

Congressman Paul Ryan is deeply committed to the financial health of the rich

While Ryan's health care plan would dramatically fail to achieve Trump's stated goal of "[insurance for everybody](#)," it would be strikingly successful in redistributing wealth to make the rich even richer.

With one hand the GOP law will squeeze the poor, while with the other hand it will gently massage the rich. Trumpcare includes an extensive set of tax cuts that benefit various groups that do not need or deserve help: medical device manufacturers, tanning salons, pharmaceutical companies, health insurance executives (whose salaries will again be tax-deductible over \$500,000), and the very well-off through the repeal of Obamacare's tax on unearned income for the wealthy (Fortune Magazine 3/9/2017.)

This week there are many opportunities to fight for our right to high quality and affordable health care. Take time to make your voice heard!

Tammy Baldwin and Gwen Moore Hold Town Hall Meeting

Tammy will hold a Town Hall Meeting on Sunday, March 12 at 12:30 pm
