

RP161 Project presents:

Soil & Nutrient Management Workshop

Better understand your soil & nutrient dynamics for improved yield & profitability

When:

Wednesday 18th March

9am – 3 pm

Lunch provided

Location:

Eton Rural Fire Shed

Barrier St, Eton

**Bring a hat and sun
smart clothing**

Topics include:

- Soil pit investigation
- How much nutrient does the sugarcane plant uptake?
- Economics and options to reduce fertiliser costs
- Impact of timing, placement, irrigation, Enhanced Efficiency Fertilisers
- Nitrogen cycle and budgeting
- Potential loss pathways for nutrients

Guest presenter Dr Phil Moody soil scientist

Bring some soil from your farm – collect 500 grams of topsoil (0-20cm deep) and the same amount of subsoil (40-60cm deep). Make sure to store separately

RSVP BY 13th March
