## Eisertechnology Cervical Cage

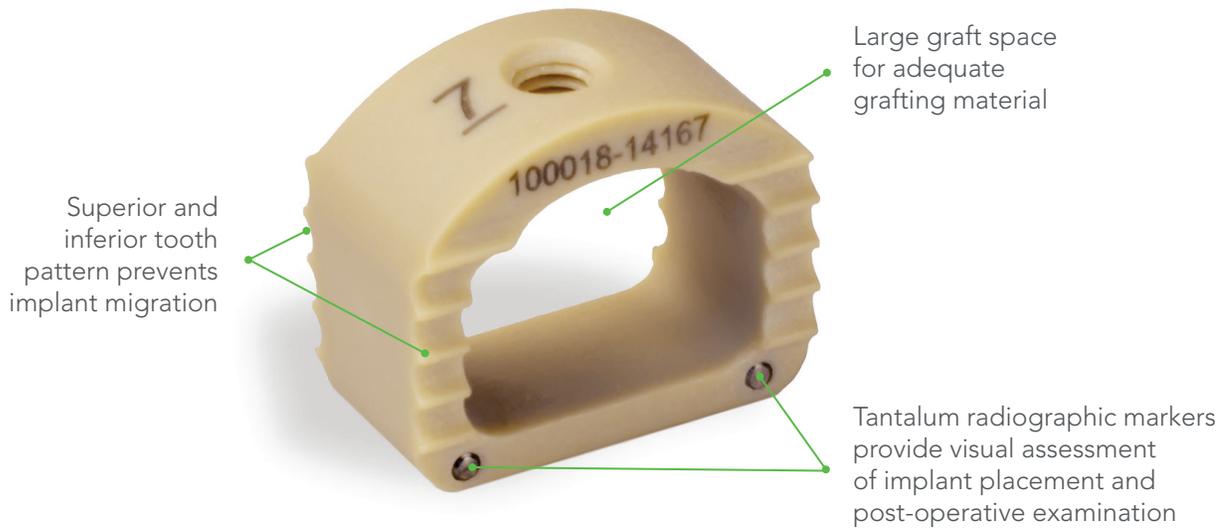

### Polyetheretherketone (PEEK) Cages

The Eisertechnology Cervical Cage is for use in cervical spine fusion surgery. Two footprints are offered standard, 12mm AP x 14mm ML and 14mm AP x 16mm ML. Both footprints are offered in heights of 4, 5, 6, 7, 8, 9 and 10 (additional footprints are available by request).

### What We Offer

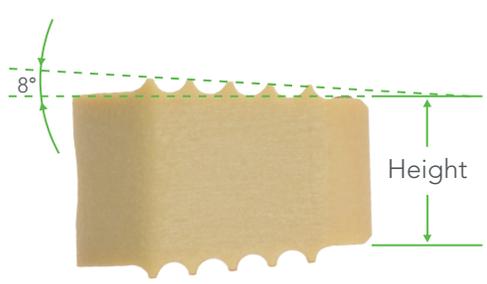

- Made from polyetheretherketone (PEEK)
- Large central graft aperture
- 8 degree lordosis
- Posterior full-height radiographic (tantalum) marker pins
- 2 Footprints available in heights of 4 – 10mm
- Full set of instrumentation including trials and inserters
