pHformula Skin Resurfacing

pHformula is the first pharma-cosmeceutical skin resurfacing line, which is the result of an innovative alliance between cosmeceuticals and medical prescriptions.

All skin resurfacing treatment developments are based on the latest technology in regenerative medicine, and are unlike anything else that's been introduced to the professional skincare market, giving the ideal opportunity to the skin care professional in achieving the best possible results.

Microblading

Microblading is a form of tattoo where pigment is implanted under the skin with a manual handheld tool instead of a machine. The therapist draws hair like strokes to mimic your natural eyebrow hair.

Touch up should be done after 6 – 7 weeks.
