

Dattamza's October newsletter

Are you a small Business or a large enterprise?

It is important that you cater to the priority needs enabled by data management services by overcoming regulatory and organizational challenges. Every organization can trace its roots back to the nascent stages of the Data management Industry while also being a part of data evolution. There are many organizations that stand testimonials to their success in actively governing their data. We are happy to hear from you on your success stories.

Standardizing Data Management and Governance services

A First look into the needs of organizations mostly financial services and health care providers are seeing an increased necessity to manage the data as an Enterprise asset, as regulations and policy around data are quickly evolving.

Standardizing Data Management and Governance Services

A second look into a well-defined Operating Model plays a vital role in achieving expected business benefits. Embarking on a Data Governance journey in an enterprise that spans divisions, geographies, and diverse stakeholders requires a good understanding of how various nuances of Data Management

The need for organizations to establish a data risk strategy

It is always a known but often forgotten fact that risk and value are two sides of the same coin. In most organizations, technology risk management can be in its nascent state of maturity while data risk management within the same function can stand a notch higher.
