Workshop 1: Schema Therapy – The Model, Methods & techniques & Working with Complex Presentations including BPD

Date: Mon, Tues & Wed – 9th, 10th & 11th March 2020 (3 days).

Thank you for your reservation to attend this workshop. Whether you are attending as part of one of our certification/accreditation programmes or as a stand-alone workshop we are looking forward to meeting you. This 3-day workshop will help participants gain a good working knowledge of both the Schema Model and Schema Mode Model. It will facilitate clinicians in being able to use Schema Therapy in their clinical practice immediately. Training will focus on the schema therapy essential basics as well as on the application of treatment for BPD and complex cases that require collaborative, compassionate and effective interventions. Participants will learn about underlying schema activation which creates significant emotional and behavioural difficulties and forms negative life patterns, and how to work with schemas and schema modes, which is essential work to facilitate change. It will provide coached role-play practise of experiential exercises (chairwork and imagery) to enhance participants' clinical skills. Video footage and live demonstrations will be used to assist with the learning experience. This workshop provides a strong platform for learning further skills and techniques used in Schema Therapy.

This workshop is suitable for all mental health practitioners with some experience of working with complex cases. No prior knowledge of Schema Therapy is necessary but we would recommend appropriate reading (see the recommended reading list below) in order to get the most out of the workshop.

Learning outcomes and objectives:

Participants will be able to:

- Convey the schema approach to clients.
- Identify and educate the client about their central life problems and unmet core needs.
- Formulate and conceptualise complex cases in terms of schema activation (including coping styles and responses) and schema modes.
- Utilise the Young Schema Questionnaire, Young Parenting Inventory, Young Compensatory Inventory & the Schema Mode Inventory.
- Work meaningfully within the therapeutic relationship during both the assessment and change phases.
- Understand and apply key components of schema therapy such as limited reparenting and empathic confrontation in order to heal schemas.
- Use chairwork and imagery experiential strategies for assessment and change.
- Use mode work to bypass the detached protector mode.
- Use mode work to tackle the Punitive Parent and Demanding Parent modes.
- Use mode work to identify and provide limited reparenting to the vulnerable child mode.
- Know their own schemas and their influence in treatment, as well as ways to respond to one's own schema activation during the therapeutic encounter.

- Understand and utilise cognitive (such as flashcards and diary cards) and behavioural components in effective treatments.
- Apply pattern-breaking techniques.
