

The Rules of Rope

as told to wade by his father

1. Rope is a tool, treat it like one.
2. Never twirl or snap a rope at anyone.
3. Never tie a rope around any part of your body, or anyone else's body.
4. Never fall asleep with a rope.
5. Try not to step on a rope.
6. Don't leave a rope laying on the ground.
7. When you are done with a rope, untie all the knots you have tied in it, and coil it up.
8. Remember; if you try to climb a rope with only your hands, it won't work, and you will really get hurt.
9. Always have 20 feet of rope handy, especially on a hike.
