Philly Tutors Gaming Club < NEW!! Bache Martin Afterschool Club (K - 8th Grade | Fridays 3:00-4:15 pm)

Philly Tutors Gaming Club uses modern board and card games to teach students numerous academic and life skills! The games are mostly “Eurogames,” which are tabletop games that stress player interaction, emphasize strategy, downplay luck and conflict, lean towards economic rather than military themes, and usually keep all the players in the game until it ends.

Some of these games are cooperative, meaning the students are playing together against the game rather than each other. This allows students of different ages and skill levels to play together as a team, building communication and group strategizing.

We also offer the **NBA Math Hoops** program. NBA Math Hoops is a fast-paced basketball board game, curriculum, and community program that allows students to learn fundamental math skills through direct engagement with the real statistics of their favorite NBA and WNBA players. With an appreciation and understanding of math, students will become passionate, self-directed learners, and they will have the capacity to control their personal and educational narratives. They will have a better chance of graduating from high school, attending college, and ultimately pursuing meaningful careers in Science, Technology, Engineering, and Mathematics. We create Math Champions, one game at a time.

The gaming program will be held on **Fridays, Oct. 6 through Dec. 22**

Cost of the 10-week session is \$80. Payment options include cash, check (made out to Philly Tutors), and Paypal (fees apply).

*10-week session begins **Friday, Oct. 6. REGISTER NOW to save a slot!** (rolling admission, fees will be prorated.)*
