

Economic Superposition II.

Prepared By: Quantum Corp.

Early this morning Jamie Gorelick was given the Company's previous guidance, Middle Eastern Union, Middle Eastern Union II., and Economic Superposition. Jared Kushner cheating on his wife with Hope Hicks, having his family security clearance downgraded, Hope Hicks resigning, and the Trump Administration trading favors to the value media in exchange to cover up the situation is a critical error. Jared Kushner's

conduct comes against the backdrop of a gift wrapped \$65Billion dollar per year energy solution on the West bank wall in reapplication to the Quantum Trump border wall. The solar initiative on the West bank wall, in parallel with the formation of the Middle Eastern Union, is the best solution put forward to begin to end the conflict between Israel and Palestine in Seventy years. However, instead of executing on the solution Jared Kushner engaged in an extra marital affair with Hope Hicks squandering away the opportunity. As stated previously on February 20, 2018, "Most notably, Jared Kushner has been reluctant to execute the Quantum - Trump border wall's reapplication to the West bank border wall, which has been redirected with the indictment of Thirteen Russian entities accused of interfering in the 2016 Presidential election at the exact time Prime Minister Netanyahu was being threatened with indictment., etc..." In this instance, I prove that Mueller was colluding with Gorelick to redirect and stall the exposure of Jared Kushner's extramarital affairs with Hope Hicks through value Edward Snowden Pulitzer indictments. For Mueller, the law isn't so much about facts and criminality in real time, its about how to tail people for decades on value FISA scams, and then bring a case when someones expensive shallow mirror they were given as a child is about to crack. That is about the time Warren Buffett usually chimes in from the Biltmore Estate with, "If a cop follows you for 500 miles,

you're going to get a ticket," moving to maximize value leverage from his previous Government shutdown so what little integrity the Presidential Administration had left is completely compromised at year two. The only flaw in the logic behind the leverage the value media wishes to create is that Jared Kushner cheating on Ivanka isn't an

information asymmetry if everyone knows. Moving on, at this point a rival Country with grievances against the U.S. only need to prod at the gaping extra marital wound to further its cause effectively. As mentioned above, this is not just a critical error, its the end of any effective diplomatic negotiations most notably compromising the legitimacy of U.S. interests in Middle East. From a U.S. military prospective this has a variety of stormy implications, but on a magnitude several orders higher that stresses the conditions for nation building, and stability. For those less familiar with the federal nuance of the criminality in question, instead of plainly stating what the facts of the matter are regarding Jared Kushner's extra marital affair, the Presidential Administration creates an alternative set of facts colluding with Mueller as stated above. In this instance, Hope Hicks at a House Intelligence Committee is perceived to have told the Committee the truth that she lied for the President in a matter unrelated to Jared Kushner. Then the President fired her. However, Hope Hicks told the House Intelligence Committee a lie about covering up for the President, when in reality she had an affair with Jared Kushner. Then since the value media already knows what the reality of the situation is through cell phone hacking, and other means leverages this information for concessions compromising the integrity of the Presidency. I can personally speak to these types of value legal scams and gimmicks because for Seven years I have defeated all of them. In this instance, the criminality, which has been brought to the attention of Southern District Attorney Kim,

has been going on for quite sometime now with debt piling up. This deteriorating strategy is reflected in the panic ridden posture of it not being enough that Hope Hicks lied about her affair. The President from out of no where comes out with a new tax on steel and aluminum to further redirect the reality of the situation, which fails. Any reasonable member

of the jury public they should be able to draw similar conclusions especially with the help of outlining the major aspects of the criminality as I have. I speak for myself, and the Company when I say that we have acted in good faith at every opportunity possible to work with the Presidential Administration. We outlined how to turn a \$30 billion dollar border wall solution right side up \$261B in its first year of operation, we outlined its reapplication in Israel, Palestine, Saudi Arabia, Yemen, and Oman. However, the Presidential Administration decided to take value handouts and bribes shutting the government down to raise campaign contributions. In all honesty, if Jared was given the opportunity to execute on the West bank solar initiative, and Warren wasn't allowed to shut the government down none of this probably would have transpired, but this is now the reality because the pattern and practice of criminality. Finally, what's ironic is that I was taking the train out East to visit family, in deep thought as I usually am with about Thirty Thousand people's lives and reputations on the line if not more, and I believe it was with the inception of Middle Eastern Union II. that I decided that I would give Jared the solution as a gift, just so he could have the savior of Israel narrative everyone would like to see. It was strange because that day the train stopped for about 15 min. I vividly remember a passenger getting off the train to smoke a menthol cigarette, I stepped off the train on the opposite side, and asked the conductor what had happened, and he told me that someone committed suicide at the Hicksville station.
