Changing The Way The World **Cleans**

The **lotus® PRO High Capacity cleaning system** turns ordinary tap water into **Stabilized Aqueous Ozone (SAO)**, nature's most powerful cleaner. SAO is a highly effective cleaning agent that breaks down dirt, grease and other contaminants, safely replacing traditional chemical cleaners, deodorizers and sanitizers.

With the lotus® PRO technology, SAO is created when introducing an extra oxygen atom to an oxygen molecule and water molecules. This combination creates a highly effective cleaning agent that breaks down dirt, grease, and other contaminants safely replacing traditional chemical cleaners and pathogen-reducing sanitizer which also provides **no harm to the body if ingested or consumed**.

3 SIMPLES STEPS

STEP 1

Inside the lotus® unit, oxygen from the air is safely turned into ozone then infused into ordinary tap water.

STEP 2

Ozone is attracted to germs, soils and bacteria and quickly eliminates contaminants it comes in contact with.

STEP 3

The lotus® PRO system works for hours, after which point it converts back into water and oxygen.
