TITANIUM

Titanium Cage

The Eisertechnik Titanium Cage has a roughened outer surface, and a large internal cavity for bone graft material. It fits firmly to our standard PLIF/T-PLIF inserter for a known, familiar, repeatable insertion technique.

What We Offer

- Lordotic PLIF Cages
- Non-Lordotic T-PLIF Cages
- Large, open graft pocket
- Secure, repeatable insertion instrument
- Heights from 7 to 14mm in 1mm increments

Rough titanium surface

Familiar, secure tooth pattern

Lordotic cages for maximal contact or
Non-lordotic cages for tapered nose
