

# Alan Jones - The Enigmatist

**TOTAL SENSORY PERCEPTION** is about being aware of the subtleties of communication, applying aspects of psychology and suggestion whilst being open to intuition and information presented from what may appear to be non-normal sources. In essence perhaps one way of describing apparent 'psychic' abilities.

**Total Sensory Perception**

## Mind Reading?

The Human Mind is such an amazing things and for anyone to claim they 'know' what another is thinking is perhaps somewhat of a redundant cliché.

However to be able to appear to capture the thoughts or even 'predict' responses of another human is not only possible, but part of everyday experience.

It is generally accepted in the scientific community that all humans have not on a 6th Sense, but a further 16 sensory capabilities. The old idea of a 6th sense being a 'psychic sense' is perhaps worth reconsidering in the light of these new ideas.

Human sensory systems take information from the 'outside' and 'inside' worlds of the individual. Relevance and meaning is given to these sensory experiences by the mind.

As a Mentalist, Mind Reader and Psychic Entertainer Alan makes use of this understanding to present some amazing demonstrations of Suggestion, Intuition and Mind to Mind Communication.
