed size. It is 3/4 length body warmer with a hood made from Reflexcell material. It provides warmth and weather protection, while allowing the wearer to remain mobile. A totally practical garment, it is warm enough for the coldest conditions. It is waterproof and windproof. Unlike many lighter products, it does not easily tear or blow away. [40/cs]

72BPS-03 Blizzard Rescue Vest, Olive Drab \$70.99 ea \$1774.75 cs

(B) THE BLIZZARD RESCUE PACK

A regular sleeping bag in a pack the size of a video cassette, the Reflexcell Sleeping Bag simplifies the task of providing warmth and shelter to people in emergency situations. It is made from a unique Reflexcell material, which blocks heat loss more effectively than any other emergency product. The bag also contains elastic, causing it to hug the body and giving a great feeling of warmth and security. Bags may be stored indefinitely, and are not affected by temperature or moisture either during storage or in use. [25/bx]

72BPS-02 Blizzard Rescue Pack, Olive Drab \$70.99 ea \$1774.75 bx

HELIOS™ HYPOTHERMIA PREVENTION KIT*

Hypothermia prevention and management is a key component in the fight to prevent the onset of the lethal triad (Acidosis, Hypothermia and Coagulopathy). Failure to manage this condition early in the treatment process can reduce patient survivability and further complicate the treatment process. The Helios™ hypothermia prevention kit was developed to provide the care provider with an ultra compact, lightweight, modular system that allows varying levels of heat retention while still allowing patient accessibility.

- 2 piece system allows different levels of coverage, accommodating time and tactical situations
- Easy load™ bag lays flat and is adjustable to fit most patient sizes
- Complete patient access
- Blanket anchors protect against rotor wash and high winds, securing the system to most litters
- High visibility pocket for placement of triage cards
- Vacuum packed to reduce size

3271-08129 Hypothermia Prevention Kit \$85.99 ea

RESCUE TASK FORCE VEST KIT WITH SIDE ARMOR

The Rescue Task Force Vest Kit by North American Rescue provides a personal protective ballistic vest with the necessary trauma supplies to provide immediate wound care. This vest was designed for EMS, Fire-Rescue and Law Enforcement personnel responding to Active Shooters and Mass Casualty Incidents. The soft armor is one of the largest protection systems able to capture projectiles and disperse the energy over the entire surface of the panel. This “one-size-fits-most” soft armor ballistic vest easily adjusts at the shoulder and waist to fit different size rescuers. Armor and medical products can also be purchased separately.

- NIJ 06 Level IIIA Soft Armor Ballistic Protection
- Front and back hard armor plate pockets able to receive multiple size plates
- Mil-Spec industrial reinforced webbing
- Front and back MOLLE modular attachment system (PALS compatible)
- Durable 1,000-denier Cordura nylon external carrier construction

3822-80365	Rescue Task Force Vest with Side Armor, Black	\$1249.99 ea
3822-80366	Rescue Task Force Vest with Side Armor, Coyote	\$1249.99 ea
3822-80385	Rescue Task Force Vest with Side Armor, Red.	\$1249.99 ea

3822-80448	Rescue Task Force Vest with Side Armor, Blue	\$1249.99 ea

ELSA RESCUE TASK FORCE VEST KIT

The ELSA™ (Emergency Life-Saving Armor) Rescue Task Force Vest Kit is a lightweight armor carrier system featuring soft armor protection and a bleeding control kit. The ELSA vest comes contained in a small soft-sided briefcase, making it ideal to store in vehicle compartments or passenger spaces. With a pull of the zipper it quickly transforms into a soft armor carrier system with a bleeding control kit. Each carrier includes two armor pouches that accommodates Level IIIA soft armor. Medical pouch includes essential trauma equipment to provide immediate point-of-wound care.

3822-80408	ELSA Rescue Task Force Vest Kit, Red, Soft Armor.	\$999.99 ea
3822-80409	ELSA Rescue Task Force Vest Kit, Black, Soft Armor.	\$999.99 ea

BATLSKIN VIPER A3 WITH MSS HELMET

The Batlskin Viper A3 Helmet is a cost effective NIJ IIIA level ballistic and head impact protection solution. The Viper A3 Modular Suspension System (MSS) features an impact liner made of low profile impact material, dial fit band, suspension and retention system. An adjustable crown net allows for sweat wicking and comfort while suspending the helmet shell on the wearer’s head, providing a free flow of air for cooling benefits. A dial fit band adjusts the fit around the circumference of the head using a dial ratchet mechanism, quickly tightened or loosened using one hand. Built in the ACH shape, the A3 is compatible with NVG’s, Chem/Bio masks and communication devices.

3822-70081	Batlskin Viper A3 Helmet with MSS, Black, S	\$409.99 ea
3822-70082	Batlskin Viper A3 Helmet with MSS, Black, M.	\$409.99 ea

3822-70084	Batlskin Viper A3 Helmet with MSS, Black, XL	\$409.99 ea

HEARTSTART® FRX DEFIBRILLATOR

The HeartStart FRx Defibrillator is designed to be used in environments too demanding for many other defibrillators. The HeartStart FRx Defibrillator's biphasic waveform delivers a highly effective defibrillation shock that is also gentle to the heart. SMART Analysis automatically assesses the victim's heart rhythm and is designed not to deliver a shock unless the rhythm is determined to be shockable, even if the shock button is pressed. Although small and lightweight (3.5 lbs) the HeartStart FRx Defibrillator is exceptionally rugged. Designed to surpass rigorous testing requirements, the FRx withstands jetting water, loads up to 500 pounds and a one-meter drop onto concrete.

861304 HeartStart FRx Defibrillator with 1 pr Adult Pads and 1 Battery. \$2099.00 ea

CURAPLEX® SELECT DEFIBRILLATOR PADS

- Our radiotransparent and radiotranslucent “one-pad system” enables pads to remain with the patient as they move through various care environments.
- Our 60-inch lead wire is by far the longest on the market, offering you more room to work with.
- Curaplex pads are designed to take up less room on a patient’s body while leaving the conductor plate the standard size. Now, it’s easier to ensure the optimal one-inch separation from the grounding pad, mapping pad, EKG electrodes and corresponding defibrillation pad.
- Our polymer adhesive gels provide superior contact, while offering uniform current distribution and more effective defibrillation and pacing.
- Curaplex electrodes are latex-free.
- Easy to read instructions, cautions and warnings located on packaging exterior.
- Packaging is color-keyed. For example, if your hospital utilizes ZOLL packaging, it will always come with a yellow expiration label.
- Our peel pouch and tear notch packaging means you have more ways to get to the pads if you’re wearing gloves.
- An easy to follow instruction checklist is directly on release liners.
- Unlike transparent release liners, Curaplex electrodes show up on the floor, so you won’t slip.
- All Curaplex pads have 510K for Physio Control, Zoll, Philips and HP.
- Manufactured in the USA.

Window Punch - Seat Belt Cutters - Rescue Shears

WINDOW PUNCH

The only punch specially designed to shatter tempered auto window glass for extrication. Features more punching power, and its specially hardened replaceable steel tip is tempered to a Rockwell hardness of C60. Lightweight corrosion-resistant aluminum barrel has a knurled finish for positive grip. Removable pen-type pocket clip. Length 5". Diameter 5/8".

400022 Window Punch \$10.59 ea

EMI LIFESAVER SEAT BELT CUTTER

The Lifesaver Seat Belt Cutter features hard impact plastic. It will cut through seat belts and other materials quickly, easily and safely. This blade will cut through seat belts faster than scissors! Hardened stainless steel blade. Approximately 4-3/4" x 1-3/4".

K4026 Lifesaver Seat Belt Cutter \$6.89 ea

EMI LIFESAVER II SEAT BELT CUTTER

The Lifesaver II Seat Belt Cutter features a built in O2 wrench. It cuts quickly through restraining belts, clothes, etc. Easy to grip, even while wearing gloves. Cutter opens easily to replace blades. High impact plastic housing with surgical stainless steel blade. Lightweight, rugged and durable. This Seat Belt Cutter is approximately 6-3/4" x 1-1/4". Fits in holsters, first aid kits, Fire/EMS coats, etc.

K4028 Lifesaver II Seat Belt Cutter \$8.19 ea

GLAS-MASTER™ GLASS REMOVAL TOOL

Wehr Engineering has developed this revolutionary tool to expedite the removal of all glass, reduce the risk of trauma to the patient and provide increased rescuer confidence in safely tackling this task. No other tool cuts glass in faster time. Cuts rescue time significantly. Manually operated and self supported. Only 3-1/4 lbs.

408920 Glas-Master Removal Tool \$299.99 ea

MULTI-PURPOSE RESCUE SHEARS

The Multi-Purpose Rescue Shears feature an eleven-in-one system that includes shears, a bottle opener, a wire stripper, an equipment opener/grasper, a lightweight saw, an ultra sharp trimmer, a knife, an oxygen bottle opener, an angled cutter scraper, a can opener and a screw driver. Made of hardened stainless steel with high impact reinforced plastic handles. Weighs approximately 5 oz and is 8" long. Available with holster designed specifically for these shears. **Holster is not available separately.**

328000 Shears, Black \$23.79 ea
328001 Shears, Blue \$23.79 ea
328002 Shears w/Holster, Blue \$29.49 ea
328003 Shears w/Holster, Black \$29.49 ea

KERSHAW KNIFE

Made of 440A, ti-nitride-coated steel, the Kershaw Knife is made to last.

Handle: Polyamide
Blade: 3-1/4" (8.4 cm) Closed: 4-1/2" (11.3 cm)
Weight: 3.5 oz

K4040 Kershaw Single Blade Knife \$120.99 ea

5.11 SIDE KICK RESCUE TOOL

The Side Kick Rescue Tool is a versatile and flexible multipurpose rescue knife for first responders and police officers. A combo edge chisel point blade excels at prying windows or doors, an integrated seatbelt cutter at the spine facilitates emergency automobile extractions, and an integrated oxygen key at the base of the blade provides utility for EMS professionals. Crafted from AUS 8 steel for maximum tensile strength, the Side Kick Rescue Tool can be carried nearly anywhere, and includes a break-away neck chain and reversible clip for multiple carry options. Whether you prefer a hip mounted seatbelt cutter for first response use or a side boot rescue tool for emergencies on patrol, the Side Kick Rescue Tool gives you the power to respond effectively. 5.75" overall length, blade is 2" long, 4 mm thick.

51046-KNIFE Side Kick Rescue Tool. \$52.99 ea

BENCHMADE® RESCUE HOOKS & KNIVES

- Made in the USA
- Unparalleled rapid response cut ability
- Safer deployment design
- Durable edge quality
- Over 200 cuts from a single hook
- 440C stainless steel
- Multiple carry options

(A) 2833-50822 5 Hook Safety Cutter \$49.79 ea
(B) 2833-80822 8 Hook Safety Cutter \$49.79 ea
2833-91515 915S Serrated Triage Knife, Orange Handle . \$191.99 ea

1ST RESPONSE 911 KNIFE

When seconds can mean the difference between life and death, you need a tool that's capable of lightening fast response. This Grilon® handled folder offers firefighters, EMS personnel and police officers a tough, fast-opening, high-carbon stainless serrated blade that doubles as a screwdriver and lightweight pry bar. The opposite end features a powerful tungsten carbide striker for quick access through auto glass. Includes a ballistic nylon sheath with belt loop and clip. 3.5" blade. 4.5" closed.

2833-91102 1st Response 911 Knife, Black Stainless Steel Blade \$92.99 ea

LAERDAL® RESUSCI ANNE® FIRST AID MANIKIN

Product Benefits

- Realistic full-body anatomy and landmarks provide the essential features necessary to learn realistic victim handling and adult First Aid skills
- High-quality, durable construction enable training in a variety of environments
- Modular design allows various limbs to be attached to produce a more realistic training experience.
- Easy-to-use and maintain faces and disposable airways give you a cost-efficient solution for First Aid training

Product Features

- Natural obstruction of the airway allows students to learn the important technique of opening the airway
- Head tilt/chin lift and jaw thrust allows students to correctly practice airway maneuvers
- Occluded airway with hyperextension stresses proper head position
- Realistic resistance for chest compressions
- Physiologically correct design allows practicing identification of anatomical landmarks
- Articulating arms, legs, and head allow realistic weight and handling of an adult during obstructed airway maneuvers.
- Carotid pulse simulation to realistically check for pulse.
- Disposable non-rebreathing airways are suitable for use by more than one student during class and are quick and easy to change after each training session.
- Removable/reusable faces allow each student to have their own mouth-to-mouth face and offers easy after class cleaning and sanitation

LAERDAL® SHOCKLINK

ShockLink™ is a new defibrillation training tool by Laerdal that enhances the realism in the learning environment and that can easily integrate in a solid and efficient CPR-D training program. ShockLink™ can simulate multiple shockable heart rhythms that can be analyzed by a variety of AEDs and Advanced Defibrillators in the market. These rhythms are VT Slow, VT Fast, SVT, VF, PEA, Asystole, and Bradycardia.

ShockLink™ connects a variety of defibrillators to the majority of current CPR manikins or simulators in the market, providing a comprehensive solution for realistic and standardized training. With this new device, you no longer need to purchase a specific training model for your AED or defibrillator or a new AED manikin, which reduces the cost of implementing live defibrillation training.

3650-18515	ShockLink	\$530.00 ea
-------------------	---------------------	-------------

LAERDAL® RESUSCI ANNE® QCPR®

Laerdal's QCPR technology, part of the new Resusci Anne and Resusci Baby manikin line, enables our manikins and feedback devices to measure the quality of CPR, providing real time feedback on compression rate, depth, release, hands-off time and other critical components of effective resuscitation.

Resusci Anne® QCPR® is built with the purpose to:

- Measure CPR performance
- Assess the results of the performance
- Facilitate good feedback to the instructor

Product Features

- Realistic anatomy including head tilt, chin lift, compression depth, compression force and chest rise.
- Sensor indicates correct hand placement
- Ventilation system provides appropriate chest rise with BMV (Bag Valve Mask) and MTM (Mouth to Mouth).
- Enhanced measurement and feedback capabilities.
- Wireless connectivity with SimPad SkillReporter or Resusci Anne Wireless SkillReporter software
- Wired connectivity with SkillGuide or SimPad SkillReporter, sold separately
- Guidelines compliant

LAERDAL® RESUSCI® JUNIOR BASIC

Includes realistic nose, mouth, and airway with movable head, neck and jaw, and carotid pulse simulation. Airway bags are inexpensive to use and provide quick and easy cleanup. Includes training mat, track suit, four faces, four airways, 12 Resusci manikin wipes, hard plastic carrying case and directions for use.

L180001	Junior with Hard Case	\$815.00 ea
L180002	Junior Without Case	\$750.00 ea

WATER RESCUE CONVERSION KIT*

The Water Rescue Conversion Kit converts your manikin for water rescue training. Kit includes leg weights, flotation bladder and instructions.

L184000	Water Rescue Conversion Kit	\$132.00 ea
----------------	---------------------------------------	-------------

LIFE/FORM CPARLENE FULL MANIKIN

This manikin provides maximum student/instructor feedback in four practice modes: compression rate, compression depth, ventilation duration, and ventilation volume. Individual student face masks provide maximum protection against cross contamination. Molded hair requires no maintenance. The disposable tracheal airway and lower airway with lung bag eliminate time-consuming disinfection procedures. Includes 10 disposable airways, 10 disposable tracheal airways, and five sanitary face masks. All electronic CPARLENE® models come complete with a washable jogging suit; child springs; and a hard carry case with wheels. Five-year warranty.

3611-03711	Life/Form CPARLENE Full Manikin with Memory and Printer, White	\$2500.00 ea

CPR Manikins

SIMULAIDS® CPR BRAD™

This economical manikin is constructed of soft, realistic vinyl plastic over polyurethane foam. Features include a long torso for realistic abdominal thrusts, realistic head tilt and chin lift for opening airway and anatomical landmarks including ribcage, sternum and sternal notch. Airway can be easily manipulated to simulate airway obstruction or choking situations. Also included are three disposable lung/airway systems and three-channel design mouth/nose pieces. Carrying bag and kneeling pads included.

652800	Brad	\$190.00 ea
652801	Brad w/Carrying Bag	\$212.00 ea
652805	Replacement Lung	\$64.00 24/pk
652023	Mouth/Nose Pieces	\$50.00 10/pk
2804	Brad Jaw Thrust with Carry Bag	\$230.00 ea

CPR PROMPT PROFESSIONAL DURACOAT™ TRAINING MANIKIN

Features a clicking chest compression piston and a tilting head with visible chest rise. This practical and affordable skills practice system is ideal for group training. The head is dishwasher safe and can be easily sanitized. Lungs inflate only when head is properly tilted and air is blown. Also has an Adam's apple and carotid arteries. Lung bags are replaceable. Durable coating is AED trainer pad "friendly".

BASIC BUDDY® CPR MANIKINS

The Basic Buddy® and Baby Buddy™ CPR Manikins are designed for teaching individuals or large groups the life-saving techniques of CPR. These manikins offer a realistic way to provide each student with their own CPR manikin. The one-piece, disposable lung/mouth protection system makes these manikins completely sanitary - there is no risk of cross contamination and no need to sanitize the manikins after use. Consists of 1 manikin, 10 lung/mouth protection bags, one insertion tool, and an instruction manual. Available in one set, five set or ten set package configurations. Three-year warranty. NOTE: Only use AED pads designed for foam body manikins.

SIMULAIDS® KIM, KEVIN AND KYLE CPR MANIKINS

Most manikins require complicated assembly and reassembly after each use; newborn KIM, six-to-nine month old KEVIN and three-year old KYLE. Their sanitary individual mouth/nose pieces can be snapped on and off in two seconds. At the end of the session, their disposable airway systems can be replaced in 20 seconds. Manikins come with an airway cutoff and exclusive nonbreathing valve. They are filled with lightweight foam and have no internal parts to break.

CURAPLEX® SELECT CPR MASK

The CPR Mask is designed to be used by the professional rescuer and first responder. It includes a low resistance, one-way valve with a disposable 3M Filtrete™ hydrophobic filter to help prevent the passage of liquids and secretions. The mask offers superior protection for both rescuer and victim. Features include: O2 inlet, disposable one-way valve and filter; 99%+ viral and bacterial filter efficacy; pre-inflated cuff for solid seal. Use for adults, children or infants. Latex-free.

- Pre-inflated cuff allows for ease of application and creates effective seal
- Oxygen inlet version facilitates delivery of supplemental oxygen to breathing and non-breathing patients
- Distance from patient allows rescuer to see chest rise and fall

LAERDAL® ALS SIMULATOR

The Advanced Life Support Simulator is a realistic interactive training manikin for simulating a wide range of advanced lifesaving skills in medical emergencies. It responds to clinical intervention, instructor control and pre-programmed scenarios for effective practice of diagnosis and treatment of a patient.

Standard: Operating ALS simulator with the SimPad System provides an intuitive touchscreen interface, easy to operate scenarios, integrated data log and a mobile training solution.

Advanced: Control the patient simulator from a laptop or desktop using the Laerdal Learning Application (LLEAP). Enhanced PC software allows video recording and debriefing. Patient monitor displays extensive vital signs library as well as radiology, multimedia files, and labs.

Call for pricing and ordering information!

Product Benefits:

- Effective for teaching advanced life saving, communication and teamwork skills through simulation, targeting the key skills of prehospital care providers
- Flexible simulator platform with multiple accessory modules accommodates a wide range of training including CPR, ACLS, NBC, trauma and bleeding control
- Preprogrammed scenarios provide standardized training while customizable scenarios and realtime instructor control allows adaptation to meet individual students needs
- Durable and lifelike; made to withstand years of use

Product Features:

- Instructor-controlled spontaneous breathing with chest rise, variable rate and lung sounds allows for simulation of a wide variety of respiratory complications
- Airway allows for insertion of standard airway devices with the addition of the LMA, Combitube® and King LT
- Difficult airway management simulations can be practiced including obstructed airway, airway blockage and needle and surgical cricothyrotomy
- Cardiac rhythm variations with synchronized pulses allow students to interpret and intervene using clinical monitors, defibrillators and external pacers and drug administration
- Blood pressure arm allows for palpation and auscultation of NIBP synchronized with cardiac rate and rhythms
- Chest tube insertion can be practiced at the left mid-axillary site and at the 4th and 5th intercostal spaces
- No cumbersome air tanks, hoses or regulator

ALS Simulator includes adult full-body simulator, interchangeable pupil set, six neck skin collars, one roll of cricothyroid membrane tape, one set of replacement pneumothorax bladders, six chest drain modules, air pump, one set of defibrillation posts, jacket, pants, directions for use and manikin lubricant.

LAERDAL® ACCESSORIES*:

Trauma Module Set

Pediatric Trauma Modules

Wound Care Assessment Set

Features:

- Cardiac rhythms with synchronized pulses allows interpretation and intervention through defibrillation, pacing and drug administration; Instructor-controlled scenarios can aid standardized teaching
- Realistic pediatric airway for insertion of standard airway devices
- Realistic needle insertion and feel at the medial malleolus and tibial tuberosity for intraosseous infusion
- Intravenous drug administration via IV bolus or drip using the multivenous pediatric IV arm
- Allows for the auscultation of normal and abnormal heart and breath and bowel sounds; speech increases realism of scenarios

Benefits:

- Preprogrammed scenarios provide standardized training while customizable scenarios and real-time instructor controls allow adaptation to meet individual student needs
- Effective for training pediatric advanced life saving skills
- Targets key skills for prehospital care providers
- Durable, rugged and lifelike; made to withstand years of use
- Flexible manikin platform with multiple modules accommodates a wide range of training including CPR, ACLS, trauma, first aid, child abuse awareness in the field and transport

(A) LAERDAL® MEGACODE KID

MegaCode Kid is a realistic manikin ideal for training in a wide range of pediatric advanced life saving skills in prehospital emergencies. MegaCode Kid has a realistic airway, defibrillation and pacing capabilities and allows drug - administration and intraosseous infusion to teach emergency skills.

MegaCode Kid Includes Full body Manikin (SimPad capable), Multi-Venous IV Training Arm, Intraosseous Leg, Manikin Lubricant, Jacket, Pants, Carry Case and Directions for Use.

Replacement Items:

- (B) Skin & Vein System
- (C) Pediatric Intraosseous Leg
- (D) Manikin Lubricant

ACLS Manikins

(A) LAERDAL® MEGACODE KELLY

MegaCode Kelly is a realistic manikin for training in a wide range of advanced life saving skills in prehospital emergencies. MegaCode Kelly has defibrillation and pacing capabilities, an instructor-controlled blood pressure arm for realistic palpation and auscultation, and allows for IV drug administration. Airway allows for insertion of Combitube and LMA.

MegaCode Kelly Includes: Manikin (SimPad capable), 6 Neck Skins, 1 roll of Criothyroid Membrane Tape, Airway Lubricant, Jacket, Pants, Carry Case, 6 Chest Tube Modules, BP Cuff, and Directions for use.

Call for pricing and ordering information!

SimPad System required for operation.

Features:

- Cardiac rhythms with synchronized pulses allows interpretation and intervention through defibrillation, pacing and drug administration Instructor-controlled scenarios can aid standardized teaching
- Use of clinical monitors, defibrillators and external pacers for practice of live interventions
- Instructor-controlled blood pressure arm allows for realistic palpation and auscultation
- Allows student assessment of heart, breath and bowel sounds, and assessment of normal, constricted and dilated pupils
- Chest tube insertion can be practiced at the left mid-axillary site, at the 4th and 5th intercostal spaces

Benefits:

- Educationally effective for training in advanced life support targeting key skills of prehospital care providers
- Preprogrammed scenarios provide standardized training while customizable scenarios and real-time instructor control allows adaptation to meet individual student's needs
- Highly flexible and mobile for use in field and during transport
- Flexible manikin platform with multiple modules accommodates a wide range of training including CPS, ACLS, NBC, trauma, bleeding control and first aid training

LAERDAL® RESUSCI ANNE® SIMULATOR

The Resusci Anne Simulator offers simulation training that meets or exceeds your emergency healthcare learning objectives. This simulator features preprogrammed learning scenarios for rapid simulation training including high-quality airway, spontaneous breathing, vital signs including ECG, IV, blood pressure and voice, lung and heart sounds for basic simulation training. The Resusci Anne Simulator's design offers complete remote control of the simulator's vital signs, voice output and breathing and airway functionality without the need for external wires, tubing or air compressor attachments.

Call for pricing and ordering information!

LAERDAL® SIMPAD®

When simulation tools are easy to use, teaching becomes more effective. SimPad has been designed in close collaboration with simulation users, from many disciplines, to ensure it provides an easy and efficient way to run simulations.

With its intuitive touchscreen interface, easy to operate scenarios, integrated data log, and compatibility with a wide range of Laerdal simulators, task trainers, and standardized patients, SimPad has the flexibility to support your needs and help you provide the best possible simulation experience.

3616-23101	SimPad System	\$3975.00 ea
3616-29301	SimPad Laptop Patient Monitor (not touchscreen)	\$3155.00 ea

LAERDAL® RESUSCI® ANNE® ADVANCED SKILLTRAINER™

The Resusci Anne Advanced SkillTrainer with SimPad offers high quality, yet relatively low cost advanced skills training. By combining the functionality of the Resusci Anne Advanced SkillTrainer with the SimPad System, instructors and trainer have the ability to offer a more comprehensive, high quality, cost effective simulation based training program focusing on advanced skills practice. With the SimPad remote control with Q CPR feedback instructors can monitor, assess and debrief students easily and efficiently. The touch screen remote control allows for flexibility in simulation based training to maximize overall learning objectives. **SimPad not included. Order separately.**

Features include:

- Airway Head (Same as Resusci Anne Simulator)
- IV Arm
- Defibrillation/3-4 Lead Monitoring
- Bilateral Carotid Pulses
- Programmable ECG
- Lung, Heart, Bowel and Vocal Sounds

3621-08951 Resusci Anne Advanced SkillTrainer \$6855.00 ea

NASCO LIFE/FORM® COMPLETE CRISIS™ MANIKIN

The Complete CRiSis Manikin is a resuscitation system that includes a full body CPARLENE® CPR manikin, Airway Larry airway management trainer, IV arm, blood pressure arm and defibrillation chest skin. Hard storage case is available separately.

653953 CRiSis Manikin. \$3575.00 ea
LF3465U Hard Case for Full Manikin. \$250.00 ea

NASCO LIFE/FORM® DELUXE CRISIS™ MANIKIN

The Deluxe CRiSis Manikin features all the same quality components as the Complete CRiSis Manikin with the addition of a handheld arrhythmia simulator. The arrhythmia/pacing simulator recreates 17 adult heart rhythms and 17 pediatric rhythms. With an external pacer, you can simulate electronic capture. You can also simulate cardioversion with manual, semiautomatic or automatic defibrillation. Hard storage case is available separately.

653649 Deluxe CRiSis Manikin (Shown). \$4250.00 ea
LF3465U Hard Case for Full Manikin. \$250.00 ea

NASCO LIFE/FORM® CHILD CRISIS™ MANIKIN

The Child CRiSis Manikin provides complete PALS training capabilities in one manikin. Simulating a five-year-old child, it features the Life/Form child airway management trainer, IV arm, blood pressure arm, defibrillation chest skin, intraosseous infusion/femoral access leg, as well as a completely functional CPR manikin.

653616 Child CRiSis Manikin \$3895.00 ea

SIMULAIDS® PEDIATRIC ALS TRAINER

Features include bag valve mask ventilation, intubation head, oral or nasal intubation, Sellick maneuver, accepts NG tube, three lead monitoring, brachial pulse, external chest compressions, jaw thrust, IV sites in hand and arm, two I/O legs for intraosseous needle insertion and aspiration of bone marrow, scalp vein for palpitation, cranial sutures and fontanels. Soft carrying bag included.

650090 Pediatric ALS Trainer \$876.00 ea

STAT BABY ADVANCED

STAT Baby Advanced has all the features of a STAT Baby, but utilizes easy-to-use iPad® technology. It gives the instructor control of the physiological features of the baby to deliver challenging training to develop student assessment skills and easily tracks sessions for later review and debriefing

3621-08010 STAT Baby Advanced, ALS Baby w/ iPad Control \$13974.00 ea

- - 7 pulse points
- - I/O Leg
- - 3 IV sites
- - PICC Access Site
- - IM/SQ injection sites
- - Advanced intubation head
- - Pneumothorax reduction bilaterally
- - 4-lead monitoring
- - Chest tube insertion
- - Defibrillation
- - Rectal medication
- - Urinary Catheterization
- - Accepts LMA, ET, OPA, NPA and LT airways- Sternal retraction
- - Fully enclosed crib
- - 6' tether assembly
- - Aneroid BP Cuff
- - Heart sounds
- - Lung sounds
- - Voice sounds
- - Spontaneous breathing

LAERDAL® ALS BABY™

The Laerdal ALS Baby manikin is designed for the realistic training of advanced cardiac life support for infants, including airway management, vascular access, ECG monitoring and professional rescuer CPR. HeartSim 200 not included.

L080011 ALS Baby \$1760.00 ea

LAERDAL® HEARTSIM® 200

The HeartSim 200 is a battery-powered ECG rhythm simulator designed to provide a wide range of rhythms with variable pulse rate and strength. Six basic rhythms including normal sinus, V-fib, V-tach and Asystole, 17 modified rhythms including Torsade des Pointes. Seven pediatric rhythms make it compatible with ALS Baby™. Special features including paroxysmal, ignore shock and variable pulse strengths. Comes with a soft carrying case.

L260010 HeartSim 200 \$1435.00 ea

DELUXE AUSCULTATION TRAINING STATION

Included with the Life/form® Auscultation Trainer and SmartScope™ the Auscultation Practice Board guides students through the transition from anatomical drawings to a three-dimensional torso. Using the same technology as the Auscultation Trainer, the Anterior Auscultation Practice Board will cause the SmartScope™ to emit various sounds dependent on the location of the stethoscope. Includes Amplifier/Speaker System, and Posterior Auscultation Board. Five-year warranty.

3680-01200 Deluxe Auscultation Training Station,
incl. Trainer, SmartScope and Practice Boards. \$4050.00 ea

ARRHYTHMIA TUTOR

A versatile patient simulator that works with most ALS manikins or directly with most monitors. The Arrhythmia Tutor I provides 16 rhythm selections for ACLS training including normal sinus rhythm, sinus tachycardia, sinus bradycardia, supravent tachycardia, SVT0, PACs in NSR, atrial flutter, atrial fibrillation, junctional escape, 1st AV block, 2nd AV block (Wenckebach), 2nd AV block II, 2nd AV block CHB, PVCs (multifocal), ventricular tachycardia, VT (Torsades de pointe) and ventricular fibrillation. These rhythms are recommended for CPR/ECC in the guidelines of the American Heart Association. An ECG patient cable snaps on the three button snaps for monitor presentation of items selected from the menu seen above the keyboard. Easy and convenient to use. Hand-held size: 5-3/10"L x 3-3/5"W x 1-1/5"D. Weight: 3 lbs.

653665 Arrhythmia Tutor \$625.00 ea

Plug-in modules for use with TUTOR 1, Sounds TUTOR, TUTOR IV and TUTOR VII only (NOT for use with TUTOR MS):

B.I.G. ANATOMICAL ADULT TRAINING LEG

The B.I.G. Anatomical Adult Training Leg enables students to learn the proper landmarks and placement of the B.I.G. intraosseous device. Clinical specialists have practiced on pediatric trainers for years, and with this new adult trainer, students will have a better understanding of landmarks on the adult patient. This anatomical leg is designed with a palpable Tibia Tuberosity. Includes one skin and one cartridge.

934-WMTLEG	B.I.G. Anatomical Adult Training Leg	\$306.99 ea
934-SKIN	Replacement Skin	\$56.99 ea
934-CARTRIDGE	Replacement Cartridge	\$49.49 ea

SIMULAIDS FAST1® TRAINING BLOCK KIT*

This small trainer provides critical anatomic landmarks for training care givers in the use of the FAST1 System. With this transportable kit, students will be able to palpate the suprasternal notch for placement of the target patch, place a target patch on the trainer, and actually insert the FAST1 infusion catheter using the FAST1 demonstrator. A replaceable disk lies under the simulator skin surface and is slightly rotated after each insertion, making at least 10 FAST1 insertions possible per disk.

3633-201	FAST1 Training Block Kit	\$111.00 ea
3633-202	Refill Disks	\$29.00 4/pk

FAST1® TRAINING FACILITATORS KIT*

Bound Tree Medical has been working with the FAST1® System for many years. We have found that there are several items commonly misplaced, broken or exhausted in the training process. With that in mind, we have developed the FAST1® Facilitators Training Kit. With this kit, you will be able to quickly re-stock your training supplies for the next round. The cardboard carrying case keeps contents organized and includes a handle for easy transportation.

NASCO SINGLE INTRAOSSEOUS INFUSION LEG

This simulator is a single leg with the ability to be placed on the Resusci® Baby Infant CPR manikin from Laerdal®, enabling you to create your own PALS manikin with equipment you already have. The leg comes with 10 replaceable bones, two sets of replacement skins and a fluid administration kit enabling you to actually visualize a flashback and infuse fluid into the leg.

653622 Single Intraosseous, Infusion Leg \$405.00 ea

NASCO LIFE/FORM® ADVANCED IV TRAINING ARM

A training arm that provides complete venous access for IV therapy and phlebotomy, plus sites for intramuscular and intradermal injections. An extensive eight-line vascular system allows students to practice venipuncture at all primary and secondary locations, including starting IVs and introducing IV catheters. The venous system simplifies set-up with only one external fluid bag supplying artificial blood to all veins simultaneously. Flexion of the wrist helps students develop manipulation skills. The replaceable skin rolls as the veins are palpated, and a discernable “pop” is felt when entering the veins. Valves in the veins can be seen and palpated on the skin surface. Simulated veins and skins are completely replaceable to keep this training arm looking and working like new forever. Includes two quarts simulated blood, 3 cc syringe, 12 cc syringe, needle, two fluid bags, instruction manual and carrying case. One-year warranty.

651121 Life/Form Advanced IV Training Arm \$625.00 ea

SIMULAIDS® IV ARM AND HAND UNIT

Arm and hand are made of supple, resilient plastic with a human feel. Blood powder and carrying tray are included. The arm and hand may be purchased as a unit or separately.

650146 Arm \$253.00 ea
650147 Hand \$253.00 ea
650140 Hand and Arm \$438.00 ea

6990-49 Reservoir Bag for Training Arm \$12.00 ea

NASCO ADULT INJECTABLE TRAINING ARM

An ideal way to teach venipuncture and injection techniques. The training arm allows one to practice infusions, intramuscular injections and drawing blood. This simulator provides the realistic feeling of puncture through the vinyl skin and latex veins. The skin actually rolls as you palpate the vein, and the characteristic “pop” can be felt as the needle penetrates the vein.

65698 Adult Training Arm \$536.00 ea
651055 Veins for Arm \$30.00 ea
650966 Adult Arm Skin and Veins. \$122.00 ea

Airway Manikins

LAERDAL® PEDIATRIC INTUBATION TRAINER

Anatomically accurate reproduction of a pediatric torso designed for teaching the differences in pediatric and adult anatomy for airway management procedures.

Features:

- Anatomically accurate airway allows sizing and insertion of various airway adjuncts: oropharyngeal and nasopharyngeal airway insertion and endotracheal tube insertion and securing
- Bag valve mask ventilation
- Tracheal suctioning
- Manually generated carotid pulse
- Closed chest compressions

255-0001 Pediatric Intubation Trainer. \$1405.00 ea

LAERDAL® AIRWAY MANAGEMENT TRAINER, ADULT AND INFANT

Realistic anatomy and head positioning lets you provide training in all adult intubation procedures. Practice training in clearing an obstructed airway by suctioning liquid foreign matter. Each manikin also includes a sanitation kit, lubricating jelly and an airway visualization model.

Realistic anatomy of the tongue, oropharynx, epiglottis, larynx, vocal cords and trachea. Case included.

L250000 Adult Model (Latex-free) \$2170.00 ea
L080001 Infant Model. \$730.00 ea
L252090 Glycerol/Water Spray Lubricant \$29.15 ea
653608 Pump Spray Lubricant \$14.25 ea

LAERDAL® DELUXE DIFFICULT AIRWAY TRAINER

The Deluxe Difficult Airway Trainer is designed for training the management of difficult airways. Manually inflatable tongue to simulate obstructed airway or tongue edema. Anatomically correct internal anatomy facilitates airway management skills using manual maneuvers and mechanical devices. The Deluxe Difficult Airway Trainer can also be used to teach oropharyngeal and nasopharyngeal airway insertion, endotracheal and right mainstem intubation, fiberoptic and lightwand intubation, needle or surgical cricothyrotomy, retrograde intubation, percutaneous transtracheal jet ventilation, bag-valve-mask ventilation, and tracheal suctioning. Includes airway torso, six neck skin collars, one roll of cricothyroid membrane tape and manikin lubricant.

261-10001 Deluxe Difficult Airway Trainer \$2480.00 ea

AMBU® INTUBATION TRAINER

The Ambu Intubation Trainer has accurate simulation of mouth, nostrils, teeth, tongue, pharynx, epiglottis, vocal cord, trachea, esophagus and lungs as well as realistic lifting and tilting of head and movement of the spine. The left side of the face is open, allowing control over the trainee's techniques. The walls of the pharynx and trachea are transparent, permitting the instructor to follow the progress of an endotracheal tube. It also offers acoustic signals to help the trainee correct their mistakes. The Ambu Intubation Trainer comes with a carrying case, access tray and lubricant.

65186000 Ambu Intubation Trainer. \$1799.99 ea

SIMULAIDS® ADULT AIRWAY MANAGEMENT TRAINER TORSO

Anatomical landmarks include sternum, rib cage, substernal notch, teeth, uvula, vocal cords, epiglottis, glottis, larynx, arytenoid cartilage and trachea. Additional features include inflatable lungs and stomach, NG tube placement and bag valve mask ventilation. Includes carrying bag.

A1004 Adult Airway Management Trainer. \$1201.00 ea

SIMULAIDS® DELUXE AIRWAY MANAGEMENT TRAINER HEAD

This new Deluxe Airway Management Head is available on a board or not so you can replace the existing vinyl head on your PDA STAT or your STAT Simulator. The features for this head include anatomical landmarks, tongue edema, laryngospasm, cricothyrotomy, and bilateral carotid pulses. Use all of the field airway adjuncts your agency uses while practicing with this product.

752-502 Deluxe Airway Management Head \$1479.00 ea

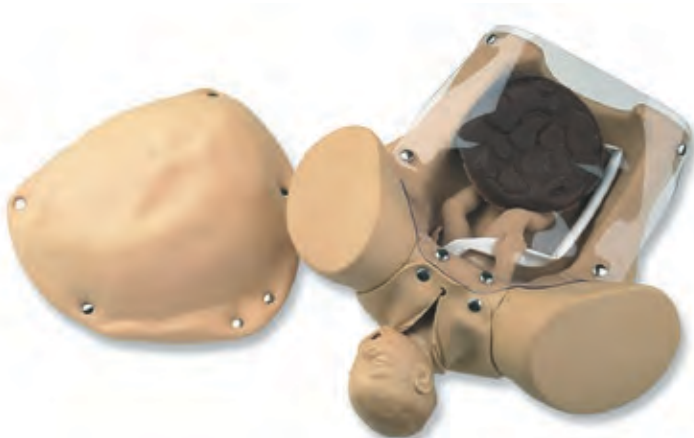

NASCO "AIRWAY LARRY" AIRWAY MANAGEMENT TRAINER

"Airway Larry" simulates a nonanesthetized patient and is ideal for practicing intubation, ventilation, suction and CPR techniques. It features anatomy and landmarks including teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, esophagus, cricoid cartilage and stomach. "Airway Larry" allows you to practice, as well as evaluate, oral, digital and nasal intubation. Suction techniques and proper cuff inflation may also be practiced and evaluated. Applying cricoid pressure changes the position of the trachea and closes the esophagus, so the Sellick maneuver can be realistically practiced. In addition, this trainer has an "airier" airway with more room to maneuver and a slightly anterior position, making it a great trainer for introductory and advanced classes. Features double, rugged, one-piece construction. "Airway Larry" can be used with stand or can be attached to CPARLENE®. Three-year warranty.

LF03958U "Airway Larry" Deluxe Crisis Torso \$2675.00 ea
653699 "Airway Larry" Trainer with Stand to Mount Head,
 Pump Spray Lubricant and Hard Carrying Case \$875.00 ea
653667 "Airway Larry" Trainer Head with Pump Spray Lubricant \$610.00 ea
653608 Pump Spray Lubricant \$14.25 ea

SIMULAIDS® OBSTETRICAL MANIKIN

Features anatomically correct pelvic model for realistic practice of delivery techniques. Life-like pelvic cavity for vertex, normal and breech delivery. Modular pregnant belly containing additional fetus floating in simulated amniotic sac, transparent plastic overlay and anatomically correct, easily replaced vulva. Interchangeable overlays, placenta with disposable umbilical cords and full-term fetus with fontanels and cranial sutures. Shipping weight, 18 lbs. Includes overlays, six disposable umbilical cords with clamps, extra vulva, simulated blood powder and soft carrying bag.

650180	O.B. Manikin	\$634.00 ea
650167	Umbilical Cord Clamps	\$12.00 6/pk
650225	Blood Powder (makes 1 gallon)	\$16.00 ea

SIMULAIDS® TENSION PNEUMOTHORAX TRAINING MODEL

This training torso introduces the chest wound management procedures necessary when a collapsed lung interferes with a victim's respiration and blood flow. Procedural needle not included. Comes with foot pump, replacement two-piece pleural chamber and soft carrying bag.

651180	Tension Pneumothorax Manikin	\$572.00 ea
6990-1801	Pneumothorax Replacement Skin	\$111.00 ea
6990-1805	Pneumothorax 2-Piece Pleural Cavity	\$39.00 ea

NASCO CRICOTHYROTOMY SIMULATOR

Designed for practice in the technique necessary to perform an emergency cricothyrotomy. Includes anatomically correct, realistic appearance, replaceable airway and skin. Palpable landmarks include the cricoid and thyroid cartilage. Prominentia laryngea is prominent on the hyperextended neck. Landmarks are accurately placed for fast action. Includes five replacement skins and cartilage inserts, cleaner, instruction guide and durable carrying case.

651082	Cricothyrotomy Simulator	\$705.00 ea
651081	3 Replacement Skins & Cartilage Inserts	\$199.00 set

NASCO CENTRAL VENOUS CANNULATION SIMULATOR

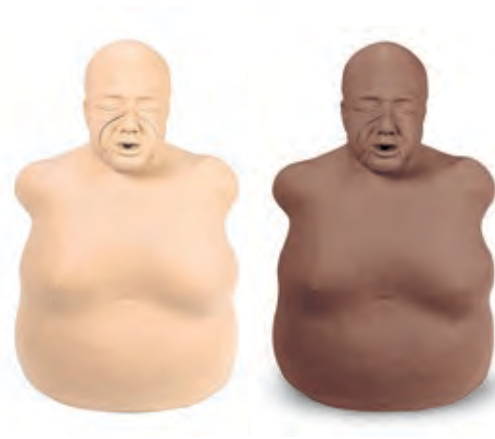

Designed for learning and practicing CVC techniques, the Central Venous Cannulation Simulator is directed to the emergency medical field. ACLS and ATLS participants will find this simulator to be the ideal trainer. Anatomically correct, palpation is exactly the same as on a patient. The sternal notch, sternocleidomastoid, clavicle and other supporting features make this simulator ideal to work with. Internal features include a replaceable muscle and bone section, subclavian, internal jugular, external jugular and carotid. Use of the Swan-Ganz catheter is possible, and changing of the internal tubing is extremely easy. The neck of the simulator is positioned to the left, making landmark identity quite easy and visual. The sternal notch “sinks” 1 - 1.5 cm when palpated. All external and internal landmarks correlate to a live patient. Modified to meet ACLS and ATLS standards, this simulator has proven itself in the emergency medical field. Includes: replaceable skin, tubing sealant, needles, one quart of blood, instruction book and hard storage case.

651087	Central Venous Cannulation Simulator	\$860.00 ea
650845	Venous Blood – Quart	\$16.50 ea
650846	Venous Blood – Gallon	\$24.95 ea

NASCO BARIATRIC CPR MANIKIN

Students always wonder how CPR manikins will compare with real victims, especially those who are older or obese. This unique manikin helps to prepare students to respond to a more typical cardiac arrest event with a victim who is elderly and overweight. Elderly physical appearance. Large body type with extra “fat” layer. Realistic head tilt and chin lift for opening the airway. Palpable and visual anatomical landmarks, including the sternum, rib cage and substernal notch. The airway can be manipulated to simulate airway obstruction or choking situation. Includes three mouth/nose pieces, three disposable lungs/airway systems and carrying bag.

653750	Bariatric CPR Manikin, White	\$385.00 ea
653753	Bariatric CPR Manikin, Black	\$385.00 ea
653751	Lung/Airway System	\$101.50 24/pk
653752	Mouth/Nose Pieces	\$54.50 10/pk

CAVICIDE™ DISINFECTANT

Multipurpose broad-spectrum disinfectant for instruments, equipment, manikins and SCBA masks.

(A) 294128	1 Gallon Refill	\$35.29 ea	\$141.16 4/cs
(B) 290024	24 oz Spray Bottle	\$15.29 ea	\$183.48 12/cs
(C) 201008	8 oz Spray Bottle	\$6.79 ea	\$81.48 12/cs

MANIKIN FRIENDLY!

Specialty Manikins

SIMULAIDS® ADULT CHOKING MANIKIN

Lifesize with realistic head, oral cavity, torso and anatomical references, this durable thermoplastic manikin was designed to sustain innumerable choking maneuvers and abdominal thrusts. Its airway will expel an obstruction when correct procedures have been utilized. Carrying case included.

651602	Choking Manikin	\$315.00 ea
1620	Child Choking Manikin.	\$169.00 ea
1630	Obese Adult Choking Manikin.	\$337.00 ea
1640	Infant Choking Manikin	\$222.00 ea

SIMULAIDS® RESCUE RANDY

Rescue Randy is the life-like adult training manikin engineered for safe utilization in situations far too hazardous for volunteers. Realistic patient handling in extrications from tunnel-collapse, smoke-filled rooms or virtually any rescue situation means personnel are prepared for every disaster or emergency situation. The leg irons entering the pelvis of Rescue Randy have been strategically angled to prevent the legs from flailing outward when raised into a sitting position. Also, the location and packing style of the steel balls used for weighting prevent cracking near the leg iron holes in the pelvis. Available with or without a permanent insertion to duplicate the weight and resiliency of a human body. Rescue Randy's tough cast vinyl-over-steel design will withstand years of rugged use. All non-combat challenge Rescue Randys are 5'5" tall and feature durable vinyl with 4,100 lb. test plastic-coated cables and equally strong steel rods. These manikins are NOT to be used for water rescue training.

651338	Randy 55 lbs	\$836.00 ea
651339	Randy 105 lbs	\$932.00 ea

ADVANCED CASUALTY SIMULATION KIT NO. 818*

This 95-piece injury simulation kit incorporates the original set developed by the U.S. Army for training medical corpsmen. Includes a comprehensive selection of injury simulations for creating disaster drills. The kit permits realistic practice in the care, management and transportation of the injured.

Kit Includes:

- | | |
|--------------------------------|-------------------------------|
| 1 Jaw Wound | 1 Burn of Chest |
| 1 Abdominal Wound | 1 Burn of Face |
| 1 Chest Wound | 1 Burn of Back |
| 36 Assorted Lacerations/Wounds | 1 Face in Shock |
| 2 Fractures of Femur | 1 Burn of Hand |
| 1 Laceration of Forehead | 2 Simulation Wax 8 oz |
| 1 Leg Amputation | 3 Bottles Makeup Blood |
| 2 Fractures of Tibia | 5 Packs Powder Blood |
| 2 Gunshot Wounds | 2 Each Grease Paint, 4 Colors |
| 1 Phosphorous Burn of Hand | 2 Packs Broken Plexiglass |
| 1 Burn of Forearm | 2 Fractures of Humerus |

650818 Advanced Casualty Simulation Kit No. 818 \$1034.00 ea

MULTIPLE CASUALTY SIMULATION KIT NO. 816*

This kit was designed especially for intermediate and advanced first aid courses. It contains simulations of the most commonly found injuries, and teaches students to recognize and treat these wounds (the best way to bridge the gap between theory and practice).

Kit Includes:

- | | |
|------------------------------|--------------------------------|
| 1 Open Amputation | 3 Pks. Blood Powder |
| 1 Compound Fracture of Tibia | 24 Assorted Lacerations |
| 1 Fracture of Humerus | 1 Casualty Simulation Wax |
| 1 Sucking Wound of Chest | 1 Pk. Broken Plexiglass |
| 1 Wound of Palm | 1 Each Grease Paint, 4 Colors |
| 1 Bottle Makeup Blood | 4 Reservoirs & Pumps Assembled |
| 1 Powder Thickener | |

650816 Multiple Casualty Simulation Kit No. 816. \$368.00 ea

SIMULAIDS® EXTREME TRAUMA WOUNDS KIT*

Simulaids Xtreme Trauma Wound Kit contains 12 lifelike look and feel wounds plus accessories you need for preparing your victims for training. Wounds can be used on manikins or humans. Many of the wounds can be made to bleed. Wounds are easily cleaned and can be reused many times.

Kit Includes:

- | | |
|-----------------------------------|--------------------|
| 1 Tongue Depressor/spatula Combo | 1 Chest Wound |
| 1 Red Grease Paint - 2 oz. | 1 Eye & Face Wound |
| 1 White Grease Paint - 2 oz | 1 Hand Wound Large |
| 1 Brown Grease Paint - 2 oz. | 1 Hand Wound Small |
| 1 Blue Grease Paint - 2 oz. | 1 Broken Upper Arm |
| 1 Casualty Simulation Wax - 8 oz. | 1 Jaw Wound |
| 3 Blood Powder Pkg. for 1 Gallon | 1 Head Wound |
| 1 Coagulant Blood - 4 oz. | 1 Burned Face |
| 1 Methyl Cellulose For Blood | 1 Lower Leg Wound |
| 1 Broken Glass | 1 Upper Leg Wound |
| 3 Spirit Gum - 1 Oz w/brush | 1 Broken Ankle |
| 1 Broken Lower Arm | |

660145 Extreme Trauma Wounds Kit \$1257.00 ea

* Bound Tree Medical strongly recommends that you review the contents of this kit with your medical director prior to use. Kit contents are subject to change without notice.

TRAINING & SIMULATION

Simulation Kits - Training Aids

PROFESSIONAL EMS MOULAGE KIT*

Included are realistic modeling waxes, wound color wheels, reusable latex wounds, bloods and tools and a full-color Trauma Simulation Guide with detailed step-by-step instructions. All components are available for replacement.

The Professional Moulage Kit Contains:

- Cyanotic Blue Foundation
- 3 Effects Wheels: Bruises, Trauma Simulation, Burns & Blisters
- 3 Foundation Bases: Fair, Olive, Dark Brown
- Gel Wound Simulation Pack
- Bright Yellow Base
- Neutral Set Face Powder
- White Cream Base
- Thick Blood
- Fresh Scab
- Modeling Waxes: Fair, Brown, Simulated Bone
- Reusable Latex Wounds: Slit Throat, Bullet Holes, Exit Wound, Open Fracture, Jagged Cut, Deep Laceration, Avulsed Eye, Torn Cheek
- Blood Powder and Stage Blood with Applicators
- Liquid Latex
- Castor Sealer
- Spirit Gum Adhesive & Remover
- Synthetic Charcoal Powder
- Petroleum & Lubricating Jellies
- Tools & Applicators
- Trauma Simulation Guide
- Heavy Duty Carrying Case

651 Professional EMS Moulage Kit. \$589.99 ea

ADVANCED MILITARY MAKE-UP CASUALTY SIMULATION KIT*

A0142 Casualty Simulation Kit. \$611.00 ea

Each Kit Contains:

- | | |
|--|---|
| 5 Dz. Assorted Stick-on Injury Simulations | 2 Each: Fake Dirt |
| 4 Bleeding Moulages with Pump Assemblies | 1 Each: Glycerine for Perspiration, Cold Cream, Mineral Oil, Latex Compound, Charcoal |
| 1 Each: Palette, Spatula, Scissors, Mirror, Measuring Cup | 2 Each: Petroleum Jelly, Pressure Sensitive Tape |
| 2 Each: Atomizer, Casualty Simulation Wax, Adhesive for Stick-on Wounds, Coagulant Make-Up Blood | 1 Each: Modeling Paste – White and Dark |
| 3 Pkgs. of Blood Powder to Make a Total of 24 Pints of Simulated Blood | 2 Each: SIMULAIDS 1/2 oz. Make-Up Liners: Red, Blue, Brown, White, Yellow, Black, Flesh |
| 1 Methyl Cellulose for Blood Thickening | 1 Assortment of Cotton Balls, Swab Sticks, Tongue Depressors, Tissues, Make-Up Sponges |
| 2 Each: Plexiglass for Simulated "Glass in Wound" | |

ANATOMICAL CHARTS

Talented medical illustrators create in-depth drawings from the latest sources and function as reference material to help you increase your knowledge about human anatomy, physiological principles and important pathological conditions. Laminated with rigid plastic coating with metal eyelets in the top corners for convenient wall hanging. Charts are 20" x 26".

HEART MODEL

This anatomically correct model of the heart is an excellent teaching tool. All of the familiar cardiac landmarks can be easily seen. Mounted on a base, this model is removable for handling. Dissectible into two parts. 12 x 12 x 22 cm.

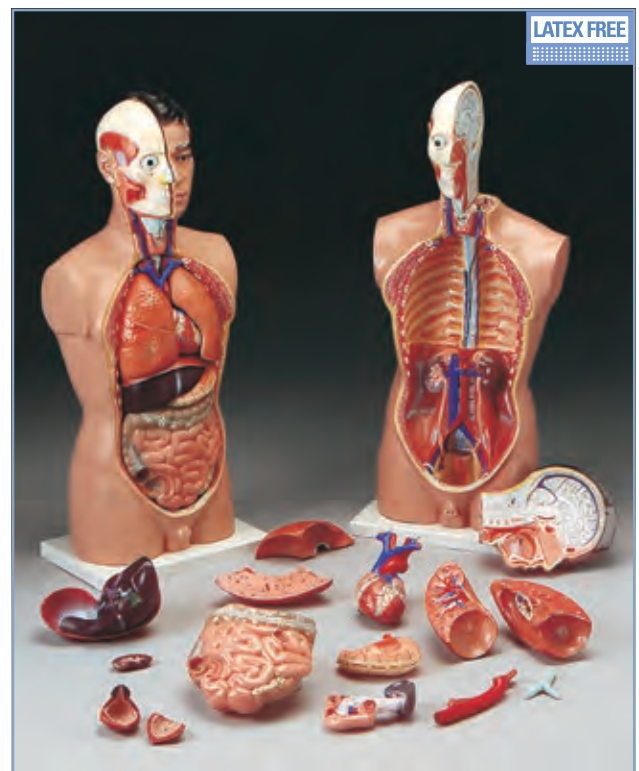

A0083 Heart Model \$128.99 ea

TORSO MODEL

This is a full-size male torso. Hand painted and meticulously assembled to simulate human anatomy. Dissectible into 19 parts: torso, head (two parts), brain, lung (four parts), heart, trachea, esophagus and descending aorta, diaphragm, stomach, duodenum with pancreas and spleen, intestines, cecum, kidney, bladder (two parts) and liver. Mounted on a base. 33" tall.

A0082 Torso Model \$462.99 ea

HUMAN SKELETON

Ideal for teaching and demonstration purposes. The arms and legs are removable for individual study. The skull (32 teeth) is dissectible into three parts with the mandible on springs. Mounted with a metal rod which extends from the sacrum. Comes with a mobile stand. Height: 5'5".

65100 Human Skeleton \$769.99 ea

CONTROLLED ACCESS PHARMACEUTICAL DISPENSERS

UCapt's Controlled Access Pharmaceutical Dispensers are customizable inventory management tools that help address supply room challenges. Items can be dispensed to EMS personnel based on customizable ID protocols. It can also prompt users for station or dispatch specific data. All supply withdrawals are cataloged, time stamped and regulated by tech clearance/training level.

See page 504 for more information.

Inventory Management

FINANCING IS AVAILABLE!

The Controlled Access Pharmaceutical Dispenser (CAP) is a customizable inventory management tool that helps address supply room challenges. The items stored within the CAP are dispensed based on customizable ID protocols. EMS management can monitor and restock inventory at any time. The CAP aggregates all dispensing history, creates a pick list for restocking and generates individual call reports based on products restocked. Managers can choose to receive automatic email or text message alerts regarding low stock, temperature variance, usage spikes, expiration dates or power loss.

INVENTORY MANAGEMENT & REFERENCES

Inventory Management

FINANCING IS AVAILABLE!

The Controlled Access Pharmacy or CAP allows EMS, Pharmaceutical and other medical professionals the ability to restock their units 24/7 and have real-time usage and inventory tracking. The CAP can check multiple forms of ID and will prompt for station or dispatch specific data. All withdrawals are cataloged, time stamped and regulated by tech clearance/ training level.

Some of the benefits CAP provides include:

1. Reduce inventory carrying costs
2. Eliminate "shrink" and hoarding
3. Eliminate waste due to expired products and pharma
4. Full real time reporting of How, What, why and where
5. Providing access to inventory while maintaining control and security
6. Meeting the FDA and DEA Federal guidelines for pharmaceutical management
7. Reducing administration costs and streamlining operations
8. Increasing the time apparatus trucks can be in service

"We can now audit our usage and remotely poll stations in order to determine restocking needs! We are in compliance with the DEA regulations regarding narcotics and can pinpoint the location of all supplies from the pharmacy storeroom to the truck."

Rob Dehnert - NREMT-P Specialist

West Des Moines EMS, West Des Moines, IA

"The report tells me what I need to know, how many are expiring, where they are located and the name of the medication. I really like that I can run the report for 90 or more days because I order replacement medications 3-4 months in advance, plus my regular stock... so I know I won't run out. Now instead of having to do a count by hand at the end of the month or so I check them in when I receive them and simply run the reports I need."

Beth Hines - Captain

Onslow City EMS, Jacksonville NC

"We will pay for the machine in 2 1/2 years just based off of direct drug costs alone. That doesn't take into account man-hours spent doing inventory."

Shawn Treloar - EMS Battalion Chief

Sanford Fire Department, Sanford, FL

Inventory Tracking

OPERATIVE IQ INVENTORY AND ASSET MANAGEMENT

A web based Inventory and Asset Management service designed for EMS and Fire Departments. Operative IQ is scalable to meet the needs of any size operation.

Call for pricing and ordering information!

IQ MOBILE NOW AVAILABLE FOR INVENTORY MANAGEMENT

Whether you have five vehicles or multiple stations with hundreds of vehicles, Operative IQ is scalable to meet your needs.

THE ELECTRONIC CHECK SHEET

Designed for use on a touch screen notebook or tablet, the Check Sheet replaces paper and pencil methods with a flexible and easy to use application that connects the front line crews to operations.

Conduct inventory updates for all supplies and automatically send requests to office administrators for any items or equipment that needs restocking.

BENEFITS OF OPERATIVE IQ

MINIMIZE ERRORS

Operative IQ improves inventory accuracy and eliminates the costly mistakes associated with manual, paper-based processes.

TIME SAVINGS

Operations management software gives you the time to perform other tasks by reducing inspection time, restock time, ordering time, asset location time, maintenance inspections and reporting.

COST REDUCTION

With automatic notification, Operative IQ reduces expired supply losses and empowers you to order only what's needed.

PERSONAL ACCOUNTABILITY

All transactions, equipment logs and inventory activities have a complete audit trail in Operative IQ, empowering accountability throughout the organization.

INCREASED AWARENESS

With the ability to deliver management reports directly to the inbox of anyone within your organization, Operative IQ provides unprecedented visibility and control.

ADVANCED OPERATIVE IQ FEATURES

Because Operative IQ has been developed by EMS professionals, the product is rich with additional features to increase efficiencies, including:

MANAGE INVENTORY ACROSS YOUR OPERATION

Operative IQ provides you the tools to manage inventory across your operation. Whether inventory resides in supply rooms, outlying stations, vehicles or vending machines it can be tracked.

BOUNDTREE MEDICAL PURCHASING INTEGRATION

You can order all your supplies using Operative IQ and easily submit your BoundTree Medical purchase orders electronically. Receive your order status and price updates to help keep you informed.

EXPIRATION DATE AND LOT NUMBER TRACKING

Reduce your risk and losses due to medical supplies expiring in the field. Easily identify items before they expire so you can rotate stock.

FLEXIBLE VEHICLE AND STATION CHECK SHEETS

Operative IQ supports inventory inspections, sealed cabinets, expiration date tracking, speed loading, asset verification and supply request routing to multiple supply locations.

VEHICLE MAINTENANCE INSPECTIONS

Operative IQ ensures your entire fleet is in top condition by alerting supervisors and fleet managers of vehicle maintenance issues as they are identified.

MANAGE ASSET PREVENTATIVE MAINTENANCE

Enter your preventative maintenance schedules and start tracking when maintenance is due for your assets. Record maintenance and store all your asset documentation for easy access.

ASSET CHECK IN CHECK OUT

Operative IQ's check in/out manager can assign items to an employee or vehicle and then check items in at a later time, ensuring that items are less likely to be lost or misplaced. Checked out assets can also be verified on the Check Sheet.

OPERATIVE IQ CONTROLLED SUBSTANCE TRACKING

Operative IQ Narcotics tracking is designed to meet the controlled substance tracking demands of EMS and Fire Departments. The online system replaces today's paper controlled substance log books, allowing you to manage the receipt, movement, administration and final disposition of each individual drug.

BENEFITS OF CONTROLLED SUBSTANCE TRACKING

CONTROLLED SUBSTANCE SAFE MANAGEMENT

The system assigns a unique control number to each item so it can be tracked as it moves through your operation.

MONITOR CONTROLLED SUBSTANCE MOVEMENT

As controlled substances move from the Narcotics Safe to a Narcotics Box and then out to the field each transaction is verified using a biometric finger print reader.

CREW MEMBER ACCOUNTABILITY

Crew members are accountable for their control numbers, can complete transactions and fill out forms.

VISIBILITY

Electronically stored transactions provide you unmatched visibility in to your logs. You can see the entire history for each controlled substance that enters your operation.

BIOMETRIC SECURITY

Biometric finger prints verify all transactions and prevents someone from making false transactions.

KEY TRANSACTIONS

- Receive into Safe
- Issue to Crew
- Transfer between Crews
- Administer
- Destroy/Waste
- Audit

Security features like the FBI endorsed biometric finger print reader and the ability to capture witness finger prints are united with true cradle to grave tracking.

OPERATIVE IQ FLEET MAINTENANCE

Fleet maintenance connects your frontline crew with your fleet manager by tracking and scheduling vehicle repairs and routine maintenance based on crew member inspections.

FEATURES OF FLEET MAINTENANCE

MAINTENANCE FORMS

Create custom forms to capture service-specific information.

MAINTENANCE SCHEDULES

Set routine services schedules and the system will prompt you when maintenance is due.

PERFORMING MAINTENANCE

When fleet maintenance is due the suggested vehicle maintenance will show in your work queue.

VEHICLE HISTORY

All maintenance performed or imported is available in your fleet maintenance software via the Maintenance Log or Management Reporting system.

IMPORTING DATA

Import data from Excel spreadsheets and Fuel Cards directly in to your maintenance schedules.

REPORTING

Equipped with a powerful reporting engine to give you insight in to your business. Easily report on Cost per Mile, Miles per Gallon or any other metric.

iQ Genius VEHICLE RFID SYSTEM

The iQ Genius uses Radio Frequency Identification (RFID) to bring automation to your inspection processes. This RFID system gives you real-time Asset Tracking and Inventory Inspections.

REVOLUTIONIZE YOUR OPERATION

- Reduce Vehicle Inspection Labor
- Produce Extremely Accurate Information
- Know the GPS Location of Equipment on Vehicles
- Be Alerted to Missing Equipment
- Accurately Verify Inventory Cabinet Seals
- Locate Inventory Bins with Expiring Supplies or Lot Numbers
- Automatically Update Changes

NIMS: INCIDENT COMMAND SYSTEM FIELD GUIDE™

This 3" x 5" reference guide clearly and concisely outlines what you need to know about NIMS objectives, whether you're at the local, state or federal level, or in private industry. The all-hazards, non-jurisdictional or discipline specific guide also provides responsibilities and checklists for applying the Incident Command System (ICS). The new second edition features an expanded and improved section on the Operational Planning Process, improved checklists for all functional positions, updated information on the relationship between NIMS and the National Response Framework (NRF), and expanded information on Multiagency Coordination Systems and Joint Information Systems. Tough, waterproof and alcohol-fast, this handy guide can be used for NIMS and ICS training, during training and functional exercises and in the field.

- NIMS Overview and Major Components
- Joint Information Systems
- Multi-Agency Coordination System
- Incident Command System Concepts
- Sample Planning Schedules
- Sample Meeting Agenda
- Sample ICS Organizational Charts
- National Response Framework Relationship Incident Action Plan (IAP)
- ICS Forms and Templates
- NIMS/ICS Glossary and Acronyms
- ICS Position Responsibilities and Checklists
- Planning Process and Cycle
- Position-Specific Prompts for Command and Operations

480387 NIMS: Incident Command System Field Guide \$27.29 ea

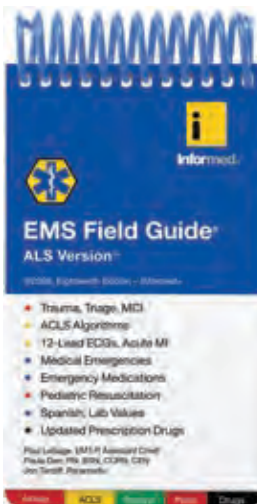

EMS FIELD GUIDE® BLS & INTERMEDIATE

The 8th edition EMS Field Guide® Basic & Intermediate Version has been updated with the latest cardiac arrest and CPR guidelines from the American Heart Association. For years, this guide has been an essential reference tool for EMTs. Whether you're a student or a 20-year veteran of emergency medical services, this guide gives you finger-tip access to all of the essential information to perform your job. This edition features; EMS protocols, spell-checking, EKGs, defibrillation, home medications and much more. Like all of our field guides this is the text you'll use in class and take with you throughout your career in the field. Field guide is 3" x 5", fits easily in your pocket, has color-coded tabs, and is waterproof, alcohol-fast and durable.

- Current AHA Guidelines
- Prescription Drugs
- EKG Rhythms
- Basic & Intermediate EMS protocols
- Meds / Airway / Intubation
- Defibrillation
- Basic & Intermediate Medications
- Anatomy, Signs & Symptoms
- Charting
- Poisons & Overdoses
- Infectious Diseases
- Mnemonics
- Trauma & Glasgow Coma Scales
- Medical Abbreviations
- Burn Charts
- Pediatric Emergencies
- Pulse Oximetry
- The "Rule of 9's"
- Multiple Patients Triage Trauma
- O2 Administration
- Spell Checker

480381 EMS Field Guide, BLS & Intermediate. \$29.99 ea

EMS FIELD GUIDE® ALS

The 18th Edition EMS Field Guide® ALS version has been updated with the latest CPR and ACLS algorithms from the AHA. This handy guide makes it easy for paramedics, nurses and physicians to look up their patients' medications, check drug doses, quickly interpret 12-Lead EKGs and much more! At only 3" x 5" it easily fits in your pocket, has color-coded tabs, and is waterproof, alcohol-fast and durable.

- Current AHA Guidelines
- 12-Lead EKG Section & Acute MI
- Current ACLS Algorithms
- Medical Emergencies Section
- Top Prescription Drugs
- Emergency & ACLS Drugs IV Drips, Drug Infusions, Dosages
- Airway Management / RSI Poisons & Overdose / 'Rave' Drugs
- Burn Charts, the 'Rule of 9s' Fibrinolytics for AMI & Stroke / CVA
- Lab Values, Metrics, Notes Childbirth, Diabetic, Respiratory Distress
- Pediatric Resuscitation, Drug Doses, Vitals
- Pulse Oximetry, Infectious Diseases
- Trauma, Triage, MCI, Glasgow Coma Scales Quick EMS Spanish Translations

480378 EMS Field Guide, ALS \$27.29 ea

EMERGENCY & CRITICAL CARE POCKET GUIDE™

The 6th edition Emergency & Critical Care Pocket Guide contains the current AHA guidelines. Use of this popular reference helps physicians, paramedics and nurses check ACLS drug doses, interpret EKGs, look up patient medications, and much more. Critical information covers use of airway devices such as the Combitube, LMA, and King LT™ Airway, a complete list of emergency & ACLS drugs, including Natrecor and Ketamine, an extensive prescription drug list, Rapid 12-Lead EKG interpretation page, dermatomes, hemodynamics, lab values, and a complete list of abbreviations! Only 3" x 5", it easily fits in your pocket, has color-coded tabs, and is waterproof, alcohol-fast, tear-resistant and incredibly durable.

- Current AHA Guidelines
- Current ACLS Algorithms
- Emergency & ACLS Drugs
- 12-Lead EKG Section & Acute MI
- Basic EKG Rhythms
- Laryngeal Mask Airway / RSI
- "Rave" Drugs
- Basic Chest X-Ray Interpretation
- Fibrinolytic Screen for AMI & Stroke
- Ischemic Stroke Management / Neuro
- Common Medical Emergencies
- Pediatric Resuscitation, Drug Doses, Vitals
- Burn Charts, the "Rule of 9s"
- End-Tidal CO₂ / Capnography / Ventilator Guidelines
- Trauma & Glasgow Coma Scales
- Pulse Oximetry, IV Drip Rates
- Quick EMS Spanish Translations
- Lab Values, Metrics and Notes Pages

480382 Emergency & Critical Care Guide. \$29.99 ea

FIRE OFFICER FIELD GUIDE®

Whether you are a command officer or a beginning firefighter, the Fire Officer Field Guide will prove to be an essential tool throughout your career. This guide includes rapid-use checklists for safe operational behaviors, situational awareness tips, RIT Team activation, Mayday and rescue procedures, Incident Command with the latest NIMS developments, HazMat section with updated chemical characteristics, MCI, tactical tips, an updated emergency medical section, and more. The Fire Officer Field Guide provides instant access to critical information in an easy-to-use checklist format. At only 3"x5", this guide fits in your pocket, is waterproof, alcohol-fast and "street tough".

Covers:

- Rules of Engagement
- National ICS Profiles Updated Fire Strategy / Tactics
- Improved Operations Center Guidelines
- Mayday & Firefighter Rescue
- Evacuation / Abandon Structure
- Enhanced WMD and HazMat Response
- Special Rescue Situations Incident Command System / MCI
- Updated EMS Section
- Water Supply / Friction Loss
- Tables for Flammable Gases & Liquids

3710-43306 Fire Officer Field Guide, 1st Edition. \$27.29 ea

HOMELAND SECURITY FIELD GUIDE™

The Homeland Security Field Guide™ is an essential tool for law enforcement, fire & rescue, first responders, EMS personnel, nurses and physicians. This second edition includes: chemical diagnosis guidelines, suspicious packages, explosives, incendiary compounds, booby traps, suicide bombings, biological agents, such as anthrax, Ebola, Q fever, smallpox, tularemia, cholera, plague, hemorrhagic fevers, ricin, blister agents, nerve agents, cyanide, ammonia, phosgene, chlorine, mustard, Lewisite, Tabun, Sarin, Soman, VX, and much more! This handy pocket guide is only 3" x 5", fits easily in your pocket, has color-coded tabs, and contains the latest information for WMD and terrorism response.

- Weapons of Mass Destruction
- Terrorist Incident
- Incident Command
- HazMat Tactics / Decon
- Special Rescue Situations
- Medical Response / Triage
- Radioactive Substances
- Dispatch Procedure
- Biological Hazards
- Personal Security

480384 Homeland Security Field Guide. \$27.29 ea

INVENTORY MANAGEMENT & REFERENCES

Pocket Guides - Reference Materials

"RITE IN THE RAIN"®

A pocket-size pad which allows you to write specific patient information in the rain. Paper stays dry and repels water. 50 sheets.

A0159 "Rite in the Rain" Pads . . . \$7.49 ea

TECHNICAL RESCUE RIGGERS GUIDE

The new edition Technical Rescue Riggers Guide by Rick Lipke shows extremely safe and up-to-date techniques for rope rescue. 126 pages, 296 clear illustrations and photos, from basic knots and anchors to highlines, helo rescues and much more. Cross referenced with handy safety reminders throughout. 4" x 6".

681788 Rescue Riggers Guide . . . \$32.79 ea

PEDIATRIC CRASHCARDS™

The Pediatric CrashCards contain 12 color-coded, 3" x 5", plastic cards organized by age and weight, newborn to 12-years. Topics include fluid resuscitation, blood transfusions, cardioversion, defibrillation, drug dosages, BLS and more.

481031 Pedi Crash Cards \$30.49 set

VITALPADS™ PATIENT FIELD NOTES

For recording and communicating ABC's, vitals, medical history, trauma scoring and treatment to accompany the patient, with a copy for your records. Provides reminder of ABC's, vitals, medical history, revised trauma scoring, O2 therapy, rules of nines, pupil gauge, generic listings for EMS phones and radios and radio protocol. Includes 40 sets of two-copy carbonless record keeping.

Standard size measures 4.25" x 7.75".
Pocket size measures 3.25" x 6.75".

481111 BLS, Standard Size \$11.39 ea
482222 BLS, Pocket Size \$11.39 ea
484444 ALS, Standard Size \$11.39 ea
483333 ALS Pocket Size \$11.39 ea

KWIKPOINT® VISUAL LANGUAGE TRANSLATORS

The Kwikpoint Visual Language Translators (VLTs) facilitate fast communication between medical personnel and patients. Each VLT contains essential content for dealing with and treating medical needs and emergencies. The Medical VLT helps exchange information with patients about symptoms and conditions including falls, bites, wounds, allergic reactions, toxic ingestions, critical pain and illness identification, as well as medication dosage and treatment options.

The English/Spanish Medical VLT features English/Spanish language panels paired side-by-side. These carefully developed picture panels enable medical personnel to communicate critical questions and get quick answers by having patients point to adjoining pictures.

3760-61209 Kwikpoint Medical VLT \$31.79 ea
3760-71807 Kwikpoint English/Spanish Medical VLT \$34.49 ea

EMS STAT 12-LEAD FIELD GUIDE

The EMS STAT 12-Lead is an easy to use visual aide designed to assist the EMS healthcare providers with 12-Lead ECG interpretation. This simple to use tool will help you systematically read and interpret 12-lead ECGs printed from Philips, Medtronic and Zoll portable monitor 12-lead print-outs. The EMS STAT 12-Lead is so compact it will fit into the pouch on your monitor.

- One-sided
- Easy to read
- Wider

3710-19212 EMS STAT 12-lead Field Guide \$52.99 ea

PEDIATAPE

Color-coded, laminated, pediatric emergency tape. Quickly measure length and estimate weight with industry-standard color codes. Get exact MLs for the most common resuscitation medication concentrations. The color lengths are based on the US CDC 2007 NHANES Data Set and compatible with the most recent Broselow Tape™.

- One-sided
- Easy to read
- Wider

3710-16051 PediaTape \$30.29 ea

PEDI-WHEEL®

Pocket-sized, laminated reference tool for pediatric emergencies. Turn the dial to your patient's age and see the following information appear in the window: average weight, blood pressure, heart rate, respiratory rate, suggested sizes for ET tubes and laryngoscope blades, as well as average length of a properly inserted ET tube at the teeth or gum line. Age categories range from preemies to 16 years old.

480224 PEDI-Wheel \$14.59 ea

PEDIATRIC DRUG CHART™

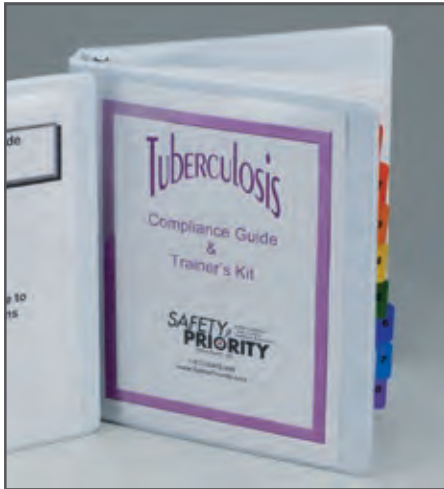

The 6th edition Pediatric Drug Chart now includes new EMS and ACLS medications, laryngeal mask airway sizes and much more! This chart makes it very easy for physicians, nurses, and paramedics to look up correct pediatric drug doses because the entire math is already done. All doses are shown in cc's. The built-in length/weight ruler makes it very easy for the provider to estimate patient weights.

- 36 Pediatric Emergency Medications
- New Emergency Drugs
- LMA Sizes
- Pediatric Algorithms
- Vital Signs
- Burn Charts
- APGAR
- Glasgow Coma
- Length / Weight Ruler
- IV Drips and More!

480379 Pediatric Drug Chart \$16.29 ea

Reference Materials

TB COMPLIANCE KIT/TRAINER'S KIT*

This TB compliance system includes TB infection control plan, respiratory protection program and TB awareness training program with presenter's notes, overhead transparencies, handout masters, tests, certificates and complete copy of CDC TB guidelines.

480911 TB Compliance Guide & Trainers Kit \$228.99 ea

BLOODBORNE PATHOGENS COMPLIANCE GUIDE/TRAINER'S KIT*

The Bloodborne Pathogens Compliance Guide and Trainer's Kit includes sample exposure control plans (EMS, FD, PD, industry editions), compliance reporting forms, checklists, flow charts, a copywritten Exposure Incident Reporting form, a copy of the standard, a training outline (OSHA required) and detailed lesson plan, overhead transparencies, handouts ready to copy, a final exam with answer key and a sample certificate of attendance.

487005 Bloodborne Pathogens Compliance Guide \$243.99 ea

SAUNDERS

For over 60 years, Saunders has been manufacturing the trusted aluminum storage clipboards in the USA. Now proudly made from durable recycled aluminum with 50% post-consumer materials, all our aluminum products are environmentally friendly and keep waste out of our landfills. Saunders plastic storage clipboard is proudly made in the USA by Americans who are blind. Made from high quality materials featuring steel bar reinforced hinges, our products will last and withstand heavy use in the field. Designed for the mobile person, Saunders provides organizational tools to meet the individual need that are essential for an effective work station.

Recycled Aluminum Cruiser-Mate® II Storage Clipboard - Silver

(A) **488512** Cruiser-Mate® II - 8.5" x 11" Form Size - Silver . . \$40.99 ea
488514 Cruiser-Mate® II - 8.5" x 14" Form Size - Silver . . \$45.79 ea

- Duel storage compartment allows for extra organization and self-locking latch ensures product will remain closed
- HIPAA Product Solution - Completed documents can be stored in the lower, larger tray
- Hard writing surface provides an easy way to complete paperwork quickly and efficiently

Recycled Aluminum Redi-Rite® Storage Clipboard - Silver

(B) **488513** Redi-Rite® - 8.5" x 11" Form Size - Silver \$45.99 ea
488515 Redi-Rite® - 8.5" x 14" Form Size - Silver \$49.99 ea

- One large storage compartment ideal for holding needed tools, pens, pencils and documents
- Self-locking latch ensures product will remain closed
- Clip provides card/license holder for additional convenience

Recycled Aluminum Padfolios - Black

(C) **3444-88322** Padfolio - 3" x 5" Form Size - Black \$26.29 ea
3444-87922 Padfolio - 8.5" x 11" Form Size - Black \$36.99 ea

- Recycled Writing Pad (Included) contains 30% post consumer waste and is proudly made by Americans who are Blind
- Slim design allows for easy storage between car seats, in bags and backpacks
- Hard writing surface provides a place to work in the field and internal bends allow for papers to be tucked away for additional organization
- The unique pocket size notepad holder fits in any convenient space for easy retrieval and note-taking

Recycled Aluminum Tuff Writer w/Foam for iPad

(D) **3444-45045** Tuff Writer w/ foam - 8.5" x 11" - Silver . . \$48.29 ea

- High density foam will securely hold tablet in place for use on the field, in the car and on the go!
- Side opening storage clipboard with foam insert creates an effective mobile office having all vital tools in one place

Recycled Aluminum Snapak® Form Holder - Silver

(E) **10507** Snapak® - 5.6" x 9.5" Form Size - Silver \$30.99 ea
488516 Snapak® - 8.5" x 11" Form Size - Silver \$45.49 ea
488517 Snapak® - 8.5" x 14" Form Size - Silver \$56.99 ea

- Hinged writing plate protects unused forms from write-through and provides a smooth, hard surface to write on in the field
- Storage compartment with latching bar is ideal for used forms and other documentation that requires fast retrieval
- Side opening design allows for easy one-handed access to all documents, forms and other materials

SlimMate™ Storage Clipboard - Bright Orange - Letter/A4 Size

(F) **3444-57915** SlimMate™ - 9" x 11.75" Form Size - Orange . . \$14.29 ea

- SlimMate Proudly manufactured by Americans who are Blind
- Slim, Sleek designed will fit easily between seats, in bags and backpacks and bright color provides high visibility for road safety
- Snap close feature ensures that documents inside will be secure
- Storage space provides storage for pens, sheers, documents and other items needed for quick retrieval

Authorization For Medical Directors and Pharmacists-in-Charge

A CUSTOMER AND SHIPPING INFORMATION

Please Print or Type:

Facility Name: _____ Account # _____

Contact Name: _____ E-mail address: _____

Company Shipping Address: _____

City: _____ State: _____ Zip: _____ Telephone: _____

Does customer have multiple shipping addresses? Yes* No **If there is more than one shipping address, please include an attachment with additional addresses.*

B ITEM CERTIFICATION

We certify that the items purchased will be used only by the organization named above. The material will not be sold to a third party, distributed or used for any other purpose. Prescription Drugs are subject to the U.S. Federal Export Control Regulations and may not be exported or otherwise removed from the U.S. without prior written authorization from the U.S. Department of State. [Please check box]

C PRODUCT CATEGORY AND LICENSE INFORMATION

I, the undersigned, am the Medical Director or Pharmacist-in-Charge for the above-named facility at the above-specified shipping address. In this capacity, I hereby authorize the facility to authorize the below-indicated category(ies) of products and submit the following referenced license(s) with respect to such orders, with a copy of such license(s) attached to this form. [Please check appropriate box(es) and complete corresponding license information.]

I wish to order Prescription Drugs and/or Medical Devices. License authorizing these items is as follows:
Physician's License or State Board of Pharmacy License # _____ Expiration Date: _____

I wish to order Controlled Substances: License(s) authorizing these items is as follows:
DEA License # _____ Expiration Date: _____

DEA license must be specific to shipping address. Please provide either medical director, pharmacists-in-charge or entity DEA license that corresponds to desired shipping location. Regardless of shipping address specified in Part A, controlled substances will ship to address corresponding to DEA license provided.

State Controlled Substance License # _____ Expiration Date: _____
State controlled substance license is required for certain states. For those states, both the DEA and state license must be provided.

D STATEMENT OF AUTHORITY AND SIGNATURE

I hereby swear under penalty of perjury that (i) I am the (check one): Medical Director Pharmacist-in-Charge with responsibility for the facility identified above in Part A with respect to the specified address; (ii) that the license information provided is current and accurate and I am, therefore, licensed to authorize shipment of the substances indicated on this form to the facility designated; and (iii) I understand that failure to provide complete and truthful information may constitute grounds for the vendor to recommend that appropriate authorities bring disciplinary actions against me.

Signature: _____ Date: _____

Print Name: _____ Print Title: _____

Instructions:

This Authorization is only valid if accompanied by a copy of the license specified in Part C. This Authorization will expire at the time of the expiration of the above-specified license (as applicable to the product ordered). Upon expiration, a new Authorization must be submitted for orders to be processed. If there is a change in Medical Director or Pharmacist-in-Charge, this Authorization will immediately become invalid and a new Authorization, including applicable license(s), must be submitted for orders to be processed.

Please complete this form and submit a copy of the appropriate license(s) to Customer Licensing by facsimile to 866-470-1355, by email to custlicense@sarnova.com, or by mail to P.O. Box 8023, Dublin, OH 43016-2023.

Bound Tree Medical, LLC

Controlled Substance Ordering Guidelines

Bound Tree Medical is pleased to now offer two ordering options for Schedule II controlled substances. In addition to the traditional paper DEA Form 222, Bound Tree now offers CSOS (Controlled Substance Ordering System), a convenient, easy to use DEA approved online system. Each time a Schedule II controlled substance is ordered, a 222 form must be submitted or an online order is required through the CSOS system. Schedule III, IV and V controlled substances (Ativan, Valium, Versed, etc.) may be ordered via phone, fax or mail.

Before Bound Tree Medical can process your order, we must receive a License Authorization form and current license/certificate.

For those interested in ordering via our CSOS program, please see the next page for instruction on how to get started. For those utilizing paper DEA Forms 222, please refer to the following instructions for completing those forms.

Complete instructions for completing a Form 222 are found on the back of the back copy of each Form 222. (The DEA Form 222 is a triplicate form.) A Bound Tree Medical order form is not necessary when ordering Schedule II substances. Please include a copy of your purchase order number with your Form 222 if you should require it for receiving/billing purposes.

In accordance with Federal regulations, controlled substances can only ship to the address shown on the DEA certificate. This address is pre-printed on your DEA Form 222.

* DEA Form 222s are issued by the DEA. To order these forms please contact your local DEA office or visit www.deadiversion.usdoj.gov.

Instructions for completing DEA Form 222

Please follow these instructions closely. Per Federal regulations, any form that has been altered or contains errors will be voided and returned to you.

1. To (Name of Supplier) Bound Tree Medical. Please see map below. Select the Bound Tree address that corresponds with your shipping location. Use this Bound Tree address to complete sections 2 & 3.
2. Street Name
3. City, State
4. Date - enter date that the Form 222 is completed and mailed.

Since controlled substances are not returnable, please be very specific with the product information.

5. No. of packages - indicate the number of boxes you would like to order.
6. Size of package - indicate the number of units per box.
7. Name of item - drug name, concentration and delivery format (amp, carpuject, vial, etc.).

Please see our Controlled Substance listing to obtain size of package and full descriptions.

8. Last line completed - indicate the number of lines you used to complete your order (example - if one item ordered, write in the number "1")
9. Signature of Purchaser or Attorney or Agent: This is the person who signs the DEA application and renewals or any individual who has been authorized by a power of attorney. Your Medical Director may or may not be the authorized agent.

Bound Tree will complete sections 10- 13. Do not write in these sections.

After completing the form, remove the last copy (blue) and retain it for your records. Do not separate the first two copies (brown and green), and do not remove the carbon paper between these two copies. By regulation, we can only accept forms where the brown and green copies are NOT separated and carbons are intact.

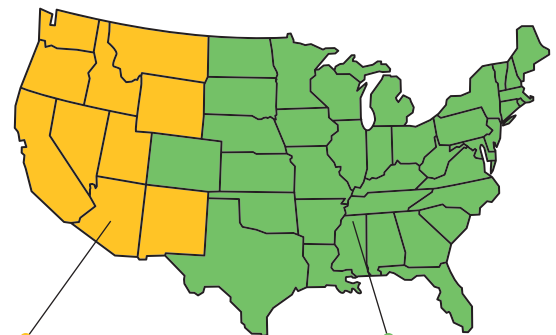

Please mail your completed Form 222 to the Bound Tree Medical address you used as the supplier information [see map to determine servicing Bound Tree Medical Distribution Center]. We recommend sending your 222 form in a way that can be tracked. The Bound Tree Medical Distribution Center shipping these items must have the original Form 222 (brown and green copies) in its possession prior to shipping your order.

For the most current Controlled Substance Ordering Guidelines, please visit <http://www.boundtree.com/forms.aspx>

BOUND TREE MEDICAL NOW OFFERING ELECTRONIC CLASS II CONTROLLED SUBSTANCE ORDERING

Class II controlled substances can now be ordered through our secure electronic Controlled Substances Ordering System (CSOS) without the supporting paper DEA Form 222!

ABOUT THE CSOS PROGRAM

CSOS was developed by the DEA for the electronic transmission of Class II controlled substances orders. It is the only allowance for electronic ordering of Class II controlled substances.

Using the DEA's CSOS program to order Class II controlled substances provides you with the following benefits:

- Significant reduction in the number of ordering errors
- Ability to include more line items on a single order
- Faster transaction times
- Lower costs due to order accuracy and decreased paperwork

GETTING STARTED

The DEA's CSOS program requires that each individual purchaser enroll with the DEA to acquire a CSOS digital certificate before placing an electronic order for Class II Controlled Substances. Each digital certificate contains identification information specific to each individual subscriber and his/her associated DEA registration.

PLACING YOUR FIRST e222 ORDER

Once you have successfully installed the CSOS digital certificate on your computer, please contact Customer Service to enroll in the Bound Tree e222 program. After receiving your login information from Customer Service, you may start ordering Class II Controlled Substances from Bound Tree Medical's secure electronic Controlled Substances Ordering System (e222.boundtree.com).

For more information contact your Bound Tree Account Manager or get started today at www.boundtree.com/csos.aspx.

IMPORTANT ORDERING INFORMATION

ORDERING

Order by phone, fax, mail or online. Contact us to get more information on the products that we carry, delivery times and current pricing.

Bound Tree Medical Customer Service:

Mon-Fri, 8:00am - 8:00pm (EST)

Toll Free: 800-533-0523

Order by Fax: 800-257-5713

STANDARD TERMS AND CONDITIONS

- 1. Conditions of Transaction.** By submitting payment for an invoice ("Invoice"), Customer agrees the terms and conditions set forth below shall apply to the products ("Products") to which the Invoice relates and Customer further agrees to be bound by such terms and conditions. Company expressly rejects Customer's purchase order, or any other document or instrument issued by Customer that is not agreed to in writing by Company.
- 2. Contract Documents.** To the extent there is not already an existing contract signed by Customer relating to the sale of the Products reflected in the Invoice, the Invoice and these Standard Terms and Conditions comprise the complete and final agreement between Company and Customer (the "Contract Documents") concerning its subject matter, and supersede all prior negotiations, proposals, representations, commitments, understandings, or agreements between the parties, either written or oral. No other agreement, quotation, or acknowledgment in any way modifying any of the Contract Documents will be binding upon Company unless made in writing and signed by Company's authorized representative. Content on a purchase order submitted by Customer shall be non-binding.
- 3. Compliance with the Law.** Customer agrees that it will comply with all applicable laws, statutes, rules, regulations or orders of the jurisdiction where performance hereunder is carried out, as well as all applicable laws of the United States of America, including but not limited to the U.S. Foreign Corrupt Practices Act.
- 4. Warranty and Limitation of Liability.** New Products purchased as reflected on the Invoice carry only those warranties as offered by the applicable manufacturer. Company offers no additional warranties relating to new Products.

Unless otherwise noted on the Invoice, recertified Products carry the following warranty:

- Three (3) year warranty from the date of the Invoice for parts and labor on automated external defibrillators (AED), excluding Lifepak 500, Philips FR2, Welch Allyn AED 10 and Welch Allyn AED20.
- One (1) year warranty on all other recertified non-AED Products from the date of the Invoice for parts and labor, unless otherwise noted on the Invoice.

There will be no charge for parts or labor to repair a recertified Product during the warranty period. Replacement parts may, at Company's sole discretion, be new, used, reconditioned or refurbished. In the event Company elects to replace a Product, the replacement unit may, at Company's sole discretion, be new, used, reconditioned or recertified so long as the replacement unit is functionally equivalent as the original recertified Product. Repaired or replaced Products are warranted for the remaining portion of the original recertified Product's warranty period.

Warranties offered by Company do not apply to abuse, accident, acts of God, consumable parts, accessories, improper installation or operation, and/or normal wear and tear or aging.

EXCEPT AS SET FORTH HEREIN, THERE ARE NO OTHER

EXPRESSED OR IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AS IT RELATES TO THE PRODUCTS. COMPANY'S SOLE OBLIGATION AND CUSTOMER'S EXCLUSIVE REMEDY FOR BREACH OF ANY WARRANTY OR FOR ANY BREACH OF THE CONTRACT DOCUMENTS SHALL BE, AT COMPANY'S OPTION, TO REPAIR OR REPLACE THE PRODUCT, OFFER A CREDIT OR OFFER A REFUND.

COMPANY SHALL NOT BE LIABLE FOR ANY OTHER DAMAGES INCLUDING, BUT NOT LIMITED TO, INDIRECT, INCIDENTAL, CONSEQUENTIAL, LOST PROFITS, SPECIAL, PUNITIVE, OR EXEMPLARY DAMAGES REGARDLESS OF THE FORM OF THE ACTION OR THE THEORY OF RECOVERY, EVEN IF THAT PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF THOSE DAMAGES. IN NO EVENT SHALL COMPANY'S LIABILITY FOR ANY CLAIM RELATING TO A PRODUCT PURCHASED BY CUSTOMER EXCEED THE AMOUNT CUSTOMER PAID FOR SUCH PRODUCT.

- 5. Rewards/Free Use Program.** Customer shall be responsible for all regular service and maintenance of any Product placed through the Company's rewards and/or free use program.
- 6. Delivery.** Unless stated otherwise agreed to in writing by Company or specified otherwise on the Invoice, all Products shall be shipped FOB Origin, Freight Pre-Paid and Added to Invoice. Title to Products shall transfer to Customer at the time Products are delivered to the carrier, at which point Customer shall assume the risk of loss to Products. Additional handling charges may apply and will be prepaid and added to the Invoice of all open account and credit card purchases.

For international shipments, Company will only be responsible for clearing Products for export outside of the United States. Customer shall remain responsible for (i) any and all shipping, freight and transportation costs; and (ii) licensing, fees, taxes, duties, assessments, paperwork, clearance of Products for import. Title to Products shall transfer to Customer at the time Products are delivered to the carrier, at which point Customer shall assume the risk of loss to Products.

Orders less than \$150.00 are subject to a \$10.50 small order handling fee. Controlled Substance orders are subject to a handling fee of \$11.95. Refrigerated item orders are subject to a \$14.95 handling fee. Orders subject to multiple handling fees will be charged only one fee, whichever is greatest.

- 7. Payment Terms and Taxes.** Amounts payable under the Invoice are to be remitted by Customer to Company within 30 calendar days after the date of the Invoice, is payable in U.S. dollars. Unless specified otherwise on the face of the Invoice, Customer shall be responsible for all federal, state, and local taxes, including income, excise, use, and sales taxes, and customs and import duties.
- 8. No Assignment.** Customer shall not assign or transfer its rights, delegate or sublet its performance in whole or in part under the Contract Documents, or assign or transfer funds due hereunder, without Company's prior written consent. Any attempted assignment or delegation without prior written consent shall be void and shall constitute a material breach of Contract Documents. The Contract Documents shall be binding upon Customer and its respective successors and permitted assigns.
- 9. Indemnity.** TO THE MAXIMUM EXTENT ALLOWED BY LAW, CUSTOMER SHALL INDEMNIFY, DEFEND AND HOLD HARMLESS COMPANY AND ITS OWNERS, OFFICERS, DIRECTORS, EMPLOYEES AND AGENTS AGAINST ALL LOSS, DAMAGE, LIABILITY, COSTS, AND EXPENSE (INCLUDING REASONABLE ATTORNEYS' FEES, ANY INJURY OR DEATH TO ANY PERSON, OR DAMAGE TO ANY PROPERTY) RESULTING FROM OR IN ANY WAY CONNECTED WITH (I) THE NEGLIGENCE

CONTINUED ON NEXT PAGE

OR WILLFUL ACT, OR OMISSION OF CUSTOMER OR CUSTOMER'S EMPLOYEE, AGENT, OR REPRESENTATIVE; AND (II) CUSTOMER'S USE OF ANY OF THE PRODUCTS. COMPANY SHALL HAVE THE RIGHT BUT NOT THE OBLIGATION, TO CONTROL THE DEFENSE OR SETTLEMENT OF ANY CLAIM OR LAWSUIT COVERED BY CUSTOMERS INDEMNITY HEREUNDER AND, AT COMPANY'S OPTION, CUSTOMER SHALL AT CUSTOMER'S EXPENSE (A) DEFEND ALL ACTIONS BASED THEREON, OR (B) PAY COMPANY ALL ATTORNEYS' FEES AND ALL OTHER COSTS AND EXPENSES ARISING FROM THE DEFENSE AND SETTLEMENT THEREOF BY COMPANY-INDEMNIFIED PARTIES.

10. Governing Law. This Contract Document and the rights and obligations of Company and Customer shall be governed and construed according to the laws of the United States of America and the State of Ohio, without giving effect to its conflict of laws principles. Customer irrevocably agrees that any legal action, suit or proceeding brought by it in any way arising out of this Agreement must be brought solely and exclusively in, and will be subject to the service of process and other applicable procedural rules of, the State or Federal courts in Columbus, Ohio. The United Nations Convention on Contracts for the International Sale of Goods, 1980 as amended, shall not apply to the Contract Documents.

11. EEO Compliance. Customer agrees to comply with all federal, state and local laws respecting discrimination in employment and non-segregation of facilities including, but not limited to, requirements set out at 41 CFR 60 – 1.4. Customer shall abide by the requirements of 41 CFR 60-300.5(a). This regulation prohibits discrimination against qualified veterans, and requires affirmative action by covered prime contractors and subcontractors to employ and advance in employment qualified protected veterans. Customer shall abide by the requirements of 41 CFR 60-741.5(a). This regulation prohibits discrimination against qualified individuals on the basis of disability, and requires affirmative action by covered prime contractors and subcontractors to employ and advance in employment qualified individuals with disabilities.

12. Miscellaneous. No course of dealing between the parties or any waiver of a breach of any provision of the Contract Documents shall constitute a waiver of any other breach of such provision. Should any provision of the Contract Documents be held invalid or unenforceable, the remaining terms will remain in full force and effect, consistent with the terms of the Contract Documents taken as a whole. Each party shall be deemed an Independent Contractor of the other. Neither party shall be deemed an agent of the other. This agreement shall be governed, interpreted and construed in the English language hereof, regardless of any translations that may be made into any other language.

ORDERS AND PLACE OF SALE

We reserve the right to accept or reject any and all orders, regardless of the manner in which the order is made. Orders become valid, and the sale shall be deemed made in Orlando, Hernando County, Florida; Gilbert, Maricopa County, AZ; Dublin, Franklin County, OH; Visalia, Tulare County, CA; Southaven, Desoto County, MS; Clifton Park, Saratoga, New York; and Arlington, Tarrant County, TX (as applicable) subject to the terms set forth herein. No change, modification or revision of your order shall be valid unless agreed to in writing by BoundTree Medical.

Government agencies and municipalities may purchase on open account. All others may apply for open account status by completing a Credit Application. Individuals may purchase by prepaid orders (Money Order), Master Card, VISA, Discover, or American Express. If in our opinion the financial condition of the purchaser at any time does not justify continuance of shipment on the terms of payment specified, we may require full or partial payment in advance.

DELINQUENT PAYMENT

Accounts delinquent over 30 days will be charge at a rate the lesser of (i) 2% per month (or 24% per annum) or (ii) the maximum amount permitted by law. Accounts past due 45 days revert to C.O.D status.

PRODUCT RETURN POLICY

Prior to returning a product, please contact the BoundTree Medical Customer Service Department at 800-533-0523 to obtain a return merchandise authorization (RMA) number. This will help us to expedite your return and allow us to give you the proper credit. Once you have received your RMA number please follow the return policy guidelines.

All pharmaceuticals, items with expiration dates, and items that are subject to FDA tracking requirements are not returnable. BoundTree Medical will only accept returns for pharmaceuticals if it was an error on our part. If so, please contact us within 7 calendar days of receipt of the product to obtain an RMA number. Items received without an RMA or after 15 calendar days will not receive credit.

If BoundTree Medical makes an error in fulfilling or shipping your order, we will promptly rectify the mistake at no cost to you. If we have made an error and you wish to return the product(s) to us, notification must be received within 15 days of invoice.

Following the initial error notification, please follow the return policy guidelines:

Non-returnable Items Include:

1. Items that are special order items.
2. Items that are buy-to-order (BTO) items.
3. Items that have been marked or engraved.
4. Items returned with broken packaging, not in original packaging or otherwise not in resalable condition
5. Customized items, any sterile product that has been opened or items determined by BoundTree Medical not to be in resalable condition.
6. Product that is more than 60 days older than the invoice date.
7. Recertified Equipment

Return Policy Guidelines:

1. Items returned within 30 days of the invoice date will not be subject to a restocking fee.
2. Items returned 31 – 60 days after the invoice date will be subject to a 15% restocking fee.
3. Items older than 60 days from the invoice date will not be accepted in our warehouse and will be returned to the customer.
4. Please write the RMA number clearly on the package label.
5. Enclose a copy of the original invoice or packing list in the box.
6. Send the package freight prepaid.
7. Returns must be received by BoundTree Medical within 30 days of issuance of RMA number.
8. Items received without a RMA number will not be eligible for credit.

RETURN FOR REPAIRS

Items to be returned for repair must be prepared according to the most recent OSHA requirements. Items must be properly cleaned and verified with a statement on the outside of the package. Proof of purchase must be included with all manufacturer warranty repairs. Please contact our Customer Service Department for additional information. All returns for repairs must be approved in advance by BoundTree Medical.

CLAIMS

Claims for damage occurring in transit must be made upon receipt of goods by customer directly to the carrier if shipment was a collect shipment. Claims for all other types of shipments should be reported to BoundTree Medical Customer Service. Please save all boxes and packing material. All shipment errors must be reported immediately upon receipt to BoundTree Medical Customer Service.

PRICING

The prices shown in this catalog are current at press time. However, because of fluctuating prices, pricing may change at any time without notification. Every effort has been made to insure content in this catalog is correct and up-to-date. BoundTree Medical is not responsible for typographical errors or other labeling errors contained in this catalog.
