# Medi-Paws®

Pets are an integral part of today's family. They are kind, loyal, and always happy to see us. They define who we are. **They trust us to protect their health.**

Our loyal companions develop some of the same illnesses and diseases as their parents. Our nutritional needs have a very similar profile. Proper nutrition plays a key role in our pet's health as much as our own, impacting body, mind, and behavior.

Today's pet parents are seeking natural alternatives to help ensure pawsitive health, which can be aided by giving them **Medi-Paws®** every day as part of their regular diet.

## FREQUENTLY ASKED QUESTIONS

- 1. How do I use Medi-Paws®?**  
For pets up to 9kg./20lbs., give 5ml per day on its own or mixed with food. Increase the daily intake in direct proportion to body weight.
- 2. Are there any side effects with Medi-Paws®?**  
Absolutely not, although we recommend 2.5ml daily on the first 2 days for pets under 3.6kg./8lbs. Medi-Paws® may act as an antitoxin, which may over activate the bowel.
- 3. Will Medi-Paws® interfere with other medications?**  
Absolutely not. Medi-Paws® is a safe and natural food supplement. Most parents decide to reduce or eliminate synthetics within a few months.
- 4. When will I notice an improvement in my pet's health?**  
You know your pet better than anyone. Most parents will notice an overall improvement in their pet's health in as little as 3 days.
- 5. Does Medi-Paws® have THC?**  
THC is toxic to animals. Medi-Paws® contains less than 4 parts per million THC, which is 10,000 times less than what is found in traditional marijuana. Medi-Paws® is perfectly safe.

## NATURE'S PAWSITIVE ALTERNATIVE

# Medi Paws®

100%  
Vegan

We work with the Cannabis Hemp plant, fortified with Nutritional Yeast.

This combination provides a pawsitive punch to ensuring your pet's health.

Cannabis Hemp Seed Oil contains the complete Omega cluster 3, 6 and 9, Plant Sterols and Sterolins with 4 times the GLA that is found in Evening Primrose.

Nutritional Yeast is high in protein, contains the complete B-Complex vitamins, and is rich in folic acid.

# PETS ARE PEOPLE TOO!®

### WHAT DOES ALL THIS MEAN?

Many commercial pet foods are low in fat content and especially in healthy fats such as Omega 3 & Omega 6 found in **Medi-Paws®**.

EFA's which originate from dietary Omega 6 fatty acids (linoleic) and Omega 3 (linolenic) CANNOT be converted in the canine/feline system and must be supplemented.

Nutritional Yeast with its complete B-Complex vitamins including folic acid, may assist in antibody formations, digestion, itching and a healthy nervous system.
