

Replacement of light globes / fluorescent tubes

When buying replacement globes, it is recommended you take the old one with you, as there are similar on the market that may not work, although they fit.

Fluorescent tube under the bathroom cabinet

LED replacement from John R Turk Electrical in Alexandria, model: 'SL9706/1440/FP Linkable LED Linear fitting'. It has the same end plug connection so no need to change the wiring. It fits the existing clips (just). 3000k warm light which is little brighter than the original fitting, but it still looks the part. \$35.00

Mitre 10 on King St may have stock, Bunnings does not as at 2017.

For the warm yellow look: select light temperature of 3000K

Suggested technique:

- Start at one end and make sure the plastic cover is going over the metal lip
- Helps if you have two people and one person works their way to the centre, then the next person works from the centre out to the other end
- Making sure bulb was properly twisted back into place rather than simply just slotting it into the holder.

Troubleshooting if the tube is not the issue:

Check on/off switch

Check tube is clicked in all the way - it clicks in and then turns about 90 degrees or so it is a little difficult to situate correctly.

It may not be the bulb, but the starter:

- When you take the tube out the starter is the round knob that is sitting out a few millimetres from the flat metal base fitting towards one end
- To remove the starter, rotate it about half a turn anticlockwise - it should drop out

Bathroom Overhead Light

LED lights should last at least 3 years

Could be either the transformer or the LED light itself

Be care full of the spring as it can either damage the plaster board or hit your fingers!

- Pull the fitting from the white circular ring which is flush on the ceiling
- If you pull on the black cable, slowly you will find it just plugs into a power point socket .

Balcony Light

You will need a tiny Allen Key – if you do not have one or do not wish to purchase, ask on FaceBook, a neighbour will loan it to you

Once you have unscrewed the small screw with an Allen Key, you need to give it a bit of a pull as the fit is close.
