Elegant Guest Facing Technology Integrations

SmartCon Solutions
Energy Management – Automation – Building Technology

Temperature, Lighting, Voice & Tablet Room Controls

The SmartCon & Premium Products Alliance; bringing together property & performance.

At the foundation of guest facing technology is the optimization of operational efficiency and to compliment the customer experience. SmartCon's collaboration with technology manufactures provide the hospitality industry with a complete solution to occupancy based room control integrations.

SmartCon Solutions is offering the following package based on __number of switches, ___number of thermostats, and a networking system per room.

The estimated cost of Hardware and Software per room would be_____*
based on a 200 room property

Telkonet EcoTouch Thermostat

The EcoTouch+ wireless thermostat with internal occupancy detection offers a flexible energy savings solution with a sleek, ultra-thin and modern design. The EcoTouch+ offers complete freedom to install anywhere. And when room renovations dictate relocation, moving the thermostat only takes a few minutes.

Control4 Multi-Button Light Switch

Can include 1-6 LED backlit engraved buttons in various combinations. The bottom button can also include up and down volume arrows. Four different button sizes allow for a total of 38 possible configurations. Mix-and-match engraved buttons and sleek, screwless faceplates with nine stylish colors and gloss and satin finishes.

Control4 Privacy/Service Switch

Backlit button engraving with programmable color control for easy readability regardless of time of day or light level. Programmable RGB LEDs provide status feedback devices in the system. Ambient light sensor automatically adjusts backlight and status LED brightness depending on the light level in the room.

Axxess Exterior Corridor Doorbell & Signage

Custom hotel signage in a wide variety of colors, finishes and styles. On the sign, the LED indicators show whether the room is ready to be cleaned or if the guest wants to avoid disturbance. Additionally, a "Do Not Disturb" status silences the doorbell automatically.
