## **QUALITY ALERT**

To all Suppliers who perform Special processing on Sikorsky Flight Safety and Rolls-Royce Fixed Process EC parts.

Suppliers who perform special processing on Flight Safety or EC parts which require Frozen Planning or Data Cards shall submit a new or revised fixed process to Senior Aerospace Connecticut prior to implementation. Senior CT. needs to acquire customer approval prior to the release of new or revised plans. The OEM's for these parts require Senior CT. to submit for approval all supplier processes which effect Flight Safety or Critical parts. It is imperative you do not work to the new or revised plan unless approved by Senior and stated on our purchase order. This notice is the result of a special process supplier revising their internal process plan and not communicating the change to us.

Please contact me with any questions or concerns.

**Very truly yours**

**Senior Aerospace Connecticut**
