Understanding Year-End Points

This page will help you to understand how Points are calculated for the Club's Year-End Standings. First, you need to understand that the Points are made based on cows penned and not money won. It is a consistency system based on the Average (AVG); meaning that cows were penned on both Goes of a team.

- Points are awarded on AVG Points,
- + No.# of cows penned,
- + Fast-Times (FT) Points awarded.

Average Points: Are figured by the Total Number of teams in each Class.

- Example: 38 teams in the Class, so we start with 38 Points.
- The winning team will get AVG 38 Points + No.# of cows penned + Any FT,
- 2nd Place team will get AVG 37 Points,
- 3rd Place team will get AVG 36 Points,
- And we continue down until the last team in the "Average".
- If you don't pen in the AVG, you only get the No.# of cows penned + any FT Points.

Fast-Time (FT) Points: We take the total number of teams and round up after 5.

- Example: 38 = 4 Pts for 1st fastest team, 3 Pts for 2nd fastest team and so on.
- 53 teams = 5 Pts for 1st fastest team, 4 Pts for 2nd fastest team and so on.
- We repeat the Fast-Time Points on the 2nd Go.

See example below:
