## Giant Pumpkin Growing Tips:

- 🍂 Plant your Atlantic Giant Pumpkin (*Cucurbita maxima*) seed in late Spring.
- 🍂 Your pumpkin patch should be well drained, spacious and sunny but well protected. The ground should be prepared and turned with manure or other types of food to give nourishment and compost.
- 🍂 Be sure to fertilise and water regularly – but don't over water as it may rot. Your pumpkin has a lot of growing to do, so fertilise weekly with liquid manure or liquid compost.
- 🍂 Once established, prune back your vine to one fruit.
- 🍂 A giant pumpkin takes approximately five months to grow – about 70-90 days before fruit appears on the vine and another 60 days or so for the fruit to mature.
- 🍂 The fruit matures in Autumn – just in time for the Caves Country Show!!
