

The Center for Animal Health & Welfare

Finding Forever Homes for Homeless Animals

Veterinary Technician

- Knowledge of basic veterinary practices, procedures and terminology.
- Ability to appropriately handle animals and perform routine veterinary medical procedures (i.e. collect samples, draw blood, administer vaccines, administering microchips, slide preparation, etc.).
- Assist veterinarians during surgical procedures.
- Administer intravenous fluid therapy, monitor vital signs and oxygen saturation.
- Clean and straighten exam rooms, treatment and lab areas. Restock exam rooms with supplies as needed. Assist other staff members to keep the public areas of the practice clean and well maintained.
- Clean and maintain all medical equipment as required.
- Accurately dispense prescription medications. Prepare prescription labels and appropriately package medications.
- Document controlled drugs in the appropriate log anytime a controlled drug is used.
- Ensure that medications are added to the patient's record.
- Perform routine suture removals, nail trims, and weight checks. Apply bandages and splints.
- Sterilize instruments.
- Prep patients for procedures.
- Give injections as directed - intravenous, intramuscular and subcutaneous.
- Examine patients for fleas, skin problems, and other obvious problems.
- Accurately perform routine in-house laboratory procedures. Appropriately prepare and handle specimens.
- Prepare specimens for outside laboratory.
- Assist veterinarians as needed.

Veterinary Technician Certification preferred for this position, however, a candidate with at least 2 years experience will be considered in lieu of a degree.
