

## Do you have problems with poor fitting dentures or are you unhappy with their appearance?

Are you struggling with unstable dentures and looking for a possible solution.

If you are feeling discomfort with your dentures then it's time to see a Denture Expert.

Sometimes, when too much shrinkage occurs in the gums supporting your dentures, the lower jaw can get out of its proper relationship with the upper jaw. This can lead to a number of problems. The facial muscles can virtually collapse, giving the appearance of premature ageing. A carefully designed denture can often improve your appearance and the comfort of the denture.

## Introducing the newest member of our team Peter O'Donnell DipCDT, RCSEng, (GDC 115171)

Peter is our Clinical Dental Technician, he will be holding clinics here at practice, giving our patients the benefits of a denture Expert and their dentist under one roof. Peter is able to not only hand-craft your new dentures, but can do all of the impressions and other steps required. Pete is able to discuss exactly what you want and will work with you at every stage to make and fit your new comfortable, stable and great looking dentures.

This professional service is personal for your individual needs and we at Goodwin and Associates are delighted to offer this excellent service to you.

Bespoke denture Services include:  
Private Exclusive Complete Dentures  
Exclusive Partial Dentures  
Metal framework dentures  
iDentures  
Implant retained dentures

Optional extras include:  
High impact acrylic  
Injection moulded  
Gum contouring and/or tinting

## Implant retained dentures

Dental implants are small titanium posts that replicate the root portion of natural teeth and can be used to stabilise dentures in either the lower or upper jaw.

The denture is then retained by the implants providing you with greater stability, that will look feel and function like natural teeth.

Dental Implants can be provided here at the practice by Andrew Henderson.

Andrew and Peter can work together to create Implant Retained Dentures for you.

## Improved stability without surgery

What is an iDenture?

iDentures are custom made and injection moulded using the latest technology to create to improves the denture fit. Impact resistant denture material and the highest quality teeth are used, with personalised characteristics for more natural looking dentures. Peter uses the Dr Abe Impression for much improved fit.

For more information visit  
[www.iDenture.co.uk](http://www.iDenture.co.uk)

Contact us to book an appointment on 01900 823467.

£50 deposit is required to book your initial 30 minute appointment with Peter. Upon attendance, this will be deducted from denture costs.

New patients to the practice would also require a dentist examination (£40)
