# Presentation Information

---

Charles D. Schlesinger DDS, FICOI

**Are you needed that extra bit of confidence to treat your patients?  
Implants and grafting can become a predictable part of your practice...  
You can build practice performance and elevate your patient care...**

---

Dr. Charles Schlesinger, DDS, FICOI is a dental implant educator who has been lecturing internationally throughout the United States, Canada, China, Saudi Arabia and the UK for the past 9 years. He graduated with honors from The Ohio State College of Dentistry in 1996. After graduation, he completed a General Practice residency at the VAMC San Diego and then went on to become the Chief Resident at the VAMC W. Los Angeles. During his time in Los Angeles, he completed extensive training in oral surgery, implantology and advanced restorative treatment.

Once he completed his residency, Dr. Schlesinger maintained a thriving restorative and implant practice in San Diego, CA for 14 years. In 2012 he relocated to Albuquerque, NM to become the Director of Education and Clinical Affairs for OCO Biomedical. In 2013 he took over as Chief Operating Officer of OCO Biomedical along with his clinical responsibilities. He continued to provide patient care along with his educational and R&D responsibilities. In 2016 Dr. Schlesinger started his own consulting and educational service.

Dr. Schlesinger has provided over 4000hrs of implant related CE since 2005. He lectured for Camlog Biotechnologies, Dentatus USA and ACE Surgical, Implant Practice Solutions, The Perio Institute and OCO Biomedical. His courses range from basic implantology through advanced restorative, implantology and cadaver based grafting courses.

Choose from Dr. Schlesinger's most requested programs below, or contact our office to customize a presentation for your group.

## Full Day Courses

**Implantology 1.0**

**Implantology 2.0**

**Advanced Grafting and Implant Techniques**

## 1hr to 1/2 Day Courses

**Incorporating Dental Implants  
Into Your practice**

**Immediate Loading of Dental Implants**

# Implantology 1.0

Dental implants have become a mainstream part of every dental practice. Are you still referral all your cases out? Imagine the difference it could make to you, your practice and your patients if you learned to place your own dental implants.

**Implantology 1.0** will show you what you need to now in order to diagnose, treatment plan and place you own dental implants with precision and predictability.

## Participants will learn:

- Understand the need for implants
- Diagnosing and treatment planning for success
- Medical history considerations
- Introduction to dental implant surgical protocol
- How to incorporate implants into their own practice

Full Day Lecture/Workshop  
or Half Day Lecture

# Implantology 2.0

You have taken an implant course, but was not quite ready to jump in. Maybe, you are already placing implants, but just not fully comfortable immediate placement protocols.

**Implantology 2.0** will review the concepts of **Implant 1.0** and move beyond. Immediate placement of dental implants, sinus bumping and elevation along with restorative considerations will be covered in this fast paced course.

## Participants will learn:

- Review of basic implantology
- Treatment planning for immediate placement
- Surgical considerations and protocols for immediate placement
- Crestal approach sinus elevation
- Restorative protocols for success

Full Day Lecture/Workshop  
or Half Day Lecture

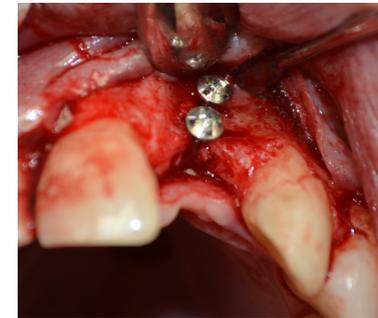

# Advanced Grafting & Implant Techniques

60% of implant patients require some kind of grafting either for site development or at the time of implant placement. Learn some of the techniques available to enhance bone volume to make implant placement more predictable.

**Advanced Grafting and Implant Placement** will cover concepts from socket preservation to ridge augmentation. Grafting along with implant placement, Sinus elevation and increasing both height and width of the alveolus will be discussed.

## Participants will learn:

- The biology behind bone regeneration
- Become familiar with various types of grafting materials
- Sinus elevation (crestal and lateral approach)
- Ridge augmentation
- Grafting with implant placement

Full or Half Day Lectures Available

# Incorporating Dental Implants Into Your Practice

Dental implants are the standard of care when it comes to the replacement of missing teeth. With the advances in implant technology, they are more predictable than ever before.

**Incorporating Dental Implants Into Your Practice** is a fast paced overview of the world of dental implants. It will demystify what the treatment is, and what is involved from start to finish. This course is designed for the doctor and staff that are beginning their journey into this treatment modality.

## Participants will learn:

- Who is a good candidate for dental implants
- Factors that will determine treatment
- Understand the different implants and abutments on the market
- Understand the various restorations available
- Learn the steps to successfully bring implants into your practice

1 hr to Half Day Lectures Available

# Immediate Loading Of Dental Implants

In today's world of immediate satisfaction, your patients want their implants and their restoration now; not in 4 months and not even tomorrow...

**Immediate Loading Of Dental Implants** takes an in-depth look at the science and technology that makes immediately loading a predictable reality. The physics behind the forces that implants take can drastically affect the success of an overall treatment plan.

## Participants will learn:

- Who is a good candidate immediately loaded dental implants
- Factors that can and will affect the outcome of treatment
- Understand the forces applied to an implant system
- Identify high risk patients
- Understand immediate, early and delayed loading protocols

1 hr to Half Day Lectures Available

# Lecture Experience

Dr. Schlesinger draws upon more than 20 years of experience in the private practice and corporate settings to bring the latest and most relevant information to his students. Since 2006 he has lectured over 4000hrs to audiences throughout the United States, Canada, the UK, China and Saudi Arabia

## Partial Listing of Meetings

Camlog USA Symposium

Yankee Dental Conference (Multiple times))

The Dentistry Show Birmingham, England (Multiple times)

AGD National Meeting

5<sup>th</sup> Military Dental School Xi'an, China

Greater New York Dental Meeting (Multiple Times)

AAID National Meeting

Southwest Dental Conference

ICOI National Meeting

3C Corp Dental Meeting Ryad and Jeddah, Saudi Arabia

# Testimonials

"I have known Dr. Charles Schlesinger, superb dental clinician and gifted dental implants instructor, since I attended his first lecture about seven years ago in El Paso, Texas. After listening to him, taking notes and reading his handouts on the fundamentals of bone biology and dental implant placement, I was convinced that I would enrich my general dentistry practice by adding dental implants to my repertoire of dental procedures.

That decision required some daring and challenges to my surgical skills, especially in mastering the bone grafting techniques. I am happy to have made that decision and have not looked back since, especially since I have had the telephone and e-mail availability of Chuck to answer my questions whenever I encountered speed bumps and/or roadblocks. He has always been there to guide me and for that I shall always be grateful.

Now, I consider him a colleague and friend on whom I can rely for advice. I recommend Chuck's sage counseling and advice for any dental doctor contemplating implants as an added procedure to his/her practice. With Dr. Schlesinger's expertise to back you up, there is no way you can go wrong. So go for it. I recommend him very highly."

J.A. Tony Marquez, DDS, PhD  
El Paso, TX

"If you are like me and looking to grow your practice and become the sought after implant dentist in your community or if you just want to provide exceptional implant dentistry to your existing patients you will want to know Dr. Schlesinger. Over the past few years I've followed Dr. Schlesinger around the country attending his courses and developing a professional and personal relationship with him. During this time my skills and confidence have increased to the point where I now find myself able to help and mentor other doctors through complicated implant procedures. Thank you Dr Schlesinger for being a mentor and sharing your knowledge."

B. Gates, DDS  
McKinney, TX

"Dr. Schlesinger's implant course was some of my first exposure on placing dental implants. His knowledge gave me the confidence to start placing implants on simple cases Monday morning.

Thank you Dr. Schlesinger for the knowledge, confidence and support."

Coty Shores, DDS  
Duncan, OK
