

Energy Efficiency Solutions With No-Upfront Capital

Retrofit for Efficiency and Stability

For most businesses, energy is one of the top five expenses affecting bottom lines. It can be challenging however to effectively manage usage, identify the right efficiency upgrades, *and* find the best payment structure for executing projects in a way that will help your business achieve its energy goals. That's why Constellation created Efficiency Made Easy® (EME)—a solution that can play an integral role in achieving your strategic financial and environmental goals.

As you think about your electricity or natural gas supply requirements, imagine reducing your total energy budget and usage at the same time through high-impact energy conservation measures. With EME, our team of experts will identify and retrofit for efficiency measures.

This unique award-winning solution provides an opportunity to pay for these conservation measures—with no upfront capital—through monthly charges that appear on your competitive power or gas supply bill from Constellation. You can realize cost savings through a reduction in consumption and an improved load profile, which will positively impact future energy costs and the ability to meet environmental goals over time.

Efficiency Made Easy is recognized for its comprehensive approach to demand-side management—giving customers the ability to fund energy conservation measures in support of organizational and environmental goals.

Primary Efficiency Measures

- Lighting Improvements
- Electric Motors and Drives
- Water & Sewer Conservation
- Building Automation & Energy Management Control Systems

Energy (Power and Gas) Spend
Purchasing Your Energy Supply

Efficiency Measures
Building High Impact Efficiency Into
Energy Supply Contracts

**No Upfront
Capital Required**

Included in Your Constellation
Power or Gas Supply Bill

**Energy Spend

Reduced Energy
Consumption

Program Benefits

- **No up-front capital required**, flexible 36- to 60-month contract terms—preserve your capital budget while reducing your carbon footprint with lower usage
- **Included in your electricity or natural gas bill**—the cost of efficiency upgrades will appear as a separate line item on your energy bill
- **Cost savings through reduced energy consumption**—load profile improvements become effective immediately upon installation of efficiency measures
- **Ability to install energy solutions today, but delay EME payments** up to 24-months—if a customer is currently under contract with another competitive power or gas supplier
- **Stay on the cutting edge of energy and efficiency**—by taking advantage of Constellation Technology Venture's portfolio company product offerings, from advanced electric vehicle charging stations by ChargePoint to state-of-the-art HVAC cycling tech and more

Products to Help You Buy, Manage and Use Your Energy

Electricity

- Fixed Price Solutions
- Secured Solutions
- Flexible Index Solutions
- Block Solutions
- Peak Load Management
- Minimize Volatile Pricing (MVPe) Program
- Information to Implementation (i2i)
- Transparency Product

Natural Gas

- SmartPortfolio Program
- Minimize Volatile Pricing (MVP) Program
- EnerPro/Energy Manager
- Fixed Price
- Fixed Basis
- Index

CPower Load Response

- Automated Load Control
- Demand Response
- Ancillary Services
- Economic Programs

Renewable Energy

- Solar
- Renewable Energy Certificates (RECs)
- Generation Development

Energy Efficiency

- HVAC Infrastructure
- Building Automation & Analytics
- Lighting & Controls
- Water Conservation
- Retro-Commissioning
- Measurement & Verification (M&V) Services
- Efficiency Made Easy

Onsite Generation

- Solar Solutions
- Fuel Cells
- Batteries & Storage
- Back-up/Emergency Generation
- Cogeneration
- District Energy Systems & Operations

CNG Fueling

- Private & Public Access Commercial Stations
- Commercial Contracts
