

Travail[™]

Intra Uterine Insemination Kit

MEDICAL
INTERVENTIONS

Inspired by INNOVATION & TECHNOLOGY

Thermo-Stable preparation

Septa technology for
Sterile application

Simplified Sperm Preparation
without Lab

× No cold chain required

× No LAB required

✓ 37°C required

ADVANTAGES

Higher Success rates

Stable pH of 7.4

No negative effects of
antibiotics on endometrium after insemination

High sperm survival rates in-vivo

Parameters	Conventional IUI	TRAVAIL
Segregation of High Quality motile Spermatozoa	+	+++
ROS generation from centrifugation	↑↑	n/a
Negative effects of antibiotics on endometrium	↑↑	n/a
pH fluctuations	↑↑	n/a
Chances of contamination	↑↑	n/a
Selective Swim-up	x	+++
Positive pregnancy rates	++	+++

IUTPI

INTRAUTERINE TUBO PERITONEAL INSEMINATION

In-Vivo Fertilisation (IVF) Technique

Improved Success rates

No dependency on laboratory
