Location / department Reporting to	Sliding Head Department Section Leader	Salary:	dependent on experience
Holiday:	28 Days Inc bank holidays and company shutdowns.		
Hours:	40hrs various shifts Nights & Weekends		

*You may be required to work such additional hours in excess of your normal hours of work as are reasonably necessary for the proper performance of your duties and to meet the needs of the Company's business

Job Purpose

Working for a busy sub contract engineering company, you will be supporting and developing the growing section of our sliding head division, this is a permanent position offering a lot of progression and growth. With an ever-growing number of Stars and Citizen machinery Rotec are looking to expand shifts to become a 24/7 operational advance manufacturing facility.

Key Tasks

- Program and setting 3 Citizen **Sliding Head** machines, C16
- Program and setting 11 STAR machines - SR20, SA12, SV32 Models
Producing components to required tolerances and quality standards, right first time
Finishing components to the highest quality standards
- Identifying and recommending program amendments to improve efficiency and/or quality
Ensure you are compliant with the filling in of the job paperwork with each job, and any other operational documentation.
- Report data as required for operational monitoring and all aspects of production quality to positively affect the right first time performance through the department.
- Positively influence accident prevention, productivity/efficiency improvements, achieving specified quality levels and standards.
- Maintain quality and safety standards by adhering to procedures and regulations.

All applications are to be sent to sales@rotec-ltd.com

Tel: 01386 424 111, Address: Rotec Engineering Ltd, Enterprise Way, Evesham, WR11 1GS

Skills, Experience and Qualifications

- 3 to 5 years demonstrable experience in a similar manufacturing environment.
- Have extensive experience in a Sliding Head machining environment with knowledge of modern technology and up to date manufacturing techniques.
- Demonstrate appropriate measurement, analysis and evaluation methods to accurately identify and document process improvements.
- Able to manufacture precision components from fully understanding engineering drawings in terms of tolerances, surface finish etc.
- Methodical and focused approach to work.
- Focused on quality with high level of attention to detail.
- Able to work well under pressure.
- Very Flexible approach to work.

The business offers excellent career progression for the right candidate alongside attractive benefits. If you are looking for a role with a forward thinking, progressive organisation, this could be ideal for.
